TEN university journalism teachers have been selected for the 1952 radio internship program of the Council on Radio-Television Journalism, according to Basket Mosse, Northwestern U., council chairman. They will serve in selected radio-TV station newsrooms during the summer vacation period. Robert K. Richards, NARTB public affairs director and council secretary-treasurer, said the program will give teachers practical newsroom experience and better prepare them to train students for broadcast service. The interns contribute their services on an "average fee" basis. NARTB supports the council financially.

The interns are Paul Deutschmann, U. of Oregon; Milo Ryan, U. of Washington; Alan Scott, U. of Texas; Calder M. Pickett, U. of Kansas; Paul Krakowski, U. of West Virginia; Oliver R. Smith, Brigham Young U.; Russell N. Baird, Bowling Green State U.; Richard F. Crandell, Columbia U.; Dr. Marvin Rosenberg, U. of California; William Carmody, Colorado A&M.

WOV Revenue Up

REVENUE totals are higher at WOV New York. General Manager Ralph N. Weil reports the month of March the most lucrative in the station's entire history and totals for the entire first quarter of 1952 surpassing those of 1951 by 21%. WOV, which specializes in foreign language broadcasts, notes its station "formula." That formula, according to Mr. Weil, is: "Thorough merchandising with specialized programming for specialized audiences and . . . scorning . . . rate-cutting practices."

KLZ—30 YEARS OF SERVICE

LIEUT. GEN. HENRY L. LARSEN
Director of Civil Defense
State of Colorado

"...KLZ does a front line job for Civil Defense!"

Lieutenant General Henry L. Larsen, director of Civil Defense for the State of Colorado, says, "KLZ does a front-line job for Civil Defense"... high compliment indeed from this able, combat veteran General of the U.S. Marines. (Ret.)

KLZ contributes time, personnel and facilities in support of the important Civil Defense program in Colorado and works in close cooperation with both City and State Civil Defense offices. Such activity is typical of the comprehensive public service efforts of KLZ, Pioneer Broadcasting Station of the West.

DENVER'S NO. 1 STATION

REPRESENTED NATIONALLY BY THE KATZ AGENCY

KLBS HOUSTON

Liberty's Key Station

LIBERTY Broadcasting System's key outlet is now located at Houston, operating the former KLEE under new call letters of KLBS. Change was effective April 25 with the station joining the network, Ray A. Lewis, general manager of Trinity Broadcasting Corp., has announced.

Trinity Broadcasting Corp. also owns and operates KLIF Dallas and KELP El Paso. It purchased the former KLEE for a price in excess of $300,000, it was pointed out, with sale and transfer approved by FCC [B•T, March 3, Feb. 4].

Change in call letters, from KLEE to KLBS, marks the proposed moving of Liberty's headquarters from Dallas to Houston. That move should be completed on a working basis in early 1953, Mr. Lewis noted. KLBS operates on 610 kc with 5 kw power and is on the air 24 hours daily. Liberty's co-chairman of the board, B. R. McLendon, is also president of Trinity and owner and operator of the Tri-State Theatre chain of the Southwest. Gordon McLendon, LBS president, is an executive of Trinity.

TOM CAVANAGH, (l), new station manager of KLBS, is greeted by Mr. Lewis (r) with Mr. McLendon adding congratulations.

'POLITICAL' ADS

Humphrey Is Answered

ATTACK on "political" institutional advertising by Sen. Hubert H. Humphrey (D-Minn.) has been opposed formally by the Advertising and Sales Club of Seattle.

The club has adopted a special resolution calling on the state's delegation in Congress to "continue to uphold free speech and a free press by opposing Sen. Humphrey's theories on the function of advertising, which is a necessary tool of business enterprise, and his efforts to hamstring advertising as a medium of free expression of views."

Resolution was proposed by A. F. Moitoret, Seattle manager of Braun & Co. and the club's legislative chairman.

Sen. Humphrey's speech against "political" institutional ads was made in the Senate early last month [B•T, April 7].

d-CON HEARING

FTC Presents Argument

HEARING on a complaint charging the d-Con Co. and United Enterprises Inc., both Chicago, with radio and other advertising misrepresentations was held by the Federal Trade Commission in Washington last Tuesday.

Hearing examiner heard arguments from government attorney Edward F. Downs challenging certain ad claims of the d-Con Co., which manufactures a rodenticide. Mr. Downs introduced radio continuities as exhibits.

Earlier, officers of the d-Con Co. had denied the complaint which labeled the advertisements on radio and in other media as allegedly "false and misleading." The company will present its side at a future hearing.

United Enterprises Inc. was described as a distributor subsidiary of d-Con by its Jerome Ratner, who also revealed that the United Enterprises will be dissolved.

Mr. Downs offered testimony tending to question claims by d-Con, a principal in per inquiry deals [B•T, March 24], that the product has been endorsed by the Public Health Service; that its application prevents reinfestation of premises by rats and mice; that it will destroy all rodents within 15 days; and that it will eliminate all after-odors usually associated with rodenticides.

CONTROLS STAY

Likely Despite Battle On Capitol Hill

BATTLE royal was fomenting on Capitol Hill last week against the backdrop of the steel industry dispute and walkout which threatened long-range repercussions in the nation's military and civilian economy.

Amidst all the shouting in Congress, there still were indications that the Senate and House eventually will vote to extend wage-price controls despite sentiment for their abolition in the wake of the steel dispute. The question was: how long an extension beyond June 30?

Reason for anticipating renewal of the Defense Production Act appeared partly political in nature as both congressional chambers held hearings on economic controls.

The Senate Banking & Currency Committee resumed sessions after executive deliberations which were sidetracked because of the steel issue. The House counterpart unit opened hearings at the same time.

Still at stake, aside from extension of wage and price ceilings, are such issues as: (1) the Capehart cost allowance formula for advertising; (2) Regulation W governing installment purchases of radio-TV sets and other appliances; (3) exemption for broadcasting and other media from price controls.

Consensus was that the last two would remain status quo, providing, of course, the production act is extended. There appears to be no organized fight to preserve the advertising cost provision authored by Sen. Homer Capehart (R-Ind.). Most manufacturers have had the opportunity to apply for higher ceiling prices on the basis of added expenses accrued before July 26, 1951 cutoff date, though they stand to benefit further if this date is extended.

Mixed Reactions

Demands flew thick and fast last week on the economic front. There was mixed reaction in Congress ranging from cries for abolition of controls to one and two-year extensions. The U. S. Chamber of Commerce labeled wage-price controls "superficial and wasteful." Price Stabilizer Ellis Arnall called for a two-year reprieve. Renewal of the act was supported generally by Economic Stabilizer Roger Putnam and Wage Chief Nathan Feinsinger.

Mr. Putnam backed President Truman in reiterating a demand for repeal of the Capehart amendment. The OPS, he said, is under "continuing and heavy pressure to raise ceilings on many commodities in vital areas." Steel industry's request for price boosts, if granted, would set off a wave of price hikes and wage demands in other industries, he added.

Former Defense Mobilizer Charles E. Wilson added his own thoughts. He said the U. S. is in a "grave position" and must get its economy "back on the track." Joining production with defense requirements will take "several years" despite the progress made under his leadership, Mr. Wilson told the Senate Banking Committee.

Side issue of the steel upheaval is the forthcoming probe of the Wage Stabilization Board by the House Labor & Welfare Committee tomorrow (Tuesday). The lower chamber voted unanimously to conduct the investigation because of WSB's handling of the dispute. Proposal is to revamp the board and eliminate its jurisdiction over such disputes. WSB governs wages in the radio-TV and other industries.

PRISON RIOT

Covered by Detroit Outlets

DETROIT radio-TV outlets gave full coverage last week to the 93-hour riot staged by 2,600 convicts in the Jackson, Mich., prison. Viewers and listeners throughout the state, and in some cases throughout the country, were kept abreast of developments through facilities of Detroit stations.

Soon after the mutiny began, WWJ-TV's news producer, Tom Sutton, rushed to the scene and within a few hours films were appearing on regularly scheduled newscasts. WWJ used WIBM Jackson as a relay station for providing direct radio coverage. Programs featured commentary by Bob Leslie, staff announcer, and interviews with prisoners themselves.

Films made by WJBK-TV were picked up for showing on Douglas Edwards' CBS-TV show. Network commended the station on the fine quality of the film cut-ins, WJBK reported.

After the riot ended, WJBK telecast a panel discussion on the causes, possible remedies and probable repercussions of the uprising. Participants included Attorney General Frank Millard and *Detroit Times* reporters Jack Pickering, Al Kaufman and Edward Breslin.

Newscaster Ray Girardin, CKLW Windsor, Ont., aired a taped interview with Earl Ward, riot ringleader, the day after the mutiny began.

Floberg Lauds Radio

ATTEMPTS to pierce the Iron Curtain by radio were described as a "marriage of technical achievements . . . and the message of a free world trying to get through" in a speech by John F. Floberg, Assistant Secretary of the Navy for Air, at an Armed Forces Communications dinner in Philadelphia April 25. He described radar-electronics achievements as a "triumph," and the "failure of one-half of the world to establish any reasonable human communications with the other" as a "tragedy."

Question:

HOW DO DRUGGISTS RESPOND TO "KYW FEATURE DRUGS"?

Answer:

(and we quote)

"ONE OF THE GREATEST MERCHANDISING IDEAS TO COME ALONG"

"Congratulations on the great job you're doing for the independent retail druggist. 'KYW Feature Drugs' is one of the greatest merchandising ideas to come along and should merit the wholehearted support of every selected pharmacy."

That's how one official of a local drug store association feels about this dynamic KYW program. And we can show you many, many other letters in the same vein!

Hal's Their Pal. With every program, Hal Moore wins new support from the local drug trade as he selects and commends another "featured" store. All this brings effective cooperation, including terrific opportunities for in-store promotions, for participating sponsors. For interesting case histories and for availabilities, check KYW or Free & Peters.

ings in the first 21 months of operation, and 11 hours of programming was fed to the network weekly. Mr. Kilian helped develop the popular sell-out *Super Circus*, the name and format of which were based on a "never-sold" radio audition for Super Bubble Gum.

He picked up business know-how to supplement his program creativity in numerous radio jobs, with announcing, production and managing stints scattered among WTOL Toledo, WBCM Bay City, Mich., WIZE Springfield, Ohio and WBBM (CBS) Chicago. He believes all "mass communication media are fumbling along in an effort to do what television does," that other media do it "by a mechanical and chemical process to try and make up for the time-lag." Immediacy, he believes, is television's forte, and it will reach mature fulfillment "when the techniques become less obvious and less cumbersome."

Mr. Kilian is a charter member of the Chicago Television Council, and is a member of the Tavern Club. He lives on the city's far North Side with his wife, the former Laura Dulski of Saginaw, Mich., who was a singer and actress. Their family includes a stepson, Joe, 18, U. of Illinois freshman who plans to attend Pasadena Playhouse; Mike, 12, "a fiddle player who wants to go to West Point," and Warren, 8, "a hambone from the toenails up." All three youngsters have appeared in movies and commercial films, and Warren has been offered several Hollywood contracts—all of which were turned down flatly. Mr. Kilian uses the same approach with his No. 3 son as with professionals—he guides instead of tells, uses psychology instead of a text book on drama.

Allergic to strenuous exercise, he spurns golf, saying "I get enough exercise walking down the hall to the media department."

DISTINGUISHED trio appearing before Rotary Club meeting in Thomson, Ga., are (l to r) Walter J. Brown, president, WORD Spartanburg, S. C.; Harry Wismer, newly-appointed general executive of Thomas S. Lee Enterprises Inc., and Turner Catledge, managing editor, *The New York Times*.

30th ANNIVERSARIES

Trio of Stations Recall Humble Beginnings

KGY Olympia, Wash., WBAP Fort Worth and WDRC Hartford have just celebrated their 30th anniversaries.

KGY marked its 30th birthday anniversary amid ceremonies marked throughout by cooperation of local merchants and listeners.

Olympia merchants contributed $10,000 worth of merchandise prizes which Tom Olsen, president-general manager of KGY, gave away to lucky ticket holders.

The tickets were dropped from atop a fire truck extension ladder in downtown Sylvester Park. Some 6,000 persons participated in this event.

Programwise, ceremonies were highlighted by the appearance of Mr. Olsen with Father Sebastien Ruth, of St. Martin's College, who founded KGY at nearby Lacey in April 1922.

Father Sebastien operated with 5 w, as a one-man staff, coupling the station operation with his teaching duties at St. Martin's. Today, KGY operates with 250 w on 1240 kc.

Build-up for the anniversary ceremonies began 10 days beforehand when the station began a feature of airing news of 30 years ago.

KGY began newscasting in 1933 with Sam Crawford, now in the sales department, doing all of the news-gathering by foot, auto and telephone.

KGY went commercial in 1927 when Archie Taft and Lou Wasmer bought the station and moved it from Lacey to Olympia. Mr. Olsen purchased KGY in 1939.

"Quietly and with no fanfare," WBAP celebrated its 30th anniversary last Friday.

During the past three decades, WBAP has grown from a 10 watter to its present status as a 50 kw clear-channel station.

The man who put WBAP on the air in 1922 as *The Hired Hand*, Harold V. Hough, today is director of the *Fort Worth Star-Telegram* broadcast operation, WBAP-AM-FM-TV.

From the one employe in 1922, WBAP operations have grown to a staff of 160 employes.

Several other "old timers" are still with the station. R. C. Stinson, chief engineer, started with the station in 1926. Ted Graves, Ann Shipp and Al Bowman, all musicians, joined shortly thereafter. George Cranston, general manager, came to WBAP in 1930 as did Gene Baugh, musical director. A. M. Woodford, production director, began with WBAP in 1929 as an engineer.

WBAP shares assignment with WFAA Dallas: NBC rides 820 kc clear channel; ABC rides 570 kc regional channel. When WFAA operates on clear channel, WBAP operates on the regional channel and vice versa. Both channels are for combined coverage of the Dallas-Ft. Worth market areas.

Party for Doolittle

Party celebrating 30th anniversary of the incorporation of WDRC was arranged by the station staff as surprise for Franklin M. Doolittle, president, and Walter Haase, general manager, with each receiving gifts from employes. WDRC was incorporated in April 1922.

The station is licensed to the Connecticut Broadcasting Co. It operates on 1360 kc with 5 kw D.

'HEADLINERS'

Radio-TV Awards Announced

FOUR achievement awards plus a Valor Medal have been voted to representatives of the broadcasting industry by the National Headliners' Club, which will make presentations to winners of its 18th annual competition in Atlantic City June 7.

Based on more than 1,000 entries from 400 newspapers, radio stations and syndicates, 18 awards are to be given news writers, photographers, editors and cartoonists for outstanding features and news coverage during the past year.

Radio - Television awards were announced last week as follows:

For consistently outstanding news broadcasting, KFI Los Angeles, cited for its *KFI Calling* series. The weekly program features recorded telephone interviews with people in world news.

For consistently outstanding radio editorials, KFMB San Diego and executive editor Paul W. White, "for courage in taking an editorial stand on vital issues of local, state and national importance." Judges suggested that "such a program in the public interest might set a pattern for other stations to follow."

For outstanding television coverage of a news event, Charles and Eugene Jones of NBC-TV "for their world beat with a film and tape interview of Robert Vogeler following his release from Communist authorities in Vienna."

For a consistently outstanding job of "radio reporting under danger in their role of providing American audiences with a 'listening post' for their troops in the field": combat radio correspondents from the Dept. of Defense, as exemplified by the work of Lt. Col. Wes McPheron, USA, and Sgt. Gene Coons, USMC.

For newsreel reporting of action at the front in Korea, Headliner Valor Awards to Wade Bingham, television news cameraman for Telenews Productions; Gene Zenier of Warner-Pathe, and Bang Young Lee, Korean newsreel photographer for MGM.

Thirteen other awards were made for best newspaper news stories, features, photographs and editorials. Among those honored for journalistic effort was Cedric Adams, who writes the column, "In This Corner" for the *Minneapolis Star Journal* and *Minneapolis Tribune*. Mr. Adams also is a commentator for WCCO Minneapolis.

Point IV Script

RADIO documentary script telling story of Point IV program throughout the world is now available on request from Public Affairs Staff, Technical Cooperation Administration, McShain Bldg., Washington 5, D. C. The script, of 15 minutes duration, is for five voices and calls for a minimum of sound effects and basic music.

Portrait of the Heart of American Folk Music

This is a typical Saturday night at WSM'S world famous Grand Ole Opry. These are five thousand out of the millions who have come to Nashville because a single radio station believed that the music of a region should be kept alive for the world to hear and applaud.

During its 26 year history the Grand Ole Opry has played to countless millions on the air and to a live audience of over 5,000,000 people. During the past nine months, 8 national magazines have featured the astounding Grand Ole Opry story, adding new weight to a program which has become an American Legend in less than 3 decades. Irving Waugh or any Petry Man can show you how to harness the power of this folk music to your product.

NASHVILLE

WSAB MEET

Confidence in Radio Noted; Northwest Ratings High

LIFTING of the television freeze and the fact that radio is still the best advertising medium were the two principal concerns of the annual meeting of the Washington Assn. of Broadcasters at Pullman April 25-26.

Joseph B. Ward, manager of Advertising Research Bureau Inc., Seattle, presented ARB Index ratings to stations in Pacific Northwest markets where radio has outpulled newspapers according to ARBI surveys. Recipients were KIT Yakima, KOMO Seattle, KVOS Bellingham, KPQ Wenatchee, KELA Centralia-Chehalis, KGY Olympia and KXLY Spokane, all Washington, and other stations of the XL group in Oregon and Montana.

New officers elected for the coming year were: President, Leo H. Beckley, president and general manager, KBRC Mt. Vernon; vice president, Loren B. Stone, manager, KBRO Bremerton; secretary-treasurer, Allen Miller, general manager, KWSC Pullman.

Directors elected were Rogan Jones, president, KVOS Bellingham, and Donald A. Wike, commercial manager, KUJ Walla Walla.

Outgoing president, Fred F. Chitty, general manager, KVAN Vancouver, advised the broadcasters to see to it that they are not ignored in their home communities.

Gov. Arthur B. Langlie told broadcasters at the Saturday afternoon session that radio has a "terrific responsibility—it must convey accurate information to the people."

Maurice B. Mitchell, general manager of Associated Program Service, urged a belief in the medium of radio, which he called "still the best," and recommended that radio executives "sell with confidence."

John P. Hearne, attorney for KLAC-TV Los Angeles and KRON-TV San Francisco, and a former examiner for the FCC, reviewed the history of the television freeze.

As reassurance to those businessmen still primarily concerned with the AM side of broadcasting, Mr. Hearne noted that currently in television markets, radio is holding its own, and there is a place for both.

William R. Taft, president and general manager KRKO Everett, lauded WSAB sales clinics, which have been held quarterly for the past year. After two of these meetings, he reported, KRKO had obtained $4,000 in new business.

Loren Stone, manager KBRO Bremerton and chairman of the Washington State Advertising Commission urged broadcasters to back an adequately financed state advertising program.

Tom Olsen, president and general manager of KGY Olympia, and WSAB legislative chairman, described the success of Washington's state law permitting legal advertising on the air.

Carl Downing, WSAB executive secretary, reported on the association-backed Radio News Bureau, which operates from the state capital at Olympia. He recommended that the broadcasters undertake the same special network coverage for the 1953 session of the Washington legislature that they used in 1951.

Awards at Banquet

Saturday night, at a banquet of the National Collegiate Radio Guild attended by more than 175 broadcasters, Gov. Langlie presented two awards to the outstanding men and women students at WSC's radio school. Bruce Berg, a senior, of Helena, Mont., received the Edward R. Murrow Award, named for the CBS newscaster, an alumnus of WSC. The Judith C. Waller Award was presented to Donna Murdock, San Carlos, Ariz.

Dr. C. Clement French, who took office as president of the State College on April 16, extended greetings to the broadcasters at the Saturday banquet. All sessions of the WSAB annual conference took place in the studios and studio auditorium of KWSC. Luncheons and the banquet were held at the Washington Hotel, in Pullman.

Attending the WSAB sessions were 55 broadcasters, plus the staff of KWSC and approximately 15 radio students at the college.

The group also heard from Jim Cox, West Coast representative for Broadcast Music Inc., who mentioned the program clinic scheduled for May 6 at the Olympic Hotel in Seattle; and from Lee Jacobs, NARTB director at large for small stations.

NEW WSAB officers and directors include (standing, l to r) Mr. Beckley, president; Mr. Chitty, outgoing president; Mr. Stone, vice president; Mr. Miller, secretary-treasurer; Carl Downing, executive secretary and director of the Radio News Bureau; Mr. Wike and Mr. Jones, directors; (seated) Mr. Mitchell and Mr. Hearne.

TAB CONVENTION

Set May 8-9 In San Antonio

TEXAS Assn. of Broadcasters is urging all Texas stations—whether they are members of the association or not—to send a representative to the semi-annual TAB meeting in San Antonio, May 8-9.

Sessions are to be held in the Plaza Hotel, with San Antonio stations KABC KITE KONO and WOAI to be hosts.

Agenda calls for J. M. McDonald, TAB president, to call the meeting to order at 10:30 a.m. Thursday. Speakers and their topics for the first day include Gene Howe, board chairman, *Amarillo Globe-News*, "Texas Radio vs. Texas Newspaper"; Lloyd George Venard, president, O. L. Taylor Co., "How Texas Can Get More National Radio Money"; John E. Pearson, president, John E. Pearson Co., "What An Agency Expects of a Station," and Kenyon Brown, NARTB District 13 directors, who will extend NARTB greetings to the convention.

Thursday afternoon will be devoted to a forum, at which participants will discuss political censorship under the new Texas election laws; sports broadcast rights; personnel procurement; public service policies and whatever points are raised from the floor.

Friday will be devoted to a BMI clinic.

C-P-P Net Drops

NET INCOME of Colgate-Palmolive-Peet Co. for the first quarter of 1952 was $2,250,000, compared with $4,378,000 in the same period of 1951, according to a report. Domestic sales were $63,402,000 as against $72,725,000 in 1951's first quarter.

ALLIED RECORDING

Gets Federal Contract

FOR the fifth consecutive year, Allied Recording Mfg. Co., through the Bureau of Federal Supply, has been awarded the contract for all recording, processing and pressing of transcriptions for all executive branches of the government. The new contract, effective June 1, continues through May 31, 1953.

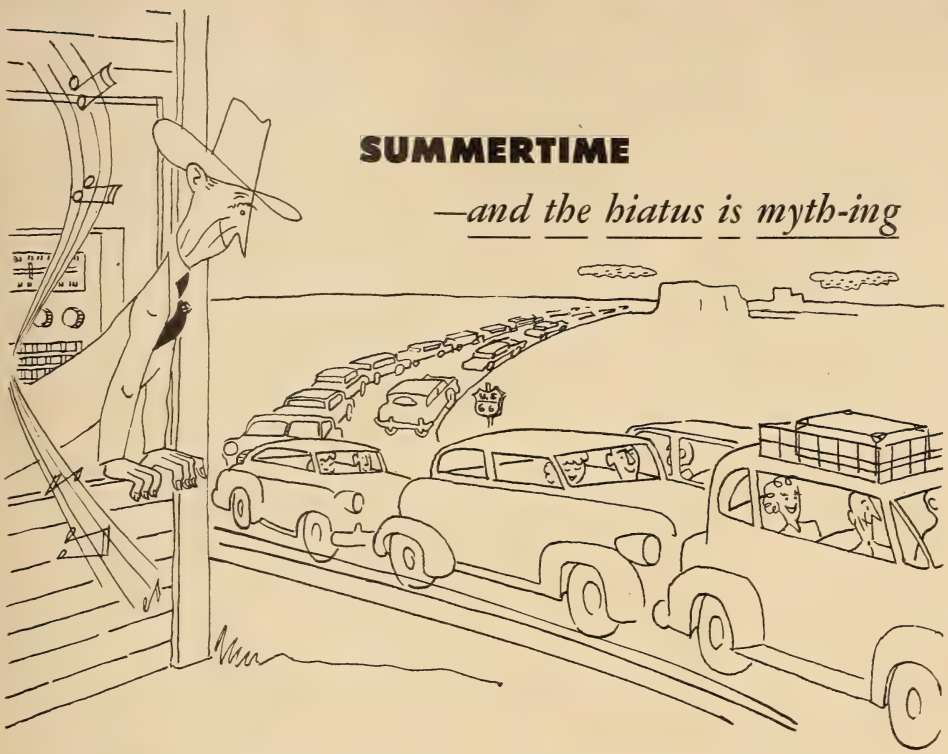
Allied will turn out all transcriptions required by the federal agencies at its Hollywood headquarters and at K. R. Smith Div., its New York plant. They include Voice of America show for the State Dept., *Guest Star* shows for Treasury Savings Bond Div. and *So Proudly We Hail* for the Adjutant General's Office of the U. S. Army.

Allied also presses recordings for overseas shipment from West Coast headquarters of Armed Forces Radio Service as well as transcribed public service Navy and Marine Corps recruiting programs.

Under all the contracts, Allied provides federal agencies with recording facilities to transcribed programs in Washington, Chicago, New York and Hollywood, according to Daken K. Broadhead, firm's president.

D.C. TAX APPEAL

Ruling Affects Engineers



FRANCHISE tax imposed on "unincorporated" businesses by the District of Columbia does not apply to consulting radio-TV engineers. That decision by the D. C. Board of Tax Appeals in 1949 in the case of consultant George P. Adair, former (1944-47) FCC chief engineer, was affirmed two weeks ago by the U. S. Court of Appeals.

Court of Appeals found that even though approximately 30% of the gross income went for salaries, it was nevertheless a fact that more than 80% of the income came from the personal services of Mr. Adair. D. C. regulation uses 80% figure as a cutoff for determining difference between personal service business and "unincorporated" business.

CORNY?

WIBW advertisers don't think our methods of selling to farmers are corny. Not when they check sales figures in Kansas and nearby states.

WIBW The Voice of Kansas in TOPEKA

SUMMERTIME

—*and the hiatus is myth-ing*

AMARILLO is located on Highway 66, the direct route from Chicago to Los Angeles. The heavy summer traffic can—and does—tune in to KGNC for 400 or 500 miles rolling through our coverage area. We offer exclusive NBC programming to a trade territory which extends *at least* 140 miles in all directions. As far as listeners are concerned, the summer hiatus is just a myth you read about in the trade press.

People around Amarillo do about the same things in the summer that they do in the winter because there isn't much else to do. We're about 900 miles from the seacoast; folks can't go there for the weekend. The mountains are about 400 miles that way—too far a piece for a fast holiday. There's only one honest-to-goodness night club in Amarillo and none in other towns KGNC covers. Except for an occasional movie there isn't much nightlife.

What do folks do with their leisure?

Listen to KGNC.

710 KC • 10,000 WATTS • REPRESENTED NATIONALLY BY THE O. L. TAYLOR COMPANY

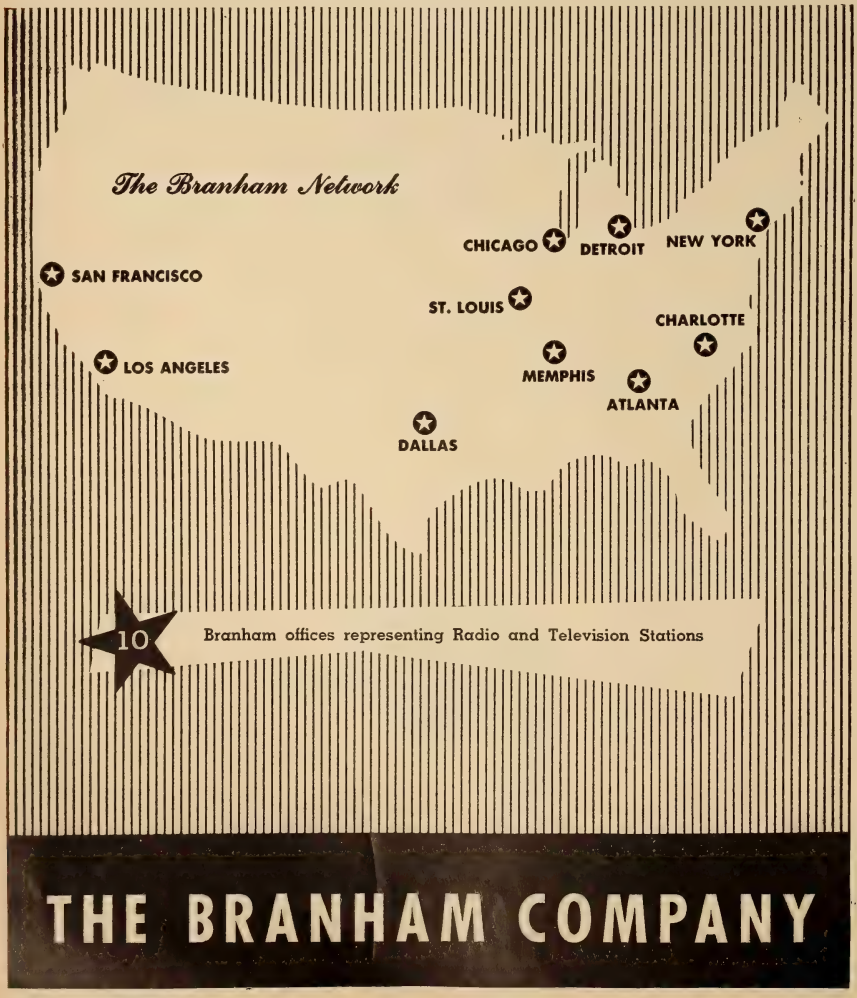
COURT LAXITY

Scored by Sarnoff In N. Y. Speech

A WARNING that failure of the courts to review the "substance" of decisions of administrative agencies could result in loss of "the right of every person to have his day in court" was sounded by Brig. Gen. David Sarnoff, chairman of the board of RCA, in an address April 23 before the Harvard Law School Alumni Assn. of New York City.

Speaking on "A Layman Looks at the Law," Gen. Sarnoff cited the color television case, in which, he noted, "eight of the nine Justices of the Supreme Court obviously agreed. . . . that the administrative agency [FCC] having made its decision there was nothing for the Supreme Court to do." He continued:

"I would not challenge the necessity of ceasing the strain on our overburdened courts by resort to the expedient of the administrative process. Nor would I challenge the right of a court of law to circumscribe that which it will consent to hear.



"But, I suggest that the growing tide of judicial unwillingness to review decisions of administrative bodies has many serious implications for business and the public. It may result in a drastic change in our system of courts and law whereby matters of substance would be determined on the administrative level and only matters of form passed on by the courts. Under such circumstances, one of the bulwarks of our form of government—the right of every person to have his day in court—would be swept away."

Gen. Sarnoff suggested that "this is a problem for the Bar to consider carefully." He asserted that "unless a reasonable solution is found, the place of the court and the lawyer in the administration of justice will increasingly be subordinated to the growing power of the administrative agency which will speak with an authority and finality for exceeding that of a court of law." He concluded:

"Looking at the law as a layman, it seems to me that where the public interest is vitally affected there ought to be some place to go where a judicial review of the substance and not merely the form of a case can be secured. . . . Compatibility is essential not only between black-and-white and color television but also between the facts and the law."

Frank Byrnes

FRANK BYRNES, 63, KCBS San Francisco sales account executive, died at his home there April 20. He joined KQW (now KCBS) in 1942. His wife, Alyse, survives.

FORD WORKSHOP

Funds Over $90,000 in '51

EXPENDITURES of the Ford Foundation's TV-Radio Workshop in 1951 totaled $90,877 out of the project's overall $1.2 million grant [B•T, April 28], according to the first annual report of the Fund for Adult Education, which administered the grant.

The report, released yesterday (Sunday), showed workshop expenditures of $30,017 for production of *The People Act*, weekly series now on CBS Radio, and $12,933 for *Assembly VI*, weekly coverage of last winter's meeting of the UN General Assembly in Paris, which was seen on NBC-TV. Total authorizations for these two programs were $175,000 for *People Act* and $50,000 for *Assembly VI*. Expenditures shown were those which had been made up to Dec. 31, 1951.

Workshop expenditures for "other programs and supervision" were placed at $46,927.

Apart from the workshop, the Fund made grants totaling $2,520,223 during the year. These included $300,000 to Lowell Institute for development of programs for the Educational Radio Network; $157,800 for KPFA-FM Berkeley, Calif., experiments in subscription radio as "another means for providing offerings in adult education"; $180,000 to Iowa State College for development of educational TV programs on its WOI-TV Ames; $25,000 to the National Assn. of Educational Broadcasters for monitoring studies of television programs in three cities, and $90,000 to the Joint Committee on Educational Television for "technical advice to educational institutions applying for television channels."

The report noted that four series are in preparation for NAEB's Educational Radio Network: *Our Jeffersonian Heritage; The Ways of Mankind; America and the Soviet Union* and *Discussions of Current Public Issues*. They are being taped, will be carried by the NAEB network's 107 stations, and subsequently will be distributed to commercial stations, it was said.

The Fund had a balance of $1,733,031 on Dec. 31, aside from the TV-Radio Workshop's balance of $1,109,123. The Fund is headed by Alexander Fraser as board chairman and C. Scott Fletcher as president, while Robert Saudek is director of the workshop, with John Coburn Turner as assistant director.

'Tokyo Rose' Plea

APPEAL by Iva Toguri D'Aquino for reversal of conviction involving treasonable broadcasts during World War II was turned down in a brief order by the U. S. Supreme Court last Monday. Mrs. D'Aquino, alias Tokyo Rose, must serve out a 10-year prison term for her broadcast activities over Radio Tokyo. Court issued the order without any accompanying opinions.

NBC's MEN IN THE NEWS: *Swayze*

Photograph by RALPH STEINER

"It never occurred to me that my neckties might be a problem . . ."

Not only his neckties, but his shirts, gestures and state of health are of tremendous concern to John Cameron Swayze's regular viewers. Swayze, who started as a reporter and newscaster in Kansas City, must choose his accessories as carefully as he edits his scripts. Television's most decorated newsman, Swayze has won more awards for accuracy than a Swiss watch . . . including the coveted DuPont award. Formerly Director of News for NBC's Western network, Swayze's phenomenal memory and brisk showmanship first gained national prominence with his TV coverage of the 1948 presidential conventions. Now with his daily Camel News Caravan, television's highest rated news show, Swayze is one of the most-heard newsmen in the business.

As a keen interpretive reporter and knowledgeable showman, Swayze knows that 1952's big story is politics, and his first assignment, like that of 100 other NBC men of news, is to cover the conventions and the elections as they've never been covered before.

Swayze, Pearson, Kaltenborn, Mueller —these are a few of the outstanding reporters who make the NBC News Center pre-eminent in broadcasting. News reaches most Americans first through radio and television, and ratings prove that, day-to-day, more Americans prefer NBC as their primary news source on both radio and television. The reason is simple. NBC's news-gathering facilities are larger and more active, and NBC consistently broadcasts more hours of news, more special events than any other radio or television network.

Politics makes more than strange bedfellows. It makes exciting news, and in this, the most intense political campaign since 1932, more Americans will hear the news first and hear more of it from NBC.

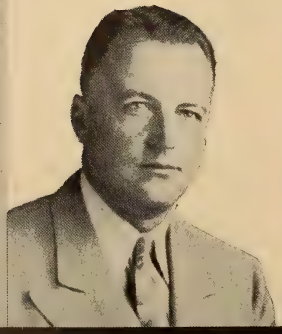
local sponsors report...

AP NEWS more profi

"Business doubled in one year... with AP news on WRUF."



Fred M. Cone, Owner
Ideal Laundry,
Gainesville, Fla.

From Mr. Cone: "AP news on WRUF contributed greatly to the increase in our business. AP newscasts give the people what they desire most — up-to-the-minute news. This certainly pays off for us. All of us are sold on AP for results!"

"Listeners more interested than ever in news."

Bernard C. Brazeau, Pres.,
First National Bank,
Wisconsin Rapids, Wis.

Says Mr. Brazeau, whose bank is the biggest sponsor of news at WFHR: "Because news is the listener's greatest interest today, we use AP news over WFHR consistently with maximum results. AP does a real job in promoting good will and business for us!"

Hundreds of the country's finest stations announce with pride *"THIS STATION IS A MEMBE*

able than ever!

Major Garland Powell, Director, WRUF, Gainesville, Fla.

And from WRUF Director Powell: "I had a hard time persuading Mr. Cone to use radio. But after a few experiments he decided on AP newscasts. Within a year he had to double the size of his plant."

George T. Frechette General Manager, WFHR Wisconsin Rapids, Wis.

And from WFHR General Manager Frechette: "Our income from AP news has been substantial year after year. Many news sponsors have been with us ever since WFHR went on the air more than 11 years ago. AP news sells easily, to national as well as local advertisers. We were among the first AP radio stations. And still feel AP is the best in the business."

OF THE ASSOCIATED PRESS."

Associated Press . . . constantly on the job with

- a news report of 1,000,000 words every 24 hours.
- leased news wires of 350,000 miles in the U.S. alone.
- exclusive state-by-state news circuits.
- 100 news bureaus in the U.S.
- offices throughout the world.
- staff of 7,200 augmented by member stations and newspapers . . . more than 100,000 men and women contributing daily.

PROFIT is the proof . . . PROFIT from increased business . . . for sponsor and station! AP news produces consistent results . . . and top listenership. Keen, precise news coverage compels the listener's attention . . . holds him for sponsor's sales message. AP news builds peak buying audiences!

editorial

Expedite, Please

THREE WEEKS have elapsed since the FCC handed down its momentous "unfreeze" report on television. The questions that have arisen are myriad. The biggest concern is whether efforts will be made to block the allocations through litigation—a course threatened by a number of attorneys representing distraught clients. And, for the most part, these prospective appellees favor the Jones dissent, which would jettison what the Ohio Commissioner described as the "firm, fixed and final" allocation and substitute a wide open procedure following the pattern in AM broadcasting.

There can be no answer to this all-encompassing question until some affirmative legal move is made. But there *can* be an answer to another question worrying many broadcasters confronted with the necessity of making their plans forthwith. That is the vexatious problem of deciding whether competitive radio broadcasters in a given market should join hands in the quest for a TV facility. The FCC hasn't spoken on the legality of such "marriages." Prospective applicants are in a quandary. The inference, from the FCC staff level, is that such fusions would constitute "duopoly" in radio. Obviously, there would be "monopoly" involved in those 902 markets in which only one TV facility has been allocated, no matter who acquired the facility. (There are 970 markets which have only one AM outlet.)

This whole situation is fraught with trouble. In TV there's a greater "scarcity" factor than there ever was in AM or FM allocations. The FCC, admittedly, is anxious to get new television services on the air fast. But by maintaining silence on the so-called "duopoly" issue, the end result can only be further delays.

If an answer to the question posed is to be of any help, it must be made promptly.

Therefore, it behooves those applicants who may be contemplating merger to petition the Commission for an immediate "declaratory ruling," permissible under the Administrative Procedures Act.

Non-Kissin' Kin

PROBABLY no profound conclusions can be drawn from it, but it is an interesting fact that most of the leaders of the American Newspaper Publishers Assn. come from papers that through one corporate arrangement or another are identified with broadcasting stations.

All but one of the newly elected ANPA officers and directors represent newspapers that are affiliated with broadcasting. Here's the list: President, Charles F. McCahill, *Cleveland News* (WHK-AM-FM Cleveland, WHKK Akron, WKBN Youngstown, WHKC Columbus); vice president, George C. Biggers, Atlanta Newspapers Inc. (WSB-AM-FM-TV Atlanta, WHIO-AM-FM-TV Dayton, Ohio, WIOD Miami); secretary, Richard W. Slocum, *Philadelphia Bulletin* (WCAU-AM-FM-TV Philadelphia); treasurer, W. L. Fanning, Westchester County Newspapers (WFAS-AM-FM White Plains, N. Y.); director, Franklin D. Schurz, *South Bend* (Ind.) *Tribune* (WSBT South Bend). The lone newspaper-only representative among the new officers and directors is Director H. H. Cahill of the Seattle *Times*.

The newly chosen chairman of the ANPA's Bureau of Advertising is Stuart M. Chambers, of the *St. Louis Post Dispatch* (KSD-AM-TV St. Louis). Mr. Chambers has an even closer association with broadcasting than the others mentioned above. He used to be commercial manager of KSD before he moved to the paper as business manager.

As chairman of the Bureau of Advertising, Mr. Chambers will be in charge of an agency to which publishers have contributed $1,374,000 to finance a free-wheeling, pro-newspaper, anti-radio and TV selling campaign.

(In terms of money at least, the newspapers' Bureau of Advertising will out-gun the broadcasters' Broadcast Advertising Bureau which has about $468,000 in sight for its fiscal year to carry on its job of undoing what is done by the Bureau of Advertising.)

At first glance it would seem that these publishers who have both newspaper and broadcasting interests are engaged in a somewhat farcial struggle to wrest the money out of one pocket of their pants only to put it in another. Actually, of course, the results of these competitive selling campaigns will be to add momentum to the whole advertising business and increase the volume which all media share.

Competition between broadcasting and newspapers should be vigorous. Indeed the more vigorous it is, the more healthy both media will be. It would only damage both if the competitive spirit were dampened by the common ownership of some properties.

One Man Brigade

CHANGE IN the high command of Mutual, which saw young, aggressive Thomas F. O'Neil take over the presidency from Frank K. White, causes little consternation. That is because the change was amicable and because Frank White remains in the broadcast field. He'll be doing business across the street at NBC—his third network connection in 15 years.

Tom O'Neil represents the ownership of Mutual. At 37, he is the youngest major network chieftain. In his five years in radio he has infused into the General Tire radio and television properties a new business approach that has paid off. He has a sound business background. And he has imagination. His right-hand bower will be Executive Vice President William B. Fineshriber Jr., who trained under Mr. White, and who takes on additional duties as an MBS director.

Frank White leaves Mutual in good condition. When he took over the Mutual presidency just three years ago, there were those who had misgivings about the continued existence of four "live" nationwide networks. While network business hasn't been a bed of roses these three years, Mr. White can look back upon improved business volume and program ratings. He met the challenge.

We have no doubt that Frank White will do more than pay his way at NBC. His rich experience with CBS—in both radio and recording—and with MBS, will serve the network in excellent stead. He's a one-man brigade.

A TWO-DECADE stalemate in radio legislation may be broken this week. The House Rules Committee, gate-way to action, sent the McFarland Bill (S 658) to the floor where it should pass this week, despite some features which would wreak havoc in broadcasting. But we're told there's no cause for alarm since Senate and House conferees will compose differences and root out the inequities. It should be that or no bill at all. The Rules Committee also okayed an Interstate Commerce Subcommittee to study radio-TV programming, by reporting out the Gathings Resolution (H. Res. 278). This is a green light to the objectors to blood-and-thunder TV programming and "offensive" beer commercials. Here's where the new NARTB-TV code review board should step in, backed by the new subcommittee.

our respects to:

FREDERICK OWEN BOHEN

EXPERIENCE of the visual publishing field will go well in helping make a success of television.

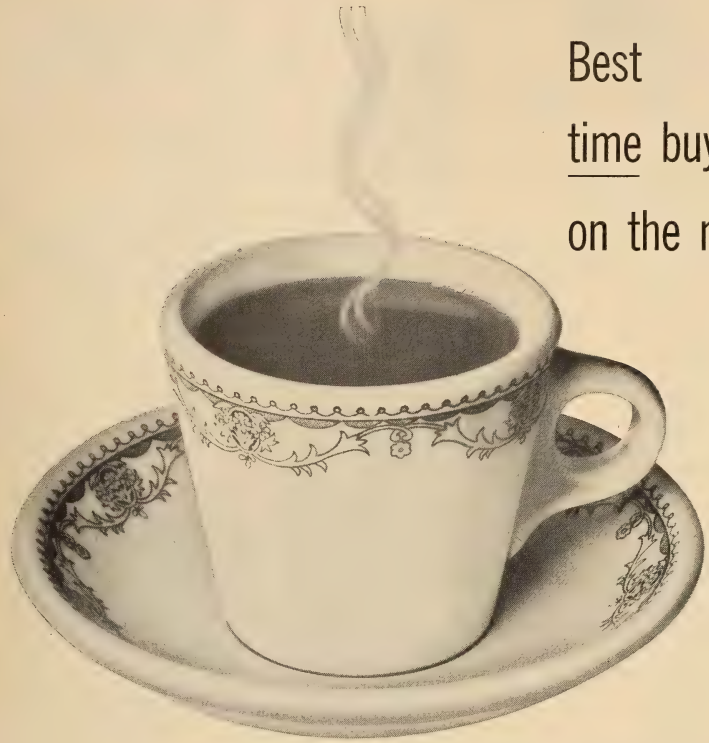
Practical proof of this theory is being demonstrated today by a newcomer to radio and TV who enjoys such a wide background in the printed medium.

He is Fred Bohen, chairman of the board and director of WOW-AM-FM-TV Omaha and vice president and director of WHEN (TV) Syracuse. In addition to a broadcaster's duties, Mr. Bohen is president and publisher of Meredith Pub. Co., Des Moines, Iowa, which publishes *Better Homes & Gardens* and *Successful Farming*.

His entrance into the radio-TV industry occurred when Meredith Engineering Co., subsidiary of the publishing firm, built WHEN (TV) and purchased the WOW properties. WHEN (TV) began operation in 1948 and WOW-AM-FM-TV was acquired in August 1951.

Applications for TV outlets in Albany, Rochester and Schenectady have been on file with the FCC for four years.

Mr. Bohen feels that the expansion of his firm into the broadcast industry will afford him an opportunity to prove that years of experience with a visual medium such as a magazine can be transferred profitably to the TV screen. Plans and a limited number of experimental TV ideas employing the know-how of a magazine editor already have been carried out.



Mr. Bohen joined the firm which he now heads as an advertising salesman in the Chicago office in 1921. Two years later, he was promoted to advertising director of *Better Homes & Gardens* and *Successful Farming* and subsequently was named general manager of the firm, a position he held until 1928 when he became president and publisher of the company following the death of its founder, E. T. Meredith Sr.

Under his direction, the Meredith Pub. Co. has grown to be one of the largest magazine publishing houses in the country. *Better Homes & Gardens* circulation has jumped from slightly more than a million copies to the current 3.5 million monthly under Mr. Bohen's direction. In the past 25 years, *Successful Farming* circulation has increased to over 1.2 million. The latter publication has been either first or second in advertising pages among the four general farm magazines for 36 of the last 38 years, he reports.

Mr. Bohen, a native of Minnesota, is active

(Continued on page 56)

Best time buy on the market

Say "Children's Hour" and instantly people in and around Philadelphia think of a Sunday morning program now in its 24th year on WCAU Radio, sponsored by the Horn & Hardart Restaurants and Retail Shops. Say "Horn & Hardart Herald" and they think of the long-established news show heard every morning over WCAU, inviting them to "hear what happened during the night."

This part played by WCAU in the Horn & Hardart organization's advertising is best described in the Company's own words . . .

> *"We early recognized the economy of advertising by radio — and more particularly over WCAU. Our 'Children's Hour' has not only done an outstanding sales job but has become a most effective vehicle for promoting good community relations. Furthermore, through our newscast, we have been able to tell our story to our Philadelphia customers every weekday. The result has been 24 years of uninterrupted selling — over WCAU. Today we are finding WCAU just as productive a sales medium as it has been at any time in our long and profitable association."*

Almost a quarter of a century of consecutive and exclusive advertising on WCAU adds more proof — proof that WCAU is the best time buy on the market.

IN SYRACUSE . . .

TELEVISION SUPPLEMENTS RADIO

. . . Does NOT Replace it as a Source of Entertainment and Information

Syracuse is a two-TV-station city. According to Niagara Mohawk Power Company monthly surveys, 71% of the homes in the Syracuse area have TV sets. According to the calamity howlers, radio in Syracuse should be a dead duck. But two separate *surveys of television homes* (October and December 1951) show that radio is alive and vigorously kicking. (Details, including methods of sampling, free on request.) Here are the combined results:

Number of Homes Called	Number of TV Homes	TV Homes Only Average Hours per Day		
		Radio	TV	Both
1467	986	3.07	4.52	7.59

The Survey Also Showed:

1 – An average of 2.4 radios per TV home.

2 – 61 radios purchased *after* the homes had television.

3 – Average of 4.4 hours per day of radio listening in non-TV homes.

Comparative loss of radio-listening time in TV homes — only 30%. Here is PROOF that TV has NOT replaced radio in Central New York — merely provides another means of reaching this rich market.

HARRY FOLTS, general manager, WINS New York, hospitalized for two weeks after undergoing minor surgery. . . .

C OF C MEETING

Group Protests Seizure

STRONG stand against seizure of property by the President was taken last week by 40th annual meeting of the U. S. Chamber of Commerce, held in Washington. President Truman previously had implied he could seize newspapers and radio stations if he felt this would be in the best interest of the country [B•T, April 21], drawing a storm of protest.

The U. S. Chamber contended the President's seizure of the steel industry "violates fundamental Constitutional guarantees designed to protect every citizen's right to private ownership of property."

The Chamber added, "Not to challenge this action is to condone assumption by the executive branch of government of powers which can nullify the American concept of due process of law. To seek justification for such an act in a vague theory of inherent executive power is to foster a compromise of principles that long have stood as the foundation of American justice and liberty."

D. A. Hulcy, retiring president, lauded the April 29 decision of Judge David A. Pine of the U. S. District Court, District of Columbia, holding the President had seized the steel mills illegally.

Another Chamber declaration reaffirmed the position that all administrative agencies should be required to keep the public fully informed as to their structure, functions and actions.

AFCCE ELECTIONS

McNary Voted President

NEW officers of the Assn. of Federal Communications Consulting Engineers, announced in Washington last week, are James C. McNary, president; Frank G. Kear, vice president; Frank H. McIntosh, secretary, and T. A. M. Craven, treasurer. Mr. McNary succeeds George C. Davis as president.

Mr. McNary

New members of the executive committee are Millard M. Garrison and Stuart L. Bailey. They replace Everett L. Dillard and Lester H. Carr. Remaining members of the executive committee are John Creutz and Ronald H. Culver.

SETTEL NAMED

Gets 'Voice' Post

ARTHUR SETTEL, public relations chief for the Office of the High Commissioner in Germany (HICOG), has been named to head overseas program information and promotion for the State Dept.'s Voice of America, it was announced last week. He will headquarter in the office of International Broadcasting Services in New York City.

Mr. Settel served as HICOG public relations director after a tenure as information chief for the Economic Information Office under William H. Draper Jr., former U. S. economic advisor.

"Look, Pop... *all Gold stars*"

"Was I proud of the kid! And glad those gold stars weren't red stars.

"Y'see, my youngster's growing up in a country where we teach our kids decent things. Like respect for the other fellow's views. Like fair play and truth. Like government of, by and for us people. In schools, churches and homes we teach them the Golden Rule.

"But take those countries the commies run. Over there, they teach *their* kids things like mass marching . . . propaganda . . . religion-hating. Like spying on their parents. A very nice lot of juniorskis they're raising . . . I *don't* think.

"Our history books are full of the Freedom of worship, speech, press and all that. Our kids learn it early. *But maybe that's the trouble!* They forget to appreciate Freedom when they grow up . . . to keep interested in it . . . to stand up for it. And I'll admit I'm guilty myself about keeping an eye on Freedom . . . always expecting 'George' to do it.

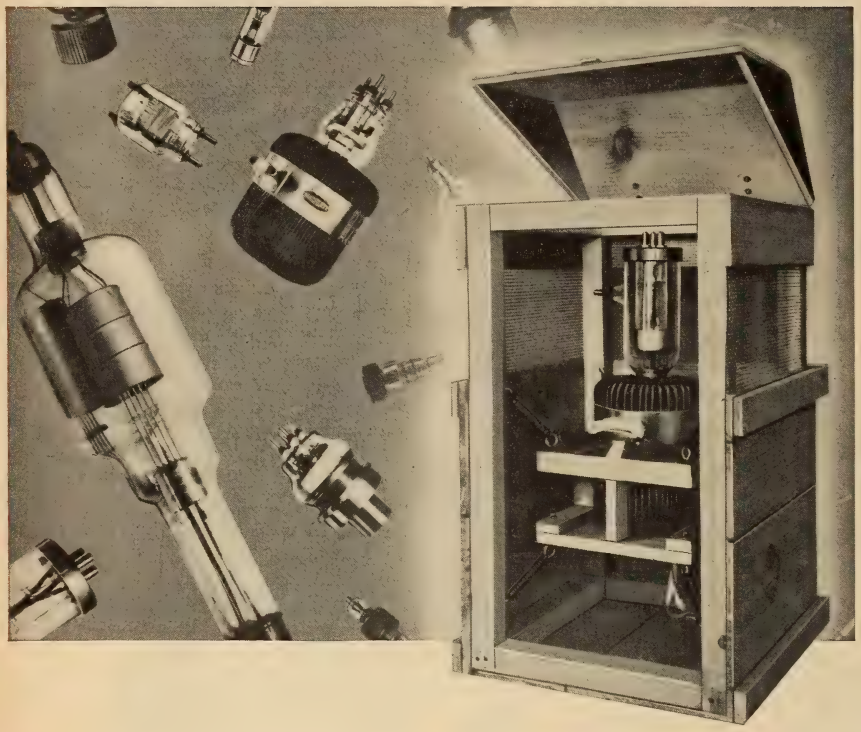
"Instead I should get what they call 'active'. You know, attend town meetings and forums. Read up on what's what abroad *and at home*. Learn to tell home-bred socialism from honest legislation. Learn to squawk bloody murder when I see our tax dollars being spent foolishly or hear about corruption by public officials. Talk over important issues with my friends, neighbors and the men I work with down at Republic. Listen to *both* sides carefully before I vote, instead of the candidates that make vague big promises. And tell off any loudmouth that runs down another race or religion.

"Why let 'George' do it? After all, *'George'* isn't Junior's old man . . . *I* am!"

REPUBLIC STEEL

Republic Building • Cleveland 1, Ohio

REPUBLIC STEEL



Republic BECAME strong in a strong and free America. Republic can REMAIN strong only in an America that remains strong and free. . . an America whose magnificent hospitals are justly famous throughout the world. *Through Hospitals, Republic serves America.* Many thousands of tons of Republic ENDURO Stainless Steel are helping these institutions of mercy maintain highest sanitation standards . . . in operating rooms and laboratories, in instruments, sterilizers, incubators, therapy tanks, wheeled beds, food preparation and serving equipment . . . and in structural applications such as walls, doors, sunshades and guard rails. Steel—and plenty of it—is a mighty weapon in the relentless fight against sickness and disease. Republic is proud to be part of that fight!

in civic affairs in Des Moines. He has been chairman of the board of trustees for Drake U. since 1949 and also has served as a trustee for the Des Moines Home for the Aged. He is past president of the Greater Des Moines Committee and regional director and vice president of the National Assn. of Manufacturers.

Currently he serves as a director of the following companies: Northwestern Bell Telephone Co., Omaha; Chicago and North Western Railway System, Chicago; National Assn. of Magazine Publishers, New York; Magazine Advertising Bureau, New York; Allis-Chalmers Mfg. Co., Milwaukee, and Central Life Assurance Society, Des Moines.

Mr. Bohen married the former Mildred M. Meredith in 1919. They have a daughter and two grandchildren.

KPRC CENTER
Will Cost $400,000

THE HOUSTON Post Co., licensee of KPRC-AM-FM-TV Houston, last week announced plans for a new $400,000 TV-Radio Center.

It is expected that the new building will be completed within five months. Herbert Voelcker & Assoc. was listed as architect. E. Lee Bond, Contractor Inc., will reportedly do the actual construction.

Final plans for the building are the results of seven months of planning by Jack Harris, vice president of the Houston Post Co., in charge of KPRC-AM-TV; Paul Huhndorff, KPRC-TV chief engineer; Bert Mitchell, KPRC-TV program director, and Harvey Wheeler, KPRC technical director, all of whom cooperated with the architects.

Announcement of building plans was made by former Gov. W. P. Hobby, president of the Houston Post Co., in a special Sunday supplement of *The Houston Post.*

GROUP TRAINING
CREI Broadens Program

CAPITOL Radio Engineering Institute, on the occasion of its 25th anniversary, last week announced the broadening of its program of Group Training for Industry. As described by E. H. Rietzke, CREI founder-president, the group training can be tailored to individual company needs at a special low cost.

CREI has published a brochure, describing in detail the group training program. This brochure is available on request to the Institute, 3224 16th St., N.W., Washington 10, D. C.

ELECTION coverage for Crosley stations WLW and WLWT (TV) Cincinnati has been expanded to include the attitude of Great Britain. Vincent Evans, Crosley London correspondent, has made the first of a series from that country.

JIMMY CAPPS, WPTF Raleigh, N. C., father of girl, Jane, April 23. **SAM BEARD**, station staffer, father of boy, Samuel, April 21.

ED VIEHMAN, senior producer, WCCO Minneapolis-St. Paul, father of boy, Thomas Patrick, April 22.

LENORE ALOE, WWDC Washington, and James T. Haight were married April 26.

RUTH BEATTIE, secretary of CAB Toronto, and James Murdock were married April 15.

News • • •

JIM BORMANN, news and public affairs director, WCCO Minneapolis-St. Paul, and president of National Assn. of Radio News Directors, received award from Minnesota Junior Chamber of Commerce for "distinguished public and community service."

CHARLES SHAW, WCAU Philadelphia news analyst and CBS correspondent in that city, appointed news director, WCAU-AM-FM-TV.

BRUCE ANDERSON, WCCO Minneapolis-St. Paul news writer, father of boy, Stewart Fraser, April 13.

FOLSOM SCHOLARSHIP

Set up at Notre Dame

"FRANK M. FOLSOM Scholarship," providing an annual grant of $800, has been established at the U. of Notre Dame for undergraduate students majoring in pure science or engineering, Dr. Charles B. Jolliffe, RCA vice president and technical director, announced last week.

For several years, Mr. Folsom has served as trustee and board member of several colleges and universities, and, specifically, as a member of Notre Dame's Advisory Council for Science and Engineering. Candidates competing for the Folsom Scholarship will be selected by Notre Dame officials and recommended to the RCA education committee for consideration, with the first recipient to be named during the fall of 1952.

Other competitive RCA scholarships will be offered additionally to outstanding undergraduate science students at 17 universities throughout the U. S.

KGW

THE People's Choice IN PORTLAND, OREGON

1,246,540 active, young-minded Westerners comprise KGW's market in 12 big, prosperous metropolitan Oregon counties, plus a generous slice of Southwestern Washington.

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., INC.

RAYTHEON MEET
Electronic Devices Shown

ELECTRONIC robots and "Reflection Plotters" that add "memory to the magic eye of radar," were among new electronic devices exhibited at the 1952 Sales and Service Conference conducted by Raytheon Mfg. Co., Waltham, Mass., at the Hotel Commander, Cambridge, Mass., April 21-23.

Among other electronic inventions revealed at the conference:

The "Fathometer," an echo-depth sounder for navigators, and the Raytheon "Weldpower" resistance welder which, operating on the principle of "stored energy," makes possible successful production welding of ferrous, non-ferrous and dissimilar metals.

D. R. Hull, vice president and general manager of Raytheon Equipment Div., stressed that "applying electronics to industrial problems" is an important part of firm's activities.

WE Workers Return

BROADCASTERS have relaxed their concern about possibly limited remote pickups as Western Electric Co.'s 10,000 telephone equipment installers settled for an average 14.1 cents an hour pay increase and returned to their jobs April 21. The strike, which had threatened telephone service in 43 states, resulted in little, if any, dislocation of broadcast facilities.

allied arts

J. E. KELLEY, J. J. KEARNEY, G. R. VANCE, HAROLD BEAN and **G. E. DITTMAN**, all renewal salesmen of RCA's tube department who scored highest sales records in 1951, named directors of Great Circle Club, company organization formed to recognize sales achievement.

THOMAS J. HODGENS, temporary vice president-general manager of New York branch of Admiral Corp., returns May 1 to permanent post of vice president-general manager of Boston office.

FRED ABRAMS, general manager of parts sales, Emerson Radio & Phonograph Corp., N. Y., appointed assistant to treasurer replaced by **FLOYD MAKSTEIN**, manager of company's field engineering group.

SAM KAPLAN, vice president-controller, Zenith Radio Corp., elected treasurer.

WILLIAM R. CAMPBELL, sales staff, Columbian Electrical Co., Kansas City, to Zenith Radio Corp., as regional sales manager in Midwest with headquarters in Kansas City.

FRED VOORHAAR, assistant manager of parts and accessory division, Zenith Radio Corp., Chicago, to Technical Appliance Corp., Sherburne, N. Y., as sales promotion manager.

ROBERT J. LEYKUM, supervisor of Majestic Radio & Television receiver plant, Brooklyn, appointed vice president in charge of manufacturing.

ALEXANDER W. GATES, former district representative, CBS-Columbia Inc., appointed sales representative for Tele King Corp. in Massachusetts, Rhode Island, Vermont, New Hampshire and 19 New York counties.

EDWARD J. KEATING, Western Electric and Ebasco Services, to Andrea Radio Corp., Long Island City, N. Y., as procurement coordinator. **PERCY SAUNDERSON** joins latter company as assistant purchasing agent. **M. J. McNICHOLAS**, assigned to procuring government contracts for Andrea, promoted to manager, special apparatus division.

RADIO CLUB OF AMERICA, N. Y., announces publication of "Survey of Radio-Frequency Transmission Lines and Wave Guides" by E. S. Winlund. Issued as Vol. 28, No. 2, book contains historical survey plus technical data from published articles between 1919 and 1936.

R. W. FORDYCE, general sales manager, Bendix radio, television and broadcast receiver division, Bendix Aviation Corp., Baltimore, resigns to enter distributing business in Miami where he will handle Bendix radio-TV line in southern Florida area.

Mr. Fordyce

R. L. WHITNER Co., Allentown, Pa., appointed distributor for Bendix radio-TV, products of Bendix Aviation Corp., Baltimore.

ADVERTEST RESEARCH moves New Brunswick, N. J. office to 90 Bayard St. Telephone is Charter 7-1564.

GLADYS AUSTEN and **ED LINDNER**, Film Features Assoc., form radio package firm, Ram Productions, 661 West End Ave., N. Y.

STANLEY BERGERMAN, Jaffe Agency, Beverly Hills talent agency, to reopen own office as TV producer-packager under name of **STANLEY BERGERMAN & Co.**, 141 El Camino Dr., same city.

GRAYBAR ELECTRIC Co., Chicago, appoints Central Television Service, that city, as official service organization for Hoffman TV sets in Chicago area.

FRANK SAMUELS, West Coast radio-TV manager, William Morris Agency, Beverly Hills, named 1952 radio-TV chairman for United Cerebral Palsy fund.

Equipment • • •

RCA VICTOR, Camden, N. J., announces new and improved type of three speed record player designed to provide in single turntable quality reproduction from records of all three established revolving speeds. Models are 2JS1, 2ES3, 2ES38 and 2US7. Shipment to distributors is scheduled in May.

AMPEX ELECTRIC Corp., Redwood City, Calif., announces new type console for audio magnetic recording in medium price market. Unit includes all push button control, built in microphone pre-amplifier and newly styled cabinet giving full interior accessibility.

GENERAL ELECTRIC Co.'s special products division, Schenectady, N. Y., announces production of portable surface-resistance indicator designed to help produce better resistance welding bond by providing rapid and accurate measurement of resistance between pieces of metal to be welded.

ALTEC LANSING Corp., Beverly Hills, announces production of 230 B and 250 A consoles. Former is designed for two-studio station use, public address and recording installations. Latter features high quality control in AM, FM and TV broadcasting. Unit has miniature plug-in preamplifiers, line amplifiers, monitor amplifiers and power supplies.

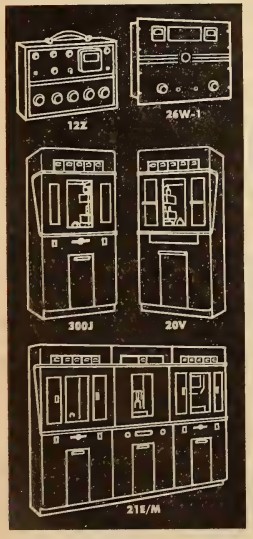
SPRAGUE ELECTRIC Co.'s Herlic division, North Adams, Mass., announces availability of new precision metal-encased tubular ceramic capacitor. Type B20, B21, B22 and B23 capacitors extend capacitance range available to circuit designers in close-accuracy ceramic capacitors at rated voltage of 500, 1000 and 1500 volts d.c.

ALDEN ELECTRONIC and IMPULSE RECORDING EQUIPMENT Co., Westboro, Mass., announces production of pocket size recorder made up of magazine and driving units. Magazine is self contained unit consisting of recording electrodes, timing switch and 8 day supply of paper. Driving unit contains synchronous motor with pinion gear to engage and drive one paper reel.

GENERAL ELECTRIC Co., Syracuse, announces production of air-cooled 5 kw VHF television transmitter for channels 7 through 13. Units available for shipment in June.

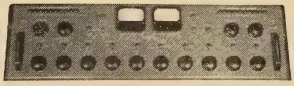
WARD PRODUCTS Corp., Cleveland, has released new catalog giving complete specifications on Model SPPC-88 describing special mobile antenna used to eliminate frequent breakage that occurs when antennas for 30-50 mc bands are mounted on high vehicles.

Technical • • •



FRANK DELLE, chief engineer, WFAI Fayetteville, N. C., to engineering staff, CBS Radio, New York.

GEORGE KRUTILEK appointed technical supervisor at WFAA-TV Dallas, succeeding **CARLOS DODD** who resigns to become regional communications officer for Civil Defense Administration.



J. P. GILMORE, CBC, Vancouver, appointed assistant coordinator of engineering projects at CBC engineering headquarters, Montreal.

ALTON TRIPP, studio engineer supervisor, WPTF Raleigh, N. C., father of boy, David, April 18.

AIR RAID TEST

N. J. Stations Take Part

NEW JERSEY's 20 commercial radio stations, linked together in a civil defense network, were completely successful in broadcasting instructions and other data in a state-wide air raid test, described as the nation's first, last Tuesday, CD officials reported.

Originating station for the network broadcast in "Operation New Jersey" was WAAT Newark. Fred Weber, owner of WFPG Atlantic City, is radio-TV director for the New Jersey CD network. He reported that all of the state's 20 commercial AM stations relayed the quarter-hour official broadcast.

Immediately after the all-clear sirens sounded, WNJR Newark broadcast a half-hour pickup from the control center, with News Editor Tom Costigan interviewing Gov. Alfred E. Driscoll and state civil defense director, Leonard Dreyfuss, who read reports as they were received from points throughout the state, describing local results of the test.

KHQ NEWSBEAT

Foretold Eisenhower Shift

KHQ Spokane is claiming a 3½-month newsbeat on the appointments of Gen. Matthew Ridgway to succeed Gen. Dwight Eisenhower as Allied commander in Europe, and of Gen. Mark Clark to replace Gen. Ridgway.

Tall Tripp, KHQ news director, and Robert Wesson, KHQ program director, attested that on Jan. 19, 1952, KHQ broadcast the following information:

"The KHQ news bureau learned tonight that should Gen. Eisenhower resign his command to seek the Republican Presidential nomination, he will be succeeded as NATO commander by General Matthew Ridgway. A Pentagon official, close to the joint chiefs of staff, also told the KHQ news bureau that the Pentagon is still undecided as to whether Gen. Mark Clark or Gen. Maxwell Taylor will go to Japan to head SCAP in Tokyo."

BAIRD NAMED

Succeeds Maier at Pearson

ROBERT M. BAIRD, assistant commercial manager of KRLD-AM-FM-TV Dallas, last week was named manager of the Dallas office of John E. Pearson Co., station representative firm, effective today.

Mr. Baird

He succeeds H. W. Maier Jr., who resigned to join CBS Radio and Television Spot Sales in Memphis.

Mr. Baird formerly was manager of KTXL San Angelo, Tex. Previously, he was identified with KVOO Tulsa, KGGM Albuquerque, KOME Tulsa, WKZO Kalamazoo and KIXL Dallas.

The Pearson firm also announced last week that Juanita Irene Hall, formerly of Radio Representatives Inc., Chicago, had joined the Pearson staff in Chicago. She was appointed last fall to succeed Kay Fisher who resigned, but was forced by illness to delay assumption of her new duties. Her background includes service with radio stations and radio representative firms.

WFIL BONUS PLAN

Set for 2,300 Druggists

NEW merchandising plan has been put into effect by WFIL Philadelphia for 2,300 independent druggists who are members of the Philadelphia Assn. of Retail Druggists, and who account for 75% of the area drug market. Used are point-of-sale displays, direct mail promotion and weekly feature of one product in a telephone jackpot quiz contest on the *Skip Dawes* disc jockey show.

The plan is a bonus for advertisers who buy the equivalent of six one-minute spots weekly for 13 weeks, with participating druggists mentioned during the quiz show on a rotating basis.

CAB Plans Ad Study

A NEW STUDY by Pat Freeman, sales director of Canadian Assn. of Broadcasters, will list all radio and other advertising by some 400 national advertisers using radio in Canada, plus advertising by non-radio advertisers. Mr. Freeman expects the study to aid in determining radio sales figures next fall and determining TV's effect by fall of 1953 in Toronto and Montreal on Canadian national radio advertising.

NEW RCA broadcast transmitter is now in operation at the Bloomfield, Conn. transmitting plant of WDRC Hartford. New equipment replaces transmitter which has been in operation since 1934.

Ahead of Police

FAST coverage of a finance company robbery almost resulted in jail for Jack Dentz, newsman for WCTC New Brunswick, N. J. Acting on a 3:30 p.m. tipoff, Mr. Dentz grabbed a tape recorder, rushed to the finance company and interviewed the office manager even before the police arrived. The radio reporter, hurrying back to WCTC studios, was detained by police, suspicious of his rush, until he convinced them he was not involved in the crime.

RCA Vans for Indonesia

FIRST of 40 radio broadcasting vans built by RCA for Indonesia has been turned over to representatives of the Indonesian government in New York ceremonies. The mobile units are equipped with RCA 150-w transmitters and associated equipment.

CPN-KNX SALES

First Quarter Revenue Up

COLUMBIA Pacific Network regional and KNX Hollywood local sales increased in revenue during the first quarter of 1952 as compared with the same period in 1951, according to Edwin W. Buckalew, assistant general manager in charge of sales.

Locally KNX radio showed a gain of 24% from Jan. 1 through Mar. 31, 1952, over the same quarter last year. Columbia Pacific Network's first quarter sales figures for 1952 were 30.5% above last year's first quarter, Mr. Buckalew reported.

Otto L. Tiedeman

OTTO L. TIEDEMAN, 49, of the WBAL Baltimore sales staff, died April 26 following a heart attack. With WBAL since October 1949, Mr. Tiedeman was well-known in Washington and Baltimore advertising circles. He was a prominent Maryland yachtsman and a member of the Gibson Island (Md.) Club.

BOOST Your Sales In HANNIBALAND*

*HANNIBALAND—
the large 41 county area surrounding Hannibal, Mo., Quincy, Ill. and Keokuk, Iowa.

with KHMO

Give your sales a big boost—a shot in the arm—in the rich, midwestern farm area around Hannibal, Mo., Quincy, Ill. and Keokuk, Iowa. You can do this for the *lowest* cost-per-listener, and with a guarantee to reach the rural and city buying power by using KHMO. This is true because the majority of the radio families living in Hannibaland* tune and stay tuned to KHMO. For proof and availabilities write, wire or phone KHMO or Pearson today.

Peabody Winners

(Continued from page 28)

commended for an "extraordinary public service" in which the programs permitted the facts to "tell their own story, without benefit of artificial coloration." The series covered narcotics, dishonest sports "and other national maladies."

For "radio entertainment (non-musical)," an award was bestowed on NBC's Bob Elliot and Ray Goulding—*Bob and Ray*—as "the foremost satirists in radio." Their fare was described as "fast moving, deadly accurate, frequently outrageous and extremely funny." Their stock should rise "although this is their first year of network broadcasting," the citation said.

Teen-Age Program

KPOJ Portland "served its community well during 1951," another citation explained, "through various carefully conceived and well executed programs." As a result, a Peabody award went to the MBS affiliate for "meritorious local public service by radio." Cited were *Careers Unlimited*, for aiding teenagers. "Indicative of the high quality and social usefulness" of the program is the fact that it has been rebroadcast for two years over KBPS Portland, owned by the city's public schools.

Another example is *Civic Theatre of the Air*, designed to stimulate community interest in the city's Civic Theatre, a non-profit organization using amateur talent. There were "similar worthwhile enterprises," the citation added.

WSB Atlanta won a coveted dual honor of *The Pastor's Study* on WSB and *Our World Today* on WSB-TV—the "first time" Peabody handed out a joint radio-TV award on a regional basis. They were described as "typical" of WSB enterprise last year.

The Cox Radio-TV properties, licensed to the Atlanta Newspapers Inc. (Atlanta *Journal* and *Constitution*), have promoted "the best interests" of the city since the inception of each operation, the award noted. "These stations in 1951, as in previous years, gave a practical demonstration of how radio and television can complement each other in the public interest," it was pointed out.

WQXR New York's citation was issued for "radio youth programs," with a low bow also to Dorothy Gordon, their moderator; Iphigene Ochs Sulzberger, director of special activities for the *New York Times*, station licensee and the Liberty network, which rebroadcast the series on tape.

It was noted that the *Times Youth Forum* was aired not only locally but also in other major cities, "coast to coast and over trans - Atlantic facilities." The forum consists of student discussions on varied topics.

Alistair Cooke, U. S. correspondent for the *Manchester Guardian*, was recognized for his *Letter from America* via shortwave facilities of the BBC. Mr. Cooke's description of the American scene was labeled "delightful" and "penetrating." He was praised for contributing to international understanding by radio.

For Mr. Murrow, CBS' distinguished radio-TV commentator, the Peabody citation represented a notable catch—it meant he had followed up his 1950 *Hear It Now* accolade (citation for second place) with a greater honor for *See It Now*, the network's video counterpart.

CBS Television's *See It Now* was acclaimed for "television news and interpretation." Mr. Murrow's widely-acclaimed tele-documentary was adjudged as a "simple, lucid, intelligent analysis of top news stories" and cited for a "strikingly effective format for presenting news and personalities . . . with humor, sometimes with indignation, always with careful thought." The citation also commended Fred W. Friendly, co-producer of the series.

NBC received its honor for "television entertainment (music)" in the form of Gian Carlo Menotti's *Amahl and the Night Visitors*, first telecast last Christmas Eve. It was repeated on Easter Sunday. The citation noted the acclaim accorded the one-act opera and "its significance to television." As the first operatic work specifically commissioned for this medium, the work "is living proof that television can accommodate itself to greatness."

Fine Direction by Segal

ABC's *Celanese Theatre* productions were found to be accomplished with "fidelity, intelligence, and scrupulous regard for the intentions of the playwright . . . its direction by Alex Segal is among the finest on television." This series of American plays also drew an award—for "television entertainment."

Distinction in the "television educational programs" field was meted out to WCAU-TV Philadelphia for *What in the World*, presented by the U. of Pennsylvania and the University Museum over CBS-TV. Series was lauded for "the stimulating manner in which it brings noted scholars . . . to the television screen for a delightfully entertaining and informal display of their learning." Added the citation: ". . . superb blending of the academic and the entertaining."

There were no special awards for 1951, nor for children's programs as such. Entries are submitted by individual stations, networks, newspaper and magazine editors, listener groups and other organizations. The board also takes cognizance of recommendations by its "listening-post committee."

Greatest stir among acceptance speeches, limited for broadcast requirements, was made by Mr. Menotti. After expressing his gratitude for the freedom and opportunity allotted him in composing his TV opera, he said he regretted the intrusion of commercials in the middle of some programs, and blandly proposed his own personal boycott of products whose commercials "interrupt artistic achievements." While his audience gasped, he suggested it might mean his missing quite a few mild cigarettes.

The composer emphasized that it is up to audiences to fight for better programming, and quoted George Bernard Shaw's remark that if they do not fight to get what they deserve, they might deserve what they get.

Referring to recent bans on broadcasting congressional hearings and noting that the press has been a more aggressive defender of news freedom than broadcasters have been, Mr. Murrow said a threatening danger is that television might become too complacent. Television, he emphasized, is no intrusion to news and, to maintain its effectiveness, must not limit itself to the sponsor's investment, but should assert its own integrity and build its own ingenuity.

'Auditory Wall Paper'

American radio listening is a sort of "auditory wall paper," according to Mr. Cooke, whose acceptance noted differences between American and British broadcasting systems, American and British audiences. It is not similarities but dissimilarities—and the understanding of and respect for them—that often make friendships meaningful, he said.

In his survey of television's immediate future, Mr. Weeks anticipated the presentation of good Hollywood pictures on the air and repeats of the better programs to provide continuous and high level consumption. Bowing to extensive plans for coverage of national political conventions this summer, he hoped the issues would be "fairly fought" on television.

Members of the Peabody National Advisory Board are:

Edward Weeks, Editor, *Atlantic Monthly*, Boston, chairman; Mrs. Elizabeth Ames, executive director, "Yaddo," Saratoga Springs, N. Y.; John H. Benson, chairman, Committee on Consumer Relations in Advertising, N. Y. C.; Bennett A. Cerf, president, Random House, Inc., N. Y. C.; John Crosby, radio columnist, *New York Herald Tribune*; Mark Ethridge, publisher, *Louisville* (Ky.) *Courier-Journal* and *Times*; Earl J. Glade, Mayor, Salt Lake City, Utah; Philip Hamburger, television writer, *The New Yorker*; Joseph Henry Jackson, literary editor, *San Francisco* (Calif.) *Chronicle*; Waldemar Kaempffert, science editor, *New York Times*; Mrs. Dorothy Lewis, Coordinator, U. S. Station Relations, United Nations; Ralph McGill, Editor, *Atlanta Constitution*; Paul Porter, former chairman, FCC, Washington, D. C.; Dr. I. Keith Tyler, director of radio education, Ohio State U., Columbus; Harmon W. Caldwell, chancellor, University System of Georgia, Atlanta, ex-officio, and John E. Drewry, Dean, Henry W. Grady School of Journalism, U. of Georgia, Athens, ex-officio.

EDITION of 1952 Publicity Directory has been published by Publicity Adv., Kalamazoo, Mich. Book contains names of over 2,000 consumer, farm and business trade publications which accept free publicity on new products, books, literature and new methods and services.

AWARDS luncheon of Virginia Associated Press Broadcasters brought together this foursome at Washington's National Press Club fortnight ago. Standing (l) Tony Vacarro, AP White House correspondent, who was principal luncheon speaker, and Fred L. Hart, general manager, WLPM Suffolk, VAPB president; seated (l) Frank H. Fuller, AP Richmond, Va., bureau chief, VAPB secretary, and Maynard Dillaber, news director, WMVA Martinsville. Mr. Dillaber succeeded Mr. Hart as VAPB president [B•T, April 28].

WABB ASSAULT CASE

Verdict Is Returned

J. ED TAIT, 43-year-old former official of an AFL motion picture operators' labor union, was convicted April 23 of a charge of conspiring to assault a radio technician during a strike against WABB Mobile, Ala., in January 1950 [B•T, Jan. 23, 1950], according to reports from the station.

Mr. Tait was fined $450 and given a 60-day suspended jail sentence, WABB said. He immediately appealed the verdict and was released on bond. A grand jury indictment accused Mr. Tait of conspiring with four other persons to assault Dean Durham, former WABB radio technician. The remaining four persons still face trial, it was further reported.

FLOOD WORK

More Stations Report

FURTHER details on flood coverage and fund-raising for flood relief were reported last week with several more stations recording their services during the emergency [B•T, April 21, 28].

WCCO Minneapolis-St. Paul climaxed its Mississippi - Minnesota Rivers flood coverage with an *Emergency Call* program April 15 featuring a distress call by Gov. C. Elmer Anderson who reported on President Truman's allocation of $100,000 in emergency funds for flood relief.

Staffers of KGCU Mandan, N. D., broadcast messages of the Missouri River flood until their transmitter was inundated, then relayed their flood information to KGCU's rival station, KFYR Bismarck. The Bismarck station, after covering the flood, started a fund-raising campaign which brought donations of $9,000.

Omaha stations KMTV (TV), KBON, KFAB and KOWH helped raise $10,674 for three relief agencies, Red Cross, Salvation Army and Volunteers of America. All Omaha-Council Bluffs stations were cited by the National Assn. of Radio News Directors board of directors for their flood work.

WOL Washington reported Mike Hunnicutt raised $300 to $400 for the Red Cross for flood aid during his all-night program April 26.

Nebraska Nominations

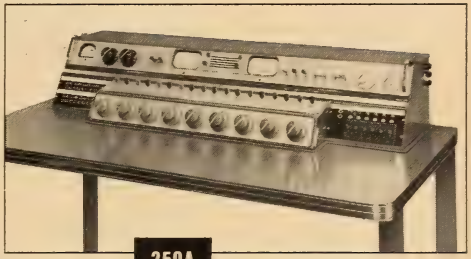
NEBRASKA's 23 radio and two TV stations have been nominated for the Ark-Sar-Ben Good Neighbor Award for service rendered in time of disaster. Sam W. Reynolds, civil defense director for Omaha and Douglas County, made the nominations. The award is given annually to the individual or organization making greatest contribution to welfare of the state.

HOBSON SINKING

WCSC Gives Full Coverage

SINKING of the *USS Hobson* was given unprecedented airing over WCSC Charleston, S. C., as a public service to the large Navy family of the naval installation in that city, many of whom knew and were concerned about the *Hobson's* personnel.

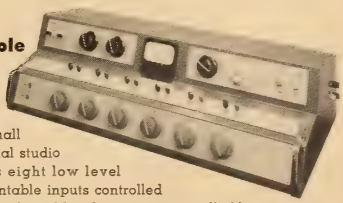
At 12:30 p.m. April 27, the first unconfirmed bulletin was aired.



The confirmed story of the *Hobson* collision with the carrier *Wasp* was broadcast over WCSC at 1 p.m. Throughout the day, WCSC played the story to the hilt with bulletins and special interviews with naval authorities. At 7:38 p.m., WCSC interrupted the *Amos 'n' Andy* show to broadcast the list of survivors.

WCSC said that other Charleston stations also interrupted their regular schedules to air the latest Hobson developments.

WITH EFFICIENT NEW ALTEC CONSOLES



The Altec 250A and 230B consoles represent a new quality standard for speech input equipment. Their frequency response, noise level and low distortion more than meet the most stringent broadcast requirements. They are compact and *completely* self-contained, without external power supplies, junction boxes or other equipment. Flexibility, compactness, accessibility and ease of operation are just a few of the outstanding features of these new consoles.

250A console For the ultimate in quality control the 250A Console is the finest unit ever made for AM, FM or TV studio use. Its compactness is made possible by the use of newly designed miniature plug-in preamplifiers, line amplifiers and power supplies. The preamps are only 1⅝"x4¼"x9". The line amplifiers and power supplies are 2⅜"x4¼"x9". You will find that the new Altec 250A Console leads to better control, more economical operation.

Frequency Response (± 1 db 20-20,000 cycles)
Very low distortion
Very low noise level
As many as 12 balanced line mike inputs (mix 7 simultaneously)
4 line inputs
4 utility inputs
(mix 4 simultaneously)
Miniature plug-in amplifiers and power supplies
Color coded controls according to function
Two output channels with illuminated VU meters
Complete patching panel
Only two amplifier types, three tube types
Built-in tube checking facilities
Compact (36" x 31" x 55" including desk)

230B console

The 230B is the ideal console for small station or individual studio operation. It has eight low level microphone or turntable inputs controlled by four mixing controls and four line inputs controlled by two mixers. Its low height (9⅜") provides maximum studio visibility. The controls are color coded and all parts are readily accessible. No other console in its price range offers as much as the Altec 230B.

ONTARIO OUTLETS

Fight Copyright Issue

TEN Canadian small-market stations have filed in Ontario Supreme Court to stop collection of copyright fees by the Composers, Authors, Publishers Assn. of Canada (CAPAC). Ontario stations took the action following a two-day meeting of the Canadian Assn. of Broadcasters' Toronto Board of Directors.

CAPAC sought to collect copyright fees on a percentage basis under a new revenue ruling set by the Canadian Copyright Appeal Board at Ottawa. The association was empowered by the board to inspect station books and determine a gross revenue figure on which to base fees for a fiscal year [B•T, April 21].

The 10 stations cite their inability to predetermine what their gross revenue will be for the year on Jan. 1 of that year as provided in the revenue ruling by the board.

They also maintain CAPAC should not collect on percentage of a station's gross revenue, since that revenue is derived only in part from use of CAPAC music. The stations already have stopped playing CAPAC music and plan to use only BMI Canada Ltd. and public domain music.

Virtually all Canadian stations are supporting the CAB board stand on the copyright tangle. Stations filing in court action are: CHML and CKOC Hamilton, CKBB Barrie, CJBQ Belleville, CKLB Oshawa, CJOY Guelph, CKFI Fort Frances, CFOS Owen Sound, CKTB St. Catherines and CFOR Orilla.

WRITERS' STRIKE

Would Hit Network Shows

SUCH sponsors as Piel's Beer, Shell Oil, Bayer Aspirin, Metropolitan Life Insurance and Sanka Coffee will be affected when Radio Writers Guild calls a strike of its news and continuity writers, it was indicated last week when the guild announced that more than 100 individual shows would be hit by a walkout of continuity writers.

Services of news writers and editors would be withdrawn from an additional total of 27 broadcast hours per week, with another 14 hours of sustaining news shows also to be affected. RWG figures exclude both radio and TV shows authored by freelance writers, who are expected to join the strike proposed against NBC, CBS and ABC.

Union spokesmen also announced the dropping of the guild request for national negotiations, a major issue in its pay dispute for news and continuity authors.

NET earnings of $1,515,506, equal to 79 cents per share, by Admiral Corp., were announced last week by Ross D. Siragusa, president, on first quarter sales of $43,970,356 compared to $2,403,344, or $1.25 per share for same period in 1951.

KTRH COVERS 'EXERCISE LONGHORN'

Uses Full-Time Staff in Field for Daily Reports

COMMENDATIONS have gone to KTRH Houston from the Army for its full-time and competent coverage of "Exercise Longhorn," huge joint Army-Air Force maneuvers held from March 18-April 11.

The gigantic military exercise was also an all-out "Operation Broadcasting" for the independent Texas station which devoted 7½ hours of air time and some 1,000 man-hours to broadcast daily coverage of the Texas-staged event. Other independent Texas stations covering the exercise included KTEM Temple and WACO Waco, the latter originating for Liberty Broadcasting System.

KTRH maintained a full-time crew to cover the exercise involving 110,000 men, set up to simulate an invasion by an aggressor nation from Corpus Christi after it presumably had invaded and taken South America and Cuba and had driven a wedge from Corpus Christi through Texas to the town of Lampasas.

Covering all phases of the maneuvers with Fort Hood as its base of operations, the KTRH special events crew of six men included Tom Jacobs, program director; Corwin Riddell, news director; Jim Ross of the news and special events staff; Jack Drake of the news staff; Julius Smith, assistant chief engineer, and Jim Byrd, engineer. Daily roundups were broadcast over remote wire.

Pre-Exercise Pickup

Stressing interpretation and documentation, KTRH presented its first broadcast March 19 after conferences with military personnel in San Antonio. The broadcast included explanations of the military situation by Lt. Gen. William Hoge, Fourth Army commander and director of Exercise Longhorn, and Maj. Gen. Edward J. Timberlake of the Ninth Air Force.

Mr. Drake broadcast on-the-scene interviews from the first plane carrying men into the battle area and flew in with the 31st Dixie Division's 8,000-man air lift, interviewing the paratroopers.

Mr. Smith, who doubled as newsman and engineer, and Mr. Drake broadcast to listeners the actual sound of battle after they ventured into no man's land to record the action. KTRH also secured an exclusive interview with Army Secretary Frank Pace Jr.

KTRH also gave Texans a documentary broadcast of the occupation of Lampasas, including the speech of aggressor Gen. Charles D. W. Canham, commander of the 82nd Airborne Division, who posed as "Gen. Gustav Muller" of the Aggressor Army.

Lt. Bob Mackall, former WFMJ Youngstown, Ohio, program director, now radio-television-newsreel officer for the public information office of the Fourth Army in San Antonio, cited KTRH's coverage of the exercise. The station worked in co-operation with Lt. Mackall and Lt. Col. John J. Kelly, public information officer for Maneuver Direction Headquarters.

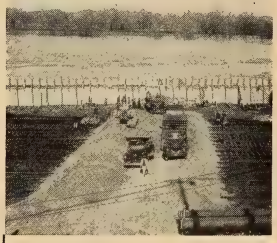
Col. Alvin E. Hebert (l) of Maneuver Direction Headquarters and KTRH engineer Byrd record critique of the exercise.

Gen. Hoge evaluates Exercise Longhorn's success at critique.

* * *

KTRH broadcast the final critique April 11 with talks by top Army and Air Force officers to the 500 unit leaders of the operation.

Mr. Smith drove more than 700 miles in five days getting interviews on recorders and transporting them back as far as 100 miles to Fort Hood for broadcast. In-the-field broadcasts were made by portable tape recorders, then edited into documentary style. Several special bulletins were presented by direct tape feeds. Other special equipment included gasoline-driven motor generators and equipment for converting 24-volt direct current.



BAB Clinic Postponed

THE SALES clinic scheduled by BAB for New York last Monday was postponed because of the illness of Vice President Kevin B. Sweeney, one of the leaders in the clinic series. Next clinic is set for today (Monday) in St. Louis. Others this week: Wednesday, Kansas City and Friday, Des Moines. The series extends through Sept. 19. New date for the New York clinic has not been designated.

KMTV-KMA Present Top Coverage of Flood Crisis!

Here's the greatest story of disaster coverage ever to come out of the Midwest. KMTV-Omaha and KMA-Shenandoah, Iowa, operating separately, presented to their audiences, outstanding TV and Radio coverage of the Missouri River Flood.

KMTV, Omaha, with 3 on-the-spot remote CBS-TV telecasts from danger areas, kept viewers up to date on flood happenings. Four motion picture cameras were working round the clock to record the epic-making struggle against the "Mad Missouri." Three daily news telecasts plus many "special events" programs, gave KMTV top flood coverage in the metropolitan Omaha area.

KMA, Shenandoah, Iowa, performed extra-heavy duties during the flood emergency. KMA's staff reported conditions in hundreds of square miles of non-metropolitan areas which were not served by local radio stations or daily newspapers. KMA's news and special events men maintained a 24-hour emergency broadcast and warning system for residents of the flood-stricken area.

Once again, the people in these areas who rely on KMTV and KMA for the Best in news and entertainment, received the most complete emergency coverage possible.

PROBLEMS?

Are you IN *or going into* TELEVISION?

With many years experience in all phases of television broadcasting, we offer an exclusive consulting service in selective markets to fit the needs of broadcasters, present or prospective, who require help in preparing and evaluating:—

1. Application Data
2. Cash Requirement Estimates
3. Appraisal of Competition
4. Production Facility Planning
5. Studio and Space Layouts
6. Organization and Personnel Requirements
7. Integration of TV with Existing Operations
8. Operating Policies-Practices
9. Programming Policies, Formats and Schedules
10. Expense Budgets
11. Revenue Estimates
12. Coverage Data
13. Market Appraisals
14. Network Affiliation Potentials
15. Rate Cards

AND if you have financing problems, we will be glad to discuss your requirements with you—confidentially, of course.

We are neither lawyers nor radiation engineers, but we will work with the representatives you may now have or may select, in these fields, in the preparation of material for your application and supporting evidence, we will collaborate directly with you and your staff on every other aspect of a complete station construction, fiscal, organizational and operating plan.

We stay with you until you are "on the air" and as long afterwards as you have need for our services.

Send for a brochure describing our service in more detail.

Inquiries which will be treated confidentially and acknowledged promptly may be addressed to:

It's great to be five months old and the first dog actually raised and trained under TV cameras. My master is Rollie Johnson, Sports Director of WTCN in Minneapolis, St. Paul. He figures more people will understand and own dogs if *they* see how much fun *we* have.

This Rollie is a swell master! Even when his evenings include a TV program, a speech, telecasting a sports event, or his Big Brother meeting . . . he always winds up with time to play with *me*.

Rollie is starting his TV fishing contest on WTCN soon. Last year the entries, from a one pound sunnie to a fifty pound sturgeon, totaled four tons of fish! Lots of tackle and equipment got sold, too! Rollie travels around a lot, takes lots of movies of folks at their favorite sport, and shows 'em on our programs. Seems like fellows get a kick out of seeing themselves on TV.

Guess I'm just one more in the Rollie Johnson fan club; I know what folks up here mean when they say people like Rollie are old friends instead of announcers. By the way, some spots on some of his sports shows are open for sponsorship. Rollie and I would like to have you "aboard" if we can help you to sell your product.

VHF PROPAGATION

New NBS Report Studied

By EARL ABRAMS

DOES new information on VHF propagation, showing that consistent long-distance reception in those bands is possible, pose a threat to TV?

That possibility, fanned by newspaper stories last week, had TV engineers searching National Bureau of Standards Report No. 1172 for guidance. It is entitled "A New Kind of Radio Propagation at Very High Frequencies Observable Over Long Distances."

That report told how a VHF signal transmitted by Collins Radio Co. at Cedar Rapids, Ia., was received consistently via skywave reflection at NBS's Sterling, Va., receiving station, 800 miles away.

Up to now, the theory was that VHF signals are not reflected from the ionosphere.

Consensus of TV engineers is that the facts are significant, and hold out a promise for communication and possibly other special purposes, but are not a threat to TV.

That attitude was summed up by an FCC official in this manner:

• The Commission knew about these tests before it set up its TV allocation table in its final report [B•T, April 14].

• The received signals in this experiment are of such low intensity that they do not seem significant as a TV interference factor.

• The transmitting and receiving antennas are highly directional and the receiver is highly sensitive, much more so than is common for commercial TV stations.

Inter-Continental TV

Possibility that the results hold out hope for inter-continental TV was minimized by most observers, at least for the immediate future. Developments of this sort are a matter of decades, one authority commented. He likened this development to that of the atom bomb experience. How to obtain fission was generally known in scientific circles years before it was actually accomplished. But it was not until the U. S. decided it was necessary, that the money and energies were thrown into actual accomplishment.

Immense powers necessary to relay a 6 mc video picture are "fantastic," according to some consulting engineers. There may be other and less expensive ways of accomplishing the same result, they pointed out.

Only manner in which the new findings may have an impact on TV is if a military or other government agency requires the use of these frequencies for special purposes. That would mean an allocation hearing—unless the world situation degenerated to all-out war—and TV broadcasters would have opportunity to protect themselves. Bands involved encompass Channels 2-6.

If the military or other government agencies decided that the band would be useful for defense or diplomatic purposes, then the position of the low-VHF band TV operators would be serious, it is believed by some. These observers recall the Commission's 1945 allocations report which spoke of the insufficient spectrum space available for TV in the below-300 mc region "to make possible a truly nationwide and competitive television system." They emphasize the FCC's next sentence: "Such a system, if it is to be developed, must find its lodging higher up in the spectrum where more space exists."

Former FCC Chairman Wayne Coy in several speeches during his tenure urged the move of all VHF to the UHF frequencies. Fact that the Commission never seriously contemplated such a move was explained by one FCC staff executive after the final TV allocations report was issued last month [B•T, April 14] on the ground that there would not be sufficient room in the 470-890 mc band for a "truly nationwide and competitive television system."

Tests began Jan. 23, 1951 on 49.8 mc, according to the NBS report. Continuous wave emissions were used. Identical high gain 41.2-ft. high horizontal rhombic antennas with 500-ft. legs were used at both the transmitting and the receiving positions. Power of 23 kw was put into the antenna. Receiver bandwidth was 3 kc.

Signal Intensity Charts

Included in the report are charts showing signal intensity received in April 1951 and June 1951. They varied from a high of 25 db above one microvolt at about noon to a low of 4 db above one microvolt at about 11 p.m.

Signal was consistently received, irrespective of season, time of day or geomagnetic disturbances. Strength of the signal was actually enhanced during sun spot conditions (which normally cause fading on usual high frequency 3 to 30 mc circuits) and during passage of meteors. The latter phenomenon was accompanied by loud heterodyne whistles.

"Scattering" effect from the E layer of the ionosphere was advanced as an explanation of the phenomenon, with the possibility that the D layer played a part in reflecting the signals.

Future experimentation for frequency and distance dependence is planned, as is a more detailed study of the received signal. During a short period a receiving test was made with a station in Bermuda, 2,000 miles from Cedar Rapids, but reception was erratic and not associated with sporadic E ionization, NBS stated.

Last February NBS reported a new theory of VHF propagation which held that the bending of signals of this band over the horizon—heretofore considered in the nature of a "freak" condition—might be considered normal and not an exception to the "line-of-sight" theory of VHF propagation [B•T, Feb. 4]. Tests had shown, NBS reported, that such conditions were too frequent and regular to be con-

(Continued on page 96)

ALLOCATIONS CHANGES

Asked of FCC

FIRST requests for changes in the table of assignment in the FCC's Sixth Report and Order on TV [B•T, April 14] were filed with the Commission last week.

Asking for changes in specific city-by-city instances, the following petitioned for changes: WMCT (TV) Memphis, Tenn.; WISC-AM-FM, Madison, Wis.; KTEM-AM-FM Temple, Tex.; KXEL-AM-FM Waterloo, Iowa.

The Commission erred when it ordered WMCT to change from Channel 4 to Channel 5, the Memphis station averred. Error is due to the fact, its petition stated, that the distance from its transmitter to Nashville, Tenn. (also assigned Channel 5) is 187.5 miles —two and a half miles less than the 190 mile co-channel minimum established for Zone II stations.

In order to meet the established minimums, WMCT asked that its show cause order be amended to require it to change to Channel 3, which was assigned to Memphis in the final report.

Assignments of Channel 5 to Nashville and Channel 3 to Memphis were not in the proposed Third Report last year, the Scripps-Howard station *(Memphis Commercial-Appeal)* pointed out. Therefore it had not objected to the requirement that it change from Channel 4 to 5 when comments were invited last fall.

WISC Comments

WISC in comments last fall on the Third Report proposals had proposed that VHF Channel 3 be reserved for educational use and the remaining three UHF channels be made commercial—so that all commercial TV stations in the Wisconsin capital be competitive. The Commission had proposed to reserve a UHF channel for educational use, permitting commercial operation of the sole VHF channel and two of the three UHF channels.

Doubt that the Commission judged the Madison situation correctly was expressed by WISC. It called attention to the fact that it had filed two comments and referred to the discussion in the Sixth Report as probably using the wrong comment.

Reservation of VHF Channel 3 instead of a UHF channel would comply with the Commission principle regarding educational reservations, WISC averred. It pointed out that Madison is an educational center and the Commission said in its final report that wherever it could, it assigned a VHF frequency in those communities for educational use. The Wisconsin station also pointed out that in 16 educational centers, the Commission assigned the sole VHF wavelength

(Continued on page 97)

CBS-TV CLINIC

Post-Freeze Outlook Explored

PROBLEMS and procedures of television station operation, starting with the application to FCC for authority to construct, were appraised for some 250 executives from CBS-TV and CBS Radio affiliates at a two-day "post-freeze" clinic conducted by CBS-TV in New York last Thursday and Friday.

J. L. Van Volkenburg, president of CBS Television, who called the clinic an aid to both prospective and present TV broadcasters, told the assembly at the opening session Thursday that FCC's lifting of the freeze means that "television can begin to stretch its muscles and reveal its huge strength."

Reviewing TV's growth since the first CBS Television clinic in March 1948, he pointed out that CBS-TV then provided 78 minutes of network programming daily, of which 32 minutes were sponsored, whereas today the network is programmed for about nine hours daily, with 6¼ hours of that total sponsored.

"Even with this phenomenal increase in the size and significance of television," he added, "we know it's still only the beginning."

"We meet today at the very threshold of the explosive expansion of a great social, cultural and economic force," Mr. Van Volkenburg declared.

Fred M. Thrower, vice president in charge of network sales, cited some 50 national advertisers not yet in TV but who he predicted will move more and more into this field.

He pointed out that CBS-TV's business in January and February was 95% ahead of that for the same period in 1951, and said CBS-TV leads all networks in total number of sponsored quarter-hours, including all new business on the books but excluding political convention and election coverage. These sponsored quarter-hours on CBS-TV now number 164, as against 259 sponsored on all three other networks, Mr. Thrower asserted.

He cited TV's dropping cost-per-thousand—from $3.49 three years ago to $1.79 now—and increased sales results as "simple economic factors" which, he said, have led 98% of the nation's leading food and drug firms to increase their TV budgets during the past two years.

Turning to commercial programming, Hubbell Robinson Jr., vice president in charge of network programs, told the clinic that a network must create "a balanced line of merchandise" to fit the varying budgets of advertisers.

"You have a right to expect from CBS Television," he said, "programs that meet these three requirements: Shows the audience will like so well they will make them into hits; shows that sell goods; shows with great staying power."

He expressed the view that there always will be a place for "a limited number of big spectacular shows," but that "the big market lies in creating a product that gives a profitable, rewarding value for the medium-priced advertiser."

Sig Mickelson, director of news and public affairs for CBS-TV, urged that both stations and networks schedule strong programs in the public interest, asserting that TV has unprecedented value as a means for public improvement. Further, he said, there is no need to "be frightened by the words commercial and commercialism." He cited news shows as traditional money-makers in radio which can also be money-makers in television, paying dividends not only in revenue but in public relations, community service, and community prestige.

Special events, education, religion, government and politics were among other fields in which he said TV can make significant contributions in local, regional and national service.

Charles Luckman, of the firm of Luckman & Pereira, architects of CBS Television City in Hollywood, outlined differences between the needs of motion picture studios and those for TV use. He said a study

television applications

Digest of Those Filed With the FCC April 25 through May 1

(† Indicates pre-thaw application re-filed.)

Boxscore	VHF	UHF	Total
Applications filed since April 14	13	7	20

Listed by States

†COLORADO SPRINGS, Col.—TV Colorado Inc., Ch. 11 (198-204 mc), ERP 200 kw visual; antenna height above average terrain 1,816 ft., above ground 187 ft. Estimated construction cost $304,071, first year operating cost $213,000, revenue $192,400. Studio location Exchange National Bank Bldg. Transmitter location "The Horns," 1.3 mi. N. Cheyenne Mtn., 38° 45′ 42″ N. Lat., 104° 51′ 51″ W. Long. Studio equipment DuMont, transmitter DuMont, antenna RCA. Legal counsel Pierson & Ball, Washington. Consulting engineer E. C. Page, Washington. Applicant firm includes licensees of KVOR Colorado Springs, Col., and KGHF Pueblo, Col., two stations each independently owned, each with 50% interest in TV Colorado Inc. Representatives of the two stations would manage station. Principals include: **James D. Russell,** president and general manager of KVOR, **Gifford Phillips,** president of of KGHF, **Robert Ellis,** general manager of KGHF, **Betty Z. Russell,** of Colorado Springs, **H. C. Harmon,** Colorado Springs businessman, and **Harry C. Schnibbe,** Denver businessman.

†JACKSON, Miss.—Mississippi Publishers Corp. (*Jackson Daily News*), UHF Ch. 25 (536-542 mc), ERP 197 kw visual; antenna height above average terrain 522 ft., above ground 522 ft. Estimated construction cost $404,030, first year operating cost $175,000, revenue $125,000. Studio location to be determined. Transmitter location Pascagoula and S. West Streets, Jackson, 32° 17′ 48″. N. Lat., 70° 11′ 59″ W. Long. Studio equipment GE, transmitter GE, antenna GE. Legal counsel Wheeler & Wheeler, Washington. Consulting engineer Raymond M. Wilmotte, Washington. Principals include: Second Vice President **Major Frederick Sullens** (11%), editor of *Jackson Daily News,* and Treasurer **Walter G. Johnson** (25%), business manager of *Jackson Daily News.*

†WILKES-BARRE, Pa. — Wyoming Valley Bcstg. Co., UHF Ch. 34 (590-596 mc), ERP 250 kw visual; antenna height above average terrain 1,004 ft., above ground 243 ft. Estimated construction cost $397,500, first year operating cost $225,000, revenue $250,000. Studio location 88 N. Franklin St. Transmitter location Penobscot Knob, 41° 10′ 58″ N. Lat., 75° 52′ 25″ W. Long. Studio equipment GE, transmitter GE, antenna GE. Legal counsel Miller & Schroeder, Washington. Consulting engineer John Creutz, Washington. Applicant is licensee of WILK-AM-FM Wilkes-Barre. Principals include: President **Dr. Isaiah C. Morgan,** M.D. (12½%), and Secretary **Roy E. Morgan** (12½%), general manager of WILK-AM-FM.

ABILENE, Tex. — Citizens Bcstg. Co., Ch. 9 (186-192 mc), ERP 2.8 kw visual; antenna height above average terrain 207 ft., above ground 282 ft. Estimated construction cost $168,623.50, first year operating cost $140,000, revenue $170,000. Studio-Transmitter location 25th and Butternut, Abilene, 32° 25′ 11″ N. Lat., 99° 44′ 12″ W. Long. Studio equipment DuMont, transmitter DuMont, antenna RCA. Legal counsel Krieger & Jorgensen, Washington. Consulting engineer George P. Adair, Washington. Applicant is licensee of KWKC Abilene. Principals include: President **W. P. Wright** (25%), whose interests, in addition to KWKC, include 10% of KRIG Odessa, Tex., automobile distributing companies, ranches, real estate, and petroleum distributor; Vice President **O. D. Dillingham** (25%), whose interests, in addition to KWKC, include a dairy, various investment companies, banks and other businesses, and **A. C. Etter** (25%), whose sole interest is KWKC, where he is general manager.

NEW APPLICANTS

Four Submitted

ONLY one new TV application was filed last week, but three were resubmitted under the new TV allocations rules.

New application was from KWKC Abilene, Tex., seeking Channel 9, proposing 2.8 kw power, with 207 ft. antenna height above average terrain. Station proposes to spend $168,623.50 for construction.

Re-submitting applications were *Jackson* (Miss.) *Daily News,* which seeks UHF Channel 25, with 197 kw, 522 ft. antenna height above average terrain. It proposes to spend $404,030 in construction. WILK-AM-FM Wilkes-Barre, Pa., is asking for UHF Channel 34, with 250 kw, 1,004 ft. antenna height and plans to spend $397,500 in building. Combination of the licensees of KVOR Colorado Springs and KGHF Pueblo is asking for Channel 11, with 200 kw, 1,816 ft. antenna height. Construction costs are estimated at $304,071. Each licensee owns 50% of the new company.

Among others announcing their TV station plans were WJR Detroit (see separate story this page), WMGM New York (see separate story on page 68) and WTRF-AM-FM Bellaire, Ohio, which announced that it would re-file for Wheeling, W. Va., Channel 7, with 316 kw, and plans to spend $700,000 in construction.

GOODWILL PLANS

Seeks 4-Station Network

PLANS to build four TV stations, linked together as a regional network, were revealed last week by WJR Detroit.

John F. Patt, president of The Goodwill Stations Inc. (WJR, WGAR Cleveland and KMPC Los Angeles), said the decision to build the stations followed extensive study of the FCC's Sixth Report & Order [B•T, April 14].

Mr. Patt said WJR will apply for UHF Channel 50, for Detroit; Channel 11 in Toledo, Ohio; Channel 12 in Flint, Mich., and Channel 5 in Bay City, Mich.

All four proposed stations will be in cities now covered by WJR radio.

Programs for the regional network will originate from all four stations. If plans are approved, educational, farm, special event and entertainment programs of area interest will be telecast over the network.

Cost of the four stations was estimated at $2,200,000. Earmarked is $1,000,000 for Detroit, $600,000 for Toledo, and $300,000 each for Flint and Bay City.

Tentative location of the WJR-TV transmitter and tower is the Fisher Building with studios in the same building or in the New Center area.

WGAR Cleveland, WJR sister-station, is applying for UHF Channel 65 for its city.

Since present FCC rules prohibit one entity from owning more than five TV outlets, it appears that The Goodwill Stations Inc. does not plan to seek a TV outlet for its KMPC in Los Angeles.

UHF DEFENSE

Made in Jones Ohio Speech

IN A ringing defense of UHF coverage potentials, Comr. Robert F. Jones last Thursday attacked what he called "absurdities" in FCC's "firm, fixed and final" TV allocations plan. He charged that the Commission has "tried to legislate instead of regulate" the industry.

"The *purpose* of the allocation plan being adopted by the Commission is to create a nationwide, competitive television system, but the *effect* . . . is to deny local television to cities not included in the (allocations) table," he asserted.

Comr. Jones, dissenter *in toto* to FCC's final TV "freeze" lift report, addressed the Ohio Assn. of Radio-TV Broadcasters Management Clinic, meeting at Columbus, Ohio, May 1-2. His speech bristled with criticisms of the Commission's findings, some of which were contained in his original dissent [B•T, April 14; Sixth Report supplement].

Harking back to 1945, when a previous Commission handed down VHF assignments to 158 metropolitan centers, Comr. Jones declared:

"Little or no thought was given to efficient use of the channels. Today the Commission tries to justify all of those assignments, which are occupied by licensees, on the erroneous ground that VHF channels have a greater potential to cover wide areas than UHF channels."

'Faults' Listed

Today, the majority claims that VHF now covers rural areas better from VHF stations in the largest cities are "fallacious reasoning from an engineering standpoint" because either VHF or UHF "can be made to cover wider areas than the other," the FCC Commissioner asserted. He said the Commission has attempted to "make the arbitrarily wide minimum mileage separations (of 1945) the bone and sinew of the 1952 firm, fixed and final allocation plan."

Among the "absurdities" and "faults" stemming from "this chain of events," Comr. Jones continued, are these:

● "Inefficient use of the spectrum," with shrinking of the present 12 VHF channels to the equivalent of four in the northeastern part of the country (New York, etc.).

● Assumption that "every city and hamlet in the U. S. will use maximum powers and antenna heights."

● The plan "excludes all local television service from every city . . . except the favored 1,274" and provides 889 cities "with just one local channel" despite the competition factor.

● Introduction of UHF is prejudiced "with no circulation of receiving sets versus the VHF with a circulation of 17 million VHF-only receiving sets—a prejudice "not confined to the intermixture cities."

● Plan "throws the heaviest financial burden upon those least able to pay" (UHF operators).

● UHF service is provided by and large for small cities, thus wasting "the natural potential of UHF over man-made noise in the biggest cities."

Scores Attitudes

Scoring the "UHF is wonderful —you take it" attitude of one VHF multiple station-owner, Comr. Jones complained that Commission Rules & Standards require 2,000-ft. antenna heights at 1,000 kw on UHF "to compete with relative coverage of VHF channels operating at 500 feet at maximum power on the basis of minimum co-channel separations."

UHF does not cover the same areas and relative number of locations as VHF unless 2,000-ft. antenna heights are used against 500-ft. antenna heights for VHF when separations are based on minimum spacings, Comr. Jones observed. He also cited lack of information on tube and power costs per hour for comparative size UHF-VHF transmitters—that a 10 kw UHF transmitter costs $4.90 and a 50 kw VHF $4.70 per hour.

Turning to coverage potentials, Comr. Jones cited the Commission's Third Notice of 1950-51 and charged that technical efficiency charts "were not distributed to the Commission until one year after the Third Notice was made public and until the die had been cast for this decision." He traced steps leading to FCC's assignment policy:

Hard and fast mileage separations based upon a New York sized maximum power and antenna height for the smallest cities in the country give us meaningless circles on the maps of the United States. They have as little relationship to efficiency as tossing poker chips upon the maps and drawing circles around them. These circles have no relationship to service areas. They have no relationship to the natural trading areas or the areas of cultural influence of the cities included in the plan. They are related to nothing remotely connected with any reasoning concocted a year later to defend the plan from an engineering or legal standpoint.

The only relationship these circles have to anything in the plan is:

(1) The Commission wants to give VHF to large cities; (2) it will give VHF to smaller cities if there isn't a bigger city within artillery range; (3) the distance between centers of two closest circles, at least one of which does not represent an existing transmitter site, because a minimum separation for the national plan: (4) existing licensees have a property right in the channels occupied by them and will not be disturbed unless separations between them can be made larger; (5) the circles will not be moved even if two circles can be used in two smaller cities in place of one in a larger city.

These meaningless circles centered at the largest cities is the assignment policy of the Commission. This assignment policy is incorporated into the general Rules and Regulations of the Commission supported by any kind of an excuse conceived as an afterthought. In other words, first we had the meaningless circles; then the Commission writes standards to fit the circles.

Comr. Jones told existing licensees that the Commission "staked your claim, assessed the crude ore and delivered a document [the Sixth Report] giving you squatters' rights whether you work the mine efficiently or rock along with the old machinery. The FCC land office made you masters of all you survey when they assumed . . . that you had a property right in your channel." He described advantages this way:

(1) "You can squat on your chan-

(Continued on page 78)

'Lucy' Viewers

FOR the first time in the history of television, a regularly scheduled program—*I Love Lucy*—is said to have been seen in ten million American homes. American Research Bureau reports for April point up that the April 7 show reached 10,600,000 homes. *I Love Lucy*, presented over CBS-TV Monday, 9-9:30 p.m., stars the husband-and-wife team of Lucille Ball and Desi Arnaz.

HAMS ON 21 MC

Reception Effects Seen

AMATEUR radio operators' use of 21 mc band [B•T, April 28], officially authorized by the FCC last week, could affect 80-90% of the 17,000,000 TV sets in use today.

That is the estimated number of TV sets in operation which have 21 mc intermediate frequency circuits—liable to interference from nearby ham operators.

Use of 21-21.45 mc band by amateurs began May 1. Authorized is continuous wave radio-telegraphy. Radio telephone use, which would make the interference worse, was proposed by the FCC, with comments required by August 1.

According to a BROADCASTING • TELECASTING check with RTMA and manufacturers, Admiral and Motorola are still using 21 mc IF. Admiral said it planned to go to the RTMA-recommended 45.25 mc IF "as soon as we feel an urgent need to do so." Motorola said it planned to change to the higher IF standard "before the end of the year."

Emerson changed its IF from 21 mc to 45.25 mc only 30 days ago.

Philco switched about three months ago.

RCA changed in the fall of 1951. Other major manufacturers, like General Electric, Zenith, DuMont and Crosley, switched shortly after the RTMA recommended the new IF band in the middle of 1949.

Amateur radio use of 21 mc has been on the FCC "books" since 1945, when allocations below 30 mc were made. In 1947, at the Atlantic City International Telecommunications Conference, that assignment was made world-wide.

Early TV sets used 10-14 mc IFs. TV set manufacturers standardized on 21.1-21.8 mc for IF use after World War II. That band was chosen because it was in an area little used in the spectrum at that time, it is understood, and also gave good amplification, and avoided beat interference and image response among other factors.

One major TV manufacturing executive declared that use of 21 mc band by amateurs was "potentially serious" for TV reception.

However, it is not likely that the 100,000 "hams" will all rip up TV pictures on the 13 to 15 million TV sets liable to that interference. First, the amateur would have to be a close neighbor of a TV set owner. Next he would have to be "working" the 21 mc band. And, thirdly, the TV set could be so well-shielded and constructed that the interference would be negligible, if at all.

Although the 21 mc frequency is used for the sound IF, it is linked with the synch pulse of the video picture. Therefore any disturbance could tear the picture, change its brilliance, or show up as bar lines across the face of the tube.

Elimination of this interference is considered a simple matter—for skilled servicemen. A wave-trap, filter or even reorientation of the receiving antenna is considered sufficient to overcome the interference.

The FCC considers itself absolved of any responsibility for the possible disturbance since it feels that the manufacturers have been on notice for more than five years. At the same time, the Commission insists that it has no jurisdiction over radio-TV manufacturers.

It is however backing an American Radio Relay League campaign to tackle TV interference (TVI) through local committees of amateurs, servicemen, set distributors and set owners [B•T, Nov. 19, 1951]. Its field engineers have been told to cooperate in this endeavor. The Commission itself has urged manufacturers to improve the design of their TV sets to overcome their liability to interference. The Commission became active following a report on how an interference situation in Dallas was cleaned up through the cooperation of that city's hams and RCA.

TALL TOWER MEET

Committee Convenes May 6

MEETING of a joint committee of broadcasting and aviation interests to discuss heights and sites of tall TV towers [B•T, April 28] has been scheduled for May 6, 9:30 a.m., in Room 2622 Temporary Bldg. T in Washington.

Basis for the meeting of what is known as the "ad hoc" committee, which also includes representatives of the FCC and CAA, is the FCC's memorandum of two weeks ago which proposes that towers more than 500 ft. high and located outside civil airways should not be considered hazards to air navigation if they are below a plane with a slope of 50:1. Details of this proposal were illustrated on a chart which was distributed at the meeting two weeks ago.

Joint working committee is co-chairmanned by John R. Evans, FCC, and D. D. Thomas, CAA. It includes the following broadcast representatives:

Thad Brown and Neal McNaughten, NARTB; Arthur Scharfeld and Fred Albertson, Federal Communications Bar Assn.; Robert E. L. Kennedy, Assn. of Federal Communications Consulting Engineers.

Representing aviation interests are the following:

A. J. Quinn, CAB; Col. J. J. McCabe, Air Force; Capt. R. G. Armstrong, Navy; Richard G. Dinning, Air Transport Assn.; Larry Cates, Air Line Pilots Assn.; Max Karant, Aircraft Owners & Pilots Assn.; A. B. McMullen, National Assn. of State Aviation Officials.

Full text of the FCC memorandum, which will be used as the basis for the May 6 meeting, is as follows:

PURPOSE

Determination of a method of achieving uniform treatment by the 9 Regional Airspace Subcommittees of applications for radio and television antenna towers over 500 ft. in height located off presently existing airways.

DISCUSSION

The Sixth Report and Order of the Federal Communications Commission encourages high antennas to make the most effective use of the television frequency allocations authorized in that order. Television antenna towers up to 2000 feet in height are contemplated in the Sixth Report and Order.

FCC Part 17, "Rules Governing the Construction, Marking and Lighting of Antenna Towers and/or Their Supporting Structures," contains criteria for determining radio tower limitation in connection with air navigation. These rules state, in part, that "Antenna structures over 500 feet in height above the ground will require special aeronautical study irrespective of their location." Appendix B or Part 17 states that all applications requiring aeronautical study will be submitted by the FCC to the appropriate Regional Airspace Subcommittee of the Air Coordinating Committee for study and recommendations.

The ACC Airspace Subcommittees use CAA Technical Standard Order TSO-N18, dated April 26, 1950, "Criteria for Determining Obstructions to Air Navigation," as a guide in making recommendations to the FCC relative to the acceptability of any proposed construction of antenna towers from an air navigation obstruction viewpoint. CAA TSO-N18 is parellel to FCC Part 17 except that Part 17 is limited to radio towers and CAA TSO-N18 relates to all types of obstructions. This order states that ". . . objects shall be considered obstructions to air navigation (unless special aeronautical study indicates otherwise) if they are more than 500 feet above the ground. . . ." (Section B). Other lesser heights are mentioned in TSO-N18 and Part 17 in connection with airport approaches, air traffic control areas and civil airways. The Airspace Subcommittees conduct the aeronautical study required by Part 17 and TSO-N18. There are no written criteria for achieving uniform treatment by Regional Airspace Subcommittees for determining when objects over 500 feet in height located off existing airways are not considered as obstructions to air navigation. This determination has been made in the past based upon expert judgment, individual consideration of each case, and good operating practices.

The aviation, radio and television industries have maintained excellent cooperative relationships in these matters and each has respected the rights and interests of the other. It is not desired to change these relationships, but with the advent of faster aircraft and higher towers, it may be that there is a need to assist expert judgment with suitable criteria to achieve more uniformity in considering similar obstruction problems.

The suggestions and assistance of both industries are desired in arriving at necessary criteria. It is desired to exchange the views, on an exploratory basis, of key aviation and radio and television industry representatives who have been invited to this conference. For discussion purposes, one suggestion for criteria is attached as Appendix A. Other proposals may be presented by those present for discussion and study.

APPENDIX A

SUGGESTED CRITERIA FOR USE BY AIRSPACE SUB-COMMITTEES IN MAKING AN AERONAUTICAL STUDY OF OBJECTS MORE THAN 500 FEET HIGH LOCATED OFF OF CIVIL AIRWAYS

Objects located outside the limits of the present civil airways or direct routes which are more than 500 feet above ground shall not be considered obstructions to air navigation if they are below a plane with a slope of 50:1 measured upward and outward in a vertical plane at right angles to the boundary of an airway or control area or the 5-mile boundary from the center of a direct off-airway route. The 50:1 slope will be projected from a point 500 feet below the minimum en route altitude of the airway or route and will extend a distance of 5 miles on either side of the boundaries thereof, measured horizontally from either edge and at right angles to the airway or route center-line. This area will extend for a distance of 25 miles on each side of and parallel to the airway or direct route measured from the radio navigational facility of the airway. Beyond the 25-mile point, objects located anywhere within 5 miles of the boundaries of an airway or direct route which are 500 feet below the minimum en route altitude of the airway or route, will not be considered as hazardous obstructions to air navigation.

Any object over 500 feet high beyond 5 miles from the boundary of the airway or direct route normally will not be considered as a hazardous obstruction to aircraft en route on civil airways or direct route. In any case, it will be required that these objects be studied to determine whether they will have an effect on VFR off airways operations, instrument approach procedures or flight operations in the vicinity of airports.

OUTLOOK FOR CP'S

Hyde Sees Slow Start

SOME TV applicants are expected to be granted licenses under the new television allocations before the end of the year, but the number will be limited, FCC Comr. Rosel H. Hyde said during the *Georgetown U. Forum* on WTTG (TV) Washington April 27.

Comr. Hyde, appearing with Thad H. Brown Jr., director of TV for NARTB, and Rev. Daniel E. Power, S. J., program director for the Georgetown U. radio and television forum, representing education TV aspirants, said "a few" licenses probably will be granted "in a short time." A transcription of the forum, moderated by Frank S. Blair Jr., was to be broadcast over WOL Washington yesterday (Sunday).

Mr. Hyde indicated many smaller communities might get TV stations before larger ones "because in the smaller communities and markets there will be fewer applicants who want to undertake the hazards" of constructing stations, leaving "enterprising operators" a clear field in hearings.

Comr. Hyde said grant of licenses for the 82 VHF and UHF channels depended on "how fast we can make judgments on applications."

LOEW'S INC.

May File for TV

LOEW'S INC., motion picture company and owner of WMGM New York, may file applications for television stations, according to statements by Vice President J. Robert Rubin at a stockholders' meeting Tuesday.

The executive, underlining the fact that his organization was "considering" application, did not indicate how many stations might be sought or where they would be located. His remarks came in answer to a question from the floor. Organizational problem in the application, he said, was whether Loew's would seek outlets in its own name, in the name of the theatre company now being organized, or in the title of the surviving distribution organization.

His company has no plans for production of TV films, Mr. Rubin added, and has not considered selling its backlog of film properties for television release.

Backs TV at Hearings

TELEVISION should have equal rights with other media in coverage of congressional hearings, Rep. Hugh B. Mitchell (D-Wash.) said last week in a broadcast on KJR Seattle under sponsorship of the Washington State Press Club. He said TV eventually would get these results in a comment on KJR announcer Dick Crombie's query on the action of House Speaker Sam Rayburn banning radio and TV from House hearings. Rep. Mitchell warned, however, that problems, such as effect of cameras and other equipment on committee witnesses, need ironing out.

Encore for B.V.D.

PRODUCED four years ago and on tour for three straight years, coast-to-coast, it's scheduled to return by popular demand: Not "South Pacific," but a B.V.D. commercial featuring dancing-singing figures of the advertisers' initials. Produced by Screen Gems, New York, the 20-second commercial was the object of so many viewers' letters after being dropped a year ago, spokesmen reported, that B.V.D.'s agency, Hirshon-Garfield, New York, has placed it on WCBS-TV New York, to follow the 11 p.m. news and sportscast.

RCA FORUM

Held in Camden

TOWER construction engineers convened at Camden, N. J., last week for a two-day session, sponsored by the RCA Engineering Products Dept., on problems anticipated in widespread TV station construction.

Tower erection engineers took part in a forum called by RCA last Wednesday and Thursday. Discussions centered around information on new UHF and VHF broadcast antennas relating to design of supporting towers. T. A. Smith, assistant manager of engineering products, presided over the welcome.

The nation's large tower construction firms were represented by over 40 engineers who witnessed demonstrations of RCA's new UHF antennas and transmission line, super-turnstile VHF antennas. Forum also included a tour of the RCA Victor plant and the company's antenna test yard.

Participating in forum discussions, which stressed mutual problems of tower erection and TV antenna engineers, were H. H. Wescott and Owen Fiet, RCA antenna engineers. Forum included:

A. A. Belda and W. C. Kovacs, representing Alliance Engineering & Construction Co., Chicago; T. Kirkman, Alpha Erection Corp., Washington, Ill.; M. W. Kyger, John C. Beasley Construction Co., Muskogee, Okla.; J. A. Costelow, K. Peters and M. Weathers, John A. Costelow Co. Inc., Topeka, Kans.; H. C. Koeppe, Frederick Tower Erection Co., Frederick, Md.; B. A. Furr, W. H. Carrick, E. C. Hedgepath and Ward Furr, Furr and Edwards Construction Co., Rome, Ga.; B. V. Pruden, IDECO Division, Dresser-Stacy Co., Columbus, Ohio; L. Mizell, Mizell Construction Co. & Truck Line, Ganado, Tex.; R. A. Hanson, G. W. Metz, T. V. Sheehy and E. Steinmetz, Lehigh Structural Steel Co., New York City; S. T. Mercer and B. J. Myers, S. T. Mercer Co., Rahway, N. J.; H. A. Peterson and L. Jamerson, Harold A. Peterson Co., Trenton, N. J.; C. French and E. Racine, Racine Tower Construction, Brandon, Vt.; K. F. Gilchrist and D. E. Phillips Jr., Radio Construction Co. Inc., Pittsburgh, Pa.; Paul Shepard, Paul Shepard Co., San Francisco; H. P. Tiner, Seago Construction Co., Dallas, Tex.; J. Amey, R. J. Eberle, Peter Loquet and W. Guzewicz, Stainless Inc., North Wales, Pa.; R. Colvin, John Dearing and T. Griffin, RCA Services Co., Gloucester, N. J.; R. H. Clark and D. W. Harrington, Tower Builders Co., Angola, Ind.; T. H. Gray, Tower Construction Co., Sioux City, Iowa; T. L. Wickems, Tower Engineering & Construction Co., Houston, Tex.

This Is Hollywood Playhouse!

A steady habit . . .

of steady buyers!

When Hollywood Playhouse hits the screen at 2 o'clock TV tune-ins *really* jump. Here is a show that literally captures audiences . . . it's become an afternoon habit with thousands of TV fans. We can give you one success story after another of advertisers whose products are sold on Hollywood Playhouse. Complete details on request.

TELECASTING

May 5, 1952 *Copyright 1952*

It's **WHIO-TV** for Sports in Dayton!

Over 10,000 written "Thank You's"! Not giveaway-gimmick responses—not fill-in postcards, coupons or box tops. With spontaneous individual letters and multi-named petitions, 10,173 loyal and appreciative viewers thanked the sponsor and ourselves for our recent basketball series!

This is the kind of special sports programming that has built such amazingly loyal community following for our station. The University of Dayton Flyers basketball team qualified for both the N.I.T. and N.C.A.A. tournaments in New York and Chicago. Our boys!—so we cleared our schedules. Then along came a new sponsor who knows opportunity when he sees it—the M. J. Gibbons Supply Co. First time to our knowledge that a plumbing and heating supply house ever sponsored this ambitious a program.

Well, though the team didn't quite finish on top, Mister Gibbons did—and so did we! Why, besides those letters—besides word-of-mouth appreciation every day—over 1500 people have gone to the slightly-off-the-beaten-path Gibbons showrooms to shake his hand and ask for a plumbing fixture booklet mentioned in a commercial.

Yes sir,—for sports, for entertainment, for public service with a meaning—Dayton stays in tune with WHIO-TV. SOON, FOR THE THIRD STRAIGHT YEAR, WE'RE AIRING THE CINCINNATI REDS DAY GAMES EXCLUSIVELY IN OUR TERRITORY—AND FOR THE FIRST YEAR WILL CARRY THE CLEVELAND INDIANS GAMES. Want action? See George P. Hollingbery Company, National Representative for impressive figures on a great market.

City-by-City Preferences Detailed in 'Hooperade'

(Report 214)

"HOOPERADE of TV Stars" for March 1952 saw *Red Skelton* leading in two of the six cities which serve 50% of U. S. television sets, with a rating of 63.0 and 699,000 sets in Chicago and 42.0 and 473,000 sets in Los Angeles.

But 1,514,000 New York sets put *I Love Lucy* at the top with a rating of 52.4, the C. E. Hooper Inc. results showed. Leading in the three other cities were: *Godfrey's Scouts* on 542,000 Philadelphia sets with 53.0, Groucho Marx on 532,000 Boston sets with 60.9 and Milton Berle on 314,000 Detroit sets with 49.6.

Lucy was fourth in February in New York with 42.8. Martin & Lewis was first there that month with 56.9, largest New York TV rating in several months, and second in March with 50.8. Mr. Skelton was first for both January and February in Chicago (53.2 and 65.2, respectively) and Los Angeles (46.0 and 46.7, respectively).

Godfrey's Scouts was second in Philadelphia in February (47.4), with *Lucy* first (48.4), second in March (45.8) and second in January (42.4). Boston ranked Groucho Marx, second in February (56.2) and fourth in January (56.2). *Philco Playhouse* was first in January (61.1) and in February (63.2), dropping to eighth in March (46.6). Detroit ranked Mr. Berle second in February (52.2).

Only three shows made the first 15 in all six cities: *Lucy*, Mr. Berle's and Martin & Lewis. Bob Hope made the list in all but Chicago, *Godfrey's Scouts* and Jimmy Durante in all but Los Angeles and Red Skelton and Groucho Marx in all but Detroit.

Rorabaugh Report Issued Covers 1952 First Quarter

N. C. RORABAUGH Co., 347 Madison Ave., N. Y. 17, last week issued its report on TV advertising for the first quarter of 1952. In addition to the main *Rorabaugh Report*, which covers network and spot advertising in January, February and March, a supplementary report on local-retail advertising also was issued.

The report covers 64 markets and 108 TV stations. Listed are 6,400 advertisers, tabulated as 188 network advertisers, 1,277 national regional spot users, and 4,935 local-retail advertisers.

Vistascope Showing Set for Hollywood

FIRST demonstration of the Vistascope, a camera device which utilizes photographs for foreground settings with live action, will be staged at the Hollywood section of the Motion Picture and Television Engineers meeting May 20 in Studio Theatre on Paramount lot. Some 300 members of MPTE will attend, according to Ed Templin, program chairman.

Equipment, a French invention, is under exclusive license to Vistascope Corp. of America, which is owned jointly by Paramount Pictures and Sol Lesser, independent producer. It will be made available shortly to all film producers and TV stations on a royalty basis.

'I Love Lucy' Heads Videodex April List

VIDEODEX ratings of top ten TV network programs, giving percent and number of TV homes for April 1952, are listed as follows:

	Percent TV Homes
1. I Love Lucy (CBS)	51.4
2. Talent Scouts (CBS)	44.4
3. You Bet Your Life (NBC)	43.1
4. Red Skelton (NBC)	40.6
5. Godfrey & Friends (CBS)	37.7
6. Comedy Hour (NBC)	37.3
7. Your Show of Shows (NBC)	36.5
8. Fireside Theatre (NBC)	33.3
9. Philco TV Playhouse (NBC)	31.2
10. Kraft TV Theatre (NBC)	30.2
Ken Murray (CBS)	30.2

	TV Homes (000)
1. I Love Lucy (CBS)	8455
2. Red Skelton (NBC)	6399
3. You Bet Your Life (NBC)	6351
4. Comedy Hour (NBC)	5933
5. Your Show of Shows (NBC)	5688
6. Godfrey & Friends (CBS)	5664
7. Fireside Theatre (NBC)	5263
8. Philco TV Playhouse	5047
9. Talent Scouts (CBS)	4860
10. Ken Murray (CBS)	4480

ZIV LOOKS TO EUROPE

For New Writers and Talent in TV Film

"SHOCKING" rate at which American television material is being "burned up" will necessitate the opening of Europe as a source of writing and talent for films.

This was the opinion expressed Wednesday by John L. Sinn, president of Ziv Television Programs Inc., as he prepared to leave with Herbert Gordon, Ziv vice president in charge of production, for several weeks of video conferences abroad.

Acknowledging the already-heavy burden on American creative people working on TV, Mr. Sinn noted reasons why pressure on writers, actors, producers and directors of film programs will become even more severe:

"It is becoming more and more evident to leaders in the industry that at least 75% of programming will be on film," he said in listing advantages of film. "Also, the recent lifting of the freeze will open . . . a tremendous new field for programming by film."

Mapping trip abroad where they intend to sound out video experts and talent are Mr. Sinn (l) and Mr. Gordon.

* * *

"We . . . want to maintain our lead . . . by increasing not only the number of our films, but by also keeping and even raising their level of artistic integrity," Mr. Sinn indicated. "Toward that end we hope to make arrangements with television experts in Europe to augment the products of our American television film writers and producers." Hollywood, he pointed out, will continue as the main source of Ziv films.

The Ziv representatives, planning to visit Europe early this month, will confer with leading European television and film writers, producers and executives, to discuss properties and techniques as well as European production facilities.

FCC RENEWALS

Only KTTV (TV) Pends

RENEWAL of the license of KPHO-TV Phoenix last week by the FCC clears up all but one of the 26 stations placed on temporary license last February [B•T, Feb. 4]. Still remaining on temporary license is KTTV (TV) Los Angeles.

Twenty-three of the 26 stations cited early this year were placed on temporary license because their list of program categories for the 1951 composite week did not show any religious programs or educational time. The last of those were cleaned up two weeks ago when WNHC-TV New Haven was renewed for the regular one-year period [B•T, April 28].

KPHO-TV was placed on temporary license until its ownership was clarified for the FCC. KPHO and KPHO-TV are owned by different companies, which have some common stockholders. KTTV has been the subject of complaints to the Commission regarding direct sales commercials, medical advice and an alleged invasion of privacy. WKRC-TV Cincinnati was put on temporary due to the pendency of the FCC's study of functional music operations, but was renewed last March [B•T, March 2].

When the Commission placed the 23 stations on temporary status due to their omission of religious and educational programs, former FCC Chairman Wayne Coy told BROADCASTING • TELECASTING that neither over-commercialization nor public interest was involved.

In 1951, when all TV stations were renewed, the Commission announced that it would call a meeting of TV operators to discuss the issue.

Subsequently, the NARTB code of good programming went into effect March 1. FCC never rescinded the announcement, nor moved toward scheduling a meeting.

ASCAP TALKS

All-Industry Unit Meets

ALL-INDUSTRY Television Per Program Committee held its first meeting in several months last Tuesday in the New York offices of Judge Simon H. Rifkind, special counsel to the group, to discuss the status of litigation with ASCAP, now pending in the federal courts.

Described as a session in which research and information in preparation by various committee members were exchanged, the closed meeting was attended by chairman Dwight Martin, vice president of WLWT (TV) Cincinnati; Nathan Lord, general manager of WAVE-TV Louisville; Thomas Dowd, Washington attorney; Eugene S. Thomas of George P. Hollingbery Co., Paul Adanti, general manager of WHEN (TV) Syracuse; Donald Mc Gannon of the DuMont network, and Thad Brown of NARTB.

CBC-TV PLANS

Sponsored Shows on Sept.

TELEVISION programs for sponsorship by Canadian advertisers will be ready in September on Toronto and Montreal TV stations, A. D. Dunton, chairman of the Canadian Broadcasting Corp. told delegates last Wednesday at the 37th annual meeting of the Assn. of Canadian Advertisers at Toronto.

Rates will be based on station time and production costs of the CBS television organization, starting at $1,600 per hour and $960 per half-hour on the Toronto CBC television station, and $500 per hour and $300 per half-hour at Montreal CBC station, he said. A limited number of spot announcements will be sold, with CBC TV rate cards to be issued soon.

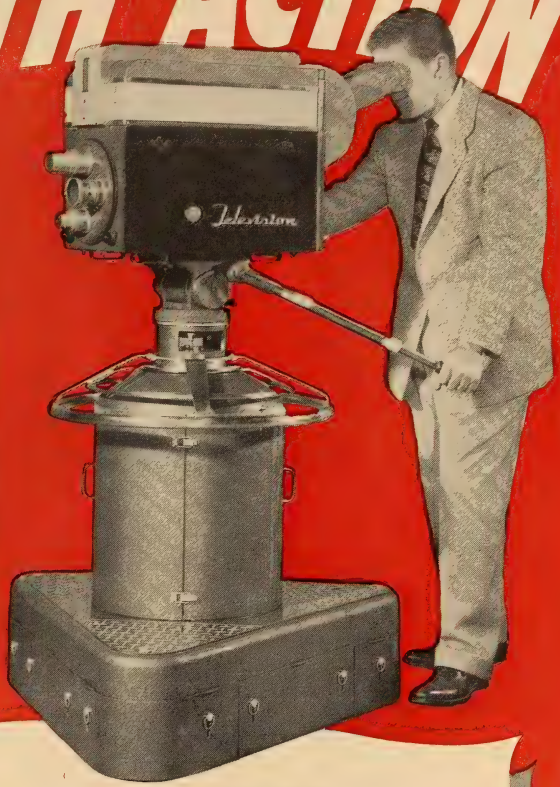
Because of high costs, Canadian video shows will be sold in segments co-operatively if necessary, he said. Advertisers will be able to import their own programs, film or live, if their contents meet CBC program balance.

On CBC-produced live programs, advertisers will pay talent costs in addition to CBC rates. CBC will try to meet the wishes of advertisers who wish to enter Canadian television, he said.

He reported construction at both Montreal and Toronto stations and production centers proceeding on schedule for opening in late August or early September.

MUNKHOF, MAZZIE

Promoted at WOW-TV



SOREN MUNKHOF has been named program director of WOW-TV Omaha and John Mazzie promoted to production manager of the TV outlet, it was announced last week by John P. Fogarty, general manager of WOW-AM-TV.

Mr. Munkhof joined WOW in 1938 as a local news reporter and subsequently transferred to the TV staff when the outlet went on the air in 1949. He is executive secretary of the National Assn. of Radio News Directors. Mr. Mazzie did television work at the station while attending Creighton U. in Omaha and was added to the permanent staff in 1950.

SMOOTH ACTION

NEW

Houston-Fearless

TV CAMERA PEDESTAL

Camera is raised quickly, easily by lifting on steering wheel.

New smooth action... new stability... new convenience and ease of operation are offered in the new Houston-Fearless Television Camera Pedestal, Model PD-3. Camera is accurately counter-balanced, making it possible to raise and lower quickly, smoothly by simply lifting or pressing on steering wheel, even with pedestal in motion. Three pairs of dual-wheels assure smoother rolling-dolly shots. Two types of steering: for straight tracking or sharp turning. All controls are within easy reach of cameraman for maximum convenience. Dependable Houston-Fearless quality throughout. Makes possible better, more showmanlike productions in any studio. Write for details today.

UHF Defense by Jones

(Continued from page 67)

nel and never invest another nickel . . ."

(2) "Unofficially, you can select transmitter sites, power and heights which will forever keep competition out of each other's service areas . . ."

Touching on the latter, Comr. Jones said measuring distances "from post office to post office or post office to transmitter site as a sole criterion for excluding or including channels in the plan is absurd when we know television transmitters will not be built there."

Comr. Jones described this as "the real control that this firm, fixed and final allocation plan delivers to you. As a group of existing licensees you can support the arbitrarily wide separations . . . and keep VHF competition to an artificial minimum in your cities. If all the VHF channels in your city are not occupied, you pioneers can still be enthusiastic supporters of this firm, fixed and final plan because you can continue without further competition for a period of one to five years while new applicants fight from the Commission to the Supreme Court."

Noting few UHF-only cities outside Grade B service areas (at 500-ft. antenna heights), the Commissioner felt the intermixture problem in Ohio is not confined to UHF-VHF intermixture cities but is "almost blanketed over Ohio."

"You who are outside the Table of Assignments because the Commission dried up your chances in arithmetical regression by employing spacings much higher than the minimum of 170 miles . . . have a real problem on your hands in spite of the evanescent promises that your case *can* be considered in one year," Comr. Jones stated.

No Plausible Excuse

FCC buttresses its separation argument, he continued, by claiming it is necessary in view of the limited amount of propagation data now available. Yet, he contended, if the separations are to be fixed, there would be no plausible excuse for the so-called "safety factor"—even if the Commission should modify its table and assign channels at closer spacings.

"This seems a plausible solution on the surface," Comr. Jones said. "However, the Commission completely destroys any hope that more assignments will be made in the VHF portion of the spectrum by its admission that it has not been able to remove existing operations which do not comply with its minimum separations because 'it has not been possible to remove these cases without unwarranted dislocation.'"

Comr. Jones wondered whether the Commission would dislocate the industry after 108 stations "have improved their facilities to approach the low level of efficiency in the allocation plan?" He also asked whether dislocations will be "easier after 108 stations have builded a second time and 100 or 200 more stations are on the air?" The answer: "Obviously not."

By contrast, he noted, the Commission failed to put in the "safety factor" in its general rules for co-channel spacing of UHF stations—and UHF propagation data is "almost non-existent." The Commission, he added, has thus been "much more harsh" with UHF than VHF in this respect.

Speaking generally, Comr. Jones remarked: "Congress created the FCC as an instrument for the exercise of continuous discretion under law in the regulation of a dynamic industry. Instead of keeping itself flexible on the basis of the day-to-day changes characteristic of such a dynamic art as television, the Commission has tried to legislate instead of regulate."

Comr. Jones Warning

The FCC allocations plan, Comr. Jones felt, poses a "critical" period immediately following the effective date of the order (early in June). If new and better methods arise, the blueprint could be changed without "undue stress," he felt. But he warned:

"The longer this plan stands and the more authorizations we grant under it, the more difficult and expensive it will be to change it. And in that most important first year the Commission has determined that it will refuse to consider any proposals for any change of any consequence."

The Jones address topped the first luncheon session of the two-day meet, held at the Deshler-Wallick Hotel. A BMI Clinic was held Friday concurrent with the Ohio Assn. of Radio-TV Broadcasters.

DuMONT SPONSORS

Three Increase Outlets

THREE DuMont network sponsors have added more outlets to their current programs, Director of Sales Ted Bergmann reported Wednesday, with two of the advertisers making their second such coverage-increase within recent weeks.

American Chicle Co. (Clorets chlorophyll gum), through Dancer-Fitzgerald-Sample, have added two stations for *Rocky King, Detective*: WHEN (TV) Syracuse and WMCT (TV) Memphis. Program now has a 29-station network. Curtis Publishing Co., through BBDO, has added WHEN (TV) Syracuse to its line-up for *Keep Posted*, making a total of 14 outlets for the panel program. Boyle-Midway (Autobrite), via Earl W. Bothwell, has added WNBF (TV) Binghamton, N. Y., to the 13 stations previously carrying *Sports Showcase*. American Chicle and Curtis Publishing had previously increased the networks for their programs within the past few weeks.

'TODAY' RESULTS

NBC-TV Gives Report

NBC'S early morning network television show, *Today*, featuring Dave Garroway, has just completed its first 13-week cycle with the following results reported by officials:

● Advertisers have increased from three at its inception to 18 currently, with more coming in on the show almost every day.

● Rating has gone up from 4.8 at the beginning of the program to 7.6 now.

● More than one-third of the time available has been picked up commercially.

● At least 1,500 pieces of unsolicited mail are received weekly, of which an average of only five could be described as non-favorable.

More than one-third of the time has been sold to national advertisers, A. A. (Abe) Schechter, executive supervisor of the program, said. "Bookings are in for the summer and are also coming in for next fall," he added.

The three initial advertisers on the program were *Kiplinger Letter*, Magikoter and Excello Corp. (Pure Pac). Since then the following have been added: Florida Citrus Commission, Bauer & Black, Knox Gelatine, Regent Cigarettes, *Time* magazine, *Newsweek*, Beacon Wax Co., Doeskin Tissues, Mystic Foam Rug Cleaner, Jackson & Perkins (rose bushes), Chase & Sanborn, Florist Telegraph Assn., Dial Soap, Kaiser-Frazer, International Silver, Pepperell Sheets, and Curtis Publishing Co.

The format of the program has been and is continuously changing. "Communicator" Garroway is assisted by such newscasters as Jim Fleming, who, this week, will report on world events from Europe via shortwave and also will film special interviews with European leaders for later showing on *Today*, and by Jack Lescoulie, among others.

MOVIE SLUMP

Said to Have Begun Before TV

THE MOVIE industry was losing its grasp on the family's recreation dollar before television came on the scene, according to an article in the April 26 issue of *Boxoffice*, motion picture industry magazine.

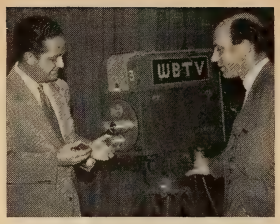
The article is based on findings by Albert E. Sindlinger, Philadelphia, whose research firm has been conducting extensive research into the impact of video on motion pictures.

According to Mr. Sindlinger, the average family in 1941 was spending 23.9% of its recreation budget for movies. This had dropped to 13.5% in the pre-TV year of 1947, and further to 7.4% in 1951, which he calls the "TV saturation year."

Household expenditures for recreation increased 111% from 1941 to 1947, and 39.7% from 1947 through 1951, he said. He indicated that TV is not the direct cause for the downward trend of the movies' share of the recreation dollar. Other forms of entertainment were cutting into the percentage as early as 1941, he said.

Mr. Sindlinger said if the motion picture industry is to regain its share of the recreation dollar it must begin to examine the reasons why the average family is slowly whittling down its movie budget.

Three encouraging factors to movies, he said, are that population is on the increase, family income is rising and recreation budgets are up. The overall gross decline has been held to 11% since 1947, he said, because of the weight of population gain and increased admission scales.



WLTV (TV) DIRECTORS

Two Board Members Added

BROADCASTING Inc., owner of WLTV (TV) Atlanta, last week announced the election of two new members to its board of directors. They are William T. Lane, who has been vice president-general manager of WLTV since its beginning in September, 1951, and George E. Johnston Jr., president of the Johnston Broadcasting Co. (WJLD WJLN (FM) Bessemer, Ala.).

Officers of the corporation, all re-elected, include Walter C. Sturdivant, president; John O. Chiles, vice president; Mr. Lane, vice president-general manager; Clement A. Evans, treasurer, and Alfred Kennedy, secretary. All officers are board members. Other members of the board include Arthur L. Montgomery, Harris Robinson, James D. Robinson Jr. and Robert B. Troutman Jr.

CARRIED in 22 markets, *John Kieran's Kaleidoscope*, 15-minute United Artists TV series, has been renewed for fourth year in Philadelphia by Camden Trust Co. and in Pittsburgh by La Premiata Macaroni.

CHARLES H. CRUTCHFIELD (l), vice president and general manager, WBT-AM-FM and WBTV (TV) Charlotte, N. C., explains latest-type TV camera to Marios Ploritis, drama director, National Radio Institute of Greece. Mr. Ploritis, visiting America under auspices of the Dept. of State, met Mr. Crutchfield when the WBT executive was in Greece last summer on State Dept. special assignment.

Tuners for UHF

TV TUNERS produced by Standard Coil Products Co. Inc. always have been compatible with the needs of UHF and can be readied for UHF by substitution of coil strips for about $10 including installation, according to the firm's president, Glen E. Swanson. No additional expense for structural modification or a converter is needed, he said.

FILM SCANNER

DuMont Speeds Outp

"UNPRECEDENTED deman for Allen B. DuMont Labs' n "film-scanner" pickup system newly developed method of bri ing TV viewers clear, sharp p tures on film or recorded p grams—has resulted in accelera production schedules in order make the equipment available f delivery to broadcasters within months, Herbert E. Taylor, T transmitter division manager, a nounced last week.

When new model was introduc at a demonstration during t NARTB convention in Chicago l month, delivery date was set at months to two years. Due to i creased demand since then, M Taylor reported, "DuMont has r vised drastically its time schedu for introducing it commercially The transmitter division has o tained a priority manufacturi rating, and a special section h been set up to handle production.

Engineers are already comple ing final plans for model's cor mercial production "so that it w be . . . available . . . at a tim when a large number of new broa casters are preparing to go on t air," Mr. Taylor said.

Advantages of new pickup ar (1) Long life and low cost; (2) r operator is required, and (3) t "greatly simplified system" reduc wear and tear on film and is easi adaptable to any color TV system.

CUBAN VIDEO

Two Firms Engage Philco

WO CUBAN firms have engaged hilco Corp. to equip and install levision microwave networks in iat country, Philco announced in hiladelphia last week.

For Circuito CMQ, operator of ie leading radio and TV network Cuba, Philco will build the rgest TV microwave relay net-ork outside the United States, it as stated jointly by James D. fcLean, general sales manager of hilco Government and Industrial ales, and Goar Mestre, president CMQ and head of the Inter-merican Assn. of Broadcasters.

CMQ plans call for a 16-hop icrowave system over a 500-mile ute from Havana to Santiago Cuba, with first installations to seven stations linking Havana nd Santa Clara. Three channels ill be provided for television and adio program service and three hers for general communications se. The contract signed by Wil-am F. Tait, sales manager, in-ustrial products, of Philco Inter-ational Corp., schedules the equip-ent for immediate delivery with etwork operation to begin late is year.

Agreements with the Radiotele-ision "El Mundo," S. A., Havana, pprove plans for a 5-station, 4-op TV microwave network ex-ending 110 miles from Matanzas Santa Clara, with intermediate elay stations at Jovellanos, Los rabos and Manacas, and one hannel for TV programming and nother for general service com-unications. Agreements with hilco were concluded by Senor entura Montez, technical director f the El Mundo firm, with almost mmediate delivery scheduled, and etwork operation to begin next inter.

FILM INVESTMENT

New Lushane Firm Formed

LUSHANE Investment Co., 450 S. Beverly Drive, Beverly Hills, Calif., as been organized to finance tele-ision and motion picture projects, eaded on a partnership basis by Maxwell Shane, motion picture pro-ucer-director, and Sidney and Alfred Lushing, Beverly Hills in-ustrialists.

First TV venture is a series of 04 quarter-hour films, *Art Link-etter & The Kids*, featuring inter-iews with children, under the ban-er of John Guedel Productions, Hollywood.

Title Dispute

RIGHT to use of the title, "Fraud," s being contested by Marcy Sapin, ublisher of magazine, *Frauds and Answers*, and Kenneth Herts, who as readied production on a pro-osed TV film series bearing the itle of *Fraud*. Mr. Herts, in an xchange of letters, claims that he word is a common English noun nd is public property.

TV Aids Newspaper

FOUR-COLUMN photo of the first public atomic explosion, photographed from the 20-inch TV screen at WLWT (TV) Cincinnati, was printed in that day's final editions of the *Cincinnati Post*. Station carried the blast telecast in place of Ruth Lyon's *Fifty Club* TV show, which goes to NBC via WLWT (TV) facilities. The show's regular audience of women watched the blast over three studio video sets.

U. S. ECONOMY

To Absorb TV—Richards

THE United States economy will absorb television in stride and support the medium along with radio and other forms of advertising, Robert K. Richards, NARTB public affairs director, told the National Capitol Forge, American Public Relations Assn., at its luncheon last Monday.

Noting that there is one business to every 40 persons, Mr. Richards said broadcasters are holding their own except in areas with too many stations.

Calling attention to public misunderstanding of NARTB's attitude toward educational TV, he said the association, during FCC hearings, warned against waste of TV facilities because of the practical problems facing educators planning to build TV stations, but said it is actively in favor of educational programming.

If state universities go into television, he said, taxpayers will be supporting the stations. Broadcasting and TV should be kept as free of government restrictions as possible, he suggested, since any such restriction cuts into individual liberties. He recalled that only a half-dozen educational radio stations remain of the 150 AM stations once on the air. He said broadcasters are doing an outstanding educational job.

Mr. Richards explained the FCC's recent TV allocations and warned that the United States "will not sprout TV towers overnight."

Trident Film Series

TRIDENT Films, New York, is preparing production of 13 fairy tales featuring the Salzburg (Austria) Marionette Theatre for filming in Europe and ultimate release both to television and theatres. Previous puppet films by Trident, formerly James & Schwep, include "Night Before Christmas" and "The Nativity," shown nationally on TV last December. Salzburg Marionettes are TV veterans, too, having had a repeat spot on the Ed Sullivan show (CBS-TV) after a 50-city "in person" tour of the U. S. last fall.

CANCER DRIVE AID

TV-Radio's Help Lauded

RADIO and television were responsible for a large part of the success of the American Cancer Society's 1951 campaign for education in cancer detection, according to the society's 1951 report, just published.

The report indicated a total of 11,221 radio transcriptions distributed and exhibited or broadcast to audiences all over the country. Two transcribed educational programs used on radio included 689 sets of *Music America Loves*, a series of musical programs with short talks on cancer, and 372 sets of *Life's Fuller Measures*, a series of dramatic sketches presenting cancer as a human program to be surmounted by timely action. Among visual features aired via television was *Worry and Doubt*, a short motion picture stressing the futility of worrying and doing nothing about cancer.

Individual stations not only carried transcriptions but also went all-out promotion-wise on behalf of campaign funds. Typical of the reports received by BROADCASTING • TELECASTING as of last Thursday were these:

A "Lights On" cancer drive capped efforts in the Troy-Albany-Schenectady area, with WTRY Troy, N. Y., participating. Program Director Randy English produced a one-hour program featuring members of the touring Movietime USA troupe—Greer Garson, Audrey Totter and Victory Jory—in taped sequences. Vern Cook interviewed the stars on tape, later incorporated as background for the program.

WHAS-AM-TV Efforts

WHAS Louisville, Ky., set up a large display at the Merchants Home Show at the Jefferson County Armory, with photographs of WHAS-CBS radio-TV stars. This proved a natural tie-in with the Kentucky Chapter, American Cancer Society, which occupied adjoining booths. WHAS interview programs thus attracted large crowds near the display and cancer contribution boxes.

WHAS-TV designated April 26 as C-Day, featuring a nine-hour telethon of local programming designed to stimulate donations. Setting a goal of $11,000 in pledges, WHAS television turned telephones over to police, sports and celebrities. Special feature was a dramatic film, *Victory*, and a presentation of the society's award to a Kentucky woman for the outstanding contribution.

WKY-TV Oklahoma City telecast an interview with a local cancer victim (whose larynx had been removed) on its daily *Guest Room*. Also appearing on the program were a physician who performed the operation, a specialist-board chairman of the Oklahoma Cancer Society and the director of the society's volunteers.

KIST Santa Barbara, Calif., went to bat for the cancer society with a show highlighting the talents of several Hollywood stars and celebrities from other radio stations. Show was coordinated by Al Staas and included Bob Hope, Tex Williams, Walter O'Keefe, Martin & Lewis, Fibber McGee & Molly, Phil Harris and Alice Faye, and Stan Kenton. Telephones were manned all night to take pledges.

WHITE HOUSE

President Guides TV Tour

THREE TV networks—NBC, CBS and ABC—arranged to carry a guided tour of the rebuilt White House, scheduled last Saturday afternoon at 4 p.m. (EDT). President Truman was to serve as host to the nation, giving the nationwide audience an intimate glimpse of the White House.

The President was to give a running commentary on the decorations and the historical background of the public rooms on the first two floors. Mr. Truman agreed to conduct the TV tour so millions of televiewers could see what the White House looks like now.

Major radio networks and many independent outlets were to broadcast a condensed version of the President's commentary for later in the week end with ABC scheduling 8-8:30 p.m. and MBS, 11:30-11:55 p.m. Saturday.

Renovation of the White House was completed recently at a cost of roughly $5,700,000. Long lines of visitors have been taking a public tour of the Executive Mansion since it was reopened, with as many as 5,000 able to crowd through in a single day. Many millions of viewers were offered the chance to see the mansion simultaneously in their own homes and at the same time hear the President in his ad lib description of the historic rooms and furnishings.

Construction Forms

APPLICATION form (CMP 4-C) for materials to be used in radio-TV broadcasting and other construction projects has been revised by the National Production Authority. Space is provided in new form to answer certain questions formerly listed on separate sheets. Additionally, a new section was added requesting information sought by the Defense Electric Power Administration which evaluates electric power projects. Broadcasters filing for authorized materials (as distinguished from those minor projects under self-authorization) need not fill out this provision which pertains to bids for use of 2,000 kw or more power. Forms and modified instruction sheet are available from NPA, Washington, or Commerce Dept. field offices.

Strictly Business

(Continued from page 12)

every housewife's kitchen shelves. This was accomplished, to a large degree, through advertising on such AM programs as Don McNeill's *Breakfast Club* (ABC radio, 9-9:15 a.m. EDT weekdays) and *The Second Mrs. Burton* (CBS Radio, 2-2:15 p.m. weekdays) as well as by hitch hiking on other vehicles in the well-filled General Foods' radio garages.

Describing himself as "a typical American guy," Mr. Cleaves fits that category, perhaps, in only one way. That is, he doesn't like joining clubs. Spending as much as 30% of his time traveling for General Foods, he seems to prefer staying at home, once he gets there. Mr. Cleaves' business travel is corollary, however, to one of his business beliefs: in spite of advertising volume, it is still the point of contact and the sales organization that counts. He strongly recommends that people going anywhere in advertising have sales experience and a thorough knowledge of the retail-wholesale relationship.

Born in Lowell, Mass., in 1911, Mr. Cleaves attended the Thayer Academy to prepare for Harvard, where he was graduated with a major in corporate economy with the class of '33.

First job was in sales promotion with American Tissue Mills, Holyoke, Mass. He left three years later to join General Foods in 1936 as a retail salesman in Boston. Quick assignments followed for him, a member of the subsidiary Diamond Crystal & Colonial Salt Co., in Providence, R. I., Chicago, and the division home office, St. Clair, Mich., where he became associated merchandising manager. He was promoted to general sales manager of the division in February 1949.

In September 1950, he was sent to New York as associate sales manager, Jell-O Division, to be appointed sales and advertising manager of the same division in January, 1951. Then, two weeks ago, Mr. Cleaves was named marketing manager for Associated Products: Jell-O, Minute Rice and Minute Tapioca, Calumet Baking Powder and Certo products.

Mr. Cleaves and his wife, the former Barbara Morrison, live in Darien, Conn., with their family of three children — Deborah, 15; Craig, 12, and Linda, 11. Given a chance, the whole family will rush to New Harbor, Me., for beach life, fishing, and—under paternal direction—"the finest clam bake you ever saw."

NBC JONES TWINS

Cameramen Cover Turkey

PERIPATETIC Jones Twins, globe-trotting NBC television cameramen, are currently extending their chain of film exclusives, latest of which was shown on the April 20 edition of the NBC teledocumentary, *Battle Report—Washington.*

The twins, Gene and Charles, and Genes wife, Natalie, now overseas, sent back 4,500 feet of film depicting activity along the Turkish-Russian frontier, filming of which has never before been permitted. The Jones trio accompanied the Turkish army in maneuvers through snow-capped mountainous terrain.

From Turkey, the Jones trio flew to Rome where they covered Easter ceremonies. Films shot of the political situation along the Suez Canal also were shown on *Battle Report.*

Jones twins may be remembered for their film of Robert Vogeler in Vienna just after his release from Hungary, and their Easter 1951 of Pope Pius XII addressing the multitude in St. Peters square.

NEW TV TUBE

Allows Two-Band Tuning

TV RECEIVING tube permitting construction of television tuning units for both present VHF channels and the ultra high frequency channels to be used in the future was reported Wednesday as developed by the General Electric tube department.

The tube makes possible a combined tuning system for both bands of TV channels, according to GE tube engineers, who said a combined tuner should include an oscillator tube, a radio-frequency amplifier and mixer tube, the type GE is announcing.

GE engineers said production began on the oscillator tube last fall and that the radio-frequency amplifier was displayed for the first time in March at the Institute of Radio Engineers national convention in New York.

The new mixer tube, like its predecessors, they said, covers with its frequency range the entire band of television frequencies. All three tubes will be built at the firm's Owensboro, Ky., receiving tube plant. The new mixer tube has designated type 6AM4.

Cantor's Blood Drive

NBC radio and TV comedian Eddie Cantor has been commended for helping the American Red Cross blood plasma drive by New York's Acting Mayor Rudolph Halley. In urging that New Yorkers support the blood donor program, Mr. Halley cited the network comedian for "personally extending himself to bestir public apathy" about military needs for plasma. Mr. Cantor scheduled a series of one-man shows, for which a blood donation will serve as admission, starting in Boston last Tuesday, followed by daily performances in Baltimore, Cincinnati, Cleveland, Buffalo and Chicago.

film report

Production . . .

Dean Martin and **Jerry Lewis**, stars on NBC-TV *Colgate Comedy Hour*, plan to produce and direct a half-hour TV film series titled *Dean Martin and Jerry Lewis Playhouse*. Their Colgate contract prohibits them from acting in the series. An advisory board to select new TV talent comprises **Janet Leigh**, **Tony Curtis** and **Jeff Chandler**.

* * *

Jerry Fairbanks Productions, Hollywood, now shooting *The Greatest Mother*, a special half-hour TV film for Mother's Day presentation by the *Family Theatre*, has added **Ethel Barrymore** and **Ruth Hussey** stage-film stars, to cast also headed by **Loretta Young** and **Gene Lockhart**. Miss Barrymore, signed for series by **Interstate Television Corp.**, will make this her TV film debut and read from the Scriptures. Miss Hussey, for the fourth time for Family Theatre, will portray Mary, Mother of Jesus.

* * *

Don Ament Productions, Hollywood, is now filming half-hour TV fairy tale series, *Once Upon a Time*, the first of which is *The Goose Girl*. Each film is laid in the home of a woodcarver who, as he carves figures, relates stories to two children. Already cast are **Lois Butler**, young film actress-singer; **Don Jorneaux**, dancer with the Sadlers Wells Ballet; **Maurice Cass**, film actor, and **Mary Scott** (Mrs. Cedric Hardwicke). **Muriel Brown**, children's short story writer, is adapting the scripts and **A. Barr-Smith**, English producer-director, is directing. **Don Ament**, Southern California artist, is the executive producer; **Richard Avonde**, is the producer, and **Leon Chooluck** is production supervisor.

* * *

Reynolds Productions, Beverly Hills, has consummated deal for **Screen Televideo Productions** to film the first series of four half-hour TV programs for the **duPont Co.'s** *Cavalcade of America* on NBC-TV. Production is to begin within few weeks.

* * *

Allegro Pictures Inc., North Hollywood, Calif., and **Bernard Tabakin**, Beverly Hills TV program packager, have concluded arrangements with **Jacques Gauthier**, head of **Enterprises Generale Cinematographique**, Paris, for a half-hour TV film series to be produced in France. Allegro Pictures and Mr. Tabakin will supply the star, director, scripts and writer. Allegro will handle distribution in the U. S.

* * *

Werner Janssen Productions, recently formed in Hollywood to produce 100 three-minute color TV films, has filed incorporation papers listing **Stanley Neal**, industrial film producer, as president; **Werner Janssen**, composer-conductor, vice president, and **Sobey Martin**, TV film director, secretary. The firm is capitalized for $150,000.

* * *

Sol Lesser Productions, Culver City, acquires 1,010,000-foot film library of **Burton Holmes'** travelogues to be re-edited and released as TV short subjects and theatrical features. The library also includes 26 features in color and represents Mr. Holmes' career as an adventurer-with-camera. His associate, **Robert Mallett**, joins Mr. Lesser to write and deliver narration for the re-edited releases.

* * *

Sales . . .

Edward Lewis Productions, Hollywood, will begin series of 26 half-hour TV films on CBS-TV May 30 for **Joseph Schlitz Brewing Co.**, Milwaukee. Featured will be **Irene Dunne** as narrator-m.c. and **Dan Duryea**, **Eddie Albert**, **Jane Wyatt** and **Teresa Wright** among others in leading roles.

* * *

Hal Roach Jr. and **Carroll Case**, co-producers of **Showcase Productions**, Culver City, signed by **Philip Morris & Co.** for 26 more half-hour TV films in *Racket Squad* series. Shooting started last week.

* * *

Spratt's Patent Ltd., Newark (dog biscuits), has started *Crusader Rabbit*, TV cartoon film series produced by **Jerry Fairbanks Productions**, Hollywood, on WCAU-TV Philadelphia for 13 weeks trial run preceding national distribution under the same sponsorship, scheduled for September. Agency is **Paris & Peart**, Philadelphia.

* * *

Harris - Tuchman Productions, Hollywood, completed series of eight TV film commercials for **Louis Milani Foods Inc.**, Los Angeles (Cimarron Sauce, Buccaneer and Thousand Island Dressing). Agency is **Leonard Shane Adv.**, Los Angeles.

* * *

Film People . . .

Edward Arnold, film actor and star of *Mr. President*, on ABC radio, and **Diana Lynn**, film and TV star, have joined **National Repertory Theatre Inc.**, Hollywood, on a partnership basis. The company is producing TV films to be released by **Interstate Television Corp.**

* * *

George Stevens, motion picture director and 1952 Academy Award winner for Paramount's *Place In the Sun*, has been signed to direct the first TV film in **Hal Roach Studios**, Culver City, *The Dramatic Hour* series.

* * *

Screen Gems Inc., Hollywood, signs **Rhys Williams**, **Elizabeth Risdon** and **Regis Toomey**, stage-film actors, for half-hour TV film, *Crossroads, U. S. A.*, now being produced by **Jules Bricken** for **American Petroleum Institute.**

* * *

Bing Crosby Enterprises, Los Angeles, signs **James Agee**, co-author of the screenplay for *African Queen*, to adapt script of pilot film for *Trauma*, a half-hour TV series. Original story, *The Chase*, was written by **Bernard Girard** and **Richard Doroso**, producers of the series.

* * *

Screen Gems Inc., Hollywood, subsidiary of Columbia Pictures Corp., has signed **Arthur Franz**, stage and film actor, for leading role in *Government Is Your Business*, second in series of TV films which company is producing for the Christophers, Catholic study group. Featured in film are **Tom Powers**, **Douglass Dumbrille** and **Minna Gombell**. Teleplay is based on writing of **Father James Keller** and was adapted by **David Dortort** and **Cyril Hume**.

* * *

Phillip Terry, film actor, signed for leading male role opposite **Gloria Swanson** in *Short Story*, first half-hour films in new TV series *The Gloria Swanson Show*, produced by **Tele-Voz Co.**, Mexico City, for distribution by **Simmel-Meservey TV Productions Inc.**, Beverly Hills.

* * *

Allan Miller, vice-president, MCA (Beverly Hills talent agency) motion picture department, and **George Stern**, radio-TV department, transfer to **Revue Productions** (subsidiary MCA), in charge of production.

* * *

Clayton Moore, star of *Lone Ranger* TV film series produced for General Mills by Jack Chertok Productions, assigned a role in Columbia Pictures Corp. feature film, "Son of Geronimo."

SAG-ATFP PACT

Negotiations Continues

WHILE collective bargaining negotiations continue for a new contract covering actors in TV film, Screen Actors Guild's new daily and weekly free-lance minimum salaries of $70 per day and $250 weekly, will be put into effect May 8 in an agreement worked out between the guild and the Alliance of Television Film Producers.

Besides ATFP members, in agreement also are Hal Roach Productions, Roland Reed Productions and Cascade Productions. Previous salaries were $55 and $175. Additional money agreed upon will be held in reserve by the producers until Wage Stabilization Board approval is obtained. Bargaining continues on all SAG proposals including rates for weekly free lance actors in multiple pictures, and additional payment to talent for re-use of television films in which they appear. Present SAG contract with these producers expires June 24.

Actor Retains Rights

RADIO and television rights to his own services are retained by Broderick Crawford, in a new contract negotiated by the actor with Columbia Pictures Corp. New agreement replaces his original seven year contract. Under agreement worked out by his representative, Al Melnick, the film star is to make two Columbia pictures yearly for the next seven years and also be available for one outside movie per year, but reserves all radio and TV rights for himself.

POLITICAL PUNS

AAAA Hits Comics' Gags

SPONSORS backed by the American Assn. of Advertising Agencies, alarmed by the growing trend of TV comedians to poke fun at prominent political figures, plan measures to curb the practice.

The culmination came April 27 on NBC-TV's Red Skelton Show, when the comic made an indirect reference to President Truman presumably causing viewers to tie in the phrase, "Number One Idiot," with Mr. Truman.

Fear has been growing for some time that if talent and writers refuse to adhere to codes established by networks, sponsors and their agencies, the government might set up control measures in the form of censorship or legislation.

Canadian TV Sales

SALES of television receivers in Canada climbed from $12,948,000 in 1950 to $20,836,000 in 1951, according to data released by the Dominion Bureau of Statistics at Ottawa. At the same time, radio receiver sales fell off from $59,160,000 in 1950 to $51,452,000 in 1951. There were 754,000 radio receivers sold in 1951, compared to 759,000 the previous year. Television sets sold in 1951 totalled 39,200 compared to 29,600 in 1950. Practically all television receivers were sold in southern Ontario.

BALTIMORE SPORTS

TV Aids, Not Hurts Gate

BALTIMORE experiment April 21 indicated video helps rather than hurts sports gate receipts there when the Squires Club staged the Coliseum boxing card without radio or TV coverage, according to Robert B. Cochran, WMAR (TV) Baltimore program director.

Mr. Cochran said Sports Editor Jesse A. Linthicum's column in *The Sun* reported the night's receipts, normally averaging $400, with television sponsorship running the figure up to between $1,500 and $1,800, totaled only $207, an all-time low, with no other local sports competition that night. Wrestling, too, is being aided by TV, he said, with 1951 attendance double that of 1950 and current figures above those of last year.

Kaltenborn Awards

THE KALTENBORN Foundation, established to promote scholarly activities in the communication of ideas through radio, television and the press, has announced one or two fellowships are now open for the 1952-53 scholastic year. Application blanks will be forwarded upon request to the Foundation, 167 East 64th St., New York City 21. Recent fellowships went to students at Miami U., U. of Munich, and Free U. of Berlin.

SET SALE FRAUDS

RTMA-BBB Fight

ACTION to protect the public from fraudulent methods in the sale and servicing of television sets has been taken by Radio-Television Mfrs. Assn., in cooperation with the Assn. of Better Business Bureaus.

The two associations have jointly prepared an 11-page booklet titled, "Things You Should Know About the Purchase and Servicing of Television Sets." It was prepared by the RTMA Service Committee in cooperation with the Television Service Bureau of BBB, developing from an idea first carried out by the New York BBB.

Television sets are complicated and need some servicing from time to time, but the prudent person should suffer few headaches when buying and using a TV receiver, according to the consumer booklet.

"Remember these basic points," the consumer is reminded: "First of all, what you are purchasing is television reception. Your responsible dealer wants you to have it. He will demonstrate for you at his place of business. Many dealers also will arrange for a home demonstration prior to purchase. The set probably will perform better in your home than in the dealer's place of business, if you are in a favorable location.

"Get it in writing. The grandest promises may not do you any good unless they're down in black and white.

"Read before you sign. This means your bill of sale, installment contract if any, manufacturer's warranty and service contract. Know what you are getting and how you are covered before you buy. Retain your bill of sale—it is important should there be need to establish warranty status in respect to date of receiver purchase.

"When in doubt, find out. If still in doubt, call or write the local BBB or manufacturer's distributor in your area."

Noting that television is probably the nearest thing to a miracle that most persons will see in their lifetime, the booklet notes:

"A television set is also a commodity when you're buying one or having one repaired or serviced. Amazing as they are, they are sensitive instruments and they have limitations. Because of some misunderstanding concerning these limitations and concerning the proper method of approach to the purchase and operation of a television receiver, RTMA and BBB have put out this booklet."

There are a few irresponsible operators in TV, as in every business, the booklet warns, explaining it is designed to protect the public from such organizations. Topics covered in the booklet include antenna, manufacturer's warranty, service, service contracts and types of service contractors. In addition, there is background material covering TV signals, equipment and types of interference.

Radio commercials of two New York City appliance dealers, offering to "store" TV sets and washing machines in listeners' homes and to pay $1 per week for the privilege, provoked action from the local Better Business Bureau, according to its April report.

Offer was made, according to the commercials, due to an urgent shortage of warehouse space in New York. After investigation, BBB reported the space shortage as "exaggerated" and that, regardless of any real shortage, just one TV set was "stored" in each household, with the purpose of making a sale. On these grounds, BBB requested the advertisements be discontinued, and one dealer, Bedford Radio Sales & Service, stopped the commercial immediately while the other, Sunset Appliance Stores, withdrew its ad within 24 hours after the bureau issued a public statement condemning the promotion.

SAFEGUARDS for public in buying and enjoying TV sets have been drafted by RTMA Service Committee, working with Better Business Bureaus. RTMA Committee members are (seated, l to r): D. R. Creato, RCA Service Co.; F. L. Granger, Stromberg-Carlson Co.; E. W. Merriam, Sylvania Electric Products; Joseph S. Durant, GE Supply Corp.; David Davis, General Electric Co.; R. W. Felber, Stewart-Warner Electric Div.; Ray J. Yeranko, Magnavox Co.; C. E. Hoshour, Belmont Radio Corp.; unnamed visitor; A. H. Kuttruff, Westinghouse Electric Corp.; N. J. Cooper, Hallicrafters Co., Frank E. Smolek, Zenith Radio Corp. Standing, Albert Coumont, RTMA service manager; A. W. Kramer, Richard H. Schneberger, G. F. Hoppmann, Crosley Division; Harold J. BOOK PUBLISHERS

Enlist TV as Sales Aid

GROUP of 18 national publishers and 27 Southern California retail book stores in a cooperative deal combined forces to have television, often blamed as their main competition, sell books for them.

KNXT (TV) Hollywood's *The Valley Book Parade*, weekly half-hour program which started two weeks ago, features Lorita Baker Valley, book reviewer and lecturer of 25 years experience, and her daughter, Pat, leading discussions on books with writers, commentators and literary authorities.

New York publishers, co-sponsoring program, are: Thomas Y. Crowell Co., Crown Publishers, Doubleday & Co., E. P. Dutton & Co., Farrar, Straus & Young, Houghton Mifflin Co., The Greystone Co., Lane Pub. Co., Little, Brown & Co., McGraw-Hill Book Co., Prentice-Hall, G. P. Putnam's Sons, Random House, Rinehart & Co., Henry Schuman Inc., Simon & Shuster and Viking Press.

Agency is Jack Case Adv. Counselor, Los Angeles.

NU-NBC INSTITUTE

Agenda Set for Chicago

ON-JOB training will be given for the first time this year to students attending the annual Northwestern U.-NBC Summer Radio Institute in Chicago. Advanced students will be eligible to enroll for the seminar-internship in broadcast production during the six-week session of professional courses.

Those selected must have backgrounds, aptitudes and interests which indicate "a capacity for achievement in that area of study," according to the co-directors of the Institute, Judith Waller, director of education and public affairs at NBC Chicago, and Donley Feddersen, chairman of the department of radio and television at Northwestern. Interns will spend 30 to 40 hours weekly as observer-workers in an NBC Chicago radio or TV production department with on-the-job training in their selected field.

Twelve regular courses will be offered during the institute, covering programming, production, writing, sales, management, public service, news and announcing, with both radio and television included in most of the courses. Television alone will be studied in television station organization and television directing and production, which will be taught by, respectively, George Heinemann, TV program manager at NBC Chicago, and Ben Park and Don Meier, producer-directors there.

Other courses and instructors:

Radio and Television Today, a symposium conducted by Mr. Feddersen with broadcast experts; Radio and Television Announcing, Louis Roen, announcer; Radio-Production Procedures, Homer Heck, radio program-production manager; Music for Radio and Television, Ralph Knowles, radio production-director.

Sales and Management, Richard Fulkner, local radio sales; Dramatic Writing, Martin Maloney, assistant professor of radio, Continuity Writing, Lyle D. Barnhart, assistant professor of radio; News and Special Events Broadcasting, Baskette Mosse, assistant professor of radio, journalism school; Program Planning and Building, Charles Hunter, assistant professor of radio; and Public Service Broadcasting, Miss Waller.

Enrollment is limited to persons with experience in broadcasting or related fields and to "especially talented newcomers," Miss Waller said. Classes will be at NBC studios in Chicago and on the NU campus at Evanston.

WJLB Detroit last month entered its 27th year of broadcasting. Toasting completion of 26 years of operation are (l to r) Richard Pavey, music director; George R. Kendall, station manager; Edwin E. Nyy, assistant to the president; E. H. Clark, chief engineer, and E. V. Hay, commercial manager.

PARTS SYMPOSIUM

Set in D. C. May 5-7

CAMPAIGN of electronics manufacturers and users to improve quality of the parts that go into equipment is arousing widespread interest in industry and government, according to Radio-Television Mfrs. Assn. Registration for a three-day symposium on quality of components is running far ahead of the rate last year.

Sponsoring the symposium, to start today (Monday) at the Interior Dept. auditorium, Washington, are American Institute of Electrical Engineers, Institute of Radio Engineers and RTMA, with active support of the National Bureau of Standards and Dept. of Defense.

Some two-score representatives from other countries are expected to attend. Sessions will be held during the day, except for an evening discussion on transistors. Symposium headquarters will be the Roger Smith Hotel.

WALK AM-FM ON AIR

Patchogue, L.I., Dedication

WALK-AM-FM Patchogue, L. I., is now on the air after dedication ceremonies last month. AM station is on 1370 kc with 500 w daytime. FM outlet operates on 97.5 mc. Officers include Nils E. Segerdahl, president-general manager; William K. Macy Jr., vice president-treasurer, and John Wallace, secretary.

WALK is owned and operated by the Suffolk Broadcasting Corp. and is located in South County Shores, East Patchogue. Other staff members include Douglas Way, news editor; Arnold Lewis, sports director; Edmond Robbins, assistant news editor; Vincent Ranieri, engineer; Walter Luce, engineer-announcer; Phillip Roll, traffic manager; Bob Early, morning personality; Leon Fremault, staff announcer-farm director; W. K. Macey Jr., vice president; Jack Ellsworth, program director; Mrs. N. Segerdahl, secretary-bookkeeper; Ailene Sybil, women's editor; Walter Bates, commercial manager, and Owen Marlow, announcer-engineer.

WSB Okays Guild Pact

NEW minimum wage agreement between Radio and Television Directors Guild and CBS Television in Hollywood, retroactive to Feb. 1, 1951, has been approved by the Wage Stabilization Board. Contract, affecting about 35 persons, calls for floor managers' starting rate to be $85 for a 40-hour week, progressing to $100. Directors start at $125, receiving $145 at the end of the first year. They receive additional fees for commercials.

NEW restaurant is being opened by Larry Finley, disc m.c., KFWB Hollywood, on Sunset Strip in that city. His programs will originate from there.

programs promotion premiums

ACCORDION folder promotion piece, released by CBS Radio, declares "It's no secret that the Housewives' Protective League proved the most sales effective participating program in all broadcasting." Cartoon characters whisper this message from ear to ear with 16 success stories given as examples of show's pulling power.

GUEST APPEARANCES

WELL known civic leaders and personalities in the Atlanta area are invited to be "disc jockeys of the Day" on new program, *It's Your Mike*, on WSB there. Guest is encouraged to tell his personal story or give information on a current community project or drive as well as introduce his favorite music.

UN INTERVIEW PROGRAM

INTERVIEW program, *Spotlight on the UN*, is being carried by Liberty Broadcasting System in cooperation with United Nations Radio daily from 8:30-8:45 p.m. EDT. Show features discussion with UN delegates and correspondents and celebrities, and highlights UN activities in various fields.

MERCHANT SALUTES WCHS

QUARTER-PAGE advertisement in both local Sunday newspapers was used by a Chevrolet dealer to salute WCHS Charleston, W. Va., as a good advertising medium. In the ads, the dealer pointed out that Chevrolet and WCHS made a good team.

FREE JELL-O CUT-OUT

FREE cut-out puppet show with the purchase of three Jell-O Puddings is being offered as part of give-away series planned by the Joseph Jacobs agency, N. Y., for concentrated promotion in the New York Jewish market. Puppet cut-out features Menasha Skulnik, leading Jewish comic, and star of the Jell-O Pudding show over WEVD New York.

NEW POLITICAL WRINKLE

AMONG special guests to be heard in WMT Cedar Rapids' special convention coverage in Chicago are winners of WMT's high school essay contest. More than 300 Iowa schools participated in the contest, with pupils writing on the topic, "Why I Would Like To Attend the Republican (or Democratic) National Convention." Two winners are to be selected from each party. Together with their teachers, the young winners are to air their views from Chicago. This political convention coverage will climax WMT's 20-program package, *Politics Is Your Business.*

RADIO-MOVIE TIE-IN

CONTRACT with Pacific Drive-In Theatres has been signed by KLAC-AM-TV Hollywood calling for reciprocal plugging of theatres' motion pictures and station's radio programs. Disc jockeys have recorded programs describing their show which will be played before first feature and during intermission. KLAC will advertise drive-in's feature between 5:30 and 7 p.m. daily spotting it twice in the afternoon and three times in the evening.

TRANS-ATLANTIC TV

FIRST STEP toward trans-Atlantic telecasting was believed achieved April 27 by WTVN-TV Columbus, Ohio, and BBC in London, when the two produced *Youth Has Its Say*, regular WTVN weekly junior town meeting show, with the audio portion comprising questions and answers relayed live via radio-telephone and the video portion comprising pictures shot in advance in London. Planning took more than a year, station reports.

AIMED AT HOUSEWIVES

DAYTIME TV show for a housewife audience was aired for first time April 28 by WTCN-TV Minneapolis-St. Paul. New show is telecast Monday through Friday, 1:30-1:45 p.m. Format combines consumer information, community activities, exercise demonstrations, hit tunes and guest speakers.

CHURCH CHOIR SERIES

SERIES featuring choirs of area Protestant churches has begun at WCCC Hartford, Conn. Greater Hartford Council of Churches and American Guild of Organists are cooperating with station to present *The Churches Sing.* More than fifty choirs are expected to participate. Programs will be taped during the week so singers will be able to hear themselves at broadcast time each Sunday.

WTJN SHUT-IN BROADCASTS

PROGRAM designed to reach community's shut-ins is being aired by WTJN-AM-FM Jamestown, N.Y. Radio coverage has been provided for weekly visits made to homes of invalids by members of city's Good Neighbor Society. Station reports programs have enjoyed great success in giving participants a sense of belonging to the community and a new interest in things which surround them.

WRFD'S RADIO ACTIVITY

FOLDER announcing "you don need an Atomic bomb to be Radi Active in Ohio" has been sent ou by WRFD Worthington. Effective ness of station's open house at ne studios and radio farm is theme o the piece, which tells the story wit pictures of those who attended t substantiate the station's claims.

'WHOA, BOY . . .'

KTOW Oklahoma City is airing special gimmick for a used ca dealer. A "cowboy-type" voice i heard over the sound of horse' hoofbeats, saying, "Whoa, boy . . this is where I trade you in for a good used car." Stunt had an un expected turn when an old fellow walked in to buy "that horse the fellow traded in."

SCORES AND MUSIC

ALTHOUGH baseball games will not be aired this season on WCAV Norfolk, Va., station has launched *Grandstand Bandstand Show* with music and two five-minute complete scorecards every hour. Cards to keep pace with the baseball scene will be mailed to listeners on request. Three and a half hour show, handled by Joe Guidi, is sponsored by Muntz TV and Personna Blades.

'THE HUMAN HEART'

COMMUNICATION Materials Center, a division of Columbia U. Press, 413 W. 113th St., New York 27, has announced completion of a radio series of eight dramatic reports on progress in the treatment of heart disease. Characters in the radio series include many top media stars.

TV STAGES BOXING

STUDIO-STAGED Thursday boxing featuring four 4-round bouts lasting from 6:15-7:30 p.m. and broadcast exclusively for television by KNXT (TV) Los Angeles is being promoted by the station with mailing pieces showing a montage of newspaper and magazine articles and pictures about the events. The CBS-TV station stages the amateur bouts in its own studio with Tom Harmon, sports director and former U. of Michigan football star, calling the blows. Invited guests number 350.

WDAK Version

"THE REAL facts about Appomattox," according to a trade bulletin circulated by Allen M. Woodall, president of WDAK Columbus, Ga., have been slightly twisted in history books. Mr. Woodall said Gen. Robert E. Lee was taking a rest after chasing Gen. Grant's army all over the country and just prior to taking over Washington. When a man walked in the court house "Gen. Lee took him to be his orderly" and gave him his sword to polish. Actually Gen. Grant came in to surrender, according to the Woodall version. Having handed Gen. Grant his sword, Gen. Lee, "being a true Southern gentleman, couldn't go back on his word."

WMCA, WPIX (TV), WGN-TV, WXEL (TV) Set Plans

ORE baseball agreements, sponrships and broadcast schedules ere announced by radio and deo outlets in three major league ties after the season got going.

WMCA New York reports it ld all baseball adjacencies and 'ailabilities for its broadcasts of e 1952 Giants schedule.

WPIX (TV) New York, schedling telecasts of 154 Giant and ankee games, has surrounded the ents with six live shows and 088 spots.

Identified by WPIX as "the rgest sports package in the hisry of television," the sale is icked by some 16 national adrtisers.

Station is featuring Joe DiMago on his *Yankee Preview* program) minutes before and after all ank games for Philip Morris garettes, through Biow Co., New ork. Laraine Day, before each iants game, is presenting her uarter-hour *A Day With the iants* for Metropolitan New York odge Dealers, through Ruthuff & Ryan, followed by Win lliot's 10-minute *Clubhouse Inrviews*, with half sponsorship by hite Rock Beverage Co., through enyon & Eckhardt, the other half Beacon Wax Co., through Allied dvertising Agency of Boston.

After-Game Buys

After follow-ups for both teams, uy LeBow and Hal Tunis are conucting a 10-minute baseball quiz or Bedford Stores, through Al lack Productions.

Bristol-Myers Co. for Bufferin nd Champion Spark Plug Co., has aken all eight-second spots; Wils-Overland and Zippo Mfg. Co. acks three-fourths of the secondary 20-second announcements alernately, and the primary 20econd spots alternately by New ork Multiple DeSoto group of ealers, Colgate - Palmolive - Peet, ities Service Oil Co. (Pennsylvania il) and Dwight Edwards Co., a ivision of Safeway Stores. Reaining quarter of secondary 20econd announcements was purased by Excelsior Quick Frosted eat Products, through H. W. auptman, New York.

WGN-TV Chicago is feeding all aturday Cubs and White Sox ames to WOOD-TV Grand Rapids, ith same sponsors as Chicago, amm's beer and Chesterfields. tation sent April 15 telecast game to WXEL (TV) Cleveland, which supplied narration for Indians-White Sox opener. Plans have been dropped for feed to Rock Island, Memphis, Birmingham and Atlanta.

Preceding Mutual's *Game of the Day*, Toni Co., (for Prom Home permanent, White Rain lotion shampoo) sponsors five-minute *Warm-Up* show over full network alternately with Gillette Safety Razor Co., Toni announces, with Al Helfer, sportscaster, handling interviews of sports celebrities and late baseball news.

WTTV (TV) Bloomington, Ind., is bringing major league baseball to the Indianapolis area televiewers for the first time. This was announced by Norman Cissna, sales manager of WTTV, who explained that WTTV is telecasting 26 Cincinnati Reds games through WCPO-TV Cincinnati.

WXEL has named Bob Neal, for past two years sportscaster and general manager for WERE Cleveland, from which he has resigned, to announce Indians' games, with Nicholas (Red) Jones, former American League umpire, concentrating on color. The station is using four cameras this year, Franklin Snyder, general manager, said.

KVEN Ventura, Calif., came up with carrier pigeons as a means of circumventing the telephone strike in its "Operation Coo" [B•T, April 21] for the Ventura Braves-Fresno Cardinals game in Ontario April 11. Station and sponsor, Warren General Tire Co., Ventura, got together with the Ventura Racing Pigeon Club and moved the game back for the strictly daytime working pigeons who brought game results after each inning to sportscaster Jerry Palmer.

WPTR Albany, N. Y., announced that George Miller, sports director, handles play-by-play broadcasts of all the Schenectady Blue Jays' Eastern League games this year, with Ed Lange, former Siena College basketball star, handling color. Tobin Packing Co. is sponsor.

WWPA Williamsport, Pa., sports director, Bill Gardner, announces the major part of the Williamsport Tigers games in the Eastern League this year. Sponsors are Clark & Hoag, Philco TV dealer, and E. Ferranti, Ballantine beer and Ale distributor.

CULMINATION of plans for carrier pigeons to serve as medium by which KVEN Ventura, Calif., received and transmitted description of baseball game played by Ventura Braves and Fresno Cardinals in Ontario are set by (l to r) Harry Engel, owner-general manager, KVEN; Lloyd Warren, president, Warren General Tire Co., Ventura; Don Johnson, racing secretary, Ventura Racing Pigeon Club. Telegraphers' strike prevented normal transmission of play-by-play reports.

* * *

NETWORK CLIENTS

Up In Radio and TV

ADVERTISERS active in TV network programming totaled 166 as of April 1952 compared to 163 as of January 1952, while 132 advertisers were sponsoring regularly scheduled radio network shows as of April, compared to 124 in January.

These listings appear in the new edition of *The FACtuary*, published quarterly by Executives Radio-TV Service, Larchmont, N. Y. Totals show 158 regularly scheduled programs sponsored on TV networks, compared with 202 sponsored radio network programs. This represents a drop of nine TV programs and a gain of two radio programs from the January totals of 167 TV and 200 radio shows.

Currently active advertising agencies in network TV number 90, with 82 agencies in network radio, *FACtuary* listings showed.

the weight of a magazine . . .

is nothing to be computed in ounces or postage rates. The true measure is this: "How much weight does it carry in the field it serves?"

BROADCASTING • TELECASTING carries plenty of weight with readers. Consider this:

1. More people associated with radio-TV pay for BROADCASTING • TELECASTING than for any other Journal.
2. Among radio-TV advertisers and agency people alone (the men and women who decide where advertisers' messages shall be aired) over 5500 copies are bought each week with at least 4 readers per copy—over 25,000 impressions.
3. In 1951—as for 20 years past—BROADCASTING • TELECASTING published more radio and more television news and business features than all other industry publications combined.

No . . . the weight of a magazine can best be determined by the intense loyalty of its readers. That's why it pays to put the weight of BROADCASTING • TELECASTING behind your message. It will carry you further, deeper, more productively to your best customers than any other approach.

Behind your message add the weight of . . .

Non-Docket Actions . . .

TRANSFER GRANTS

Listed by States

KHSL and KVCI (FM) Chico, Calif.; KVCV and KVRE (FM) Redding, Calif., and KYOS and KVME (FM) Merced, Calif.—Granted transfer of control from Ruth McClung, executrix of estate of Hugh McClung, deceased, to Micky McClung (also known as Ruth McClung) under terms of decree of first and final accounting and final distribution in matter of Mr. McClung's estate. No monetary consideration. Granted May 1.

WLBE Leesburg, Fla.—Granted transfer of control from Eleanor Hunter to Paul A. Husebo and Wendell F. Husebo, equal partners, for $79,000 for 100% interest. Paul A. Husebo is general office manager for Minneapolis wholesale hardware firm. Wendell F. Husebo is manager of WTRF Thief River Falls. Granted April 18.

WRGA-AM-FM Rome, Ga.—Granted transfer of control from Annie C. Quarles, administratrix of estate of John W. Quarles, deceased, to Charles Smithgall. Transferor will sell note amounting to $83,588.54, representing indebtedness to licensee corporation, for $60,000. Mr. Smithgall is owner of WGGA Gainesville, Ga., and president, treasurer and 28% owner of *The Daily Times*, Gainesville. Granted May 1.

WCBC Anderson, Ind. — Granted transfer of control from Lloyd B. Gallimore and J. Byron Crouse to Great Commission Schools Inc. for $22,745. Transferee is parochial school (grades 1 through 12), of which Paul E. Billheimer is president. Granted April 18.

WORX (FM) Madison, Ind.—Granted assignment of license from Pioneer FM Co. to Knight-Cutler System for $11,000. Transferees are Charles N. Cutler, who really only retains his present ⅓ interest, and Frances Knight (Breckenridge), who buys here ⅔ control from former owners. Miss Knight (Breckenridge) is manager of WORX (FM) and Mr. Cutler is chief engineer. Granted April 18.

KPRS Olathe, Kan.—Granted assignment of license from Johnson County Bcstg. Co. to Twin City Advertising Agency Inc. for $37,500. Principals in Twin City are President Edward H. Pate (28%), president of Twin City Adv.; Vice President Andrew E. Carter (28%), vice president of Twin City Adv.; Secretary-Treasurer Eugenia L. Pate (28%) secretary-treasurer of Twin City Adv., and four other holding minority interest. Granted April 18.

WIDE Biddeford, Maine — Granted transfer of control from Edward A. Harriman and nine others to Victor C. Diehm and three others for $45,000. Mr. Diehm (25%) is president, general manager and holds 25% interest in WAZL Hazleton, Pa., and vice presi-

(Continued on page 96)

SDG BARGAINING

Directors' Minimums Raised

MODIFICATIONS in collective bargaining agreement of the Screen Directors Guild with major movie studios last week brought agreement on minimums for directors on Western pictures budgeted at $100,000 or under to $550 weekly on a four-week guarantee and for all other types of features, $550 weekly with a 5½-week guarantee.

Retroactive to last March 13 agreement, the agreement also includes a new minimum of $500 for second unit directors. First and second assistants are to receive $300 and $175 weekly.

WTVJ(TV) on AM Time

TIME has been purchased by WTVJ (TV) Miami on five radio outlets promoting the joint appearance of Sens. Estes Kefauver (D-Tenn.) and Richard B. Russell (D-Ga.) on the station May 5. To draw attention to the event which station management feels should be brought to the maximum number of viewers on the eve of the Florida primary, spots are being aired on WFEC WKAT WVCG WWTB and WMIE, all Miami.

BILLINGS for first quarter of 1952 for KVVC Ventura, Calif., were 72.4% higher than same period last year, according to Roland Vaile, manager. March was most successful month since station began operations in January 1948.

UHF CONVERTER

Demonstrated by Crosley

"A REVOLUTIONARY change in distribution and selling is now taking place in this country," W. A. Blees, Avco Mfg. Corp. vice president and Crosley general sales manager, said Wednesday when the Crosley Div. demonstrated a production model of its "Ultratuner"—an ultra high frequency TV converter.

The revolution, which will emphasize sales rather than distribution, is being met by his organization, Mr. Blees said, by a split of its home office into two parts with separate sales forces for electronics goods and appliances. The sales emphasis, in turn, will lay on two separate areas: Pioneering selling and replacement selling, a distinction that may prove "quite a trick" to teach dealers to follow consistently, the executive said. In spite of the current situation, he predicted that the television business will continue to grow "bigger and bigger."

The Ultratuner, demonstrated at the Westchester Biltmore Country Club in Rye, N. Y., will enable all Crosley sets to receive all VHF and UHF channels. In production and ready for immediate shipment to dealers, the small unit—measuring an approximate 8 x 8 x 6 inches—is priced at $39.95. Special features, in addition to reception of all channels, include a built-in antenna, which is said to preclude use of an outside UHF antenna within reasonable distance of the transmitter, and simple installation, which can be managed quickly and easily by the set-owner without service help.

Projection Tube

RCA Tube Department has announced a new seven-inch projection-type kinescope capable of providing a 20-by-15-foot picture when used with a suitable reflective optical system having an 80-foot projection throw. The new tube (RCA-7WP4) measures approximately 19½ inches in length and seven inches at its greatest diameter.

FCC Roundup

(Continued from page 95)

dent, director and owner of 84 out of 336 shares of WHOL Allentown, Pa. Granted April 18.

WNAW North Adams, Mass. — Granted assignment of license from Courtlandt Nicoll to Cecil W. Clifton for $10,000. Mr. Clifton is general manager and 50% owner of WAVL Apollo, Pa. Granted April 18.

WDGY Minneapolis, Minn.—Granted transfer of control from Stuart Investment Co. to Herman J. Lange, George E. Lau, Clarence T. Hagman and Clarence W. Levy for $425,000. Mr. Lange is owner of Minneapolis electronic welding firm and San Diego auto supply houses; Mr. Lau, with his wife, is owner of Minneapolis coffee shop chain; Mr. Hagman is former general manager of WLOL Minneapolis-St. Paul, and Mr. Levy has interest in two retail furniture stores in Minneapolis-St. Paul.

WENE Endicott, N. Y.—Granted assignment of license from Empire Newspapers Radio Inc. to Ottaway Stations Inc. for net book value of assets on closing date; on Feb. 29 such value was $69,529. Principals in Ottaway Stations Inc. are president James H. Ottaway (40%) and treasurer-secretary Ruth Ottaway (30%), who are controlling officers, directors and stockholders of Empire Newspapers Inc., licensee of WVPO Stroudsburg, Pa. Granted May 1.

TRANSFER REQUESTS

Listed by States

KYMA Yuma, Ariz.—Assignment of license from KOY Bcstg. Co. to KYMA Yuma Inc. through merger of new corporation formed by spin off of KYMA assets and liabilities to new entity. Capital stock in KYMA Yuma Inc. will be issued to stockholders of KOY Bcstg. Co. in same ratio as their present holdings in latter corporation and equal in total net value of assets and liabilities being transferred to KYMA Yuma Inc. No KOY Bcstg. Co. stock will be surrendered by its stockholders. William L. Lindsey, general manager of KYMA, will subscribe to capital stock of new corporation in amount equal to capital stock of that corporation to be issued to each existing holder of KOY, i.e., 16⅔%. Filed April 16.

KCLF Clifton, Ariz.—Assignment of license from Dwight Harkins Amusement Enterprises Inc., d/b as Saguaro Bcstg. Co., to Saguaro Bcstg. Co., Inc. through formation of new corporation, 50% of stock to be held by corporation and 50% by Dwight Hawkins Amusement Enterprises Inc., and 50% by H. Chester Darwin, general manager of KCLF, who will become president of new corporation. Filed April 16.

KHSL and KVCI (FM) Chico, Calif.; KVCV and KVRE (FM) Redding, Calif., and KYOS and KVME (FM) Merced, Calif.—Transfer of control from Ruth McClung, executrix of estate of Hugh McClung, deceased, to Micky McClung (also known as Ruth McClung) under terms of decree of first and final accounting and final distribution in matter of Mr. McClung's estate. No monetary consideration. Stock transferred includes 1012½ shares out of 300 shares (not including 140 more shares in her own name) of stock in KHSL and KVCI (FM), and KVCV and KVRE (FM), and 20,399 out of 24,000 shares in KYOS and KVME (FM). Filed April 9.

KTLN Denver, Col.—Assignment of license from Leonard Coe Radio Station KTLN Inc., in which Mr. Coe will own 100% of the stock. No actual change of ownership or control. Filed April 23.

WFEC Miami, Fla.—Assignment of license from Howard D. Steere to David Haber for $40,000 (in escrow). Mr. Haber owns 50% of various taxicab companies, including Cathedral Fleet Inc., Alpine Cab Co., Crescent Cab Corp. and Phil-Mat Cab Corp., New York City. He also has interest in various other automotive enterprises. Filed April 9.

WORZ-AM-FM Orlando, Fla.—Transfer of control from Radio Station WORZ to WORZ Inc. through transfer of stock from Central Florida Bcstg. Co., licensee of WORZ, to same stockholders in exchange for equivalent amount of stock in same properties and by same persons who now own stock in licensee company. No actual change of ownership or control. No monetary consideration. Filed April 14.

WCNH Quincy, Fla.—Transfer of control to Andrew B. Letson through sale of 320 out of 500 shares of stock for $18,400. Mr. Letson is general manager and chief engineer of WCNH, and already holds 26% interest in station; he will own 78.2% of stock. He also is applicant for new AM station in Tallahassee, Fla. Filed April 15.

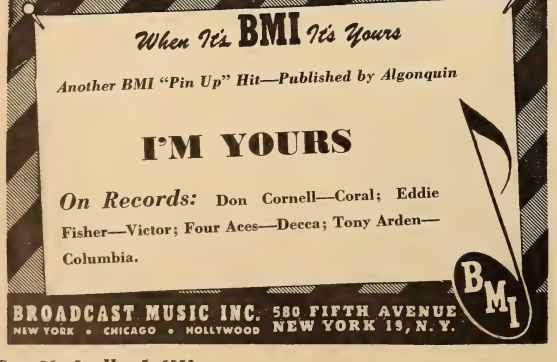
KCLO Leavenworth, Kan. — Assignment of license from Leavenworth Bcstg. Co. to Cecil W. Roberts for $31,000. Mr. Roberts is owner of KREI Farmington, Mo., KNEM Nevada, Mo., and KCHI Chillicothe, Mo., and is applicant for new AM station in Chanute, Kan. Filed April 15.

WKLX Lexington, Ky.—Transfer of control to Central Kentucky Bcstg. Co. through transfer of 850 outstanding shares of stock (100%) for $70,000. Central Kentucky Bcstg. Co. is the licensee of WLEX Lexington, license of which will be surrendered to FCC upon Commission approval of sale of WKLX. Accepted May 1.

WSPR-AM-FM Springfield, Mass. — Transfer of control from Q. A. Bracket and L. B. Breed to Ruth W. Bracket and Alma Breed, executors of estate of Mr. Brackett and Mr. Breed, respectively, both of the latter deceased. No monetary consideration. Filed April 12.

WDET (FM) Dctroit, Mich.—Assignment of license from UAW-CIO Bcstg Corp. of Michigan to Wayne U. Board of Education. No monetary consideration. Filed April 14.

KOB-AM-TV Albuquerque, N. M. — Assignment of license from T. M. Pepperday to Time Inc. for $900,000 [B•T, April 28]. After series of reorganizations, which will transfer assets to Albuquerque Bcstg. Co., a Time Inc. subsidiary, 50% interest in station will be sold to Wayne Coy for $75,000, plus eight-year contract as general manager for $26,000 per year. In addition, Mr. Coy will remain consultant to Time Inc. at fee of $24,000 per year. Time Inc. publishes *Time*, *Life* and *Fortune* magazines and other periodicals. Filed April 25.



WJOC Jamestown, N. Y.—Transfer of control 140 out of 277 shares of stock from Harry E. Layman to Frederick E. Davis (who now holds 7 shares of stock) for $53,845.40. Filed April 10.

WIRO Irontown, Ohio — Transfer of control from Clacus G. Merrill, Marie B. Merrill and Fred Bailey to Theodore M. Nelson, Clinton McElroy, William P. Shannon and C. A. Baker, equal partners, for $30,000 plus contract with Mr. Merrill, who will be hired as consultant for $28,000 in 60 installments of $466.66 monthly. Mr. Nelson is general manager of WIKK Erie; Mr. Shannon is sales manager of WIKK; Mr. McElroy is assistant manager of WIKK, and Mr. Baker is chief engineer for WIKK. Filed April 16.

WKSR Pulaski, Tenn.—Transfer of control from W. K. Jones and Fred Deming to Mr. Jones for $21,500. Mr. Fleming, who now has 50% interest, will have 93% interest after transfer; Mr. Jones will have 7% interest. Filed April 25.

WDXE Lawrenceburg, Tenn.—Assignment of license from Aaron B. Robinson to Lawrenceburg Bcstg. Co. Change from an individual to a corporation; no actual change of ownership or control. Filed April 15.

KDSX Denison, Tex.—Assignment of license from Grayson Bcstg. Corp. to Radio Station KDSX. Change from a corporation to a partnership of B. V. Hammond (52%) and L. L. Hendrick (48%). No actual change of ownership or control. Filed April 25.

VHF Propagation

(Continued from page 65)

sidered aberrations due to tropospheric conditions. FCC and outside engineers pointed out at that time that these facts were known and taken into account in formulating TV allocations.

Last year, Collins Radio Co., in cooperation with NBS, bounced a UHF signal off the moon [B.•T., Nov. 19, 1951]. Collins used a 20 kw transmitter on 418 mc, putting out an effective radiated signal of 5,000 kw. It transmitted a continuous wave message for a half-hour on Oct. 28 and again on Nov. 8, using a highly directional transmitting antenna. The received signal strength of the moon-reflected message, "What Hath God Wrought," was 0.0002 microwatts.

During the VHF tests, the Collins signal was monitored by FCC monitoring stations, "ham" operators, Bell Telephone Labs., and by Cornell U. Operation was under an FCC authorization, but was not identified on the air. Pre-experimental work was done at MIT as part of a State Dept. and military project. The program is a cooperative venture between MIT and NBS.

CBS-TV Clinic

(Continued from page 66)

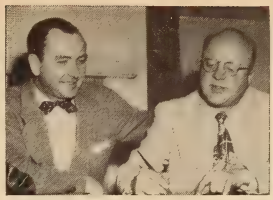
made it clear "that the difference between television and motion picture production is more than the obvious one of being separate and distinct media." TV, he asserted, "must place greater stock in efficiency and time-saving devices [in its production facilities] than was necessary when motion picture studios were planned."

"When Television City is completed," Mr. Luckman said, "we feel that CBS-TV and the general public will be satisfied that something new and revolutionary has been done—that a television production center has been devised which can accommodate any of the infinite number of changes through which television will undoubtedly go."

Oscar Katz, CBS-TV director of research, appraising the potentials for expansion of set ownership, said that "one-third of the population now own sets; another third live in TV areas but do not have sets, and the last third live in non-TV areas —thus, there is as much room for growth of the medium in TV areas as there is in non-TV areas."

John Cowden, operations director of CBS-TV advertising and sales promotion, advised new TV stations to "be prepared to meet their promotional problems head-on with a solid advertising program from the minute they go on the air." He cited the promotional activities of CBS-TV's Los Angeles station when it changed its call letters to KNXT (TV) and at the same time moved to a new site and boosted power.

These activities, he recalled, included on-the-air promotion, newspaper ads, full-page advertisements for the first broadcast followed by 14 days of intensive advertising after the change; billboards throughout the market, and counter cards and window streamers.



He advised TV stations to stress, in their promotion efforts, the extent to which they penerate their markets, size of potential audience, TV's sales effectiveness, and success stories of specific clients. He regarded film trailers as the simplest, most logical and dramatic tool of TV promotion.

David J. Jacobson, director of public relations, saw two main public relations problems confronting new stations: (1) Integration of the station into the community, and (2) capitalizing locally on solid integration with the network. A good publicity operation, he said, combines necessary manpower, knowledge of publicity techniques, and imagination capable of utilizing all opportunities including those offered by the network.

The CBS-TV Network's own growth was sketched early in the meeting by Herbert V. Akerberg, vice president in charge of station relations, who also gave his views on future expansion and development.

Friday's session (see AT DEADLINE story page 98) was slated to feature a luncheon address by CBS President Frank Stanton, with morning and afternoon sessions devoted to studies of such diverse subjects as acquiring a construction permit, by Engineering Vice President William B. Lodge; construction costs, by Chief Engineer A. B. Chamberlain; staff and operation costs in a major market and in a secondary market, by James C. Hanrahan of WEWS (TV) Cleveland and Glenn Marshall Jr. of WMBR-TV Jacksonville; rate structures and income expectations, by Fritz Snyder, CBS-TV director of station relations, and a wind-up panel session with Mr. Akerberg presiding.

A dinner was held Friday night, and on Saturday the guests were invited to WELI New Haven to view UHF television reception.

WJMO Cleveland is promoting WDOK Cleveland under a year-long contract calling for a spot a day, just before WJMO's sunset sign-off. Walberg Brown (r), WDOK general manager, signs contract while Dave Baylor, WJMO vice president-general manager, watches. Spots began April 14.

Allocations Changes

(Continued from page 65)

for educational use, although there were UHF channels also assigned.

Refusal of the Commission to assign Channel 6 to Temple, Tex., was protested by KTEM. It stated that the Third Notice proposed 180 mile minimum co-channel separations and that Temple was 183 miles from San Angelo. The Commission proposed then to put Channel 6 in San Angelo.

In its final report, KTEM stated, the minimums were raised to 190 miles for these Zone II cities, thus preventing the assignment of Channel 6 to Temple.

KTEM asked for a rehearing in order to show that the transfer of Channel 6 from San Angelo to Temple would better serve the public interest.

In the Commission final notice, it stated that priorities for stations in Group A (2)—those cities not now served with TV signals—would be established on the basis of the population of the city applied for. This KXEL objected to, on the ground that its service area included rural populace which would therefore discriminate against the Waterloo, Iowa, residents.

It therefore asked that the Commission delete that criterion for listing which cities would receive precedence in processing, and instead permit flexibility in the order in which applicants will be processed. What KXEL desires is the chance to show the FCC that it should be considered early in the processing line, rather than to have to take a low position based on Waterloo's population, due to rigid criterion.

TEXTRON Inc., Providence, R. I., announces sales for first quarter ending March 31, were $22,177,000 compared with $26,053,000 for first quarter of 1951.

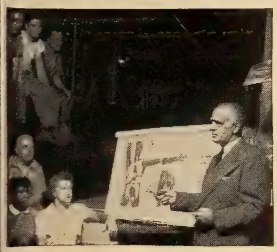
UHF BOOKLET

RCA Notes Value

RCA's faith in UHF is emphasized in a 24-page booklet, titled "UHF," being sent to customers.

Booklet reveals that RCA spent more than $2.5 million in UHF experiments and a total of $50 million in TV. It also stresses that the reception of TV signals from a UHF station can be as clear and stable as on VHF, that present TV sets can be "readily" adapted for UHF, and that costs of building a UHF station are "about the same" as for a VHF station. It also mentions that color TV can be broadcast on UHF.

Referring to the Bridgeport RCA-NBC experimental UHF station, the booklet quotes Technical Director Dr. C. B. Jolliffe as saying: "This pioneering station proves beyond doubt that UHF television is a practical means for extending television service to communities now without it. . . . We feel that the Bridgeport station, conducted by RCA as a service to the public, points the way to a truly nationwide television network."



KYBS (FM) LEASE

Collins Radio to Operate

LEASE of KYBS (FM) Dallas by the Collins Radio Co., Cedar Rapids, Iowa, was reported last week. The station, on 107.9 mc with 90 kw power, has been inoperative since last December when its owners, Baptist General Convention of Texas, shut it down pending its disposition. Station was losing $25,000 to $30,000 a year, it was reported.

Terms of the lease were not disclosed, although Dr. R. Alton Reed, radio and public relations director of the Convention, was reported to have said it would bring a 10% return on the property. Station was valued "in excess of $50,000," it was said.

Use for which Collins Radio Co. intends to put the station was not disclosed. Collins Radio has been working on classified military and government projects for the past several years (see story page 65).

NBA HOLDS ELECTIONS LENWELL NAMED PRESIDENT

LEROY LENWELL, KBRL McCook, late Friday was elected president of Nebraska Broadcasters Assn. at NBA meeting in Omaha. Others elected were Gene Ackerley, KCOW Alliance, vice president; Bob Thomas WJAG Norfolk, secretary; Todd Storz, NARTB representative, and Jack Yeager, KGFW Kearney, and Hap Anderson, KOIL Omaha, board directors.

Resolutions endorsing Horan Bill (HR 7062) giving broadcasting relief from libel responsibility and expressing interest in unattended transmitter operation were adopted by NBA. E. K. Hartenbower, KCMO Kansas City, new NARTB District 10 director, read report of William B. Quarton, WMT Waterloo, Iowa, retiring district director, who was unable to attend.

Speakers included Bill Martin KMMJ Grand Island, retiring president, and Bob Thomas, secretary; Virgil Sharpe, KOIL, who discussed work of Nebraska Network; Todd Storz, KOWH, on unattended transmitter operation; George Round and Ken Keller, representing U. of Nebraska, expressing university's appreciation for cooperation of stations. NBA committee will confer with university on reduction of fees for multiple-station sports pickups.

BMI clinic Thursday included talks by Ed Mason, KMMJ; Jim Bormann, WCCO Minneapolis, president, National Assn. of Radio News Directors; Gene Ackerley, KCOW; Charles Siverson, WHAM Rochester; Grover C. Cobb, KVGB Great Bend, Kan.; Bill Kalana, WNEW New York; Joseph Connolly, WCAU Philadelphia; Carl Haverlin, BMI president.

PILOTS PROTEST TOWER HAZARDS

ALLEGED hazards of high TV towers to air navigation was taken to public by Airline Pilots Assn. in a press release issued in Chicago Friday by President Clarence N. Sayen. Matter was subject of meeting two weeks ago [B•T, April 28] and is scheduled to be gone into at working committee meeting May 6 (see earlier story on page 68).

At a meeting of Chicago Airspace Subcommittee, ALPA submitted recommendations restricting heights and sites of TV antennas [B•T, April 7]. Pilots' organization is a member of "ad hoc" committee comprising broadcasting and aviation interests, as well as representatives of FCC and CAA.

FCC ATTACKS HOUSE VERSION OF McFARLAND BILL

FCC opposes House version of McFarland bill (S 658) chiefly on two key sections, B•T learned Friday. Commission expressed displeasure of bill to remodel its functions in letter Thursday to House which is near debate S 658 (see story, page 29).

Among sections criticized are 5 (c), 15 (c) and 8. Former two would divorce staff from Commissioners' orbit. Reason cited for opposition was that separation would slow down FCC work at time when it must act expeditiously on TV applications. Same FCC reason applied for Sec. 8 which would require 30-day notification before applications are set for hearing or grants would be issued without hearing. Sections cited would place unnecessary burden on Commissioners, agency noted.

TRUMAN FOLLOW

SPOT announcements immediately following President Truman's 4-5 p.m. Saturday TV tour of White House were bought on two CBS Television stations by Kefauver National Campaign Committee. Stations were WTOP-TV Washington and WBNS-TV Columbus, Ohio. Account handled by Robert J. Enders Adv., Washington. Spots started, "You are the landlord of the White House. Soon you will decide who will be the next occupant." Rest of continuity promoted Kefauver candidacy. Account had been accepted by at least one station which later withdrew on ground of station policy, according to agency. (Early story, page 82).

Business Briefly

(Continued from page 5)

to start May 19, using two five-minute transcribed shows five times weekly for six weeks. If successful campaign will be expanded through agency, Hirshon-Garfield, N. Y.

ENVELOPE FILM SPOTS ● Self-Seal Div., United States Envelope Co., has begun spot television campaign using one-minute film spots in principal national markets. Contracts, to continue throughout 1952, are on staggered schedule. Filmed commercials were produced by Robert Lawrence Productions, N. Y., and feature actor Henry Fonda. Agency: S. R. Leon Co. Inc., N. Y.

TESTS BY COCA-COLA ● Coca-Cola Bottling Co., Chicago, testing consumer response to its new 12-bottle carry-home carton with a heavy spot radio schedule on WJOL Joliet, Ill.

PEOPLE . . .

CHARLES PHILIPS, sales manager and executive administrator NBC's WNBC New York, to network-owned WNBK (TV) Cleveland as sales manager, effective May 12.

JOSEPH H. McCONNEL, NBC president, will be honored by Alumni Assn. of Davidson College at Army and Navy Club, Washington, at dinner May 9th. Other distinguished alumni of college will be present. Mr. McConnell will serve as toastmaster.

WILLIAM B. ROHN, salesman with WINS New York since 1949 and earlier with Burn-Smith Co., station representatives, appointed assistant general sales manager, WINS.

JACOB RUPPERT Brewing Co., N. Y., on Friday reported four promotions among executive personnel: **J. J. TAYLOR JR.**, named director of marketing; **GERALD FRISCH** to serve as general assistant to vice president for sales & marketing Herman Katz; **BEN MITCHELL JR.** named manager of distributor sales, and **J. L. CONNER** appointed manager for metropolitan package sales.

HELEN SLATER AYERS, Irving Serwer Adv., N. Y., to copy staff, Robert W. Orr & Assoc., N. Y.

FEHLMAN NEW PRESIDENT OF OHIO ASSOCIATION

NEW NAME adopted by Ohio Assn. of Broadcasters at Thursday meeting in Columbus. Group now known as Ohio Assn. of Radio & Television Broadcasters.

In election of officers, Robert C. Fehlman, WHBC Canton, was elected president. Other officers elected were Adna Karns, WCOL Columbus, vice president, and L. A. Pixley, WLOK Lima, secretary-treasurer.

Harold E. Fellows, NARTB president, was speaker at meeting along with John H. Smith Jr., NARTB FM director. William T. Stubblefield, NARTB station relations director, also attended.

Friday session was programmed by BMI.

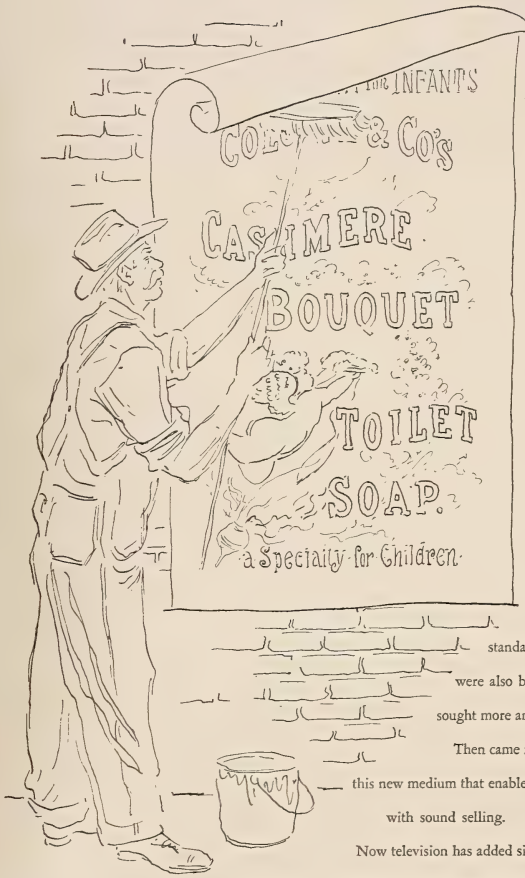
UHF, VHF Equipment Costs Noted

EQUIPMENT costs for VHF and UHF television stations differ "very little" when estimated radiated powers of both types are equal, but high-band VHF and UHF costs tend to pull away from those of low-band VHF when their ERP's are increased to get comparable coverage, CBS-TV Chief Engineer A. B. Chamberlain told network's TV clinic in New York Friday (early story page 66).

In another clinic feature CBS president Frank Stanton told luncheon Friday that TV "has no equal, socially, politically and economically, as a mass communications medium" and that it comes at just right time in country's economic picture.

Noting that national income is up three times since 1940, that "plant facilities have increased tremendously in the same period we are moving from a defense to a peace economy," and that inventories are piling up, Mr. Stanton said: "Television should play a vital role in the mass distribution at a minimum cost of the goods these increased plant facilities can turn out and which the American public wants."

Detailed report on construction costs—including number of items which sometimes are omitted from such studies (legal and engineering services, building costs, furniture and fixtures, etc.)—was presented showing estimated total costs for each type of station according to city population bracket, as follows:



City Population and Station Power	VHF Low Band	VHF High Band	UHF
Under 50,000			
(ERP 1 kw at 300 ft.)	$111,700	$116,950	$119,550
50,000 to 250,000			
(ERP 2 kw at 500 ft.)	342,200	336,700	340,250
250,000 to 1 million			
(ERP 10 kw at 500 ft.)	430,760	431,460	436,920
Over 1 million			
(ERP 50 kw at 500 ft.)	557,600	544,600	604,700
Large city			
(maximum powers*)	874,500	1,018,900	1,059,500

* Maximum powers: Channels 2-6, 100 kw; 7-13, 316 kw; 14-83, 1,000 kw.

Cost differences between VHF low band, VHF high band, and UHF stations "are influenced more by site, location, construction conditions, building construction, antenna height, and type of tower (whether guyed or self-supporting) . . . then by differences in equipment costs," Mr. Chamberlain's report said.

Meanwhile, in discussion of rate structures for potential advertisers, Fritz Snyder, CBS-TV director of station relations, recommended careful study of gross operating costs per hour, saying equitable rate structure can then be devised on basis of set saturation in market.

William B. Lodge, CBS-TV vice president in charge of engineering, sketched steps to be followed in getting FCC authority to construct station, summarized new FCC rules, outlines factors to be considered in picking transmitter site, and discussed transmitting facilities.

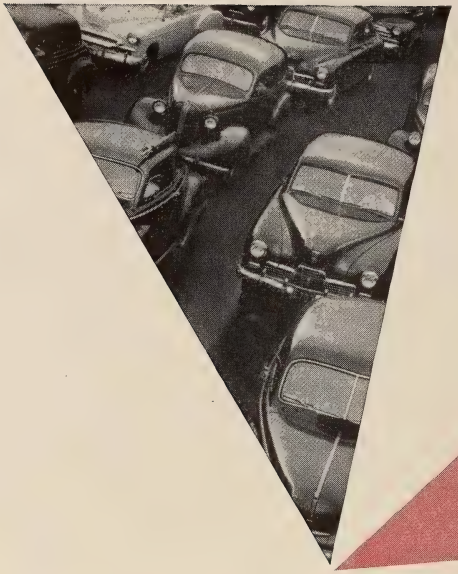
FORERUNNER...

Forerunner of today's big, efficient outdoor advertising industry was this scene. Early in the century advertising posters of various sizes were displayed on buildings, boards and fences—wherever a suitable surface greeted the bill poster.

About the same time that billboards were becoming standardized, other media—newspapers, magazines, car cards—were also burgeoning with advertising as manufacturers sought more and better ways to reach the public.

Then came radio . . . and advertisers quickly took advantage of this new medium that enabled them to reach millions of people simultaneously with sound selling.

Now television has added sight to sound . . . and again advertisers were quick to capitalize on the added impact this newest medium affords them.



In WLW-Land, these two media—WLW Radio and WLW-Television—used in combination, offer advertisers the most efficient and economical way to reach more people more often and more effectively.

CLOSED CIRCUIT

NEW ROUND of radio network rate skirmishing may be resolved through establishment (on rate cards) of new rate discounts on purchase of contiguous periods, giving large daily strips buyers, like P & G, Lever and Miles Labs. substantial reductions which would not "penalize" them as big buyers. Base rates, under this procedure, wouldn't change, except for necessary and ordinary adjustments based on coverage.

WHILE DECISION won't be reached for couple of weeks, it's learned that Miles Labs. is inclined to renew all five of its present programs on same networks. Fortnight ago, Miles had top executives of all four networks at Elkhart, Ind., headquarters, to make pitches, and presumably to ascertain that rates are uniformly applicable.

TRADE TALK these days mainly involves talk of trades. Latest, lacking confirmation, is possible acquisition of WJR Detroit by NBC but with parlay that would involve all or part of WTAM-AM-TV Cleveland. These discussions, admittedly preliminary, presumably stem from intermittent negotiations for purchase of KMPC Los Angeles by NBC for million dollars, plus. Ascertained was fact that John F. Patt, president of Richards stations, and Robert O. Reynolds, vice president and general manager of KMPC, are increasing minority holdings in WGAR Cleveland and KMPC respectively, but with Richards family to retain 51% control. Richards stations, applicants for five TV outlets [B•T, May 5], also talking acquisitions of existing TV stations in their own right.

UPCOMING this week will be appointment of J. Leonard Reinsch to executive post with Democratic National Committee. Announcement expected from Chairman Frank McKinney in Chicago. An old hand at political radio-TV campaigning, Mr. Reinsch was radio director of DNC in 1944 Roosevelt campaign and afterward radio advisor to President Truman. It's presumed he will be on leave of absence basis from his post of managing director of Cox radio and TV stations (WSB-AM-FM-TV Atlanta; WIOD-AM-FM-Miami; WHIO-AM-FM-TV Dayton).

DUE OUT SOON: new, identical standards governing 10-second shared station-identification breaks, now in preparation by NBC-TV Spot Sales for eight stations it represents. New standards will eliminate present need to make separate strips for each station. Additionally, standards will specify that advertising copy on station breaks occupy no more than 87% and no less than 75% of screen.

WHILE General Mills yet hasn't disclosed its full list of stations on its "summer saturation campaign", word trickled through last week that it had signed all five Westinghouse radio stations—but at rate card. Campaign covers 19-week span, involving 1,000 announcements, with roughly $100,000 billing. Contract covers equitable distribution of spots among daytime,

(Continued on page 6)

PEDLAR & RYAN QUITS; CAMAY TO B & B

PEDLAR & RYAN, New York agency, to leave advertising business with its prize Procter & Gamble Camay soap account, estimated at $2.5 million annually, reported Friday as transferred to Benton & Bowles, starting Oct. 1. Action results from retirement "from the conduct of advertising" by Thomas L. L. Ryan, agency president, who was to announce his resignation today (Monday), also effective Oct. 1. Mr. Ryan's statement said he "resigned to all clients" and offered his congratulations "to all new agencies."

Future handling of other Pedlar & Ryan accounts was not known late Friday. These include Melville Shoe Corp. and Peck & Peck.

ALL BROADCAST STATIONS TO JOIN ELECTION DRIVE

NARTB to participate in three-ply "register and vote" campaign, as instructed at recent Chicago convention, President Harold E. Fellows announced Friday in naming John F. Patt, WJR Detroit, as chairman of special committee in charge of project.

American Heritage Foundation and Advertising Council are supporting project. NARTB will direct participation by 2,300 stations in program, which will include monthly material urging citizens to register, material for broadcasts encouraging citizens to inform themselves on candidates and issues, and nationwide saturation drive to encourage voters to go to polls.

Robert K. Richards, NARTB public affairs director, will coordinate NARTB activity at staff level, with John Archer Carter, radio-TV director, coordinating for AHF. In last 10 days of fall campaign all stations will be asked to broadcast minimum of ten get-out-the-vote announcements daily. All states to set up citizens celebrations, with state broadcaster associations taking part.

CAMPBELL RENEWS RADIO ADDS TV PROGRAMS

VOICING faith in radio's continued strength and impressed with daytime TV's growth, Campbell Soup Co. announced Friday it is renewing its network radio and TV programs and adding three half-hours of daytime TV in fall expansion of broadcast advertising.

Spokesman said company would sponsor three half-hours weekly of TV version of *Double or Nothing* on CBS-TV, while continuing sponsorship of quarter-hour *Club 15* three nights weekly on CBS-TV, half-hour *Double or Nothing* five days weekly in NBC radio, and half-hour *Aldrich Family* weekly on NBC-TV. Final decision on renewals had not been expected for another 10 days (see story, page 23).

Campbell spokesman said "our renewals of evening and daytime radio, with plans to continue sponsorship of *Club 15* and *Double or Nothing*, are evidence of our conviction that radio continues as a potent and profitable purchase. It certainly reaches many markets and many homes we cannot touch on television." Expansion into daytime TV decided upon, it was said, because company is "impressed" with daytime TV's growth and development.

BUSINESS BRIEFLY

NEW CPP PRODUCT ● Colgate-Palmolive-Peet planning to put large advertising budget behind newest product, toothpaste with chlorophyl. Radio and TV spots most likely will be used. Test campaigns being prepared. Agency, Sherman & Marquette, N. Y.

SPOT CAMPAIGN ● General Foods, N. Y. (Jello-O), planning 11-week spot radio campaign in several West Coast markets. Agency, Young & Rubicam, N. Y.

REGENT ON RADIO ● Regent Cigarettes, N. Y., in addition to participating sponsorship in NBC-TV's *Today* three times weekly, is contemplating sponsorship of weekly half-hour radio network show. Agency, Hilton & Riggio, N. Y.

TENDER LEAF TEA ● Standard Brands, N. Y. (Tender Leaf iced tea), preparing radio spot campaign to be launched June 1, using daytime minutes. Contracts are said to be on 52-week basis. Agency, Compton Adv., N. Y.

PICK UP OPTION ● American Cigarette & Cigar Co., N. Y. (Pall Mall Cigarettes), has picked up first option on CBS-TV 7:45-8 p.m. period, Tuesdays and Thursdays, which is being dropped along with show *Stork Club* by Liggett & Myers (Fatima cigarettes). SSC&B, N. Y., is agency for Pall Mall.

FIVE-WEEK CAMPAIGN ● Bristol-Myers Co., N. Y. (Mum deodorant), effective June 1 is placing five-week campaign in various

(Continued on page 106)

CHICAGO BAR OPPOSES LEGISLATIVE PROBE TV

CHICAGO BAR ASSN. Thursday opposed telecasting hearings conducted by legislative investigative groups, saying such telecasts (1) "violate our traditional concepts concerning procedings which inquire into an individual's conduct and character," (2) there is and can be no guarantee that telecasting will be continuous enough to give both sides of the matter and (3) there is a tendency for such telecasts to undercut the privilege against self-incrimination. Lawyers in group agreed it was unjust to inquire about guilt or innocence before a national audience, and that legislative hearings are similar to grand jury inquiry, which are always conducted in secret.

CANNON RCA SECRETARY

JOHN Q. CANNON, assistant secretary of RCA for past year, Friday elected secretary of corporation. He succeeds Lewis MacConnach who retires after 29 years of continuous service (see story, page 26). Native of Salt Lake City, Mr. Cannon joined RCA in 1945 as attorney in Victor Div. Had served successively in government as business specialist of Bureau of Standards, chief law officer of U. S. Civil Service Commission and director of personnel of Securities & Exchange Commission.

CALVIN J. SMITH ELECTED PRESIDENT OF SCBA

CALVIN J. SMITH, president-general manager of KFAC Los Angeles, unanimously elected president of Southern California Broadcasters Assn., succeeding Austin E. Joscelyn, CBS Hollywood operations director, who continues as SCBA board member.

J. Frank Burke Jr., co-owner of KFVD Los Angeles, named vice president. Thelma Kitcher, general manager of KGFJ Hollywood, named secretary-treasurer. New board members are Robert J. McAndrews, commercial manager of KBIG Avalon; William J. Beaton, vice president-general manager, KWKW Pasadena; Robert O. Reynolds, vice president-general manager, KMPC Hollywood.

WKVM CHANGE OF FREQUENCY

PERMISSION to change to 810 kc was granted by FCC Friday to WKVM San Juan, P.R. Station at present has CP for 1070 kc, with 25 kw, DA. At same time, FCC denied petition of WGY Schenectady that WKVM's application be designated in same hearing with General Electric station, ABC's KGO San Francisco and WDAE Tampa, Fla. That case involves request of KGO to make changes in its directional arrays, which would require WGY to go directional. Both are on 810 kc. WDAE is involved through its application to change from 1250 kc with 5 kw to 810 kc with 10 kw, DA. Grant of WKVM's modification of CP was conditioned on it accepting any interference from WDAE or WGY which might result from the KGO-WGY-WDAE case.

FCC RADIO PLAN FAVORED

COMMENTS in favor of FCC's proposal to set up two processing lines for AM applicants in order to give preference to those communities without broadcast service [B•T, April 28, 21] have been received at FCC. Deadline for comments is today. One suggestion, made by Washington law firm of Bingham, Collins, Porter & Kistler, was that Line I processing be arranged so that simultaneous consideration be given to applicants for same city—so applicant who filed earlier won't get grant first, put other applicant into Line II "freezer." Approvals were on file from Southeastern Arkansas Broadcasters Inc., Dermott, Ark.; Benton Broadcasting Service, El Dorado, Ark.; Knox Broadcasting Co., Rockland, Me.

ABC GROSS UP

ABC had gross sales, less discounts, returns and allowances, of $16,489,121 for first quarter of 1952, as compared with gross for comparable 1951 period of $14,560,345, report showed Friday. Network also reported additional $500,000 loan at 3.25% under agreement with bankers' trust which permits drawing of $3,800,000. As of April 30 ABC had drawn total of $2½ million under that agreement, including $500,000 borrowed in March.

COURT BARS STANDBY

THEATRE not required to hire standby musicians when it brings in "name" orchestra on tour, Judge Charles C. Simons ruled Friday in Sixth U. S. Circuit Court of Appeals in Cincinnati. Decision reversed ruling by National Labor Relations Board, holding practice in violation of Taft-Hartley Act. Case originated in Palace Theatre, Akron, where AFM Local 24 had refused to allow bands on tour to play unless theatre hired local standby orchestra.

In this Issue—

Removal of credit controls on sales of durable goods may be handsome windfall for radio and television. Manufacturers, distributors and retailers are expected to increase advertising budgets to push durables that have been moving slowly because of restrictions on time payments. *Page 23.*

Rumors of impending radio network rate reductions are flying as under-the-table deals with advertisers continue. One such deal involves General Tire, majority stockholder of MBS, as sponsor that wants bargain. *Page 23.*

Auto makers are in high gear in summer advertising drives on radio and television. *Page 25.*

Talent agencies have struck gold in television, which has created most consistent demand for talent in entertainment history. Here's full story of how ten-percenters are getting rich. *Page 72.*

Don't be surprised or disappointed if law suits hold up television thaw. Arthur Scharfeld, president of Federal Communications Bar Assn., thinks Sixth Report and Order is full of weaknesses and that court action against it is almost inevitable. *Page 74.*

A new bill is introduced to give broadcasters relief from headaches they get in carrying political speeches. This one would modify existing laws to let broadcasters censor libelous material out of such broadcasts. *Page 25.*

Tapping farmer's pocketbook is like tapping U. S. mint. He's last capitalist left, says Robert E. Dunville, president of Crosley Broadcasting Co., and he's radio's best prospect. *Page 29.*

Legislation is introduced by Sen. Ed Johnson to give Secretary of Commerce blanket power to remove or prohibit construction of any radio or television tower he considered hazardous to flying. Tall tower issue is getting more controversial every moment. *Page 73.*

National Collegiate Athletic Assn. announces third study of influence of TV on football gate. Though study is full of contradictions, NCAA swears it means that TV is murder for ticket sales. *Page 74.*

Relaxation of government's ban against color television manufacturing may come within week, but it won't mean color will suddenly come to life. At best, it will permit only trickle of color equipment. *Page 71.*

Upcoming

May 12-13: NBC radio workshop, Hollywood.

nighttime, floating schedule and station breaks. This combination schedule, on rate card, works out to roughly 50% of one-time rate.

GENERAL MILLS understood to be negotiating with ABC radio network for its *Hymns of All Churches*, currently running in 90 radio markets and placed on station-to-station basis. If network gets show, renewals on stations will not be forthcoming. Definite word expected next week. Dancer - Fitzgerald-Sample, N. Y., is agency.

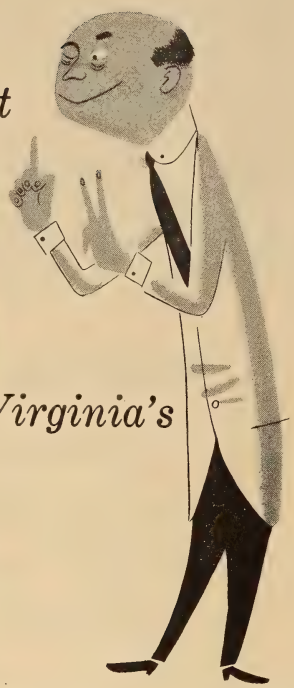
REP. MIKE MANSFIELD (D-Mont.) is in no hurry to place bill in House hopper to prohibit so-called double charging for political talks by stations [B•T, April 14]. Apparently, he's hoping threat of legislation will force broadcaster surveillance. He was impressed with his December 1950 success in prodding NARTB to warn member stations on alleged charging beyond card rates. His present plan is to hold off for some weeks.

IN TEMPO WITH TV and radio programming co-ordination, consideration is being given by both national political committees to 12 noon convening of conventions in Chicago in July. This would coincide with hour Congress convenes and would give committees opportunities to perform their "smoke-filled room" conclaves prior to noon. Thought is that sessions could be held from noon to 3 or 4 p.m., with night sessions starting at 9. This would mean minimum of interference with programs during off hours.

CARL HAVERLIN, president of Broadcast Music Inc. and a Lincoln student, author of one-time shot on Lincoln's Presidential election year to be telecast May 18 on Sloan Foundation's *American Inventory* via NBC. Produced by Walter Schwimmer Productions, Chicago, show to serve as showcase for projected weekly half-hour live video series from Chicago. Mr. Haverlin wrote original radio scripts, packaged by Mr. Schwimmer, eight years ago and sold then as network feature to National Assn. of Small Businessmen.

THEY'RE ALREADY talking impending shortage of trained personnel for TV station operation, what with licensing of new stations upcoming following freeze-end July 1. Prospective applicants, notably those without radio operations, report difficulty in finding experienced people to assist in application preparation and planning. Consequently it's felt that there will be more job opportunities developing, both in television and for their replacement in radio, than at any time since excruciating World War II shortages.

DuPONT RADIO-TV AWARDS TO BE ANNOUNCED MAY 17



ANNUAL awards of Alfred I. DuPont Foundation for outstanding radio-TV public service to be announced May 17 at banquet in Mayflower Hotel, Washington. FCC Chairman Paul A. Walker to be guest along with Mrs. Jesse Ball DuPont, founder of awards in 1942; O. W. Riegel, foundation curator, and Dr. Francis P. Gaines, president of Washington & Lee U., administrating awards.

Plaques and $1,000 awards to be given large radio or TV station, small radio station and news commentator. Money may be used to establish scholarships or fellowships for advanced study by young people at approved American institutions. Other stations to receive special commendation.

ASSOCIATION OF AMERICAN RAILROADS
TRANSPORTATION BUILDING
WASHINGTON 6, D. C.

WILLIAM T. FARICY
PRESIDENT

May 8, 1952

To the PRESS and RADIO:

Subject: ABOUT THOSE "TWELVE" INCREASES IN RAILROAD FREIGHT RATES

To meet increases in railroad operating costs which have been accumulating since 1949, the Interstate Commerce Commission on April 11 authorized an increase in freight rates estimated to average about 6.8 per cent above the rates then in effect and about 13.8 per cent above the rate levels of 1949.

This increase has been described as the twelfth since the end of World War II, but eight of the twelve have been interim increases, subsequently absorbed into, and made a part of, four basic decisions.

Whether described as twelve increases, or four, all of them put together have raised the level of railroad rates above pre-war levels by only a little more than one-half the percentage by which the major elements of the cost of producing rail transportation -- wages and fuel and materials prices -- have gone up in the same period.

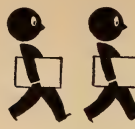
And the average revenue the railroads receive for performing a unit of service -- moving a ton of freight one mile -- has gone up since before the war only about one-third as much as the average increase in prices generally.

Railroad freight rates today -- even after the latest increase -- are a smaller proportion of the cost of most things people buy than they were before the war, and total railroad freight charges are such a small part, on the average, of the cost of producing and distributing most goods that changes in freight rates, either up or down, are not enough to have material effect on retail prices.

Even if all freight rate increases authorized since 1949 -- including the one of April 11 -- were reflected in full in the prices the public pays for goods, the total increase in prices would be something less than one-half of one cent out of each dollar spent -- and that includes the increases in rates on raw materials and everything else that goes into the finished products, as well as in the rates on the products themselves.

The significant thing about the increase in freight rates recently granted is that railroad revenues will be brought more nearly in line with increases in the cost of producing transportation -- so that railroads will be better able to serve the public and to meet the requirements of agriculture, commerce and industry, and the demands of national defense.

Sincerely yours,



William T. Faricy

Junior's too young to worry much about sharing a platter with french fries and onions. Mother is hopeful he'll escape his predestination and get a job posing for Borden ads, but chances are next time you see Junior in print it'll be on a menu.

Radio can be like that. You hopefully buck destiny by placing a schedule on a lightweight peanut-whistle and the results are hamburger instead of Chateaubriand. Avoid that error in Oklahoma City by going first class . . . buy KOMA, the only 50 kw CBS outlet in the state . . . the *merchandising minded* station in Oklahoma City

agency

FRED E. SPENCE, president, Grant Adv., Toronto, transfers to agency's New York office as vice president in international division. He is succeeded in Toronto by **JOE WREN.**

ROBERT C. WARREN, account executive, Edward S. Kellogg Co., L. A., named vice president.

JOHN O. RAMSEY, vice president, Martin R. Klitten Co., L. A., to Ruthrauff & Ryan, Hollywood, as account executive.

RUTHRAUFF & RYAN transfers assets and liabilities of Mexico City office to newly organized Dillon - Huymans - Rincon Gallardo agency. Latter firm is headed by **LUIS G. DILLON,** former executive vice president, Foote, Cone & Belding International; **EDGAR HUYMANS,** former general manager of R & R office, Mexico City, and **FERNANDO RINCON GALLARDO,** former FCBI regional director for Brazil and Mexico.

LAMBERT B. BEEUWKES resigns as general manager of WHEE Boston to enter advertising field in Philadelphia.

SCOTT ROBINSON, International Nickel Co., to G. M. Basford Co., N. Y., as account executive.

on all accounts

"I ACTUALLY welcome the kind of campaign that other agency men would hate to stick their neck out on," says Al Charles, account executive for Washington's Kal, Ehrlich & Merrick Adv. Inc.

"I mean the kind of a campaign where immediate results are wanted; the kind where your clients want the telephone to start ringing as soon as the announcement is over," Mr. Charles explained.

"It's a game with me," he added. "Each account has its own advertising problems. I welcome the tough ones because if it clicks through my ingenuity, I have a real sense of accomplishment."

Apparently advertisers have noticed Mr. Charles' good batting average because he now has 25 active accounts for which he places about $500,000 a year.

Radio is paid high compliment in the way Mr. Charles selects his advertising vehicle. He estimates that about 90% of his placements go to radio, with the remaining 10% divided equally between television and printed media.

"I have the advantage of choosing my media," Mr. Charles explained. "And, in all modesty, I can say that I know more about local radio than any other man in the country. A lot of people don't know how to use radio."

What would you say are basic rules for a successful radio campaign? a reporter queried.

Mr. Charles flicked the ashes from a cigarette, and reflected a moment.

"Well, first, domination. By that I mean get on all the stations. Second, try to sell only one idea at a time. Third, repetition."

Mr. CHARLES

Then speaking generally, and not for radio specifically, Mr. Charles said that gimmicks were invaluable and that when he has a piece of copy that clicks, he doesn't change it. He said that he once used the same copy for two years.

Speaking of copy, Mr. Charles said that there is a value in having copy so poor that listeners get sick and tired of hearing it. He explained further:

"If you hit the nail on the head with a catchy commercial, the whole country is talking about it. If your copy is purposely so poor that listeners can't stand it, they talk about that kind of a commercial too. If, however, you're in between, it doesn't make much of an impression at all. I try to

Hal, Bill and Coo

EDITOR:

Several broadcasters have asked me what I thought of NARTB and BAB.

We now have in Harold Fellows and Bill Ryan "two of our own." They started in radio at the beginning. They grew with the industry. As former station managers, they know what it means to have strong and able leadership in our national organizations. They know our problems. They are practical in their achievements. . . .

If we as an industry don't get behind Hal and Bill and help them do the job, then we don't deserve a healthy NARTB and BAB.

I work with many stations throughout the United States. The confidence in NARTB and BAB is now at an all time high. . . .

Fred Palmer
The Fred A. Palmer Co.
Columbus, Ohio

Growing Pains

EDITOR:

The April 21 issue of BROADCASTING • TELECASTING carried a double page spread for KCBQ San Diego —"First In Audience In The Nation's Fastest Growing Major Market." We respectively take exception to this reference to San Diego as the nation's fastest growing major market.

According to the U. S. Census of 1950, the population of the San Antonio metropolitan area showed an increase of 60.25% during the decade from 1940 to 1950. The San Diego metropolitan area showed an increase of 58.1% for the same period.

Furthermore, these figures do not include "on the post" military personnel for San Antonio's 11 major military installations.

There is nothing better than first—and San Antonio is FIRST.

Howard W. Davis
General Manager
KMAC, KISS (FM) San Antonio

* * *

Yes and No

EDITOR:

The letter of W. E. Bradford of KSST in your April 21 OPEN MIKE is very interesting. However, if you were looking for votes as to whether station listings should be marked that no P.I. business is accepted, please cast one very emphatic "no" vote.

Our waste baskets are pretty well loaded also with P.I. offers, but we have never had any problem in immediately distinguishing between a P.I. and a legitimate order. Evidence of the P.I. deal is usually available in the first sentence. Very little reading time is lost and they do make a nice hot blaze.

In our opinion, they should not even be given the status of having been voted upon as far as station listings are concerned.

G. P. Richards
General Manager
WHBL Sheboygan, Wis.

* * *

EDITOR:

. . . We heartily endorse Mr. Bradford's suggestions.

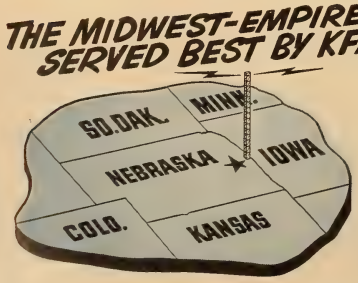
F. T. Wilson
Manager
KGNB New Braunfels, Tex.

* * *

Educated Educator

EDITOR:

The question of whether or not education can have a place in TV by joining forces with commercial broadcasters or by striking out on its own is a vital one.



I thought that you might be interested in the latest development in television at the U. of Omaha. . . . The university is cooperating with KMTV (TV) to present a course over TV for college credit. We hope that many people will decide to register. . . .

But the main point is not registration. The success of the course will not be determined by the number of registrants but simply by the fact that thousands of people will have the opportunity to see and hear education in action. . . .

Bruce A. Linton
Head, Dept. of Speech, Radio and Theatre
U. of Omaha

"For reporting and public service far beyond the call of duty." That is the achievement citation going to KFAB this month. The Missouri River Flood (worst in history) was the Midwest story of the Year. KFAB reporters, on water, land and in the air, operating 24 hour schedules, kept Midwest Empire listeners accurately and fully informed as the Big Muddy carried on its destruction. Achievements in reporting and programming are taken for granted by KFAB listeners. Achievements in results are taken for granted by KFAB advertisers. For information on how you can use the "Achievement Station," call Free & Peters or contact Harry Burke, General Manager.

"Better turn off either the sink or the TV, honey!"

feature of the week

Seeing the 70,000 baby-chick passengers safely on plane bound for Austria are (l to r) Walter Bishop, Agriculture Co. of Pan America, Mr. Morency, John Christensen, state commissioner of farms and markets, representing Gov. Lodge, and Mr. Atwood.

* * *

A CHANCE conversation between Paul W. Morency, vice president - general manager, WTIC Hartford, and A. J. Brundage, retired 4-H Club leader, initiated action which resulted in a gift of 3,000 baby chicks from Connecticut 4-H Club members to Austrian 4-H'ers.

This has resulted in a commercial order from the Austrian government for 200,000 chicks this year.

Mr. Morency happened to meet Mr. Brundage in the Hartford railroad station last year. They thought a gift of chicks to Austrian children would be a good idea. The idea was carried through by the Connecticut Poultry Assn. and 4-H Clubs. The good record made by the Connecticut chicks influenced the Austrian Ministry of Agriculture to place the large order this year.

It will take three cargo flights to carry the chicks to Europe. First flight, carrying 70,000 day-old chicks, took off from Bradley Field April 28.

Prior to the departure of the plane and its valuable cargo, Frank Atwood, farm director at WTIC, conducted a broadcast from Bradley Field. On the program, Mr. Morency declared "that helping the people of Austria to provide food for themselves is a splendid way to build good will between the two countries."

YOU CAN GO "LIVE" with SPOT PROGRAM TELEVISION

Spotted across the country are certain *live*, station-produced TV shows with strong claims on any advertising budget. For product tests . . . for getting your feet wet in television . . . for solving localized sales problems — these shows can't be beat.

These station-produced programs come in all types and sizes: variety, drama, homemaker, juvenile, sports and news, participations, etc. Their names may or may not be familiar to you. Some have ratings that seem stratospheric; others have ratings considerably more earth-bound. But they all have one feature in common: **They sell their heads off for the sponsor.** For they're planned that way, by people who know the local audience best.

These local *live* shows are just one more facet of the many different advantages of Spot Program television. All the exciting opportunities in Spot Program advertising are detailed in a new Katz presentation. Your Katz representative will be pleased to arrange a convenient meeting to show it to advertising, selling, or agency executives.

YOU CAN DO BETTER WITH SPOT...MUCH BETTER

"KWKH jacks sales of Jax Beer"

Says HAROLD W. HARGROVE

Sales Manager, Jax Division, Shreveport Beverage Agency

LARGE LOUISIANA BEER DISTRIBUTOR

Few beer distributors in America can boast as pretty a sales curve as Jax Beer has racked up in the big Louisiana-Arkansas-Texas area, primarily through KWKH advertising. Here's how Mr. Harold W. Hargrove recently put it:

"In July, 1949, the Fitzgerald Advertising Agency of New Orleans launched a radio campaign for Jax Beer over KWKH. Our Jax sales increased approximately 30% during the first year this campaign was on the air and have continued to climb steadily since that time. We are confident that KWKH has been the greatest single factor in building demand for this product and we feel that the 'Jax World of Sports' and the 'Louisiana Hayride' are doing a grand job for Jax.

(Signed) *Harold W. Hargrove*"

KWKH DAYTIME BMB MAP

Study No. 2—Spring 1949

KWKH's daytime BMB circulation is 303,230 families, daytime, in 87 Louisiana, Arkansas and Texas counties. 227,701 or 75.0% of these families are "average daily listeners". (Nighttime BMB Map shows 268,590 families in 112 Louisiana, Arkansas, Texas, New Mexico, Mississippi and Oklahoma counties.)

CREDIT LIFT EFFECTS

Ad Budgets May Benefit

By JOHN OSBON

THE GOVERNMENT opened the gates last week to a potential multi-million-dollar plus in national, regional and local advertising expenditures.

The prospect for competitive buying of radio-TV network and spot time and for fresh new money in broadcasters' sales tills loomed brightly with the lifting of credit restrictions on automobiles, radio-TV and other appliances, and household furnishings.

Industry authorities, national advertisers, trade groups, and local dealers agreed that the government's action paves the way for stimulated consumer demand, with a beneficial effect on all segments of the American economy including employment.

What impact the move would have on national network radio-TV accounts among those products freed by the government and on local or spot time sales was not, of course, immediately ascertainable. But the feeling seemed to be that any action to ease controls in the economy would prove helpful in the long run. Installment credit outstanding as of last March 31 was in excess $13.1 billion.

Foundation for Further Action

While it obviously was too early to elicit concrete instances of expanded advertising media budgets and particularly increased radio-TV outlays, the groundwork was laid with suspension of Regulation W for a spirited buyers' market.

The indications of healthy media activity for summer and fall business not yet set may be gauged by the nature of the products freed for the open market by the Federal Reserve Board.

Perhaps the prime effect will be felt among automobile manufacturers and their dealers who had faced stiff reluctance from prospective buyers balked with terms calling for 33% down and 18 months to pay. Auto advertisers ranked top-most by product group in use of local radio with a whopping $32 million plus last year, and fifth in spot on a national basis with nearly $10 million.

Auto retailers (cars, accessories), department stores, home appliances and furniture stores commanded top rungs on the local radio sales ladder in 1951 and it seemed certain that, in the competitive battle ensuing, would fight hard for the consumer dollar by boosting their ad budgets.

Coincidentally, FRB announced the suspension as major automobile manufacturers acknowledged a new competitive era and urged dealers to "push" their wares to maintain sales volume. New radio-TV schedules point up the desire to capitalize on summer traveling (see story page 25).

As a spokesman for the National Automobile Dealers Assn. put it, "this action will open up a market to millions of Americans who couldn't buy cars before. Dealers will have to advertise more to sell and keep pace competitively."

Radio and television set-makers enter the Regulation W picture in two ways: (1) use of broadcast time, nationally and regionally, to (2) meet consumer demand for radio-TV receivers, now operating at a normal production-distribution level. Local distributors and dealers, through manufacturers' tie-ins, also are re-appraising their local sales outlook.

There were widespread reports that many local dealers throughout the country rushed full-page ads into print advising prospective buyers of a "no down payment, two years to pay" policy. In some instances, they also bought radio spots, though many broadcast commitments had not firmed up or were not reported to BROADCASTING • TELECASTING late Thursday.

Set manufacturers had been caught in the squeeze between FCC's late unlamented freeze on new TV station construction and a somewhat lessening demand for new video receivers until last fall. Since then, dealers have cleared their shelves of bulging inventories.

Auto Field Requisites

Actually, terms were not as stiff for set-buyers as automobile customers, with the reserve board prescribing a 15% down payment and 18 months maturity payment. Retailers have been scrapping competitively for the radio-TV receiver dollar, with such resultant low prices that OPS has seen fit to devise tailored price ceilings for the industry.

But with decreasing inventories and the prospect of new TV stations adding to circulation, dealers are expected to find a more flexible market.

"The Federal Reserve Board's action will stimulate business to some degree and have some effect in that it will open up new markets," according to James Secrest, general manager, Radio-Television Mfrs. Assn. He foresees perhaps a rash of dealer advertisements at the outset to take advantage of the board's action but no substantial long range impact.

Mr. Secrest noted that inventories have diminished to the normal six-week level and that the 15% down payment required under Regulation W was not too large. Some customers may purchase more expensive TV models, on which small down payments may be required. He predicts no mass buying that might deplete store shelves to the point that materials shortages will hurt production more seriously than has been the case.

RTMA spearheaded the industry fight in June 1951 for relaxation of installment restrictions. Later, the Federal Reserve Board, acting on mandate from Congress, eased curbs from the original 25% down and 15 months to pay.

A more conservative view on the government's action was given by James D. Shouse, board chairman, Crosley Broadcasting Corp. and vice president of Avco Mfg. Co. He saw no appreciable effect on buying habits of the American public or on the nation's advertising expenditures.

"The public has been relatively

(Continued on page 105)

NETWORK RATE CUTS

Charges, Denials Made

UNEASINESS carrying almost hysterical overtones surrounded the network radio rate situation last week, with reports of ready-to-go nighttime cuts ranging all the way up to 60% despite repeated denials.

At one network it could be heard that a rival was all set to chop nighttime costs, if it hadn't already. The charges brought denials and veiled—and sometimes not so veiled—counter-charges.

Offsetting at least partially the unconfirmed speculation over the fate of nighttime rates were reports, also unconfirmed, that networks are thinking in terms of hiking daytime charges.

The whole subject seemed apt to dominate a meeting of the All-Radio Affiliates Committee—formed initially under a cloud of announced and impending rate cuts—which was called by chairman Paul W. Morency, of WTIC Hartford, to consider this and other matters May 20-21 in New York.

Storm center of the speculation about impending changes in nighttime rate structure was CBS Radio, which initiated last year's round of cuts and which, perhaps at least partially for that reason, was reported variously last week to be considering—or even to have put into effect already—nighttime reductions of 15, 25, 50 and even 60%.

Stanton Statement

These reports brought from President Frank Stanton an assertion that, although rates in both radio and television are and for a long time have been a subject of almost constant discussion at executive staff meetings, no definitive action has been taken and no specific proposal has been submitted for his consideration.

"We have discussed the matter of rates at virtually every executive-level meeting during the past year," he said.

But he reiterated that definite decision must await the results of newer station measurement studies, so that this factor may be appraised along with others. CBS Radio has subscribed to Standard Audit & Measurement Services Inc.'s current studies in that field, results of which are expected this fall.

Mr. Stanton leaves May 16 for a European vacation with Mrs. Stanton, returning about July 1.

Other CBS and at least two station sources claimed meanwhile that reports of scheduled cuts by CBS Radio emanated from other

(Continued on page 36)

GAB INSTITUTE

Wailes Cites Radio Dominance

FAITH that radio will continue its dominance as a medium of mass communications, "certainly in the foreseeable future," was voiced by Lee B. Wailes, executive vice president of the Storer Broadcasting Co., in an address Friday at the seventh annual Georgia Radio and Television Institute.

As one evidence of the aural medium's power and attraction, he noted that 1951's 41.9 million radio homes in the U. S. represented "an increase of almost 50% over the days before television." He called attention also to radio's circulation as dwarfing that of even combinations of major magazines; to its high rate of listenership, and to its economies as a salesman.

Stressing the effectiveness of the human voice, Mr. Wailes cited an occasion when the army "asked a group of blind and deaf veterans which of the two senses they would rather have restored, if they could have only one.

"Eighty per cent," he asserted, "said they would rather hear again. They felt more 'cut-off' from people, more lonely, when they couldn't hear human voices than when they couldn't see human faces."

The Georgia Radio & Television Institute, sponsored jointly by the U. of Georgia School of Journalism and the Georgia Assn. of Broadcasters, was held Friday and Saturday at Athens, Ga.

Scharfeld, Heslep Speak

Also speaking was Arthur W. Scharfeld, president, Federal Communications Bar Assn., who addressed a dinner-meeting Thursday evening. Mr. Scharfeld spoke on "Regulatory Aspects of Television" (see separate story, page 74).

Another leading speaker at the institute was Charter Heslep, radio-TV director, information office, Atomic Energy Commission. Mr. Heslep gave a detailed account of the April 22 atomic test coverage in his talk, "They Said It Couldn't Be Done."

A variety of radio-TV topics were touched upon at Friday's morning session. Friday afternoon was devoted to practical aspects of successful operation of radio and television stations.

Among others scheduled to speak were Martha Rountree, TV producer and personality; Ford Bond, announcer - producer, and Clark Gaines, secretary, Georgia Dept. of Commerce.

Saturday's session was to be devoted to a BMI clinic on station operation, how to make local news pay off and mood music.

". . . . Counting for the knock-downs at the bell will be . . . ."

THESAURUS SALES

'Date' Sold in 100 Markets

RCA THESAURUS' transcribed library feature *Date in Hollywood*—featuring singers Gloria De Haven and Eddie Fisher with Hugo Winterhalter's orchestra—has been sold to local and regional advertisers in more than 100 markets in 30 days, according to report last week by RCA Recorded Program Services, New York.

"If monthly sales reports on *Date in Hollywood* average during the next eight months what this first 30-day period tells," Recorded Program Services spokesman said, "then by the end of 1952 Thesaurus subscribers will earn enough in time charges and talent fees on this show together with other Thesaurus packages. . . . to more than pay for the cost of their entire library service."

Ad Council Campaign

RADIO will be called upon by the Advertising Council to help set in motion a public service campaign undertaken by the Council and announced last week to get qualified high school students to consider engineering as a career. Requested by the Manpower Commission of the Engineers Joint Council, the campaign points out the present shortage of engineers as totalling 60,000, with another 30,000 needed in 1953.

FORT INDUSTRY

Now Storer Broadcasting Co.

COMPANY name of Fort Industry Co., which includes radio and television interests of its president, George B. Storer, has been changed to Storer Broadcasting Co. The change was made because the former title, based on Mr. Storer's early industrial enterprises, was not descriptive of radio-TV operations.

Plan for possible public or private sale of Storer Broadcasting Co.'s stock is under consideration. This would not affect control in the hands of Mr. Storer or identification of J. Harold Ryan, director-vice president-treasurer, and his wife, Frances S. Ryan.

The Storer radio-TV properties consist of WJBK-AM-FM-TV Detroit; WSPD-AM-FM-TV Toledo; WAGA-AM-FM-TV Atlanta; KEYL (TV) San Antonio; WWVA-AM-FM Wheeling, W. Va.; WGBS-AM-FM Miami; WSAI-AM-FM Cincinnati, and WMMN Fairmont, W. Va.

IKE HOMECOMING

Radio-TV Setting Plans

MOST major radio and television networks were preparing last week to broadcast General of the Army Dwight D. Eisenhower's first address upon his return to the United States, to be delivered during his homecoming welcome at Abilene, Kan., June 4.

NBC, ABC, and CBS Radio networks—the latter through KMBC Kansas City—scheduled the talk for 10-10:30 p.m. EDT, and MBS, planning to carry it, had not scheduled the time. NBC and CBS-TV networks scheduled the speech at 7-7:30 p.m. ABC-TV had not planned a telecast by the end of last week and DuMont, considering coverage, had reached no definite conclusions.

DAYTIME RADIO

'Solid' Medium—Stolzoff

DECREASE in the average radio station's audience without a corresponding decrease in its rates merely means the cost-per-thousand is going up, Jerry S. Stolzoff, account executive for Foote, Cone & Belding, Chicago, told the Louisville Advertising Club Friday.

He compared this to increases by magazines of their advertising rate without increases of circulation. Recommending to stations relatively low-cost news, music and sports programming during evening hours, when television hits hardest, Mr. Stolzoff said also that "daytime radio is a hearty, lusty solid advertising medium."

"The national bills for daytime radio are being paid by some of the sharpest national advertisers in the country," he said. "There are more people listening to morning radio on May 9, 1952, than there were on May 9, 1948," he said.

"Radio, until mid-afternoon, is as strong as it has ever been in the entire history of the radio industry," Mr. Stolzoff said. "The slight decreases in percentage of sets tuned in is more than offset by the increase in the number of sets."

Citing FCC figures of $455 million AM-FM radio industry income in 1951, largest in history, he said: "According to every indication, it looks as though 1952 will be a bigger year than 1951."

KENKEL SWITCHES

Joins Nielsen Firm

FRED H. KENKEL, formerly executive vice president of C. E. Hooper Inc., has joined A. C. Nielsen Co. as a vice president, it was announced today (Monday).

Mr. Kenkel

Mr. Kenkel, who will make his headquarters in New York, will be primarily responsible for direction of the new Nielsen coverage service to radio and TV stations, it was added.

A graduate of St. Louis U., Mr. Kenkel was associated with Gardner Advertising Co., New York, for several years, ultimately serving as director of radio and media and as an account executive. He joined the Hooper organization in 1941 and, a year later, became a vice president. In 1944, he was named executive vice president and became a director.

Platt to Speak

JOHN H. PLATT, vice president in charge of advertising and public relations for Kraft Foods, Chicago, will discuss policies and planning which a client puts into a high-budget network show at the Chicago Television Council May 21.

AUTO ACTIVITY

Firms Set Summer Schedules

By FLORENCE SMALL

AMERICAN automotive manufacturers have released the clutch on their budgets for a power drive into summer advertising, using radio and television in both spot and network form. That was the finding of a BROADCASTING • TELECASTING check made last week.

The purpose of the campaigns is to capitalize on the seasonal urge of Americans to hit the road, and to that end at least nine firms were found to be actually involved in summer scheduling, with at least three of the companies using radio and TV spots.

First, Ford Dealers of America will retain its half-hour on NBC-TV during the summer months with a new program called *Mr. Peepers*, featuring Wally Cox. Show will be produced by Fred Coe. If the program proves successful it has a good chance of remaining on during the fall season. At any rate Ford will retain the time (Thursdays, 9:30-10 p.m.) during next year. J. Walter Thompson Co., New York, is the agency.

The three active spot advertisers are Dodge cars, Hudson Motors, and Kaiser-Frazer.

Dodge (Chrysler Corp. of America) is using 500 radio and TV markets for spots starting on the following dates: April 28, May 5 and May 12, for two, three and four week durations.

Ruthrauff & Ryan, New York, has been placing the campaign, although the account goes to Grant Advertising Inc. effective early in June.

Hudson Starting To Roll

Hudson Motors through its agency, Brooke, Smith, French & Dorrance, Detroit, has placed a campaign in a number of markets for this month. Advertiser is using programs and spots on local stations.

Kaiser-Frazer, in addition to its recent buy of 45 minutes per week on NBC-TV's *Today* with Dave Garroway, is placing a two-week campaign during May in a number of markets across the country. On a Monday-through-Friday basis, Kaiser-Frazer sponsors two separate five-minute segments on each day except Tuesday, when it has one five-minute segment. William H. Weintraub & Co., New York, is the agency.

The one radio network buy involves General Motors Oldsmobile Div., Lansing, Mich., which signed for sponsorship of the *Peggy Lee Show* on CBS Radio (Tuesday and Thursday, 7:30-45 p.m.) starting the end of May. Agency is D. P. Brother & Co., Detroit.

DeSoto-Plymouth has renewed Groucho Marx' *You Bet Your Life* on NBC-TV (Thursday, 8-8:30 p.m.) for next season through its agency, BBDO, New York.

Chevrolet Div. of General Motors is about to sign the renewal of its *Dinah Shore Show* twice weekly (Tuesday and Thursday, 7:30-45 p.m.) on NBC-TV. Advertiser spends over $2 million a year in television. Campbell-Ewald Co., New York, is the agency.

Buick Cars, which has not used TV for two years, is expected to pick up the fourth Tuesday night 8-9 p.m. segment on NBC-TV, which has been released by Texaco Oil Co. Latter advertiser will continue to sponsor Milton Berle the other three weeks out of four. Kudner Agency, New York, is the agency for both Buick and Texaco.

Cadillac Considering

Cadillac Cars is understood to be considering a network television show through its agency, McManus, John & Adams, Detroit.

Lincoln-Mercury will continue to sponsor the Ed Sullivan *Toast of the Town* show on CBS-TV next season. Ford Motor Co. had been asked to co-sponsor the program because of mounting costs. However, Lincoln-Mercury Dealers is currently trying to get a larger budget so that it can singly underwrite the program.

Packard Cars through Maxon Inc., New York, which is sponsoring *Rebound* on a number of television stations, is currently in negotiations on next fall's plans. Decision is expected early this week.

Other developments in the automotive field last week were of a somewhat preliminary nature but strongly significant as indication of the future direction and extent of advertising outlay in at least a segment of the industry.

E. C. Quinn, vice president of Chrysler Corp., announced that his company is setting up the most intensive advertising and sales program in its history for its Chrysler Car Div. in a move to take the leadership in the luxury car market.

Speaking more generally, Harry J. Klinger, vice president of General Motors, pointed out that the automotive industry is once again entering into a competitive market, "passing out of a period of 'pull' into a period of 'push' selling." "Dealers," he said, "will have to go out and start 'pushing to produce' more and more to maintain sales volume. Competition has returned."

He made his remarks before a group of dealers meeting at the Waldorf-Astoria last week in New York.

WELCOMING Henry E. Abt (r), president, Brand Names Foundation, to the Rocky Mountain region are Palmer Hoyt (l), publisher, *Denver Post*, and Charles Bevis (c), manager, KOA Denver.

O'HARA BILL

Would Offer Political Libel Guard

By DAVE BERLYN

A "COUNTRY LAWYER" approach to clear up the vexing problem of political broadcast liability was offered on Capitol Hill last Thursday on the threshold of the upcoming national elections.

Use of the rustic term, "country lawyer," was the way Rep. Joseph H. O'Hara (R-Minn.) described his bill (HR 7782) that would attempt to give the broadcaster full discretion and authority to delete libelous material from a candidate's talk.

The licensee does not hold that authority now under Sec. 315 of the Communications Act which governs political broadcasts.

Observers on the radio scene saw in the O'Hara bill a possible new avenue of exploration toward an eventual solution of the current licensee political predicament.

Bill Provisions

The new bill would require equal opportunity for time to all other candidates for the same office to which a legally qualified candidate, whose talk is broadcast, aspires. It holds no provision for persons who speak on behalf of the candidate.

The licensee would be prohibited from exercising power of "political or partisan censorship." But there would be no obligation upon him "to broadcast any defamatory, obscene, or other material which may subject it [licensee] to any civil or criminal action in any local, state or federal court."

FCC, according to the bill, would be compelled to issue rules and regulations to carry into effect the bill's provisions within a year after the measure became law. Apparently this interpretation of Sec. 315 would become the law of the land. After the year was over, and incidentally, the election year would be history, too, the FCC then would be required to promulgate its rules and regulations.

Rep. O'Hara told BROADCASTING • TELECASTING that he had designed the bill "to place the broadcasting station on the same basis as the newspaper in taking a political advertisement."

His strategy, he explained, was to "get hearings on my bill and the Horan bill before the House Commerce Committee." The current situation for the broadcaster, he said, was "bad" but the Horan bill, he asserted, would leave it "almost as bad." "We must have one policy or the other," he said.

The bill, Rep. O'Hara continued, was "my own idea coupled with requests from small stations that something be done." The measure, he said, represents a "country lawyer approach to the problem."

The broadcaster must have rights of censorship plus the responsibility when carrying a candidate's speech. "We shouldn't remove one in favor of the other," he added.

This new bill came in the midst of feverish behind - the - scene activity at the Capitol to give the broadcaster libel protection. The developments included:

● Possibility that the libel-proof bill, as proposed by Rep. Walt Horan (R-Wash.), may be offered on the House floor as an amendment to the McFarland bill.

● This failing, it's said House Interstate & Foreign Commerce Committee Chairman Robert Crosser (D-Ohio) will be prodded to hold hearings of his committee on the bill.

● Flood of letters from broadcasters urging legislators to get behind the Horan bill. Some 30-40 House members have received correspondence, it was reported.

● Absence of opposition thus far leads to opinion that the path toward enactment should be smooth.

● Identical bill (HR 7756) introduced Wednesday by Rep. Pat Sutton (D-Tenn.).

Definition of Candidates

The Horan bill (HR 7062) would denote legally qualified candidates as those "in a primary, general or other election"; specify that an authorization to speak on behalf of a candidate must be in writing, and direct that the broadcaster would have no power to censor the material broadcast.

It also would *not* hold the broadcaster liable in any civil or criminal action in any local, state or federal court. The candidate, moreover, would be subject to libel laws.

Both the McFarland and Horan bills would amend the Communications Act but for different purposes and certainly to varied extent. The McFarland legislation would set up a new communications law while the Horan measure would change the language of but one section of

(Continued on page 95)

RCA REPORT

Sarnoff Reviews Firm's Record

"INTERNATIONAL television as a regular service will be realized within the next five years," RCA Board Chairman David Sarnoff told corporation stockholders at their annual meeting in New York Tuesday.

Predicting international television as "a powerful aid socially, educationally and politically," Gen. Sarnoff warned, however, about technical, economic and political problems which must be solved before such television can be established on a regular basis—problems which present, he said, a "stimulating challenge to all of us."

The same technical pioneering by RCA that led to international radiotelegraphy, radiotelephony, radiotelephotos and radio broadcasting on a world-wide scale, have also enabled RCA experts to bring the day of international television closer to realization, he observed.

"By cultivating better international understanding and helping to reduce tensions born of misunderstanding, 'The Voice and Vision of America' can contribute substantially toward achieving the goal of universal peace," the General pointed out.

Lifting of the TV freeze in the U. S., Gen. Sarnoff noted, has given "tremendous impetus" to the expansion of video throughout the country. "Socially, economically and educationally, television can now attain its full stature as an industry and broadcasting service," he said.

Outlook Brightening

Adding his own report to the corporation's annual statement, which had been issued previously [B•T, March 3], Gen. Sarnoff concluded that the sales outlook for television is brightening.

"While uncertain factors in the current world situation obscure the general outlook, there are certain factors within our own field of operations that are clear," he said. "For example, productive capacity is the greatest in our history. Television is expanding its services. New markets for TV transmitters and receivers are being opened, and . . . we expect that our business for the last half of 1952 will show an improvement over the first half."

RCA gross of $163,871,331 by March 31 of this year resulted in a profit of $14,841,520 which, after taxes, amounted to $7,076,520, according to the first-quarter report given by the RCA board chairman. For the comparable period last year, $185,590,755 gross provided a pre-tax profit of $26,743,542 and a net of $11,901,542.

Like the rest of the industry, Gen. Sarnoff said, RCA was affected by a decline in TV set sales during the first quarter of 1952. RCA Victor manufactured all TV receivers permitted under government allocation of materials, he noted, adding, "we sold what we produced." Current inventories are, he said, "normal."

RCA has spent a total of $3 million for UHF research, his report indicated, and the company also is working on the following developments:

Atomic electronic equipment, called a "color corrector," which is said to reduce by half the time required to make color plates for printing, as well as improving color fidelity and lowering production costs.

Electronic inventory control system, developed for military purposes and considered applicable to commercial operations, which can complete in days the inventory operations requiring several weeks.

Electronic inspection apparatus for pharmaceutical check on the purity of drug products, such as ampules containing vaccines.

"Walkie-lookie," a portable one-man TV station announced previously [B•T, March 3], for use by reporters covering special events in the field. This equipment may be incorporated, Gen. Sarnoff said, in NBC-TV coverage of political conventions this summer.

Magnetic sound-recorder projector to record individual commentary or musical background on 16mm film, expected to be particularly useful to home-movie enthusiasts, schools and advertising agencies.

Two-way microwave radio system for communication along highways, railroads and similar commercial routes as well as among military units. The North Atlantic Treaty Organization has ordered the system for use in Europe.

Closed-circuit industrial television for manufacturers', scientists' and educators' use and exchange of pictorial information.

Transistors Described

Transistors, described as tiny devices which operate like certain electron tubes, being developed for further use in new radio, TV and electronic instruments.

Defense contracts include a "substantial" backlog, Gen. Sarnoff said, later answering a question from the floor by evaluating them at "several hundred million dollars." Research on military projects continues at "relatively high levels," with a recent project being the start of a 430-acre electronics proving ground at Morristown, N. J., for some $3 million.

Experimental work on color television will continue, the board chairman emphasized, noting that one project now was to convert theatre-TV equipment — installed by RCA in 60 film houses throughout the country—to color use.

Questioned about subscription television, Gen. Sarnoff said it is "technically feasible" but, in his personal estimation, years off—not only for technical reasons but because it introduces the idea of broadcasting as a public utility for which charge can be made, thus suggesting government control of rates and a change in the whole American broadcasting picture. He noted that there are, however, a number of interpretations of the idea on paper, including an unannounced one developed by RCA.

RCA Advertising

In answer to another question, Gen. Sarnoff indicated that RCA advertising during 1951 was approximately the same as for the previous year, a little more than $15 million.

RCA business volume has increased nearly four times its $158 million of ten years ago to the present $600 million, Gen. Sarnoff pointed out, explaining that, to secure working capital for continued expansion, the corporation had loans totalling $100 million by the end of last year, a figure that will increase to $150 million by mid-1953, he said.

Last year's 48% increase in NBC sales, which reached a new high of $137 million, were re-iterated by Gen. Sarnoff, who again attributed the rise to television. Video, he added, continues at a "profitable level."

Purpose of the stockholders' meeting was to consider election of four officers, name an independent accountant to certify corporation statements, and consider a cumulative voting resolution for election of board members.

Directors whose terms were to expire this year and who were re-

(Continued on page 103)

RCA AND DOMESTIC SUBSIDIARIES CONSOLIDATED STATEMENT OF INCOME FOR QUARTER ENDED MARCH 31

	1952	1951
Products and Services Sold	$163,871,331	$185,590,755
Cost of Operations	149,029,811	157,847,213
Profit Before Federal Taxes on Income	14,841,520	27,743,542
Federal Taxes on Income	7,765,000	15,842,000
Net Profit for the Quarter	7,076,520	11,901,542
Preferred Dividend	788,239	788,202
Balance for Common Stock	6,288,281	11,113,340
Earnings per share on common (13,881,016 shares)	.45	.80

CBS INC. GROSS

Near $56 Million in First Quarter

GROSS income of $55,965,242 resulting in a net income of $1,522,796 after provision of $2,350,000 for federal income taxes was reported for the first quarter of 1952 by CBS Inc. and its domestic subsidiaries, including the Hytron manufacturing group acquired last June.

The 1952 net shows an increase of $121,742 over that for the comparable 1951 period when a net of $1,401,054 was reported on a gross of $39,323,391 after provision of $2,100,000 for taxes. Gross figures in both instances are those before discounts, commissions and returns were deducted. Most noticeable change in the consolidated statement was an increase in operating expenses and cost of goods sold from $18½ million in 1951 to almost $31 million this year.

Corporation directors, it was noted, declared a cash dividend of 40 cents per share on Class A and B stocks, payable June 6 to stockholders as of May 23. Some 2,337,896 shares of CBS Inc. stock were outstanding as of March 29, according to Samuel R. Dean, treasurer.

Full income statement follows:

	Three Months Ending March 29, 1952 (13 Weeks)		March 31, 1951 (13 Weeks)	
Gross Income		$55,965,242		$39,323,391
Less discounts, commissions and returns		12,977,144		11,557,742
		$42,988,068		$27,765,649
Deduct:				
Operating expenses and cost of goods sold	$30,963,775		$18,535,851	
Selling, general and administrative expenses	7,616,538		5,356,646	
Provision for depreciation and amortization of leasehold improvements	558,658		435,089	
		39,138,971		24,327,586
		$ 3,849,097		$ 3,438,063
Miscellaneous income, less miscellaneous deductions		23,699		62,991
Income before federal taxes on income		$ 3,872,796		$ 3,501,054
Provision for federal taxes on income:				
Income tax	$ 2,330,000		$ 2,080,000	
Excess profits tax	20,000		20,000	
		2,350,000		2,100,000
Net Income for Period		$ 1,522,796		$ 1,401,054
Earnings per Share (Note 3)		$ .65		$ .82

Notes:

1. The 1952 figures include the operations of the Hytron group (Hytron Radio & Electronics Co. and CBS-Columbia Inc.) which was acquired on June 15, 1951.
2. The provision for federal taxes on income for the first quarter of 1951 as originally reported was calculated in accordance with the 1950 Revenue Act which was in effect at that time; this provision has been adjusted in this report to reflect the changes resulting from the subsequent enactment of the 1951 Revenue Act which was applicable to the the full year of 1951.
3. The 1952 earnings are calculated upon the 2,337,896 shares outstanding as of March 29, 1952 and the 1951 earnings upon the 1,717,352 shares outstanding as of March 31, 1951.
4. The 1952 results are subject to year end adjustments and to audit by Lybrand, Ross Bros. & Montgomery.

FCC REVAMP BILL

House Debate Seen Within Few Weeks

HOUSE leadership has set the McFarland bill (S 658) down for debate this month, placing it in a sudden upswing of pending legislation.

Despite the crowded calendar, including the important foreign aid bill, House leaders hope to get the FCC-remodeling bill through at least by the week of May 26. If possible it may be debated the week of the 19th (next week), it was learned.

Rep. John W. McCormack (D-Mass.) was unable to supply a definate date when questioned on the House floor last Thursday by Rep. Carl Hinshaw (R-Calif.), second ranking member of the House Interstate & Foreign Commerce Committee. Rep. McCormack, House Majority Leader, acknowledge the measure's importance and recognized that the commerce group had put long and strenuous days on the bill. But he said, while attempting to fit the bill into the House program, he could not give an assured date.

It was subsequently learned, however, that the leadership, particularly Rep. McCormack, is pinning hopes on the weeks mentioned above.

The House Rules Committee has okayed the legislation and is permitting three hours of debate. The bill can be amended on the floor.

It was also learned that House Speaker Sam Rayburn (D-Tex.), who has authored revisions in communications law when a member of the commerce group, was looking over comments sent to him on the bill by the FCC [B•T, May 5].

In its memorandum, FCC warned that sections of the House version of the bill, as contained also in the original Senate measure, would "paralyze the Commission's functions at a time when it is imperative that the Commission be able to act efficiently and expeditiously to permit the proposed nationwide expansion of television broadcasting to become a reality, as well as to take care of its heavy workload in other vital areas of the communications field."

Sections which were bitterly criticized by the Commission were those which would bar consultation with members of its staff in any adjudicatory proceedings designated for hearing, and also prohibit staff members from making recommendations. The bill, however, would direct the FCC to establish a "review staff" to aid it in hearing cases but would limit it to summarizing the evidence in hearing cases and exceptions to initial decisions and replies. FCC said:

. . . in all adjudicatory cases coming to the Commission for review of an examiner's initial decision, the Commission itself would apparently be required to consider each exception filed to either a finding of fact or conclusion of law contained in the initial decision, and then instruct the review staff with respect to each such exception.

Because consultation with staff members would be taboo, commissioners also "would be forced to devote a disproportionate amount of time to conferences, at which the seven professional assistants could not be present, held for the purpose of drawing up point by point directions to the review staff on each matter of fact or law raised upon exceptions to initial decisions," FCC stated. Also thus affected would be all interlocutory motions made in hearing cases and in petitions for rehearing of hearing cases, the agency noted.

No one Commissioner can be expected to make satisfactory decisions in these several fields without the assistance and advice which may be gained from free consultation with members of the staff possessing specialized training in each of the fields.

Another part of the McFarland bill undergoing FCC's fire was Sec. 8 which would require a 30-day notification before applications are set for hearing or grants would be issued without a hearing.

This is commonly known as the "party in interest protest" section. This section, FCC said in part, would:

. . . establish an unnecessary and burdensome procedure, entailing needless expense both upon new applicants and the government, whereby before the Commission could designate an application for hearing it would have to process the application twice, first upon consideration of the application as filed, and subsequently, upon consideration of the reply received from the applicant.

On the problem of staff relationship to Commissioners, FCC suggested the following substitute for Sec. 5(c) of the bill:

No person engaged directly or indirectly in any prosecutory or investigatory function in any adjudication proceeding or who is subject to the supervision or direction of any person performing or supervising any such prosecutory or investigatory activity shall advise or consult with the Commission with respect to decisions by it after formal hearing in any adjudication as defined in section 2(d) of the Administrative Procedure Act.

In a separate memorandum to the House committee, FCC also questioned language of a new amendment which would permit discrimination against newspapers, noting it would open the door to a varied construction. The Commission asserted that the provision, as written, might mean that FCC may not consider diversification of control over mass media as a factor in consideration of applications. Additionally, FCC raised the question of whether the amendment might not apply to motion picture firms and radio stations among others because of the laws of construction.

No Mention in Report

Not mentioned in the report was the section on cease-and-desist, suspension and fine levying powers which has been finding strong opposition in broadcast industry circles [B•T, April 14].

FCC Comr. Robert F. Jones was the only FCC member not participating in the writing of the memorandum as he was out-of-town addressing the Ohio Assn. of Radio-TV Broadcasters' management clinic [B•T, May 5].

GATHINGS PLAN

House Consideration Near

THE RESOLUTION aimed at setting up an investigation and study of radio and television programs is tenatively slated to be taken up today (Monday) or tomorrow by the House [B•T, May 5].

This was revealed last Thursday by Rep. John W. McCormack (D-Mass.), the House Majority Leader. The resolution (H Res 278), authored by Rep. E. C. Gathings (D-Ark.), would direct and authorize the House Interstate & Foreign Commerce Committee to conduct the investigation.

Calendar in the House for this week, which is subject to change, schedules the resolution as one of the first pieces of business for the two days. (For earlier story on a Gathings interview, see page 52).

HYDE RENOMINATED

For Another FCC Term

ROSEL HERSCHEL HYDE, vice chairman of the FCC and its "career" Commissioner, appears before the Senate Interstate & Foreign Commerce Committee Wednesday to testify on his re-appointment to the Commission.

President Truman nominated Comr. Hyde to a full, seven-year term last Monday. Comr. Hyde is an Idaho Republican.

In advance of the hearing, it was noted that little, if any, opposition to Comr. Hyde's re-appointment is expected among committee members. There may be some questioning about the North American Regional Broadcast Agreement (NARBA) with which the Commissioner has been very active in recent years.

The NARBA treaty is now before the Senate for ratification, but has been bottlenecked in the Senate Foreign Relations Committee where the U. S. international role has elbowed it aside in favor of action on major foreign policy programs.

Comr. Hyde is a veteran in the FCC, having come up through the ranks. He achieved his commissionership and vice chairmanship through merit. His service on and within the Commission dates from his association with the old Federal Radio Commission in 1928.

He was appointed to the Commission by President Truman in April 1946 to fill the unexpired term of the late Comr. William H. Wills which ran until June 30, 1952.

COMR. HYDE

* * *

Senate confirmation was swift when Comr. Hyde was appointed on the Commission. The Senate committee session then was short.

When named to the Commission, Comr. Hyde was serving as General Counsel, a post he was promoted to in March 1945. He was assistant general counsel from October 1942.

The tall, lean Commissioner is a "young" FCC veteran. He was born in 1900 on a farm near Downey, Ida., attending schools there and was graduated from high school in Salt Lake City. He attended Utah Agricultural College.

In 1924, he was manager of the Downey State Bank, which meant he was a legal, financial and business adviser to farmers and townsmen of the area. That year, he married Mary Henderson, a Downey school teacher.

Comr. Hyde traveled to Washington the following year, entered George Washington Law School in 1925, completing its courses in 1929, and was admitted to the District of Columbia Bar. First job in the capital city was clerk in the Civil Service Commission, later he moved to the Office of Public Buildings and Parks after study in accounting.

He was started in Grade 1 with the Federal Radio Commission, became chief of its docket section and reorganized the system then in use which served as a guide for many years later. He moved into the legal department as an attorney and in 1932 was an examiner. When FCC was formed, he was again named to that post. Subsequently he became senior attorney, working on common carrier as well as broadcasting matters. In 1938, he was put in charge of the

NBC 1952 Stations Planning & Advisory Committee members are (seated, l to r) Stanley E. Hubbard, KSTP-TV Minneapolis-St. Paul; Ralph Evans, WHO Des Moines and WOC Davenport; Allen M. Woodall, WDAK Columbus, Ga., and Martin Campbell, WFAA-TV Dallas; standing (l to r) are Lee B. Wailes, Storer Broadcasting Co., secretary for TV; Willard C. Worcester, WIRE Indianapolis; E. R. Vandeboncoeur, WSYR-TV Syracuse, vice chairman; Robert B. Hanna Jr., WGY Schenectady; Richard O. Dunning, KHQ Spokane, secretary for radio; B. T. Whitmire, WFBC Greenville, S. C.; P. A. Sugg, WKY Oklahoma City, chairman, and Ed Yocum, KGHL Billings, Mont. NBC held its first 1952 SPAC meeting in New York [B•T, May 5].

RADIO NEEDS

Cited by Fellows at WAB

RADIO will not be able to solve its problems on behalf of the public or the industry itself unless it organizes a strong national trade association and 48 state broadcasting associations backed by almost 100% membership. This was the assertion of NARTB President Harold Fellows as he spoke at the luncheon meeting of the Wisconsin Broadcasters Assn. in Milwaukee Tuesday. More than 50 station men in Wisconsin attended the two-day session, which started Monday with a day-long clinic sponsored by BMI [B•T, April 28].

Discussing the need for close cooperation with legislators, Mr. Fellows pointed out that this need is apparent on state and local as well as federal levels. He reminded broadcasters they "are doing business by the grace of God, technical inventions and a government license," and that the third factor inevitably means the industry "is a shining target for government legislation, and always will be."

Main Element

The main element in "pursuing the business of legislation," Mr. Fellows charged, is for the broadcaster to "organize and conduct himself so that he establishes stature and respect for radio and television."

"We haven't done it," he said, "and we should start immediately." Charging broadcasters with smugness, Mr. Fellows recommended "sale" of both media to public and legislators, "because where we don't find friends it's our own fault."

He discussed briefly, and off the record, specific legislation before Congress and educational TV.

This was discussed also by Prof. Harold B. McCarty, director of WHA Madison, operated by the U. of Wisconsin. He said the state radio council has made no specific plans for use of TV as an educational tool, and is now considering several proposals.

Two proposals involve use of a closed circuit TV laboratory at the university and election of a TV network with one origination site and 11 relay towers. The latter suggestion would require an estimated investment of $3 million, he said, equal to $1 per Wisconsin resident. Under no circumstances, he assured the broadcasters, would the university wish to compete on a commercial or non-profit basis.

WRBC PURCHASE

Lamar Firm Selling WJDX

TO BETTER its Jackson, Miss., coverage, Lamar Life Insurance Co. is buying 100% ownership of WRBC for $250,000, application for transfer approval filed with the FCC last week disclosed. WRBC is on 620 kc with 5 kw day, 1 kw night.

At the same time, Lamar is selling its presently owned WJDX (1300 kc, 5 kw day, 1 kw night) to majority stockholders of the present licensee of WRBC (Rebel Broadcasting Co.). Purchase price is $100,000. Both transfers are contingent on the other.

In addition to acquiring a better facility, Lamar will also acquire the new studios and equipment of WRBC. It is selling to the purchasers of WJDX (a new corporation named Rebel Broadcasting Co. of Mississippi) the transmitter facilities of that station.

Officers and stockholdings of new Rebel Broadcasting Co. of Mississippi are virtually the same as those in the present WRBC licensee: T. E. Wright, president and 32.5% stockholder; W. B. McCarthy Sr., vice president and 21.4%; J. W. Carlier, secretary-treasurer, and 7.5%.

After FCC approval, call letters of stations will be exchanged. This will maintain the WJDX call letter for Lamar Life Insurance Co., but on 620 kc. WRBC will then be owned by Rebel Broadcasting Co., on 1300 kc.

LBS CUTS TIME

Possible Changes Speculated

LIBERTY Broadcasting System, concentrating on small-market and small-station coverage, was understood last week to have cut its daily network hookup from a 16-hour to eight-hour basis.

Efforts to contact Liberty executives in Dallas had proved fruitless, as of Thursday night.

Word that the network was making major changes in its operating procedure spread last week following a closed circuit talk by Gordon McLendon, Liberty president. Several affiliates contacted by BROADCASTING • TELECASTING said they had been asked to keep contents of the talk on a confidential basis.

Liberty is plaintiff in a $12 million suit filed against 13 major league baseball clubs. The suit was filed in U. S. District Court, Chicago, last Feb. 21 [B•T, Feb. 25]. In that suit Liberty claims it suffered business damage through loss of baseball broadcast rights. The network contended the defendant club owners operated a monopoly and named all clubs but the Chicago White Sox, Cincinnati Reds and Brooklyn Dodgers.

Rumors about the network's future were rife last week following Mr. McLendon's closed circuit talk. One report was that Sears, Roebuck & Co. was not renewing its Liberty contract effective May 16. The Sears campaign involved two 15-minute five-weekly series promoting Coldspot freezers.

Earlier in the spring Liberty denied rumors it would not broadcast baseball in 1952, and it has been carrying play-by-play programs since the season opened.

The network has obtained important income by charging affiliates for its program service, tapping local sources of revenue.

A problem facing the network since it filed suit against major league baseball clubs has centered around the hesitation of national sponsors in signing contracts while litigation is pending, according to some affiliates.

Under the new Liberty operating schedule, it is understood, the network will open at 12 noon (EST) and continue to 8 p.m. This was expected to require rescheduling of some programs.

Among current Liberty sponsors are such national advertisers as General Mills, Pequot Mills and Amana refrigerators.

Last March Liberty went through a revamping process by reducing the New York sales organization. At that time Mr. McLendon said the step was designed to bring about economies in view of the amount of business originating in the office.

The LBS key outlet is now KLBS Houston, formerly KLEE [B•T, May 5]. Network headquarters are to be moved from Dallas to Houston.

Topping the Liberty organization are Barton R. McLendon, father of Gordon, and H. R. Cullen, prominent Texan. Program origination points include Dallas, New York and Washington.

SDX AWARDS

Murrow to be Honored

EDWARD R. MURROW of CBS-TV's news show, *See It Now*, on May 19, will add more honors as a Fellow of Sigma Delta Chi to his George Foster Peabody Award [B•T, May 5] at the national professional journalism fraternity's 1952 presentation ceremony and banquet at Chicago's Conrad Hilton hotel.

Among Sigma Delta Chi Distinguished Service Award winners will be Jim Monroe, news director of KCMO Kansas City, and William E. Griffith Jr., radio news writer of KMBC Kansas City, both for coverage of the 1951 flood. A public service award will go to NBC's WMAQ-AM-TV Chicago for its news broadcasts on the narcotics problem, particularly the three-program series, *The Black Mark*, by Len O'Connor [B•T, April 7].

Others were honored as follows:

Elected Fellows of SDX: Irving S. Dilliard, editor of the St. Louis *Post-Dispatch* editorial pages, and Dr. Alberto Gainza Paz, editor and publisher of Buenos Aires' *La Prensa*.

Public service awards: Chicago *Sun-Times*, for its campaign leading to the arrest of a murderer, Policeman Michael Moretti; *McCall's* magazine, for its article, "Who's Trying to Ruin Our Schools?" by Arthur D. Morse.

Individual winners: Editorial cartooning, Herbert Block (Herblock), Washington *Post*, and Bruce Russell, Los Angeles *Times*, both for third time; general reporting, Victor Cohn, Minneapolis *Tribune*; foreign correspondence, Ferdinand Kuhn, Washington *Post*; foreign and domestic affairs, AP Correspondent John Hightower, Washington; editorial writing, Robert M. White, Mexico (Mo.) *Ledger*; news pictures, Edward De Luga, Chicago *Daily News*, and Roger Wrenn, San Diego *California Union*; magazine reporting, Bill Davidson, for his *Collier's* article, "The High Cost of Dying."

Charles Clayton, national SDX president, will preside at and address the ceremonies. Walter G. Curtis, president of the Headline Club, Chicago SDX chapter, will make remarks, and Gideon Seymour, Minneapolis *Star* and *Tribune* executive editor, will keynote the banquet session. Victor E. Bluedorn, SDX national executive director, made the announcements of winners April 3.

Trade Bill to Senate

AS result of House passage last week the Senate now must consider legislation to restore the so-called "fair trade" retail price-fixing laws in 45 states. It would cancel out court decisions last year which thumbed down state trade laws intended to bar price-cutting on name-brand goods. The Supreme Court ruled that laws could not make a price agreement between one manufacturer and one retailer binding on all retailers in the state unless all retailers actually sign the agreement.

YOUR BEST CUSTOMER: THE FARMER

By ROBERT E. DUNVILLE

MEET your best customer, your prosperous, ready-to-buy customer who is growing sounder, establishing higher educational standards, and buying more merchandise because he has more spendable cash. He's the American farmer.

This man—the American farmer—owner of his own property and destiny, is the current American capitalist. Today he lives in a modern home — comfortable and attractive — full of modern conveniences. He has a well-equipped kitchen—and a late model car. Unlike the farmer of old, today he sends his children to good schools and more of them to college.

And this is the most important factor:

The farmer's average net worth today is approximately $25,000. Farming is big business—represents a big capital investment. Many of us are paying for a home or car; not your best customer. He owns his. And even though his credit is good he usually pays cash for his expensive equipment, his tractor, his truck, his corn picker, as well as his day-by-day purchases of consumer items.

In 1940 gross income from farming in the United States was nearly $11 billion. By 1945, this had increased to $22 billion, and in 1950, $32 billion — up 194%. Latest figures show farm income in 1951 was higher than ever—$37.5 billion.

* * *

TODAY farmers are buying more consumer merchandise. Taking 1940 as the base, the index of their general merchandise purchases rose from 100 to 148 in 1945, and in 1950 to 263, two-and-a-half times the merchandise purchased in 1940—up 163%.

The modern farmer is building up his plant. Taking the value of farm construction in 1940 as our index of 100, we find an increase of only 11 points by 1945. In 1950, however, this index rose to 453—up 353%. Total farm assets in 1940 amounted to $54 billion, with 12%, or $6.6 billion mortgaged. In 1951, total farm assets were $153 billion as mortgages dropped to 4% or only $5.8 billion. Farm assets rose $165%, and mortgages dropped 67%.

How many families are saving 50% of their income? Only 4% of total families save this proportion, but 13% of farm families do. How many save 30% of their income? Only 12% of total families do while 31% of farm families make this saving. The farmer's higher percentage of savings is remarkable in the face of his increased spending and debt reduction.

Farmers have more ready cash than ever before. In 1940 the United States farm total was over $4 billion. In 1945 it was up to $14.5 billion, and in 1951 nearly $20 billion, a jump of 400%. That represents spendable cash per farm family amounting to $3,178—many times the liquid assets of the average city dweller.

That's the national picture, and it may be applied with minor variations to most sections of the country.

* * *

RURAL communities are no longer just wide spots in the road. Today with good roads, good cars and a desire for good things, farm families come to town to buy their consumer goods. They buy at the super market and the chain drug store. These purchases in self-service stores represent the volume tonnage of consumer goods sold today.

Joseph B. Hall, president of the Kroger Co., confirms this fact. Mr. Hall says, "Nearly half of our sales are in rural communities. The manufacturer who advertises both to the rural and the urban public has a real advantage." The importance of the rural consumer is further underscored by another authority on marketing — W. P. Napier, executive vice president, A. C. Nielsen Co.—who says: "Clients are shocked by the amount of business in small towns."

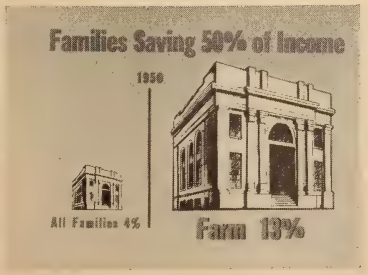
Purchases of 24 grocery and drug store items were studied in a recent survey by the WLW Cincinnati research department through the People's Advisory Council. The findings show 70.5% of rural families buy these products, compared to 71% of urban families. Like similar surveys over the past five years it showed the rural customer buys the same consumer goods as do city people.

Our research people looked into another aspect—the intention of the farmer to buy electrical appliances. What we found in the WLW area, we believe may be applied to other areas across the nation.

In 1940 only nine of every 24 farms had electricity. By 1945, this had risen to 13. In 1951, fully 21 of every 24 farms in our area were using electricity. A third of all farms electrified since 1945 means a tremendous electrical appliance market.

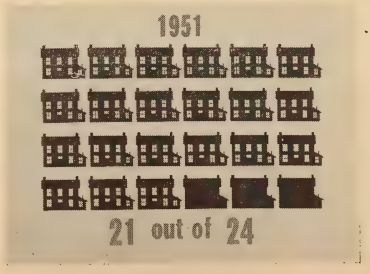
This survey of buying intentions

(Continued on page 38)



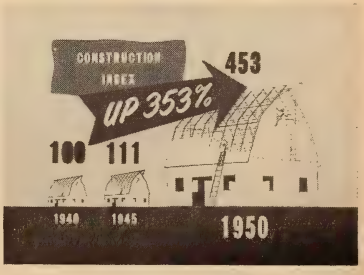
THE AUTHOR, president of Crosley Broadcasting Corp., has reached the top through the sales department. He used government and Crosley research department statistics as sources of this article. Mr. Dunville believes much of the data will prove valuable to others in the broadcasting industry who seek to point up the wealth in the rural market. Crosley stations include WLW, WLWA (FM), WLWT (TV) Cincinnati, WLWB (FM), WLWD (TV) Dayton, WLWF (FM), WLWC (TV) Columbus and WINS New York.

Mr. Dunville



* * *

SAVINGS of 50% of their incomes by U.S. families in 1950 saw 13% of farm families saving that amount, compared to only 4% of total families saving 50%.



* * *

ELECTRICITY study by WLW Cincinnati of farms in its area showed nine of every 24 farms using electricity in 1940, but 21 of every 24 in 1951, a jump of one-third.

* * *

CONSTRUCTION by U.S. farmers, with values based on 1940 index of 100, rose to a figure of 453 in 1950, a jump of 353% in farm building values.

CBS MERGER

WCCO, WTCN-TV Details

DETAILS of CBS's merger of its WCCO Minneapolis-St. Paul with WTCN-TV interests in the same city were disclosed last week in a transfer application filed with the FCC. The Minnesota merger was on of two which CBS worked out last March in moves to strengthen its position in the TV network sweepstakes [B•T, March 10]. The other was buying a 45% interest in KQV Pittsburgh.

Nub of the Minneapolis-St. Paul merger is the creation of Midwest Radio & Television Inc. to be owned 53% by present WTCN-TV owner Mid Continent Radio - Television Inc. and 47% by CBS. Mid Continent puts up WTCN-TV and $212,000 while CBS does the same with its 50-kw WCCO (on 830 kc) and $188,000.

Mid Continent's WTCN has been sold to former U. S. Ambassador to Cuba and Australia Robert Butler and associates for $325,000 [B•T, April 21]. Station operates on 1280 kc with 5 kw day and 1 kw night. Transfer application has not yet been filed.

Original cost of WCCO was $480,625.49, according to the application. Replacement value was put at $734,750.

Original cost of WTCN-TV, which operates on Channel 4 with power of 17.9 kw, was $506,098.90, according to the application. Replacement value was put at $535,-103.03.

Mid Continent Owners

Mid Continent is half owned by Northwest Publications (Ridder Newspapers) and the Minnesota Tribune Co. (which does not publish a newspaper). It also owns 40% of WEMP-AM-FM Milwaukee.

Ridder newspapers include the *St. Paul Pioneer-Press* and *Dispatch, Duluth News-Tribune* and *Herald, New York Journal of Commerce, New York Staats-Zeitung* and *Herald, Aberdeen* (S. D.) *American* and *News, Grand Forks* (N. D.) *Herald,* and a minority interest in the *Seattle Times*. Ridder interests own WDSM Superior, Wis., control KSDN Aberdeen, S. D., and KILO Grand Forks, N. D.

Total assets of Mid Continent as of Jan. 31 were given as $1,427,-207.36, of which $603,207.53 was in cash.

CBS listed its total current assets as of March 1 at $64,333,186, of which $12,683,076 was in cash. Total current liabilities was given as $31,760,870.

Application stated that the present staff of WCCO, under General Manager Gene Wilkey, will be retained. It also stated that the management of the new Midwest company would be in the hands of the present Mid Continent officials. Chairman of the new company will be William J. McNally, the application stated. President of Midwest will be Robert B. Ridder, it showed.

Approval of the WCCO-WTCN-TV merger will give CBS the following ownership lineup: WCBS-AM-FM-TV New York, KNX-AM-FM and KNXT(TV) Los Angeles, WBBM-AM-FM Chicago, WEEI-AM-FM Boston, KMOX St. Louis, KCBS-AM-FM San Francisco, 45% of WTOP-AM-FM-TV Washington. In addition to the 45% buy into KQV Pittsburgh, CBS will buy WBKB (TV) Chicago for $6 million if and when the FCC approves the merger of ABC with United Paramount Theatres. CBS is a TV applicant for Chicago, Boston and San Francisco.

OPERATOR RULES

NARTB Amends Request

RELAXATION of the FCC's operator rules to permit AM and FM stations using 10 kw power with omnidirectional antennas to be run by remote control, and to give authority to use restricted operators to stand transmitter watches was filed last week by NARTB. Petition was an amendment to the request filed earlier this year to permit same relaxation for stations using up to 5 kw power [B•T, Feb. 18, 11, 4].

NARTB's petition and amendment stressed that the technical calibre of broadcast equipment is now of such high standards that the requirement for a first-class radio-telephone operator to attend each transmitter is obsolete.

Amendment also asked that the authority to dispense with first class operator's presence also apply to such stations using more than 10 kw in power, or a directional antenna part of the operating day. NARTB asked that relaxation be authorized for that part of any station's operation that falls within the meaning of 10 kw omnidirectional radiation.

The amendment called attention to an NARTB board resolution calling for boosting the cutoff power to 10 kw "after concluding that there was no real basis for limiting the benefits of the relief to AM and FM stations operating omnidirectionally with powers of 5 kw or less." It was filed by Bernard Koteen, special counsel to NARTB on this matter.

Opposition to the petition has been voiced by operators in letters to the FCC and to BROADCASTING • TELECASTING [B•T, Feb. 18, 11]. Station owner Homer H. Haines (part-owner of WNAE Warren, Pa.) has also objected to the relaxation of the operators' rules [B•T, Feb. 18].

NBC Oregon Coverage

NBC radio will continue its grass roots coverage of important primary elections with the vote in Oregon Friday, to be broadcast via KGW Portland and KMED Medford. A special network program, *Oregon Primary Preview*, will be broadcast from 10:35-11 p.m. EDT Thursday, with results of the balloting slated for airing from 12:30-12:45 a.m. Friday. News editor of the primary coverage will be Frank Coffin, KGW program manager, with commentators Chuck Foster and Lawson McCall of KGW and Jennings Pierce and Russell Jamison of KMED.

NARTB DUES

Multiple Members to Get Discounts

NARTB plan to give reduced combination dues to members owning more than one licensed station was put in effect Thursday by a special dues committee comprising board members.

The three-man committee implemented the plan at a meeting with NARTB President Harold E. Fellows; Judge Justin Miller, board chairman, and C. E. Arney Jr., secretary-treasurer. Members of the board group are Harold Essex, WSJS Winston-Salem, N. C., chairman; Robert T. Mason, WMRN Marion, Ohio; Clair R. McCollough, WGAL Lancaster, Pa.

Action of the committee is subject to ratification by the board at its June meeting. The proposal was set up by the board in February and follows careful study of the membership situation.

Application forms will be distributed within a few days to companies owning more than one station. It was made clear that an AM-FM unit is considered one station and cannot be separated to take advantage of combination dues.

Since the plan was designed to become effective April 1, the discount schedule will be retroactive to that date for members who had all their stations in membership at that time.

The schedule for discounts follows:

1 unit—basic rate
2 units—10% discount on all
3 units—15% discount on all
4 units—20% discount on all
5 units or more—25% discount on all.

The present policy will be to consider 50% or more ownership of a property as ownership under terms of the discount formula.

Applications for discounts will be subject to approval by the Essex committee after it has a chance to study each case.

Transcription Rules Committee

NARTB headquarters last week announced membership of a new Transcriptions Rules Committee headed by Michael R. Hanna, WHCU Ithaca, N. Y., a Radio Board member [B•T, May 5]. On the committee with him are William Fay, WHAM-AM-TV Rochester, and Walter Compton, WTTG (TV) Washington.

The committee was authorized by the board at its February meeting to ask the FCC to lift its requirement that stations identify recorded and filmed programs as produced by electrical transcription. The requirement would remain for news programs having transcribed segments. The committee will meet May 19 at NARTB Washington headquarters.

President Fellows called a meeting of the AM Committee May 22-23 at the Ambassador Hotel, New York. Members are Glenn Shaw, KLX Oakland, chairman; John Esau, KTUL Tulsa; Simon R. Goldman, WJTN Jamestown, N. Y.; William C. Grove, KFBC Cheyenne, Wyo.; Lee Little, KTUC Tucson, Ariz.; Paul W. Morency, WTIC Hartford; John F. Patt, WGAR Cleveland; G. Richard Shafto, WIS Columbia, S. C.; F. C. Sowell, WLAC Nashville. Alternates are R. Sanford Guyer, WMOA Marietta, Ohio; Harry W. Linder, KWLM Willmar, Minn., and Richard H. Mason, WPTF Raleigh, N. C.

PA. ASSN. MEET

Elect Clipp President

ROGER W. CLIPP, general manager of WFIL-AM-TV Philadelphia, was elected president of the Pennsylvania Assn. of Broadcasters at its May 3-5 meeting, held at Nittany Lion Inn, State College, Pa. He succeeds John S. Booth, WCHA Chambersburg.

Other officers elected were William J. Thomas, WCPA Clearfield, vice president; David J. Bennett, WKBO Harrisburg, secretary (re-elected), and James Murray, KQV Pittsburgh, treasurer.

Eight district directors were elected: Roy E. Morgan, WILK Wilkes-Barre; Charles R. Petrie, WISL Shamokin; Joseph M. Cleary, WESB Bradford; Robert Trace, WMGW Meadville; Thomas B. Price, WBVP Beaver Falls; Jack M. Snyder, WFBG Altoona; A. K. Redmond, WHP Harrisburg; Louis H. Murray, WPAM Pottsville; named directors-at-large were Frank H. Altdoerffer, WLAN Lancaster; Joseph Connolly, WCAU Philadelphia; Robert R. Nelson, WARD Johnstown; George J. Podeyn, WHJB Greensburg.

Penn State Plans

Milton Eisenhower, president of Pennsylvania State College, told the broadcasters he felt the college would not be justified in spending a large sum for a television station, especially in view of its remote location. He suggested the college could perform a public service by developing programs for telecast on commercial stations.

Harold E. Fellows, NARTB president, addressed the Monday luncheon, discussing NARTB legislative activities and other association functions.

Other speakers included Roy Thompson, WRTA Altoona; Paul Good, U. S. Chamber of Commerce; Ben Gimbel, WIP Philadelphia, and Victor J. Diehm, WAZL Hazleton. A series of panel discussions was held, including a forum on television for small market broadcasters and a tape-recorded forum on UHF.

Tom W. Metzger, WMRF Lewistown, was chairman of the convention committee with Mr. Connolly, program chairman.

YOU CAN KNOW *Everything* ABOUT YOUR AUDIENCE IN IOWA!

Probably the first axiom in advertising is that to do an optimum job, you must know exactly to *whom* you are talking, at what *time,* under what *circumstances.*

Many advertisers have told us that the only precise data they have on most newspapers and magazines is "rates and circulation"—and that this doesn't provide the information needed for smart selling. For fourteen years, the annual Iowa Radio Audience Survey has presented a complete, accurate and detailed picture of the radio audience in Iowa. Using these Surveys, you know exactly *who* is listening to the radio at any time of day or night—men, women, children—urban, small town and farm—their economic and educational status—their preferences for various types of program materials—and dozens of other facts to help you plan your strategy.

The 1951 Iowa Radio Audience Survey is now available. It is the result of personal interviews with 9,180 families—all scientifically selected from Iowa cities, towns, villages and farms to present a true picture of the radio audience in Iowa. It is a *must* for anyone who wants to get the ultimate value from his advertising dollars, in Iowa. Write direct for your copy, or ask Free & Peters.

SELL THE HEART OF INDIANA

OVER **WIBC** INDIANAPOLIS, INDIANA'S FIRST

When all the yardsticks of time buying are applied to WIBC, this station emerges as one of the soundest purchases in all radio. With 50,000 watts on 1070 KC, it has the largest coverage area of any Indianapolis outlet and enjoys complete dominance of the rich Indianapolis market. The selling power of WIBC is felt far into strategic portions of Kentucky and Ohio as well.

As the country's 28th metropolitan market and the key distributing and shopping center for the entire state, Indianapolis is a vital consideration for the advertiser—who can reach out, over WIBC, into an area that covers 1,077,356 radio families.

Blair-represented WIBC has earned its position as one of the territory's outstanding stations through the excellence of its local programming. Virtually every personality featured by WIBC has become a long-time favorite with listeners, which is a tribute not only to their talents but also to this station's splendid music and production facilities.

As exclusive representatives of WIBC, John Blair & Company—along with an impressive list of important advertisers—have factual proof that the size of WIBC's audience is matched by its responsiveness. No matter what you have to sell, you can sell it at low cost over WIBC. Call your John Blair man today!

EASY GWYNN, whose "Easy Does It" and "Easy Listening" disc jockey programs are consistently first in Hooper D. J. surveys. His mail count has averaged 5,000 a month for the past eight years, and has gone as high as 2,500 a day in contests.

"Platter Party", a family type musical request program with **MILT LEWIS,** enjoys the second top local rating in opposition to three networks and TV.

POLITICAL TIME

Z Bar Net Adopts Policy

NEW policy designed to give candidates for major political office one free period each, with commercial facilities available at regular rates, has been adopted during the primary campaign by the XL stations in the Northwest and Z Bar Net, headed by Ed Craney.

Each candidate for governor, U. S. Senator, Congressman and secretary of state, within the station areas, will be given a 14½-minute time period to be taken from sustaining availabilities and used as a single unit. The time must be used by the candidate personally.

Candidates may use facilities further at regular commercial talk rates. "Any individual, group or organization in support of a legally qualified candidate" is qualified to buy time "provided the candidate provides the originating station of the Z Bar Net with a written statement that such individual, group or organization is authorized to speak on behalf of such candidate on each specific occasion," the Z Bar Net instructions specify. They continue:

"The Z Bar Net authorizes no group or individual to act in its behalf in arranging for broadcasts except the managers of its individual stations, who will clear the time, accept payment in advance for the broadcast, receive the signed letters of authorization to broadcast (in case of other speaking in behalf of a candidate), provide and receive the signed indemnity agreement and deliver the contract to party or organization purchasing such time."

Z Bar will sell time up to the normal closing time of the local station on election eve, with national network political broadcasts having priority over all others for time clearance. State broadcasts are second in priority, county third and city fourth. National network commercial programs will be cancelled when all sustaining time and local commercial time has been exhausted, it is explained. Announcements will be sold only on run-of-schedule basis.

In the instructions sent candidates by KXLY Spokane, Wash., the station insists that all talks by persons other than candidates be submitted 48 hours before broadcast time.

17 OUT OF 18 PREFER WDAY, FARGO!

"To what radio station does your family listen most?" As part of an independent survey made by students at North Dakota Agricultural College, this question was asked of 3,969 farm families in 22 prosperous counties within 90 miles of Fargo. 74.6% of the families named WDAY; 4.4% said Station "B", 2.3% Station "C", 2.1% Station "D", and so on.

WDAY was a 17-to-1 choice over the next station . . . a 3½-to-1 favorite over all other stations combined!

In Fargo's home county, WDAY was the first choice of 87.2% of the families, as against 5.8% for Station "B". *Here WDAY was a 15-to-1 choice over the next station . . . a 6½-to-1 favorite over all other stations combined!*

BMB figures, Hoopers and mail-order returns all tell the same amazing story on WDAY and the rich Red River Valley. *Get all the facts.* Write us direct, or ask Free & Peters!

NBC SESSIONS

Midwest Affiliates Meet

THIRTY NBC affiliated stations from the Midwest were represented at the second of the network's series of promotion, press and merchandising sessions on radio in Chicago last week. The network and its executives were hosts to more than 40 station men at meetings in the Palmer House Monday and Tuesday.

Harry C. Kopf, NBC vice president and general manager of WMAQ and WNBQ (TV) Chicago, presided at the meetings. On Monday, Fred Shawn, director of radio station relations, introduced Jacob A. Evans, manager of radio advertising and promotion; Gordon Mills, radio network sales manager, Chicago; Jack Ryan, Chicago press manager; William Ray, Chicago news and special events manager; Fred Dodge, director of merchandising; Clyde L. Clem, supervisor of audience promotion, and Hugh Beville Jr., director of plans and research. Luncheon entertainment was provided by Tommy Bartlett, *Welcome Travelers* personality, after which a slide film presentation of "Summer Radio—1952" was shown.

Tuesday discussions included speeches by Ludwig Simmel, manager of the network's co-op sales, and Mr. Clem, as well as general discussion on network and affiliate plans for sales promotion merchandising, publicity, news and research. Alex Drier, Chicago network commenator, spoke at the luncheon.

Those attending included:

Mel Kampe and Ed Maxwell, WMAY Springfield, Ill.; Clem Scerbaek, WTAM Cleveland; Milt Greenebaum, WSAM Saginaw, Mich.; Ray Pederson, WDAY Fargo; John Schweiker, WHO Des Moines; M. Wayland Fullington and Ward Glenn, WIRE Indianapolis; Jack Zinselmeier, Jack Frazier and F. G. Feinthel, WLW Cincinnati; John Alexander, KODY North Platte; N. V. Bakke and Bruce Wallace, WTMJ Milwaukee; Clifton Westin Jr., WOW Omaha; Richard Gourley, WSPD Toledo.

Joe Floyd and Larry Benston, KELO Sioux Falls; W. T. McClorin KVOO Tulsa; Leonard G. Anderson, WKBH La Crosse; David Hayle, WOOD Grand Rapids; J. R. McKinley, WTAC Flint; Ray Scales, WKY Oklahoma City; Carl Wyler, KTSM El Paso; Robert Nelson, WEAU Eau Claire, Wis.; Don Degroot and Edwin K. Wheeler, WWJ Detroit; David Pasternak, KSD St. Louis; Fred Reed, WOC Davenport; Alex Keese, WFAA Dallas.

Charles W. Hill, WAVE Louisville; Joe Cook, KSTP St. Paul; G. David Gentling, KROC Rochester; John Meagher, KYSM Mankato; Ken Gordon and "Red" McAleece, KDTH Dubuque; Joseph D. Mackin, WMAM Marinette, and Jess Hadsell, WOWO Ft. Wayne, Ind.

WHIM Business Up

WHIM Providence has celebrated its fifth birthday anniversary with the biggest cake in its history. General Manager Bob Engles reported that billings for the first quarter are up 30% over the same period last year. As part of the anniversary observance, WHIM sponsored a slogan contest, awarding $100 in cash and other prizes to listeners submitting slogans. The winning slogan: "WHIM — the listening post you tune to most."

Network Rate Cuts

(Continued from page 23)

network sources. Meanwhile, NBC officials maintained they were doing their best to protect the rate card.

Like CBS Radio's subscription to the new Standard Audit surveys, NBC has signed for the new A. C. Nielsen Co. Station Audience studies, also now in progress and slated for completion in late summer.

Meanwhile, one radio network and the owner of another figured in a sponsorship proposal which some affiliates estimated would be the equivalent of knocking off up to 45% of stations' card rates. The principals: NBC and General Tire & Rubber Co., controlling stockholder of Mutual.

As reported by Affiliates, NBC asked stations to clear time for General Tire sponsorship of a total of 2¼ hours spread over the days, the Affiliates to be paid on the basis of one hour of Class A time. The programs would consist of coverage of the National Open Golf Tournament on June 12, 13 and 14.

The plan was said to encompass the following time periods (EDT): Thursday, June 12, 8-8:15 p.m.; Friday, June 13, 8:30-8:45 p.m., and Saturday, June 14, 3-3:15, 4-4:15, 5-5:15, 6:30-6:45, and 7:30-8:15 p.m.

May 20-21 Meeting Topic

The overall rate situation is one of several subjects slated for the May 20-21 meeting of the Affiliates Committee to be held at the Ambassador Hotel in New York starting a luncheon May 20.

Chairman Morency said last week his group "views with regret" the "rather spasmodic and opportunistic approach" which it feels has been taken with respect to advertiser pressures for lowered time costs. At the same time, he said, "strong indications" that some or all networks may boost their daytime rates are heartening.

He contended that, even though advertisers want to buy for as reasonable a price as they can, they are even more concerned that their competitors do not get better buys than they. A great deal of pressure, he felt, would disappear if advertisers were assured that all were getting the same deal. Similarly, he thought, one agency would be less apt to try to lure accounts from others on the promise that "I can get it for you cheaper," thus again reducing the rate turmoil.

Representatives of both A. C. Nielsen Co. and Standard Audit are expected to appear—separately — to explain their respective measurement studies to the committee.

Another agenda item is selection of a successor to Leonard Kapner, who has asked to be relieved of committee membership because of the pressures of duties at WCAE Pittsburgh, of which he is president and general manager. Mr. Morency expressed regret at Mr. Kapner's withdrawal.

Mr. Morency himself has served notice of intention to retire as chairman as soon as the permanent committee structure, formally authorized at a meeting of all supporting member-stations during the NARTB convention six weeks ago, is completed. Much of this work may be done at the May 20-21 meeting, but efforts are afoot to continue him in office although he insists that he must be free to spend more time on WTIC managerial duties.

While the rate pot boiled, a spokesman for one advertiser which reportedly had renewed time on CBS Radio at a healthy discount—Campbell's Soups, for *Club 15*, 7:30-45 p.m. EDT Monday-Wednesday-Friday—denied late last week that the renewal had been made or that any cut in rates had been offered, and said that final decision on renewal would be disclosed to the network shortly before the deadline, which is May 21.

KTOK SALE

Would Sell to Tex. Group

CONTRACT for the sale of KTOK Oklahoma City by O. L. (Ted) Taylor to the newly formed Amarillo Broadcasting Co. for $225,000 was in process of preparation last week.

New firm, which recently acquired KFDA Amarillo for $240,000 from the Nunn interests, expects to have application for the transfer before the FCC within ten days. The KFDA transfer now is awaiting FCC approval [B•T, March 3].

Principals of Amarillo Broadcasting Co., which would acquire the stock of KTOK Inc. from Mr. Taylor, are C. C. Woodson, publisher of the *Brownwood* (Tex.) *Bulletin* and of other newspapers, who also holds oil interests; Wendell Mayes, president of KBWD Brownwood and KNOW Austin; Charles B. Jordan, vice president of Texas State Network and assistant general manager of KFJZ Fort Worth, and Gene Cagle, president of TSN.

A recent transaction, whereby KTOK would have been sold to the Kerr-McGee interests in Tulsa for $225,000, in a parlay also involving WEEK Peoria, controlled by Sen. Robert S. Kerr, was cancelled [B•T, April 28]. This paved the way for the disposition to the Texas group, subject to customary FCC approval.

Mr. Taylor, chairman of the O. L. Taylor Co., station representatives, in addition to KTOK, owns KANS Wichita and KRGV Weslaco.

Floating "Voice" to Pierce Iron Curtain

To parry jamming tactics and reach more remote areas, the Voice of America is adopting the novel technique of using a ship as a floating transmitter.

For this purpose a cargo ship has been converted at Bethlehem Steel's Hoboken, N. J., Shipyard into a floating radio station. This vessel, named the *Courier,* which is operated by the United States Coast Guard for the State Department's Voice of America, is equipped with both medium and short-wave transmitters. Its sending power is very great—greater than that of any standard radio station in the United States. Messages broadcast from the United States are picked up and relayed from the ship via a special antenna raised above the ship's deck by a captive barrage balloon.

The conversion work completed, the *Courier* left the Bethlehem Hoboken Yard in the early part of this year, ready and able to go anywhere in the world.

With the aid of this highly mobile, powerful station, broadcasts of the Voice of America are expected to get through to listeners in deep Iron Curtain territory hitherto sealed off from the outside world.

BMI CLINICS CONTINUE

Attendance 3,000

A BUSY last week saw 21 more BMI program clinics completed in the United States and Canada for a total of 38 through Saturday with attendance well above the 3,000 mark [B•T, May 5]. The clinics wind up this week with meetings in Alabama and Maine today (Monday), in St. John, New Brunswick on Wednesday and Toronto on Friday.

Last week's progress was reported as follows.

VANCOUVER, B. C., May 5

The Vancouver BMI clinic drew 156 broadcasters, with William Harold Moon, assistant general manager, BMI Canada Ltd., acting as chairman.

Dave Baylor, general manager, WJMO Cleveland, made the opening talk, with Maurice Finnerty, president, CKOK Penticton, B. C., discussing profits and service in single station communities.

William Holm, general manager, WLPO LaSalle, Ill., emphasized local news, and Harry McTigue, general manager, WINN Louisville, talked on "Music Is Our Business."

President F. H. Elphicke, British Columbia Assn. of Broadcasters, was chairman at the clinic luncheon, which was addressed by Carl Haverlin, BMI president. Other talks were made by Joseph G. Csida, editor-in-chief, *Billboard* magazine, and Mahlon Aldridge, general manager, KFRU Columbia, Mo.

ALEXANDRIA, La., May 5

Louis Read, commercial manager, WDSU-AM-FM-TV New Orleans, speaking of the importance of programs in account servicing, told Louisiana broadcasters: "Radio people everywhere are beginning to realize that in radio they have the nation's No. 1 mass-medium of communication" and "in most instances to do something about making changes wherever changes are indicated. . . . There will always be plenty of listeners available. It's up to us to give them the programs they want to hear. If we do this, and do it well, those all-important sales will follow. . . ."

BATTLE CREEK, Mich., BMI Clinic April 30 saw these three ironing out a clinic problem: Seated, Dan Jayne, general manager, WELL Battle Creek, president of Michigan Assn. of Broadcasters and president of the Committee of State Assns. of Broadcasters; standing, John McLaughlin (l), advertising manager, Kraft Foods Corp., and Sydney Kaye, BMI board vice chairman and general counsel.

* * *

WICHITA, May 5

Gene Trace, vice president and general manager, WBBW Youngstown, Ohio, addressing the Kansas broadcasters, said that what follows after the sale may make sales renewals possible.

"The program director should constantly be striving to build programs that are salable and he should let the commercial department know about it," he said.

"There must be the closest cooperation from every department," he said. "Successful radio stations are not in the habit of carrying deadwood." Mr. Trace also addressed the St. Louis, Des Moines and Chicago clinics during the week.

Al Marlin, BMI field representative, acted as chairman, and Ben Ludy, president, Kansas Assn. of Broadcasters and general manager, WIBW Topeka, presided. Other scheduled speakers included: Arden Booth, manager, KLMN Lawrence; Ed Yocum, general manager, KGHL Billings, Mont.; Bess M. Wyse, general manager, KWBW Hutchinson; Manuel Rosenberg, editor, *The Advertiser;* Bruce Behymer, farm editor, KFH Wichita, and D. Gordon Graham, assistant program director, WCBS New York.

MILWAUKEE, May 5-6

George T. Frechette, general manager, WFHR Wisconsin Rapids and managing director, Wisconsin Network, thought local news was the "key to greater audience and greater sales."

Mr. Frechette, who also spoke Wednesday at the Minneapolis clinic, told Wisconsin Broadcasters Assn. members that interviews with men and women of the Armed Forces "are the kind of programs local sponsors want and will buy." He also described his station's contests and programs, some offering prizes, and of a taped Christmas program recording holiday activities.

Ben Laird, WBA president and general manager, WDUZ Green Bay, presided. Burt Squire, BMI field representative, was chairman. Other speakers were Milt Slater, production manager, WNEW New York; W. Robert Rich, program director, WBEN Buffalo; Emerson Smith, program manager, KDYL Salt Lake City; Gus Haganah, vice president, Standard Radio Inc.; James Hanlon, public service broadcasts director, WGN Chicago, and Harold Safford, program manager, WLS Chicago.

ST. LOUIS, May 6

Joseph Slattery, assistant program director, KWTO Springfield, Mo., told Missouri broadcasters they should make special efforts to reach rural audiences.

He advised "building your shows around a personality and giving him honest products to advertise." He also advised encouraging visitors, personal contacts and service

Your Best Customer

(Continued from page 29)

showed the average proportion of rural families who planned to buy is practically the same as city families, 6.1% and 6%, respectively.

Percentage wise, the rural intention to buy was highest on these products:

Product	Rural	Urban
Home freezer	10.2%	4.3%
Refrigerator	8.5%	6.5%
Electric range	5.7%	4.0%

That, broadly, is the farmer, your biggest prospective customer. You've seen how prosperous he is—how high his income is. His purchases are up, his savings are amazingly high, his supply of ready cash is higher than that of any other segment of our population.

It is true the farmer is difficult to reach but the most effective and economical way of reaching him is through radio.

Don Lee's
Radio audiences
are climbing, too
12-month average - 1951 vs. 1949*
Daytime audience 8.9% higher
Evening audience 11.2% higher
...and network rates are currently
LOWER than they were in 1949!
*Pacific Nielsen Ratings, Full network average audience, Monday thru Friday.

DON LEE GIVES THE MOST COMPLETE, CONSISTENT, LOCAL COVERAGE OF THE PACIFIC COAST AT THE LOWEST COST PER SALES IMPRESSION OF ANY SALES MEDIUM

On the Pacific Coast, over 14 million people are distributed throughout 323,866 square miles. It takes a *big* advertising medium to cover it. Only Don Lee is big enough to sell your customer *locally* in 45 important markets from their own *local* network station. Only Don Lee has the flexibility to match *your* distribution. No waste! You buy what you need, where you need it.

That's why Don Lee consistently carries more Pacific Coast regional business (with more regional shows in the top 10) than any other network. The advertisers who know the Pacific Coast best also know the best Pacific Coast sales medium ...Don Lee.

MBS ADDS SIX

Affiliates Number 554

SIGNING of six new affiliates by Mutual, bringing the network total to 554 stations, was announced last week by Earl M. Johnson, vice president of station relations and engineering.

The six were:

WJPG Green Bay, Wis. (1440 kc, 00 w day, 1 kw night), licensed to reen Bay Newspaper Co. and headed y A. B. Turnbull, president.

WDBQ Dubuque, Iowa (1490 kc, 50 w), licensed to Dubuque Broadsting Co., with James D. Carpenter xecutive vice president and general anager.

WYVE Wytheville, Va. (1280 kc, kw, day), licensed to Wythe County roadcasting Co., with Arthur M. ates Jr. as general manager.

KVOZ Laredo, Tex. (1490 kc, 250), licensed to Uvalde Broadcasters, th W. J. Harpole as manager.

WJCM Sebring, Fla. (1340 kc, 250), licensed to Highlands Broadcastg Co., under the presidency of enry L. Jollay.

WPKY Princeton, Ky. (1580 kc, 250 , day), licensed to Princeton Broadsting Co., with Leslie Goodaker as wner and general manager.

ETAIL AD RISE

Seen in NRDGA Survey

RISE in retail advertising udgets was indicated last week in survey by the National Retail ry Goods Assn.

Responding to a survey of "more han 60 outstanding merchants rom 55 different cities and 34 tates," according to NRGDA, 41% aid they planned to increase adertising budgets this year, while 4% reported they would spend he same amount as last year and 0% indicated their appropriations ill be less than in 1951.

The question on advertising plans as one of a large number on which he stores were surveyed by RDGA.

xpensive Haircut

TWENTY years ago, shortly after arriving in Cleveland to start WGAR, John F. Patt, now WGAR president, went into a barbershop for a haircut. The barber, Al Klein, was a Detroit Tigers rooter. Mr. Patt, with his newly-found civic pride, bet Mr. Klein that the Cleveland Indians would finish ahead of the Tigers in the American League pennant race. If Mr. Patt won, he would receive a haircut, shave, shoeshine and manicure, all personally administered by Mr. Klein. If, however, Mr. Klein won, he was to be given 15 minutes of WGAR time to predict baseball happenings. Every Cleveland opening day since, Mr. Patt has relinquished the 9:30-9:45 a.m. segment to the barbershop prognosticator, Mr. Klein.

A REPORT ON RFE . . .

Europeans Learning the Truth—Withycomb

RADIO Free Europe's operation in Munich is a perfect example of international cooperation, Donald Withycomb told BROADCASTING • TELECASTING last week on his return to New York after a year's service as studio manager of the RFE Munich plant.

Studio and transmitter personnel are almost entirely German, Mr. Withycomb said. The top supervisory and departmental heads are Americans. Producers, writers, announcers and other program staff are mostly refugees from the Iron Curtain countries. "At times the atmosphere resembles the Tower of Babel," he said, "but still the show goes on—from 5 a.m. to 1:15 a.m. daily."

Commenting on the RFE operation, Mr. Withycomb said that he felt privileged to have had a year's participation in "a unique type of anti-communist radio program service directed to the Iron Curtain countries. Through the use of high power medium wave, short wave and relay transmitters beamed toward the east from locations in Germany and Portugal, those who have receiving sets in Hungary, Poland, Czechoslovakia, Roumania and other countries can learn the truth not only about what is actually happening in their own localities which have been trampled under foot by the communists and their native quislings, but through the careful production of hundreds of hours each week of programs transmitted in their native tongues, these people are told what the Western World is doing to help their cause."

Asked about the balloonscasting which was inaugurated last summer, Mr. Withycomb expressed the opinion that this method of reaching a very wide group of people in the eastern countries is about as effective a counter propaganda weapon as can be devised at this time.

"I hope that this endeavor will be reactivated on a considerably larger scale," he said. "It is one type of operation the communists cannot jam."

Mr. Withycomb is planning to reenter the TV consulting field, in which he was active as consultant to Meredith Publishing Co., owner of WHEN (TV) Syracuse, before joining RFE. He is establishing headquarters at 150 East 39th St., New York.

FCC DISPROVES RUMOR

Spread by Newspapers

ALARMING implications publicized by San Francisco newspapers when an FCC radio engineer quit two weeks ago leaving "all of Northern California and Nevada uncovered" were largely disproved by the FCC last week.

Resignation of Frank T. Roach as a radio engineer in the San Francisco field office inspired a front page news story that was headlined: "Lone FCC Man Gives Up—Dangers of Illegal Radio Interference Here Told." The story quoted Roach as saying he was unable to do his work properly because of the lack of funds.

Although Mr. Roach was mainly responsible for investigating complaints—interference as well as illegal transmissions — the FCC pointed out that he was not the only engineer engaged in that work. Nor was he the only one in the San Francisco field office, it was emphasized.

Mr. Roach was reported in newspaper stories to have said that he received 60 to 80 complaints a month from airlines, military, TV set owners, etc., and that he had more than 200 unanswered complaints on his desk when he quit.

BUY MYSTERY SHOWS

Michelson Announces Sales

CHARLES MICHELSON Inc., New York, producers of radio and television transcriptions, announced last week the signing of five more stations for across-the-board mystery programming: WSYR Syracuse, WTOP Washington, WCMB Lemoyne, Pa., WHB Kansas City, Kan. and KLKC Parsons, Kan.

Michelson, which started sales of half-hour transcribed mysteries in blocks about eight months ago, reported its packages now cover 83 markets and summer sales total an all-time high for the company, $105,000.

Morehouse Apppointed

P. B. MOREHOUSE, chief of Trade Practice Conferences Division, Federal Trade Commission, has been appointed assistant general counsel in charge of compliance for the commission, succeeding Joseph S. Wright, who resigned. Trade practice division, which promulgates rules for various industries (including radio-TV), will be headed by Allen C. Phelps, FTC Chairman James M. Mead announced Monday. Mr. Phelps was moved from the Export Trade Division of which he was chief.

TENTATIVELY titled *Ask Dr. Gallup*, a transcribed pre-election program featuring the pollster with political news, trends and analyses, has been signed as a six-time weekly 7:05-7:10 a.m. feature on WCBS New York. The 26-week series, produced by George F. Foley who handled Dr. Gallup's '48 election programs on TV, is scheduled to start today (Monday). The daily 5-minute transcription has also been purchased for 26 by WTOP Washington and WCAU Philadelphia.

IBA-UI CLINIC

Free Radio News Urged

BREAKDOWN of barriers against access to government news was urged by Fred Siebert, director of the U. of Illinois School of Journalism, at a clinic attended by 50 Illinois radio news directors May 1-2 at Urbana.

Mr. Siebert, addressing the clinic sponsored by the journalism school and the Illinois Broadcasters Assn., said radio newsmen should work with groups such as the American Society of Newspaper Editors in focusing attention on public officials.

Bill Ray, manager and news director of NBC's WMAQ Chicago, outlined work of the National Assn. of Radio News Directors nationally and NBC in Chicago in opening the doors to government news, and Glen Farrington, news director of WTAX Springfield, described his campaign for more news from the Illinois legislature.

Mr. Siebert suggested setting up a weekly radio-press conference with the governor and individual legislators, which he said could lead to an official tape recording of all legislative proceedings to be made available to newsmen.

Other participants in problems at the clinic included: Ray Livesay, past president of IBA and manager of WLBH Mattoon; Robert Eickmeyer, news director, WTAD Quincy; Bert DeBarr, program and news director, WVLN Olney; Wick Evans, news director, WDZ Decatur; Don Brown, assistant U. of Illinois professor of journalism; Fred Hinshaw, news director, WLBC Muncie, Ind.; Laverne Waltman, news director, WLPO LaSalle; Glen Broughman, WQUA Moline; Jack Shelley, news director, WHO Des Moines, Iowa; Brooks Watson, news director, WMBD Peoria; Prof. Quincy Howe, formerly with CBS and now news analyst for WILL Urbana, U. of Illinois station, and Herschel Schooley, representative of the Office of Public Information, Dept. of Defense, Washington.

Small Newsroom Operations

Speaking on profitable practices for small newsrooms, Mr. Hinshaw stressed working with station time salesmen and sponsors and competent coverage of local news; Mr. Waltman suggested use of correspondents similar to those of a newspaper in getting news from outside a city; Mr. Broughman said the "beep" recorder should be used for maximum interest.

Prof. Brown pointed out the value of news written in readable style and with "flow," yet having individuality. Mr. Shelley said newsmen were not exploiting weather news, which he said means dollars and cents both to the station and the listener.

Prof. Howe spoke on current issues and best political coverage of news. Mr. Watson described WMBD's election results coverage.

NBC Chime-Play

IT RINGS the bell. That's the idea of NBC radio in using special theme, composed by Meredith Willson and based on the network's chimes, to symbolize broadcasts by name dance bands. Ringing in of the chime theme, to be used for opening of every NBC radio remote dance-program, was slated for the network at 12:05 a.m. EDT Saturday with broadcast of Woody Herman's orchestra from New York's Statler Hotel.

HOLLENDER NAMED

To 'Ike' Radio-TV Post

ALFRED L. HOLLENDER, executive vice president and partner of Louis G. Cowan Inc., New York producers of radio-TV packages, has been named director of radio and television activities by Citizens for Eisenhower, S.S. Larmon of Young & Rubicam, vice chairman of the national group's public relations committee, announced last week.

Mr. Hollender

Mr. Hollender's position will require his supervision of radio-TV coverage of the Abilene, Kans., speech to be made by the general June 4, production of future network shows for the candidate, preliminary planning for summertime convention coverage, and preparation of special material for use in various states, it was pointed out.

Formerly associated with WIND and WJJD Chicago, Mr. Hollender, during the war, was chief of the OWI Radio Outpost Division and, overseas, a member of Gen. Eisenhower's Supreme Headquarters staff with the Psychological Warfare Division. He later was chief of radio and communications for the American zone of Germany.

Thomson Elected

ROY H. THOMSON, owner of CKGB Timmins, CJKL Kirkland Lake, and CFCH North Bay, all Ont., as well as a string of 14 Canadian and one United States dailies, was elected president of Canadian Press at Toronto April 30. Victor Sifton, *Winnipeg Free Press* (CKRC Winnipeg), was elected honorary president. New directors of Canadian Press, whose newspapers have radio station affiliates include D. B. Rogers, Regina *Leader-Post* (CKCK Regina); Arthur R. Ford, London *Free Press* (CFPL London); Arthur L. Davies, Kingston *Whig-Standard* (CKWS Kingston); Herve Major, Montreal *La Presse* (CJAC Montreal), and T. F. Drummie, St. John *Telegraph-Journal* (CHSJ St. John).

TRUSCON ... a name you can build on

there's

conflict

in the conference room when a list is being checked!

The media buyers are on the spot. They've made up their list. They've dug up information, talked to space and time representatives, boned up on all the facts . . .

Now they've got to SELL their selections to the toughest buyers of them all—the account executives and top men in the agency. . .

That's why they take Standard Rate and CONSUMER MARKETS right into the conference room!

The questions come thick and fast—

"Are you sure this paper leads in grocery linage?"

"What proportion of this TV audience is *young marrieds?*"

"Which dealer paper has run the most articles on clerk training?"

"Are per-capita drug sales higher in Boston than in Baltimore?"

"Don't *all* farm papers have Women's Sections?"

No time now to dig for that market analysis; to study voluminous material. The facts that count now are those the media men can *remember*, *for sure*, and those they can lay their hands on, *fast*.

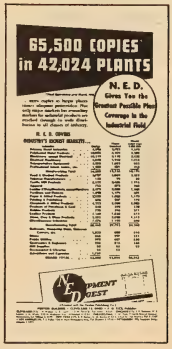
There they have at hand quick sources of reliable information . . . facts assembled and organized by the experienced staffs of Standard Rate & Data and CONSUMER MARKETS.

The Los Angeles trading area? Industrial wages in Illinois? A map of Denver? Drug sales in Baltimore? They flip the pages of CONSUMER MARKETS; come up with accurate answers.

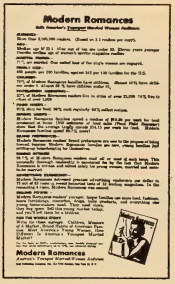
Circulation? Rates? Occupational breakdowns of business publications? They turn to the monthly SRDS books; scan the *standard listings.*

But some questions cannot be answered by *standard listings!*

"Which newspaper has the better out-of-city circulation?"



"How does this station promote its programs?"



"What business paper leads in the top 25,000 plants?"

"What is the trend in magazines for men?"

These are not standard questions. They demand not just facts, but analyses of facts. And this is where Service-Ads in Standard Rate and in CONSUMER MARKETS come to the rescue. For this is the kind of information that approximately 1,050 publishers and station managers put into the space they took next to their SRDS listings last year; next to their market data in CONSUMER MARKETS.

Service-Ads not only help busy media buyers BUY . . . they help them SELL!

KGW SALES PLAN
Brings Results in Portland

LOCAL merchandising plan by KGW Portland, Ore., featuring 13 city communities in a 26-week promotion campaign, has increased its national and local advertising despite the advent of television, the station reports.

The NBC affiliate's plan, which spotlights KGW-advertised national brand products with local grocers and has been used already in five communities, has resulted in additional support from business firms and listeners, with the station receiving requests for participation from grocers not included in the program to date, according to KGW officials.

Spot announcements tell of the various shopping centers featuring KGW-advertised brands, integrated with a KGW "banner store" idea, with much of the distribution of banners and store material by community booster organizations of businessmen. Competing grocers in the same area band together on "KGW Days" to promote the overall "banner" theme, the station reports, and new friends among listeners and in business circles have been added.

Kellert Plans Agency

RESIGNATION as sales manager of WOKO Albany, N. Y., after 15 years has been announced by Al Kellert, who will open an advertising agency to handle radio, television and newspaper advertising, merchandising, promotion and sales. Other posts held by Mr. Kellert during 25 years in the advertising field were as sales manager of WABY Albany and as display advertising staff member of *Knickerbocker News* and *Times-Union*, both Albany newspapers.

ABS BUSINESS
Six Sign Contracts

ALASKA RADIO SALES, New York, representing the six-station Alaska Broadcasting System, has reported expanding network business activity for 1952. Increased schedules, renewals, and new business for ABS were broken down as follows:

Anheuser-Busch Inc., through D'Arcy Adv., both St. Louis, has increased its spot schedule.

Hills Bros. Coffee Inc. through N. W. Ayer & Son, N. Y., Brewing Corp. of America through Benton & Bowles, N. Y., and Avoset Co. through Harrington-Richards div., Los Angeles, have all renewed spot radio schedules with ABS.

New contracts have been signed by Blatz Brewing Co., Milwaukee, through Kastor, Farrell, Chesley & Clifford, N. Y. and Philip Morris & Co., through Biow Co., N. Y., has signed for live weekend baseball games. J. A. Folger & Co. (Folger's coffee), through Raymond R. Morgan Co., both San Francisco, has placed a spot schedule with ABS. Latter was obtained by Duncan A. Scott & Co., West Coast representatives of network.

Radio Still Dominates
THIS RICH MARKET

Radio delivers MORE sets-in-use in the South Bend market than before TV! . . . Hooper Serveys for Oct.-Nov. 1951 compared with Oct.-Nov. 1945 prove it. Morning up 6.8, afternoon up 8.0 and evening up 4.4. Television is still insignificant here because no consistently satisfactory TV signal reaches South Bend. Don't sell this rich market *short*. Wrap it up with WSBT radio.

NBC COURSES
Set by Barnard College

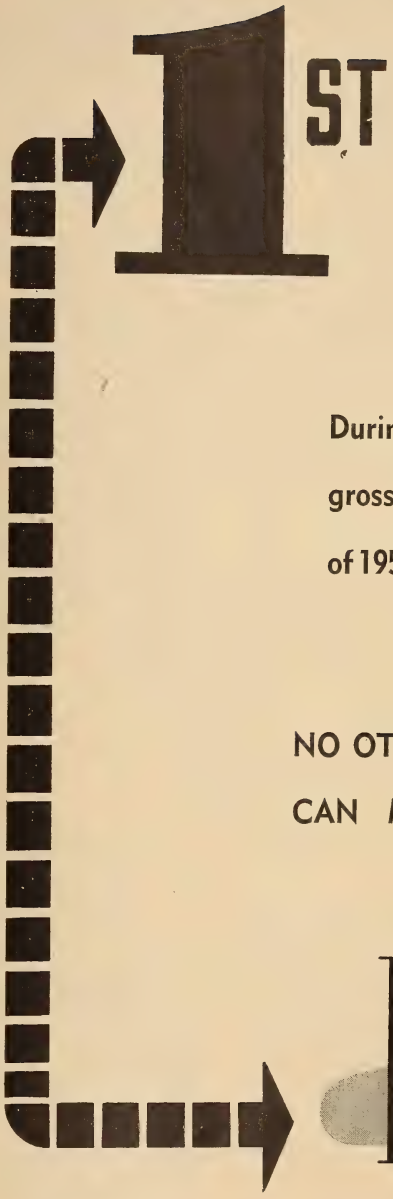
BARNARD College, New York, will offer four professional courses as part of its six-week Summer Institute of Radio and Television, with classes to be taught in NBC studios by NBC staff members, it was announced last week.

To start June 30, the classes are intended for educators who want to incorporate radio-TV techniques in their own classes as well as for graduates preparing to enter the broadcasting field. Tuition fee for the Institute, which started last year, is $140.

Network instructors and their subjects are: Mrs. Doris Corwith, supervisor of public affairs, NBC Radio, who will teach an introductory course, surveying the entire industry and its operation; Patrick J. Kelly, supervisor of announcers, who will teach speech and microphone techniques, with NBC announcers conducting discussion periods; William Hodapp, producer of the NBC-TV series, *American Inventory*, who will direct production and programming classes, and Ross Donaldson, NBC supervisor of literary rights, who will instruct a writing workshop course.

LAB ELECTS
Wilson of KPLC Named V. P.

DAVID A. WILSON, general manager of KPLC Lake Charles, La., has been elected vice president of the Louisiana Assn. of Broadcasters, succeeding J. C. Liner, KMLB Monroe, who died two months ago [B•T, March 17].



Mr. Wilson was named to fill his unexpired term at a dinner meeting of the association in Alexandria's Bentley Hotel May 4. A BMI clinic followed the meeting on Monday, according to B. Hillman Bailey Jr., LAB secretary-treasurer.

Arkansas Broadcasters

ARKANSAS Broadcasters Assn. will hold its regular late-summer meeting Aug. 25 in Little Rock. In conjunction, the ABA will hold its second annual sales clinic Aug. 24.

Tannen Fame

ERNIE TANNEN, program director, WGAY Silver Spring, Md., personifies "opportunity" to one English journalist, whose impressions of the U. S. are currently running in the *Manchester Guardian*. John Aldrich, whose series "American Journey", is currently appearing, tells of Mr. Tannen's discharge from the army in 1948 and his ambition to own part of WGAY or another similar station in the U. S. before he is 40.

RADIO CIGARETTE ADS

Certain Legislators Question Claims

SOME Congressmen have turned raised eyebrows toward cigarette advertising on the radio and have asked the Federal Trade Commission what it is doing to curb certain claims.

This was pointed up in testimony before a House Appropriations subcommittee studying FTC's 1953 budget. The commission has requested $1,042,025 to staff its Bureau of Antideceptive Practices, to which false and misleading radio, TV and other media advertising are referred.

Subcommittee Chairman Albert Thomas (D-Tex.) put it this way to FTC Comr. Stephen J. Spingarn:

"I listened to the radio last night for awhile, and every time I turned it on there were the cigarette advertising people, and of all the wild advertising that was ever on radio, theirs is the worst. Just what does the commission do about that?"

Comr. Spingarn said FTC has issued orders in cigarette ad cases against a number of firms.

Richard P. Whiteley, director of FTC Bureau of Antideceptive Practices, estimated that the four major cigarette firms had cost the agency $10,000 or $20,000 each to process their cases.

Of the companies mentioned, P. Lorillard came in for a verbal bouquet from Comr. Spingarn: ". . . Take Old Gold. We have an order against them. (Their advertising) is pretty clean. They say, 'We are tobacco men, not medicine men; smoke Old Gold for a treat instead of a treatment.' . . . They rib this medical advertising of their competitors, which I think is rather clever." Chairman Thomas readily agreed.

Explaining that FTC has limited power to stop objectionable claims, the commissioner felt that it has "stopped them from making a good many false representations. . . . We have accomplished a great deal in cleaning up much of that advertising."

FAB SPEAKERS

Announced by S. O. Ward

SPEAKERS for the Florida Assn. of Broadcasters meeting scheduled for May 22-23 at the Royal York Hotel, Miami Beach [B•T, April 7] were announced last week by President S. O. Ward, WLAK Lakeland.

Maurice B. Mitchell, president of Associated Program Service, will address the group at an afternoon session May 22. On May 23, Gov. Fuller Warren will speak at the morning meeting. F. S. Holiday, FCC engineer, will outline Conelrad Thursday afternoon. Friday morning, Bill Stubblefield, NARTB, will speak on "Proposed Legislation Affecting Broadcasters."

Program chairman for the meeting, when new officers and two new directors will be elected, is George Thorpe, WVCG Coral Gables.

AAW AWARDS

Scheduled in June

FIFTH annual Advertising Assn. of the West competition for best radio commercial programs and spot announcements produced in the 11 Western states and Western Canada is now open with final judging set for early June. Distribution of awards will be made at 49th annual AAW convention in Seattle June 22-26.

Southern California Broadcasters Assn. is handling coordination of the contest in cooperation with AAW. Competition is open to all radio stations, advertising agencies, advertisers and individuals in the western area.

Four certificates will be given for top programs and announcements. Best of four will receive a perpetual trophy awarded by Vancouver Advertising and Sales Bureau. Chairman of judging committee is C. Burt Oliver, vice president of Foote, Cone & Belding, Hollywood.

Entry blanks and rules are available from Western advertising clubs, AAW or Norman Nelson, managing director, SCBA, Hollywood.

WICC, WTIC FORM

Two-Station Conn. Network

FORMATION of a new two-station radio network in Connecticut has been announced by Philip Merryman, president and general manager of WICC Bridgeport, owned and operated by Bridgeport Broadcasting Co. To be known as Connecticut Quality Network Group, the network will comprise WICC and WTIC Hartford.

Mr. Merryman said services will be sold in combination to offer statewide coverage of the national political campaign, and that additional stations may be added to the network upon request.

West German Show

GERMAN Radio and Television Exhibition will be held Aug. 22-31 in Duesseldorf after a pause of two years, with all West Germany and West Berlin manufacturers showing new designs in wireless and TV sets, radiogram attachments, phonograph records and accessories and spare parts, according to the German-American Trade Promotion Office, New York.

PORTLAND POINTERS

★ PORTLAND'S wholesale trading area is among the largest geographic trading areas in the nation…covering all of Oregon, much of Washington, and parts of California.

★ PORTLAND'S 1951 wholesale sales of $1,425,289,000 are almost double the city retail sales.

★ …yet Portland has the highest total retail sales per capita of any city on the Pacific Coast.

★ PORTLAND is a city of wide diversification in industry. Only 68 firms employ more than 500 people. 16,000 firms employ less than 500.

★ Home ownership in PORTLAND is the HIGHEST IN THE NATION! (64% of all householders own their own homes.) (U. S. Census)

★ OREGON employment is diversified and stable. Of non-agricultural employees Oregon claims 454,400 workers: (Manufacturing and lumbering 145,000; Trade 105,000; Government 66,000; Transportation and Public Utilities 48,000; Service business 47,000; Construction 26,000; Finance 15,000; others 2,000.)

★ PORTLAND City Government rates the lowest per capita tax levy for operation of any large city in the nation. Portland $29.30.

★ OREGON leads the nation in average weekly earnings of production workers. (Examples — Oregon $76.10; Washington $72.52; California $72.84; Pennsylvania $64.64.)

★ With but slight increase in rate OREGON State Income Tax collections have more than doubled in the past 5 years: $25 million 1946—$59 million 1951.

★ Per capita state debt in OREGON is among the lowest in the nation—$5.85.

★ Farm income is higher on the Pacific Coast than any other area in the nation. $9,483 average for 1950—or $3,644 MORE than the national average of $5,839. Farm land values have increased 13.2% in the year 1950-51.

★ Over 750,000 people visit the Vacation Lands of Oregon every summer…spending over $115,000,000. (Oregon's 3rd largest industry.)

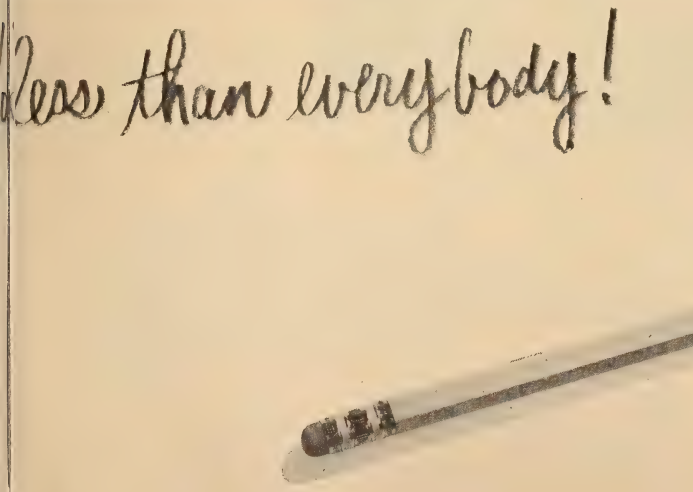
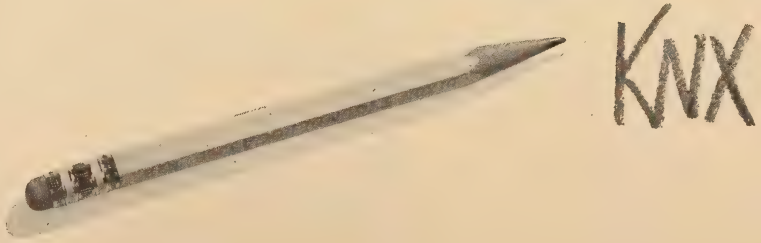
In Los Angeles, Radio reaches just 1%



Official tally: 99% of all homes in metropolitan Los Angeles are radio homes. Only *radio* can give you saturation coverage of all the multiple suburbs of this far-flung metropolis.



Los Angeles is spread-out, decentralized, composed more and more of suburbs and other incorporated cities. And it keeps growing fast (population increase past 10 years: 49%). So fast that it's now the *largest* city in the country in land area and the nation's *third-largest* market in population and retail sales.

Of all media, only *radio* has kept pace with the growth of Los Angeles. And of all stations, KNX is by far the most listened-to in Los Angeles, winning virtually twice as many quarter-hour firsts as all other Los Angeles stations combined. (Just as impressive: KNX reaches more than twice as many families as the top Los Angeles newspaper!)*

You can count on big sales in big Los Angeles when you use 50,000 watt KNX. Just check with KNX or CBS Radio Spot Sales.

GATHINGS' VIEWS

Given in Radio Interview

WHAT are Rep. E. C. Gathings' (D-Ark.) views on his proposed investigation and study of radio and television programs?

A documented answer is supplied by the radio script of a program on which Rep. Gathings appeared as guest. The program, *Crusade Against Crime*, uses a news format. It is a 30-minute show with half the time devoted to an interview. Julius N. Cahn, who also is executive secretary to Sen. Alexander Wiley (R-Wis.), is commentator. The show, produced on tape in Washington, is a sustainer on about a dozen stations which pay a nominal cost for production.

Stations which carry *Crusade* are WOOK and WFAN (FM) Washington; WINX Rockville, Md.; WSID Baltimore; WARK Hagerstown, Md.; WANT Richmond, Va.; WISC Madison; WEAW Eau Claire; WJMC Rice Lake, Wis.; WEBC Duluth; WMFG Hibbing, Minn., and WCAR Pontiac, Mich.

Mr. Cahn's interview of Rep. Gathings was conducted prior to House Rules Committee approval of his resolution (HR 278) to direct and authorize the House Interstate & Foreign Commerce Committee to study and investigate radio and television programs [B•T, May 5].

It is expected that the resolution will soon pass the House and the committee will map its line of action.

In order to give a cohesive presentation of the Gathings opinion, BROADCASTING • TELECASTING herewith prints under arbitrary headings, Mr. Gathings quotes taken from transcript:

[*Children and TV Shows*]

". . . When you get an objectionable program on television it is very difficult to get the child to leave the TV set, and it is very difficult to turn over to another channel. You meet with objections immediately . . . we should be awfully careful of the type programs put on the air between the hours of five in the afternoon and eight or nine at night, especially. So many of these programs during those hours ought not to be aired. That is the time the children do watch the television sets."

[*The Advertiser*]

". . . That's what they are trying to do. [In answer to query: "How would you answer the industry when it says 'we only give the people what they themselves want?' "] And that's what these programs intended. So many of these advertisers are using these programs because they do get more listening audience."

[*NARTB Radio & TV Codes*]

"Well, it is working in a way. But it is not going far enough. It's voluntary in nature, and many of these broadcasters are complying with the provisions of this particular code. While I feel that quite a lot has been accomplished, more is needed to be accomplished. This code was adopted and put into effect I believe originally back in the middle of 1948 [sic], and it has had a very fine effect on the programs I have noticed since that time. But at the same time, there are many objectionable programs . . ."

[*On Federal Censorship*]

Mr. Cahn asked: "You don't have in mind that there would be a system of federal censorship, for example, of programs?"

(Mr. Gathings) "No, it is not my idea that we should set up a separate department in the federal government. I believe that quite a lot can be accomplished by uncovering the different types of programs that are objectionable, and which should be corrected."

[*On Surveys of Program Types*]

". . . This one was taken in New York City of various television channels. It shows that 3% of all the time which was allotted was informational in nature. Of the total time over television, 3% was for information, 10% went for crime, 6% for westerns, fine arts nothing, education nothing—no percent. Here are 14% variety, 10% sports, 10% home-making, children's programs 12%. But the '10% crime program' was what I was referring to. And only 3% is for actual information and educational purposes."

[*On Congressional Investigations*]

"Well investigating is a good sign. For my money, I say that the people in America are aroused—they want something really accomplished and these investigations have meant an awful lot. The various types . . . that Congress has put on have been effective and have done a great work. . . ."

[*Steps Hearing Should Take*]

". . . it would be up to the Interstate & Foreign Commerce Committee . . . I feel that all phases of the problem should be looked into . . . the industry should come in and tell just what has been done . . . they should also give us a log of the various types of programs from the time they go on the air right on throughout the day.

"I think that groups which are interested—various types of groups—religious groups, parent-teacher groups—should be heard, and the various surveys that have been made should be put into the record.

[*On the Committee's Report*]

". . . it is expected that a recess of both houses of Congress will be taken during the early part of July. So, if this resolution is passed by the House soon after the Easter recess—next week or the week after next—there will be enough time for 60 days of hearings. We would have to make a report, however, before the conclusion of the present 82d Congress.

New Buying Cycle in Kansas

Wheat isn't the only cash crop of Kansas farmers. Waiting for sale on their farms are cattle valued at $742,311,000.00.* Along with oil, poultry, hogs, eggs, and dairy products, beef is just one of many sources of diversified, year-round income that WIBW listeners consider "spendable."

The surest, fastest way for you to get an above-average share of this steady flow of dollars is to use WIBW. Because we're THE FARM Station for Kansas and adjoining states, we have the full confidence of farm families . . . a confidence that's proved by RESULTS FOR WIBW ADVERTISERS.

YOU MIGHT GET A SIX-FOOT MOUNTAIN LION*—

BUT . . .

YOU NEED THE FETZER STATIONS TO BAG WESTERN MICHIGAN!

WKZO-WJEF in radio, WKZO-TV in television—that's the record-breaking Fetzer line-up for Western Michigan advertising. Here's why:

WKZO-WJEF RADIO

WKZO, Kalamazoo, and WJEF, Grand Rapids, give closest "home-town" coverage of urban and rural Western Michigan. Each is consistently the *listenership leader* in its home city—and the 1949 BMB Report credits WKZO-WJEF with a 46.7% increase over 1946 in their unduplicated daytime rural audience—a 52.9% nighttime increase. *Yet WKZO-WJEF cost 20% less than the next-best two-station choice in Kalamazoo and Grand Rapids!*

WKZO-TV

WKZO-TV is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. Its brilliant Channel-3 picture also provides intensive primary service to Battle Creek and dozens of smaller towns—effectively serves a 28-county market with a Net Effective Buying Income of more than 2 billion dollars. *An April, 1952 Videodex Diary Study by Jay & Graham Research Corporation proves that WKZO-TV delivers 91.9% more television homes than Western Michigan's other TV station!*

What other facts would you like? Your Avery-Knodel man has them.

** J. R. Patterson killed a 276-pound mountain lion at Hillside, Arizona, in March, 1917.*

WJEF *top* IN GRAND RAPIDS AND KENT COUNTY (CBS RADIO)

WKZO-TV *top* IN WESTERN MICHIGAN AND NORTHERN INDIANA

WKZO *top* IN KALAMAZOO AND GREATER WESTERN MICHIGAN (CBS RADIO)

editorial

Cops and Robbers Congress

SOME DAY (and it can't come too soon) some aroused member of Congress is going to offer a resolution to investigate the Congressional investigators.

Congress, evidently bent upon outdoing the "whodunits", is playing cops and robbers. Legislators are not content to have standing committees undertake inquiries; they want "select" committees, with special appropriations, subpoena power, television pickups and all. Inner councils call this the "Kefauver Influence."

The function of Congress is to legislate. Congress wasn't conceived as a super detective agency. The ever-increasing trend toward "special" inquisitions is making a mockery of the legislative processes. Clear-headed legislators recognize this. Standing committees are relegated to secondary, routine stature. Regular work is impeded as the "select" committeemen hunt the limelight and the headlines.

There isn't a shred of evidence that these "select" committee inquisitions, with every chairman a Sherlock Holmes, needled by a dozen Watsons (on the public payroll), contribute an iota toward the legislative process.

Within the last fortnight, three cloak and dagger inquiries have been authorized in the House. There's the Gathings Resolution (H Res 278) to investigate radio and television programs, originally headed for a "select" committee. Happily it was diverted to the standing Interstate & Foreign Commerce Committee. The other half of this resolution—covering immoral books—goes to a "select" committee. Then there's the Cox Resolution (H Res 561) for a "select" committee to study tax exempt foundations and organizations.

What warranty has Congress to establish empirical standards for radio and television programming? Or for books, or movies or newspapers or individual citizens?

The First Amendment precludes censorship. The Bill of Rights guarantees freedom of speech, of religion, of press, of assembly. Our forefathers revolted against the British Crown in 1776 because of restrictions on freedom.

Congress cannot write a law defining good or bad programming. The responsibility for regulation of radio was delegated to an expert agency, with an express prohibition against censorship. The FCC can (and all too often does) look at programming in appraising license renewals.

Rep. Eugene E. Cox (D-Ga.), arch-foe of the FCC, won his fight to have a select committee investigate tax-free foundations. It may be appropriate to determine whether foundations are resorting to devious and clever ways of avoiding taxes, but does a "select" committee have to do it? What about the standing committees dealing with revenue? Cannot the FBI determine whether there's Communistic infiltration of these foundations?

Once a "select" committee starts, there's no stopping it. The Cox Committee, in its investigation of "foundations" would soon find reason to dip into other "non-profit" organizations. In this category are labor unions (the biggest business in America today), trade associations, political organizations and educational institutions.

It is hard to fathom what motivates our legislators in their zeal to curb the freedoms they are sworn to keep inviolate. The movies were the first on the freedom firing line. Two cases now in the Supreme Court might well prove the bellwethers in the inevitable crusade to clarify and restore the guarantees of the Bill of Rights. Radio, as a "licensed" medium, has navigated in hot water almost from the day it became an influence in moulding public opinion. Now television, with its king-making power (witness Kefauver) accentuates the Congressional drive to get into the act.

The newspapers stand aloof, refusing to recognize other media as kith and kin in the freedom fight. But once pinched, ever so lightly as in the case of President Truman's recent "se'zure" slip, their editorial pages become electrified, with nary a mention of the threat to radio or motion pictures.

The freedom fight is eternal. Associate Justice Black, in a recent dissent in a "group libel" case, sagely commented that state laws making opinions punishable as crimes, are at war with the "kind of free government envisioned by those who forced adoption of our Bill of Rights." History, he said, "indicates that urges to do good have led to the burning of books and even to the burning of witches."

Our zealous legislators seem to forget that Hitler and Mussolini burned books. They sequestered radio stations and newspapers. "Free speech" was punishable by death. In the Soviet orbit, there's no radio other than Stalin's, no books or movies or music other than those anointed by the Kremlin. Newspapers are edited and kept by the Foreign Office.

Without realizing it, some of our legislators are travelling the road toward totalitarianism. What else can it be when the move is inexorably toward suppression of thought, and control of the minds of men?

SEN. William Benton has twice suffered attacks of a disorder to which we had thought him immune. He has become a victim of mike fright. Last week, on advice of counsel, he refused to testify at a pre-trial hearing of the $2 million libel - slander - conspiracy suit brought against him by Sen. Joseph H. McCarthy. He objected to use of a recording machine. Earlier he had refused to let the pre-trial hearings be broadcast or telecast. The silent Benton is an entirely new character on the national scene and, we must say, an infinitely more satisfactory one than the old, or noisy, Benton. Next time he pops up on the Senate floor to push one of his favorite "remedies" for broadcasting, we hope someone slips a microphone in front of him. It's the only instrument we know that has ever stunned him.

On Merit Alone

PRESIDENT TRUMAN did what came naturally when he nominated Rosel H. Hyde last week for a new seven-year term as a member of the FCC. Mr. Hyde has served with distinction since 1946, when he was first appointed by Mr. Truman to fill one of two then existing vacancies. His knowledge of administrative law and of the broadcast and communications fields and his rare judicial temperament qualify him admirably for the Commission. He has grown with the job.

Mr. Hyde came up through the ranks. He began with the old Radio Commission in 1928 in an apprentice legal capacity. He was successively attorney, examiner, assistant general counsel, general counsel and Commissioner. Every promotion was based upon merit. He is a Republican. But politics in no way entered the picture. He is one of the few men in public life who have made public service a career. We wish him well in those seven years ahead.

our respects to:

CARROLL CARROLL

THE MORNING of April 11, 1902, uneventful for the average man that fateful day, brought forth the following wire to Lucius Carroll, a New York attorney specializing in mail order matters in Washington, D. C., on business:

"Never mind the second class mail matter. Eight pound bundle of first class male matter arrived this morning."

This was the first official pronouncement of the arrival in the Bronx of Carroll Carroll.

The eight pound bundle has since developed into a 150 pound, 5 foot, 5 inch bundle of energy, good humor and wit who currently holds sway in Hollywood as vice president in charge of West Coast operations for Ward Wheelock Co. He also is one of the top radio writers in the business.

To reach this stage in life, approximately 28 of the intervening years were spent in advertising, the majority of them in radio. During this time Mr. Carroll wrote for most of the top radio performers, including Bing Crosby, George and Gracie Allen, Eddie Cantor, the late Al Jolson and Fannie Brice.

In his present capacity, Mr. Carroll handles all radio activity of the multi-million dollar Campbell Soup Co. account. He also works on TV commercials filmed in Hollywood for Campbell Soup, Adam Scheidt Brewing Co. and Whitman's Chocolates.

Campbell's current radio includes the thrice weekly Bob Crosby's *Club 15* on CBS Radio which Mr. Carroll writes and helps produce, and the daily NBC's *Double or Nothing* with Walter O'Keefe as m.c.

First official act of the new-born male matter was to defy his parents who had been looking forward to a "Caroline." After crashing their tender hope, he continued this defiance in his attitude toward formal schooling.

Far from the conventional example of "how to become a success," the young Carroll spent a total of approximately seven years at being "formally" educated. Until he entered at age of 10 years, the fifth grade of Frances E. Willard Public School in Chicago, to which city his mother and he moved following the death of his father, Carroll Carroll had a record of "resigning" from one private school after another.

He completed his grammar school education at Willard, discovering too late that there was no resigning from public school. In addition he managed 3½ years at Hyde Park High School. Then he decided that was enough

(Continued on page 66)

For Distinguished Service
in the field of
Public Service in Radio Journalism

A group of broadcasts attacking the Chicago narcotics problem following investigations by WMAQ newsman Len O'Connor resulted in the latest in a series of many national honors for Station WMAQ and its quality news reporting.

Winning of the 1951 Sigma Delta Chi Award for Public Service in Radio Journalism again points up the recognized position of Station WMAQ as THE news station of Chicago.

Day after day, WMAQ newsmen—gathering, analyzing and accurately reporting the news—are constantly achieving good journalism and good radio.

INSTITUTIONAL ADS

Revenue Bureau Gives Stand

THE INTERNAL Revenue Bureau intends to stick to a well-defined line of action in considering whether expenditures made for institutional advertising are deductible for federal income tax purposes.

Sen. Hubert H. Humphrey (D-Minn.), who is studying means of cracking down on so-called "political" institutional advertising as an income tax deductible expense, is aiming his criticism against newspaper use, not radio.

These were two developments last week in the Senator's efforts to determine his line of action [CLOSED CIRCUIT, May 5, B•T, April 14, 7].

In a statement to BROADCASTING • TELECASTING, the Senator pointed out that his illustrations made on the Senate floor of "political" institutional advertising were confined to the printing medium. "I was referring to newspapers, not to radio advertising," the Senator said. He said he was not aware of any large-scale use of such ads on radio.

In answer to Sen. Humphrey's query, Comr. John B. Dunlap, of the Internal Revenue Bureau, explained the sections of the code dealing with deductibility.

Forbidden, he said, are sums of money "expended for lobbying purposes, the promotion or defeat of legislation, the exploitation of propaganda, including advertising other than trade advertising, and contributions for campaign expenses."

The bureau's policy, Comr. Dunlap said, is to "allow as deductions to a taxpayer reasonable costs for advertising, including advertising of an institutional character."

Definition of institutional advertising, according to the bureau's terminology, means "advertising which does not present to the public the particular products or services of the advertiser but which does put the name of the advertiser before the public; i.e., advertising directed to the promotion of good will rather than any specific product or service."

Comr. Dunlap said the bureau has not attempted to define the type or form of advertising which a business must employ.

"For example," he said, "a taxpayer may select as his advertising medium, a radio program consisting for the most part of entertainment or music; or a taxpayer may purchase space in a newspaper in which nothing appears but the name and address of the taxpayer."

In general, Comr. Dunlap said, the taxpayer is "free to choose the advertising which best serves his purpose and which meets the tests set out in the Internal Revenue Code and the Regulations."

What will determine the bureau's consideration in the future is whether the advertising is employed to the purpose of defeating legislation "in issue" or in an area of "political controversy," it was said.

Sen. Humphrey had attacked two full-page advertisements appearing in a Washington paper, one by McGraw-Hill Publishing Co. on wages and prices, and another by Safeway Stores Inc. of Oakland, Calif., national food chain, on the price stabilization program.

The bureau indicated it could not comment on these specific cases since it is not permitted to do so except upon request from the parties involved. However, it noted, the bureau has a legal policy to follow.

Technician's Glossary

WILLIAM H. OFFENHAUSER Jr., consultant engineer to Telenews Productions, New York, has been requested by the Society of Motion Picture and Television Engineers to supervise compiling and publishing a directory of technical terms currently used in both industries. Need for the glossary was pointed out by Mr. Offenhauser in a paper delivered at the society's semi-annual meeting in Chicago April 21 [B•T, April 28]. The paper, urging that vagueries be clarified and that jargon be replaced with exact terms for technical use, will be recorded by SMPTE for presentation at its sectional meetings.

STUDENTS SELL SPOTS

Operate KXEO for Day

FIFTY high school students who took over the entire announcing, sales and programming of KXEO Mexico, Mo., for one day, sold 117 spot announcements above the station's normal billings, according to Monty Moncrieff, program director of the 250 w station.

The students, all members of the diversified occupations class of Mexico high school, set the record during their special "D-O Radio Day," abbreviated letters for "diversified occupations."

Mr. Moncrieff and Earl Dougherty, general manager, met with the class several weeks in advance to instruct the students in selling. The station furnished the students a list of potential advertisers.

Regular staffers were able to see "our own mistakes after hearing the students' day-long broadcast," Mr. Moncrieff said. He added that the two-year-old station gained much community prestige from the operation.

Both station and students profited from D-O Day. The class earned money it needed to finance visits to industrial and other plants. KXEO's Margaret Patton, news director, prepared listeners for the day by running a series of spot announcements and a progressive story of the event from the KXEO news desk.

How earnings work to produce more oil

IMPORTANT FACTS FROM THE 1951 ANNUAL REPORT OF STANDARD OIL COMPANY (NEW JERSEY)

IN THE FREE WORLD, people use tremendous amounts of oil. Meeting their needs, rising year after year, has been one of the notable industrial accomplishments of our time.

For example, the peak war effort in 1945 pushed use of oil 23% higher than in 1940. This looked like a mark that would not be topped for years.

But vigorous post-war reconstruction, and expansion of industry, transportation and agriculture, made oil use in 1946 greater even than in 1945. And in 1951 it was 58% higher than in 1946.

To supply this oil has called for great expansion by the petroleum industry. It has meant new wells, pipe lines, storage tanks, refineries, tankships . . . in times of high costs.

The job has required a vast outlay of money, *which has been provided largely by the industry's own earnings.*

How this works out is shown in the case of Standard Oil Company (New Jersey), an American corporation having investments in companies carrying on the varied functions of the oil business in the United States and abroad.

Consolidated net income of Jersey and affiliates for 1951 was $528,461,000. Of this, $278,862,000, or 53%, was used to help provide new equipment.

In the six years since 1945, Jersey and affiliates have spent $2,350,000,000 for replacement and expansion of facilities. Depreciation and depletion reserves provided only 44% of that amount. The largest share of the expenditure was met by the reinvestment of earnings.

During 1951 alone, to do their part in supplying more oil for the free world, companies in which Standard Oil Company (New Jersey) has investments:

Discovered Oil

In the United States, made new oil discoveries in the Williston basin, the Uinta basin, and Texas . . .

In Latin America, extended known fields in Venezuela, and opened up a new area in Colombia . . .

In the Middle East, Arabian American Oil Company made two important discoveries, one in the offshore waters of the Persian Gulf . . .

Developed Production

In the United States, drilled more wells than in any year since 1937, and greatly expanded secondary recovery operations to get more oil from existing fields . . .

In Venezuela, completed 190 producing wells . . .

In Canada, increased total producing wells from 844 to 1,140 . . .

In the Middle East, Arabian American Oil Company and Iraq Petroleum Company increased production 57% . . .

Expanded Refining Capacity

At Baton Rouge, La., and Everett, Mass., enlarged refineries . . .

At Winnipeg, in Canada, opened a new refinery and, at Edmonton, Sarnia, and Vancouver added facilities . . .

At Fawley, England, put the largest refinery in the United Kingdom on stream . . .

At Antwerp, Belgium, proceeded with field work on a large refinery . . .

At Durban, South Africa, started work on a refinery, and at Bombay, India, completed arrangements to build a new one . . .

Expanded Transportation

In the United States, boosted pipe line capacity substantially, particularly in the South . . .

Ordered twelve new ocean-going tankships, bringing the post-war total of those purchased or contracted for to 72 . . .

Began to bring Western Canadian oil to consumers in the Eastern provinces by means of two large, new Great Lakes tankers, with a third going in service this spring . . .

In Iraq, Iraq Petroleum Company brought near completion a new 556-mile pipe line from the oil fields to the Mediterranean. It will permit oil production in Iraq to be more than doubled in 1952 . . .

Advanced Research

Put into the search for new and improved processes and products a total of $23,100,000, one of the largest expenditures for such a purpose by any company . . .

Continued Good Employee Relations

The interest of the company and its employees in maintaining good mutual relationships resulted in another year without strikes or work stoppages in the domestic affiliates. This was an important factor in meeting the increased demand for oil . . .

AS THE FREE WORLD GROWS IN STRENGTH, it calls for more and more oil. So, not just to the 254,000 shareholders who own Jersey, but to people on freedom's side all through the world, the two outstanding facts about our Annual Report for 1951 are: (1) Jersey affiliates again did their part in meeting the growing needs for oil; and (2) the competitive business system that did this job produced the earnings to help meet even greater needs in the future.

FINANCIAL SUMMARY

Standard Oil Company (New Jersey) and Consolidated Affiliates

Total income from sales, services, dividends and interest . . . $3,863,317,000	Taxes charged to income $400,700,000
Net income . . . $528,461,000 or $8.72 per share	Other taxes, collected for governments $329,900,000
Dividends . . . . $249,599,000 or $4.12½ per share	Spent for new plants and facilities $381,824,000
Wages and other employment costs . . $600,500,000	Number of shareholder-owners 254,000
	No. of employees . . 120,000

We will gladly send a copy of the full report if you wish one. Write Room 1626, 30 Rockefeller Plaza, New York 20, N. Y.

STANDARD OIL COMPANY (NEW JERSEY)

AND AFFILIATED COMPANIES

front office

NORMAN FURMAN, president of Furman, Feiner & Co., N. Y., elected vice president-general manager of WHEE Boston. Main duty will be to convert station's programming toward specialization in broadcast for Irish, Italian, Jewish and Polish listeners. He replaces LAMBERT B. BEEUWKES who has resigned [AGENCY BEAT page 10].

WILLIAM O. PAINE, national advertising manager, KGU Honolulu, named station manager succeeding MARION A. MULRONY who retires after 30 years as manager of station.

Mr. Paine

JAMES E. WEMPLE, account executive, KWKW Pasadena, Calif., to KNBH (TV) Hollywood, in similar capacity. JAY SEIBEL, account executive, KGFJ Hollywood, succeeds him at KWKW.

Mr. Mulrony

RAY BARNETT, sales manager, KEAR San Mateo, Calif., appointed acting station manager succeeding HOWARD SMILEY.

J. R. KENNEDY, supervisor of operations in engineering division of CBC Toronto, named commercial manager for CBC television stations at Toronto and Montreal.

JOE SEIDEMAN, radio-TV director, The Caples Co., L. A., to KBIG Avalon, Calif., as account executive.

GERTRUDE SALNY, formerly with E. A. Lundy Co., to sales staff, WOV New York.

CHARLES G. BASKERVILLE, former general manager, WFLA Tampa, to KRIC Beaumont, Tex., as general manager.

JAMES C. FLETCHER, in addition to duties as eastern sales manager of Midnight Sun Broadcasting Co., named national sales manager for Manila Broadcasting Co., which includes DZRH, DZPI and DZMP Manila, and DYBC and DYBU Cebu.

STANLEY SCHLOEDER, manager of spot radio-TV time buying, Ruthrauff & Ryan, N. Y., and ALFRED I. MIRANDA, advertising sales staff, *Vogue* magazine, to The Katz Agency, N. Y., station representative firm, on TV sales staff.

PAUL SCHEINER, account executive, KGO San Francisco, becomes sales manager replacing ALAN JOHNSTONE who will resign May 15.

E. FREDERICA MILLET, radio department, National Foundation for Infantile Paralysis, joins political sales group at NBC, headed by WALTER E. MYERS, to act as sales contact, selling both radio and television time.

JOSEPH K. FLETCHER, sales staff, WFLN-FM Philadelphia, to WCAU-TV that city, in same capacity.

DONALD J. TRAGESER, sales staff, KQV Pittsburgh, to KDKA that city, in same capacity.

STANLEY B. WOOD, formerly with Ruthrauff & Ryan and Cecil & Presbrey, both N. Y., to WOR that city, as account executive in recording studios.

NATIONAL BROADCAST SALES, Montreal, has moved to 1396 St. Catherine St. W. Telephone is University 6-1538.

WBNS RADIO DOMINATES CENTRAL OHIO

We'll be a monkey's uncle if WBNS Radio still isn't the biggest entertainment factor in Central Ohio . . . and the cheapest! It's a fact . . . more people have radios than ever before. Listeners stay tuned to WBNS. There's no monkeying with dials because WBNS offers the 20 top-rated shows with strong CBS programming and locally-loved personalities. Sponsors have a billion-dollar listening and *spending* audience through WBNS.

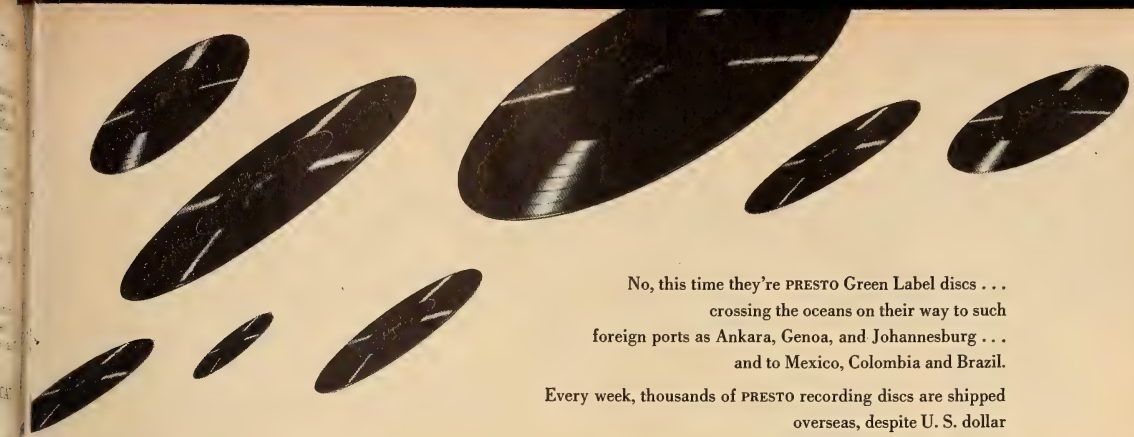
L. A.'s RTRA ELECTION



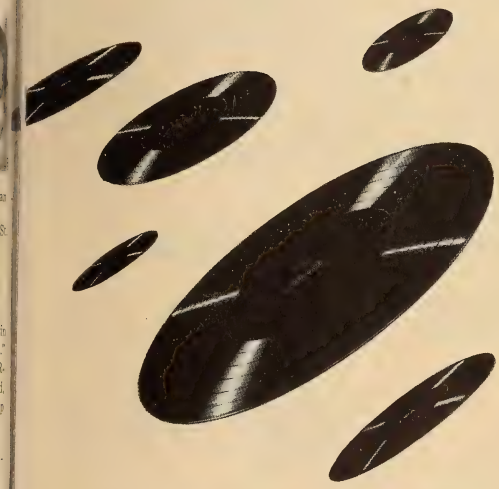
Reynolds Named President

ROBERT O. REYNOLDS, vice president and general manager, KMPC Hollywood, has been elected president of Radio-Television-Recording-Advertising Charities Inc., that city. He succeeds Sidney N. Strotz, TV consultant and formerly NBC Western Div. vice president, who headed the charities organization since its founding three years ago.

Hildred Sanders, vice president in charge of radio-TV, Dan B. Miner Co., and True Boardman, writer-producer, John Sutherland Productions, were named RTRA first and second vice presidents respectively.

Donn B. Tatum, ABC-TV western manager, was elected secretary, with Thomas C. McCray, NBC Western Div. director of radio operations named treasurer, and Harold R. Maag, RCA-Victor vice-president, assistant treasurer.

Continuing to service with new officers on board-of-directors are Larry Shea, general manager, Bing Crosby Enterprises; Wayne Tiss, BBDO vice-president; Bob Shugart, public relations director, Musicians Mutual Protective Assn., Local 47, AFM; Richard Moore, general manager KTTV (TV) Los Angeles and Mr. Strotz.



No, this time they're PRESTO Green Label discs . . . crossing the oceans on their way to such foreign ports as Ankara, Genoa, and Johannesburg . . . and to Mexico, Colombia and Brazil.

flying saucers again?

Every week, thousands of PRESTO recording discs are shipped overseas, despite U. S. dollar shortages, import license controls and other obstacles in the path of foreign trade. In one week, the week of February 28th, M. Simons & Son Company (Presto's foreign representative) shipped nearly 23,000 discs to these points around the world.

There must be a reason for this proven preference for PRESTO discs, particularly in the face of increased demands for magnetic tape. The reason is plain to us . . . and will be to you when you use PRESTO on your next job. PRESTO is the preferred disc because it is manufactured by the highest standards in the industry . . . made in the world's most modern disc plant . . . and tested for maximum performance.

Do you want to pay for

A Government Honeymoon at Niagara Falls?

You may be taxed for the cost of the most expensive honeymoon Niagara Falls has ever seen. The federal government's wooing of America's electric light and power threatens to reach a climax at the famous Falls.

Here's how. . . . A giant new hydroelectric power plant is going to be built on the Niagara River. And a critical point in the drive toward a government power monopoly is being argued over who will build it — the federal government or a group of 5 electric companies. (There is also a proposal to have the State of New York build the plant and sell the power.)

These electric light and power companies are ready with the plans and the money — and the lines to take the power where it will be needed — under normal public regulation.

But the job is held up — for there are people who want the federal government to take over electricity — as well as medicine and other businesses and services. They say the federal government should build the plant — even if it takes more time, and costs the U. S. public many millions in unnecessary taxes. Here's how the choice shapes up . . .

"MEET CORLISS ARCHER"—ABC—Sundays, 9:15 P.M., Eastern Time.

If electric companies build the plant

- **The companies and their investors will pay for it.**
- **Power produced will be shared by all, with rates regulated by state utility commissions.**
- **The Niagara project will pay about $23 million a year in local, state and federal taxes.**
- **Defense plants and others will begin to get the power in about 3 years.**

If the federal government builds the plant

- ***You* will pay for it in taxes — over $350,000,000.**
- **Specially favored groups will have first call on all power. Rates *won't* be regulated.**
- **Little, if any, taxes will be paid to local, state or federal governments from the sale of power.**
- **Government estimators say it will take them at least 5 years.**

NOTE: In no case would the scenic beauty of the Falls be affected.
Nor has this project any connection with the controversial St. Lawrence Seaway.

Who do you think should build this new plant? Talk it over with your friends and neighbors. The decision ought to be made by the American people. . . . The government plan is a long step toward socialized electricity — because only power production is involved — with no other purposes, such as flood control, to complicate the issue. That's why these facts are brought to you by America's *business*-managed, tax-paying Electric Light and Power Companies.*

(Continued from page 10)

nauseate people," he added laughingly.

But doesn't that antagonize listeners in regard to the product? he was asked. "My results show that it doesn't," he stated.

Radio, he believes, was helped by video. He pointed out the money spent on radio to advertise TV sets.

Mr. Charles said that he chooses radio because he thinks that TV is overpriced. "For example, for the same price that I can buy one 20-second TV announcement, I can buy around 65 minute spots on radio. And one spot, even on television, is not enough to sell a big item. Dollar-for-dollar, radio today is a better buy than television," he emphasized.

Although a transplanted New Yorker, Mr. Charles thinks that Washington is the "hottest" advertising city in the country. "Where else," he asks, are you going to find appliance dealers spending $5,000 a week?"

In his native New York City, Alexander Lloyd Charles attended James Monroe High School where, incidentally, he was quite an athlete. He then studied engineering at New York's Cooper Union College.

After he left college, he was a salesman for a chemical company but successful friends in radio sales influenced him to try his hand at that medium.

He was in the sales departments of WINS New York City, WARM Scranton, WHYN Holyoke, WKIP Poughkeepsie and WINX Washington. He left WINX to join Kal, Ehrlich & Merrick in 1942.

Advertising's Pace

"I like advertising because, to use the old cliche, it keeps you young." This is substantiated by Mr. Charles who, although born March 8, 1912, looks considerably less than 40.

He is married to the former Gertrude Silber, of Poughkeepsie. They have two sons, Peter, 8, and Eric, 6. When he can, Mr. Charles likes to play golf and he shoots in the 80s. However, he seldom has time for golf.

"I need about three more hours in the day. Even then I couldn't play golf. I need that time to do my work the way I want to do it."

Mr. Charles believes that it's important for the advertising man to keep the upper hand with clients insofar as advertising is concerned. This he does, by producing results and injecting good humor into the relationship.

"I invented a gag," he said, a little proudly. "I call up a client and say, 'Good morning, this is the second-best advertising man in the world.' When he asks me who is the best, I reply, 'I am, but I'm modest.' "

there isn't time to read them all

Let's not kid ourselves. No advertiser, account man or agency time buyer has the hours or physical stamina to read all the trade press.

In radio-TV they concentrate on one — BROADCASTING-TELECASTING. (We've a hat-full of statistics to prove it.) It doesn't take five, three or even two publications to woo the attention of the people who really count. One does it — BROADCASTING.

They may not read the others (and paid circulation figures show they don't).

but they always read

BROADCASTING TELECASTING

42 OUTLETS SIGN

With World in April

WORLD Broadcasting System, producers of sales and program services, signed 42 new subscriber stations during April to set a company record for one month's sales, Robert W. Friedheim, general manager, announced last week.

Mr. Friedheim said sales materials and audition discs on World's new *County Fair*, featuring Judy Canova, have been sent to more than 900 subscribers. *The People Choose*, election-year series of 13 half-hour shows, has been sold to 173 stations, with many advertisers sponsoring it as a public service, he said.

Another World series, the weekly quarter-hour *Get a Hit* baseball show, is being carried on 365 stations, Mr. Friedheim said.

HARPER TO TALK

At Library Group Meet

MARION HARPER Jr., president of McCann-Erickson, will discuss "Tomorrow's Advertising" as one of the principal speakers at the opening luncheon of the Special Libraries Assn.'s 43d annual convention, May 26-29, at the Hotel Statler in New York.

Other highlights of the convention will include a May 28 session on "Evaluation of Services Used in Advertising," with speakers including Hans Zeisel, research director of the Tea Bureau, "Evaluation of Radio and TV Services"; Frank McCord, research director of Cecil & Presbrey, "Evaluation of Market Research Services"; Gladys Hinners, manager of copy research for McCann-Erickson, "Evaluation of Copy Research Services," and Evelyn Becker, librarian of Needham, Louis & Brorby, on "Evaluation of Library Services."

Turkish Program

FIRST Turkish-language radio program to be broadcast in New York metropolitan area has begun on WHOM-FM New York 7-8 p.m. EST. Program is conducted by R. Oguz Turkkan, Columbia U. lecturer on Turkish history and New York correspondent for Turkish newspaper *Cumhuriyet*, and features music of that country and the Orient as well as news and special features in Turkish language.

'MICHAELS' LIST

ARTAS Awards Made

WINNERS of the third annual "Michael" awards in radio and TV, sponsored by the Academy of Radio and Television Arts and Sciences, were announced last week.

NBC's *Big Show* was adjudged the radio program of the year, Red Skelton was named best TV comedian, and special citations were issued to Gian-Carlo Menotti's opera, *Amahl and the Night Visitors*, and to Theodore Granik's forum, *Youth Wants to Know*, both on NBC-TV.

List of winners follows:

RADIO CATEGORY

Program of the year, *The Big Show* (NBC); Musical, *Telephone Hour* (NBC); Drama, *Theatre Guild on the Air* (NBC); News program, Edward R. Murrow (CBS Radio); Public interest, *Metropolitan Opera* (ABC); Classical music, *NBC Symphony* (NBC); Mystery, *Dragnet* (NBC); Children's, *Greatest Story Ever Told* (ABC).

TELEVISION CATEGORY

Comedian, *Red Skelton* (NBC-TV); Variety, *Your Show of Shows* (NBC-TV); Situation comedy, *I Love Lucy* (CBS-TV); Drama, *Philco-Goodyear Playhouse* (NBC-TV); Mystery, *Dragnet* (NBC-TV); Panel Quiz, *What's My Line?* (CBS-TV); Discussion-Interviews, *Meet the Press* (NBC-TV); Forum, *American Forum of the Air* (NBC-TV); Musical Variety, Fred Waring (CBS-TV); Daytime, *Garry Moore Show* (CBS-TV); News Program, *See It Now* (CBS-TV); Commercial Presentation, Schlitz Beer (CBS-TV); Innovation, Biography Shows on *Toast of the Town* (CBS-TV); Children's, *Zoo Parade* (NBC-TV); Announcer, Betty Furness.

RADIO & TELEVISION CATEGORY

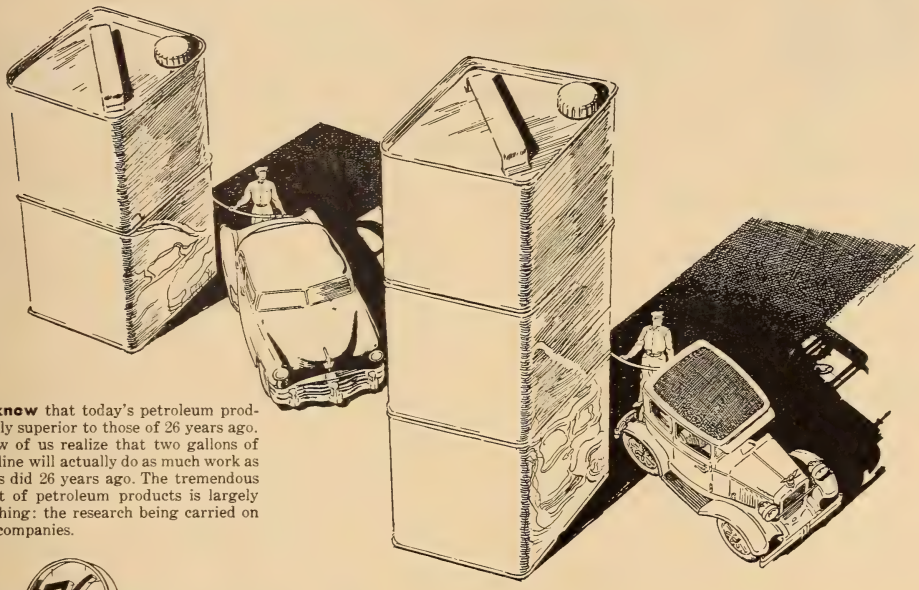
Sportscaster, Mel Allen; Female Vocalist, Dinah Shore; Male Vocalist, Perry Como; Popular Song, Too Young. Citations: Gian Carlo Menotti's Opera *Amahl and the Night Visitors* and Theodore Granik's *Youth Wants to Know*.

U.S. WEATHER NEWS

Morning Program Emphasized

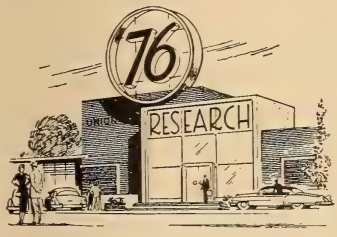
U. S. Weather Bureau has discontinued its evening radio program, *National Weather Summary*, and has shifted its emphasis to morning programming.

This was announced by James C. Fidler, chief of the Weather Bureau's radio-TV division, who explained that lack of manpower forced the shift. *National Weather Summary* was carried up to April 18 by four Continental FM Network stations.



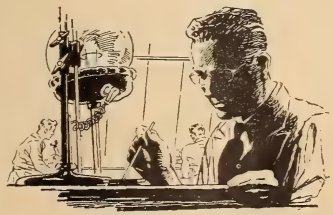
"However," Mr. Fidler added, "we would be receptive to any network interested in a weather summary program between 7 a.m. and noon."

Mr. Fidler makes three announcements per day on Dave Garroway's NBC-TV program, *Today*, Monday through Friday. He is heard in a weather summary over CBS on Friday.

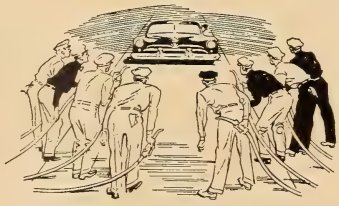


Miss Nora B. Hall

MISS NORA B. HALL, 63, treasurer and a director of the Coshocton Broadcasting Co., licensee of WTNS Coshocton, Ohio, and president of the Coshocton Tribune Co., died at a hospital there May 5 of a heart ailment.



Why 2 gallons of the gasoline you buy today equal 3 gallons you bought in 1926



1. We all know that today's petroleum products are vastly superior to those of 26 years ago. But very few of us realize that two gallons of today's gasoline will actually do as much work as three gallons did 26 years ago. The tremendous improvement of petroleum products is largely due to one thing: the research being carried on by U. S. oil companies.

2. In February Union Oil opened the doors of its new $8 million Research Center near Los Angeles. Here a staff of 300 will work on product improvement as well as petrochemical research—the development of the base chemicals for such products as synthetic rubber, detergents and plastics.

3. Over the last 61 years the money we have spent per year on research has risen steadily from $3 thousand to over $3 million. Why? Not because we like to spend money or because someone told us we must. But *to keep ahead of our competitors*—all of whom are working on new and improved products too.

4. These 30,000 U. S. oil companies—big and little—are all competing with each other. Consequently, the *incentive* to develop new and improved products or techniques is constantly with all of us. This incentive is the driving force behind our whole free, competitive American system.

5. For it encourages the introduction of new and better products to a greater degree than could ever exist under a governmental monopoly.* As a result, the American people have the highest standard of living the human race has ever known.

**As long, that is, as the government doesn't tax industry to the point where there's no incentive left for research and development.*

Our Respects to

(Continued from page 56)

higher education and left in 1919 with "enough credits to graduate with, but in all the wrong subjects."

When it came to choosing a career, Mr. Carroll had no doubt as to what he wanted to do. Even as a child he had gravitated toward advertising. As a pastime, he had diligently clipped and pasted up for future reference little verses in the Campbell Soup magazine ads.

Thus, on leaving high school, when 17 years old, he got his first job with Sigmund Kahn Agency, a small New York advertising firm, now defunct. He was office boy with a salary of $10 per week. The next three years, he went progressively from that agency to three others, ending up in 1926 as copy chief for Irwin Jordan Rose Corp.

To relieve the grind of commercial writing, he wrote humorous copy and verse, plus film reviews for *Judge*, whose staff young Carroll eventually joined.

He also did free lance copy for the old *Life*. These "outside" assignments brought him so much enjoyment both spiritually and materially that in 1926 he temporarily left advertising to devote fulltime to freelance writing.

Wide Writing Activities

For the next six years in addition to writing for *Judge* and *Life*, Mr. Carroll wrote for the *New Yorker, College Humor, Saturday Evening Post;* did a New York column for *Canada Goblin;* for two years did a radio column plus features for *New York Sunday World* until its demise in 1930; wrote vaudeville skits for "Garrick Gaities" and for about six months handled publicity for Tobus Klagfilm Syndikat, A.G., German film distributor.

In "spare time" during this period, he managed to collaborate with Harry Wagstaff Gribble on a musical review, "Cherry Pie," which ran for three weeks in Greenwich Village.

"The play got good reviews," explains Mr. Carroll, "but no one showed up."

Ending his vacation from advertising in February 1932, he joined the New York radio department of J. Walter Thompson Co. During the next 14 years he worked on network shows produced by that agency, such as *Burns and Allen—Guy Lombardo; Rudy Vallee Show; Shell Chateau; Chase & Sanborn Hour,* and *Paul Whiteman and Al Jolson,* which he started. Latter program later became known as *Kraft Music Hall.* In addition, the busy young man wrote interviews and the framework for CBS' *Lux Radio Theatre.*

At one period his schedule included writing for 2½ hours of Thursday shows *(Kraft Music Hall, Rudy Vallee Show, George Olsen* and *Frank Fay* programs); the hour *Al Jolson Shell Chateau* on Saturday; *Chase & Sanborn Hour* and *Joe Penner Show* half-hour programs on Sunday.

In Sept. 1946 Mr. Carroll left that agency to join Ward Wheelock Co., in Hollywood as agency executive on *Jack Carson Show.*

Before he left JWT, Mr. Carroll took along a permanent momento of his association there. Her name was Norma Tobias, a secretary on the agency staff. Robert T. Colwell, then his boss, and now the third man of the Sullivan, Stauffer, Colwell & Bayles lineup, was matchmaker. She became Mrs. Carroll on Sept. 19, 1934. The Carroll family, which now includes Lida, 16; Bruce, 12 and Adam, 8, make their home today in Beverly Hills.

Six months after joining Ward Wheelock Co., Mr. Carroll helped start the *Club 15* musical on a five weekly basis and *Double or Nothing,* daily audience participation show, both on CBS Radio. *Club 15* has since gone to thrice weekly on CBS Radio, with *Double or Nothing* shifted to NBC radio on its same daily schedule.

It was in the summer of 1950 that Mr. Carroll was named vice-president in charge of Ward Wheelock Co.'s West Coast operations.

A hard worker when a job has to be done, and a neat one too, agency co-workers concur, Mr. Carroll works best on a deadline. He likes to get things done "so tha I can rest."

This probably accounts for hi usual calm and relaxed manne which, added to his warm sense o humor and natural ease in getting along with people, makes them enjoy working with and for him.

He takes a serious outlook on the radio vs. TV debate. Mr. Carroll believes television is now in the same growing stages that radio was in its beginning. However, television will not "kill" radio, only change it, he believes.

Mr. Carroll still freelances magazine writing. He also has written several popular songs. Most recent are "Christmas Is For Children" and "You Say the Nicest Things." Other songs include "Baby Me" and "Why Won't You?"

Other writings including collaboration with Bob Hope on the very successful "I Never Left Home," which sold more than 1½ million copies, and "So This Is Peace." In the words of Mr. Carroll, the latter was a "huge failure," selling a mere quarter million copies.

In spite of his loyalty to radio, it is TV which has given him his opportunity to become a star in his own right. For the past four years, Mr. Carroll has been a permanent panel member of the Sunday night show, *Movietown RSVP,* seen locally on KTLA (TV) Hollywood.

Not a joiner, his sole organization affiliation is the Hollywood Executives Club.

ARE YOU A STICKLER FOR COVERAGE?

Smart local advertisers know that WINS, with tremendous power day and night, reaches *lots* of listeners. They know it offers lowest cost per thousand listeners most every period of the day.*

"Spots," shows on WINS have a reputation for *selling*—extra pulling power. Ask any of our local advertisers—among them:

CROSLEY BROADCASTING CORPORATION

MBS CO-OP SHOWS
Reach New High

SPONSORS of Mutual network cooperative programs have reached an all-time high to total 4,485 local and regional advertisers, Bert Hauser, director of co-op programs, announced Tuesday.

Noting that a total of 25 network programs were available for local sponsorship as of May 1, Mr. Hauser pointed out that *Game of the Day* leads the list, having been sold to 1,879 advertisers on 245 network stations. Only half the daily innings of these broadcasts are available to local backers, he explained, since the Falstaff Brewing Corp., St. Louis, sponsors the remaining play on a national basis.

An additional 625 sponsors have been attracted since Jan. 1 to the five Metro-Goldwyn-Mayer shows available for local sponsorship: *Crime Does Not Pay, Story of Dr. Kildare, Hardy Family, MGM Theatre of the Air,* and *Gracie Fields Show.*

The two leading MBS newscasters—Fulton Lewis jr., sold on 368 stations to 708 advertisers, and Cedric Foster, backed by 320 sponsors on 158 affiliates—together represent more local business sponsors than the combined contracts of all co-ops on other networks, Mr. Hauser said.

Other leading MBS co-ops include Cecil Brown, sponsored on 86 stations; *Mutual Newsreel* on 81, and commentator Bill Cunningham, 79.

Newest program added to the cooperative plan is Bert Bacharach's broadcast version of his syndicated column on men's dress and interests, *Men's Corner*, which is broadcast from 7:15-7:30 p.m. EDT, Wednesdays.

WCAO BIRTHDAY
30 Years Marked

MARYLAND'S oldest radio station, WCAO-AM-FM Baltimore, celebrated its 30th anniversary last Thursday and this year observes its 25th year with CBS. Station became one of the 16 basic affiliates of the network in 1927.

The 5 kw on 610 kc AM outlet and the 20 kw FM station today have four 300-ft. towers and transmitter equipment on a 31-acre tract, but began in 1922 as a 50 w AM station licensed to Sanders & Stayman Piano Co.

President and general manager today is L. Waters Milbourne, son of Sen. Lewis M. Milbourne who headed a group which bought WCAO in 1931. In August 1947, the station moved to its present location at 1102 N. Charles St.

According to officials, WCAO has been credited with creation of the original *Morning Musical Clock*, a favorite 6-9 a.m. program today. Nine WCAO employes have more than 20 years service and two announcers are veterans of 15 years or more.

KPRC-AM-TV WINS
Get-Out-Vote Campaign

VOTING at the precinct conventions in the KPRC-AM-TV Houston area May 3 was 50 times as great as in 1948 and was the biggest turnout in history after a concentrated get-out-the-vote campaign by the station, in close cooperation with its parent newspaper, the *Houston Post*, according to Marsh Callaway, KPRC promotion manager.

For the first time in the memory of any Texan, Republican voting at precinct level was greater than Democratic voting, he said.

On May 1, KPRC-TV presented *The Voice of The People*, a story of democracy in action. The same night, KPRC presented a radio version of the same theme. Both programs were introduced by Texas Gov. Allen Shivers. Jim Alderman, KPRC-TV, and Pat Flaherty, KPRC, served as moderators.

Heavy spot schedules ran from April 13 through May 3 on both stations, urging voters to participate in their precinct conventions, and publicizing a "Political Primer" newspaper insert. Jack Harris, KPRC-AM-TV general manager, made a personal appeal to managers of all Texas radio stations to encourage precinct convention participation.

HADACOL BACK
With New Radio Campaign

"NEW and intensive radio advertising campaign" for Hadacol will be conducted in eight southern states, according to Frank E. Heaston, director of advertising for LeBlanc Corp., Lafayette, La. The campaign may be extended into more states.

Campaign includes three to five one-minute spot announcements per day, six days a week, placed directly by LeBlanc Corp. from its headquarters. Spots were produced and transcribed by Erwin, Wasey & Co., New York. States covered include Alabama, Arkansas, Georgia, Oklahoma, Louisiana, Tennessee, Texas, Mississippi and cities of Cincinnati and Asheville, N. C. The proprietary product was promoted to nationwide fame and wide distribution by its former president, Dudley J. LeBlanc, Louisiana political figure, mainly by use of extensive radio advertising. Later the company went through bankruptcy and reorganization proceedings.

Columbus Poll Melee

CRUSADING News Editor Phil Kriegler of WGBA Columbus, Ga., was one of three newsmen allegedly attacked last Tuesday by a group of men as the three were taking pictures at a polling place in Phenix City, Ala., a city where gambling is the object of a clean-up drive. Other newsmen were Ray Jenkins and Tom Sellers of the Columbus *Ledger and Inquirer*, of which the station is an affiliate.

From where I sit *by* Joe Marsh

As a Matter of Fact...

Out of all the newspaper and magazine columns that I read, the ones I enjoy most are those that pack in a whole lot of facts—unrelated facts, maybe, but each one an interesting bit of information in itself.

These columns go something like this: "Did you know that humpback whales are addicted to snoring? That bees have been bred with red, brown, blue and buff-color eyes?

"Did you know that lead can be converted to gold—at a cost of only $1,000,000 an ounce? That a 555-pound fat girl went on a diet and lost 401 pounds in 12 months? That a chrysanthemum has been developed that smells like a violet?"

From where I sit, maybe I'm a kind of "Johnny-one-note." My own columns always seem to revolve around one *idea—a plea for us to make sure we respect the other fellow's rights—like the right to vote for your own choice or the right to enjoy a glass of beer now and then. I may not be in style, but I believe my one fact is* worth repeating—*and remembering!*

MBS GAINS

Sales, Audience Increase, GT&R Reports

MBS is the only radio network with increased sales and audience from a year ago in the face of TV's progress, according to the annual report of General Tire & Rubber Co., which controls MBS and owns Yankee and Don Lee networks as well as seven radio and three TV stations.

The company substantially expanded its radio-TV interests with acquisition of WOR-AM-TV New York and KHJ-TV Los Angeles last Jan. 25, the report explains.

Total income of General Tire & Rubber Co. in the year ending Nov. 30, 1951, was $180,521,180, a new high. Net after taxes was $7,790,467 including net income of $773,827 from TV and broadcasting activities. Discussing the merger of Yankee and WOR with Thomas S. Lee Enterprises Inc., the report points out that the firm now has a major stock interest in MBS.

"Your company's 1951 investment in this subsidiary was exceeded by earnings for the year," it was stated.

In a section titled, "New Programs Command Attention of Radio and Television Listeners," the report comments on acquisition of WOR-AM-TV and KHJ-TV Los Angeles this way:

These new acquisitions along with the Yankee Network in New England and the Don Lee Network in the west comprise our subsidiary (90% owned —10% stockholder, R. H. Macy & Co.), known as the Thomas S. Lee Enterprises Inc., which controls 58% of the Mutual Broadcasting System's stock.

Both Yankee's 29 stations and Don Lee's 45 stations covering the 13 western states are key Mutual units. This subsidiary owns outright seven radio stations and three television stations. The other stations are affiliates.

In Mutual the other stockholders are the Chicago Tribune, the Cleveland Plain Dealer, Gimbel's, and Sedgewick-Rogers of Windsor, Ontario, and currently this 545-station Mutual system is the only network boasting increased billing and listening audience over last year despite television's inroads. Our sales and income have been excellent.

With its Metro-Goldwyn-Mayer deal, Mutual "scooped" the industry. Now it has regular week-day features starring such movie greats as Bette Davis, Errol Flynn, Mickey Rooney, Orson Welles, Lionel Barrymore, Lew Ayres, Marlene Dietrich, Ann Sothern, and many other stars.

Our three television markets of New York, Boston and Los Angeles service an area constituting about 30% of all the television homes in the country. The increase in television advertising in the last two years has far surpassed the performance of any media in the history of the world.

In a series of notes detailing general functions, the radio-TV expansion was discussed as follows:

Thomas S. Lee Enterprises Inc. and The Yankee Network Inc. reported a net income of $773,827 for the period ended Nov. 30, 1951. This included the net income of The Yankee Network, Incorporated to May 6, 1951, date of merger with Thomas S. Lee Enterprises Inc. and the net income of the latter company from Dec. 31, 1950, date of acquisition.

As of Jan. 25, 1952 General Teleradio Inc. was merged into Thomas S. Lee Enterprises Inc. for which Thomas S. Lee Enterprises paid $1,683,622 in cash and issued 732 shares of its capital stock (aggregate stated value $87,840); this changed The General Tire & Rubber Co.'s ownership of Thomas S. Lee Enterprises Inc. to a 90% interest. Coincident with this merger Thomas S. Lee Enterprises Inc. purchased certain assets from WOR Program Service Inc. for $1,236,000 in cash.

In connection with the above transactions The General Tire & Rubber Co., subsequent to Nov. 30, 1951, advanced $3,000,000 to Thomas S. Lee Enterprises Inc., which was made subordinate to a five year $2,500,000 bank loan of Thomas S. Lee Enterprises Inc. Under the terms of that bank loan Thomas S. Lee Enterprises Inc. has agreed that it will not pay any dividends (except stock dividends) so long as the aggregate principal amount of the loan exceeds $1,500,000 and thereafter only to the extent that tangible assets exceed total liabilities by at least $2,500,000.

Thomas S. Lee Enterprises Inc. has made certain long term leases (one of which was entered into in January, 1952), the performance of which The General Tire & Rubber Co. has guaranteed for various periods to the extent of $663,500 annually.

INCREASE in revenue each month in 1951 over the same month for the previous year has been announced by WITH Baltimore. Station also reported sales in 1950 have topped those of 1949. All station time between 6 and 11 p.m. is now completely sold, it was said.

Radio and TV push broadens Italian-American market

Progresso food products don't believe big advertising budgets will crowd little fellows from shelves

On page 46 of Printers' Ink's April 25th issue, is a success story that tops them all. Consumers were asked to send to the advertiser, Uddo & Taormina, packers of Progresso Italian-American foods, labels and coupons representing $10.00 worth of Progresso merchandise.

Those who do this have their names and the names of relatives in Italy forwarded to a Rome correspondent of station WOV, New York. He then visits the relatives in Italy and records interviews with them. These interviews are sent back to the United States, and then comes a day when the American relatives hear the voices of their friends and loved ones still in Italy.

In addition to this sensational program, Progresso uses WPIX-TV, New York. The show, Opera Cameos, has "opened the door of dozens of super-markets and the pocketbooks of thousands of New Yorkers of non Italian origin."

The last paragraph of this exciting story says, "the aim of Uddo & Taormina Co. today is to spread throughout the country from coast to coast, everywhere, every place." Progresso started with WOV in New York; they then added WPIX-TV. Now they are planning to move across the country. Starting as a local advertiser, they will soon be regional advertisers, and eventually national advertisers.

If you missed this story drop me a line and I will send you the issue of Printers' Ink in which it appeared.

This radio and TV success story is typical of the constant research and reporting done by Printers' Ink every week, to make it easier for you to interest and SELL our 23,309 subscribers—more than two-thirds of them are buyers of advertising, men at the top management level, and their agencies, who place their business—the importance of using YOUR station to sell more of their foods, clothing, cosmetics, refrigerators, cars, rugs, carpets, furniture, plants, fertilizers, ice cream or what have you.

Bob Kenyon

Week after week, year after year, Printers' Ink is on the prowl, unearthing better ways to advertise new and old products. And in addition to all of the "How to do it" articles, most of them exclusive with Printers' Ink (such as the Progresso story) our subscribers have in the most convenient format, the news of the sales and advertising world, the names of the great and the near great *and what they are doing.*

We welcome the opportunity to tell you how a modest appropriation for say 1/6 of a page a week, or a full page, can be used by your station to win new customers, and cement more closely the accounts you now have.

When shall we have our first talk?

ROBERT E. KENYON, JR.
Advertising Director

GE CEREMONY

Aided By WSAI Remotes

WSAI Cincinnati played a prominent part in a two-day ceremony of General Electric Co.'s "Fastest Ten Years in History" celebration which commemorated the running of the first jet engine in America and dedication of the Lockland, Ohio, GE plant.

Preceding the 10th anniversary dinner at the Netherlands Plaza Hotel, GE's own program, *Sports Time,* with Dick Baker, WSAI sports director, was originated from the hotel. Other special programs followed.

The next day, WSAI originated programs from the Lockland plant. That night, taped recordings of afternoon discussions during the two-day celebration were aired. Special programs were under supervision of J. Robert Kerns, WSAI managing director.

PUBLIC SERVICE

Ads Cited by S. C. Gale

VALUE of public service advertising in building good will was stressed by Samuel C. Gale, General Mills vice president in charge of advertising and past chairman of the Advertising Council, in a speech before the Public Utilities Adv. Assn. Friday at Minneapolis.

Outlining the Council's work in public service advertising during its 10 years, he told the group: "I think it has now been demonstrated that public service advertising is a surer, better, and sounder way of building good will than the older forms of institutional advertising."

Public utilities are "more dependent than most upon public good will," Mr. Gale said, recommending that every public utilities advertising man "give serious thought to earmarking a portion of his budget for public service advertising. . . .

"There must be some reason why public service advertising is the fastest-growing classification of advertising, and there is: It is good citizenship and at the same time it is good business."

Additionally, he said, "advertising people. . . . have rediscovered themselves as the responsible trustees of the world's greatest instrument for mass persuasion. They have awakened to the fact that they are protecting the bases of democracy. . . ."

DISC—m.c., Stu Wilson, will be featured on *Are Ya Listinin'* on KBIG Avalon, Calif., when station begins operations. Show will occupy 9-12 noon slot, Mon. through Fri.

COOKBOOKS SOLD BY WBAP-TV IN FORT WORTH AND DALLAS

(An Industry Record)

Yes, over a million cookbooks were sold by WBAP-TV during a 26-week period! The cookbooks were available in leading grocery stores in Fort Worth and Dallas. The promotion for the books was done over WBAP-TV, Channel 5.

Yes, WBAP-TV follows through to the point of purchase!

The bulk of the promotion for these WBAP-TV cookbooks was done on Home Economist Margret McDonald's "What's Cooking?" program seen between 1:00 and 2:00 p. m. each weekday. On Mondays, Wednesdays and Fridays vivacious Margret would prepare a recipe from the current volume being promoted. On the other two days she would talk about the books and show them.

Margret's popularity in the Fort Worth-Dallas area has been phenomenal. In the past year she has received more than ten thousand pieces of mail from housewives in this area requesting food recipes, asking for advice on interior decorating, floor-cleaning, flower arrangements, furniture and a dozen-and-one other home management topics.

NPA COLOR BAN

May Be Relaxed For Limited Manufacture

POSSIBILITY of a compromise regulation that would relax the ban on manufacture of colorcasting equipment in certain instances was held out by the government last week.

Despite published reports that a new order (M 90) would thaw the production freeze, it was understood that the prohibition would be retained on manufacture of color TV equipment which would preclude mass production in the industry.

The question was posed at a Thursday news conference held by Henry H. Fowler, National Production Authority administrator, and Manly Fleischmann, Defense Production Administrator. Mr. Fowler said an amended order would be issued in perhaps a week.

It was understood that the compromise goes farther than NPA's avowed intention to maintain the ban but permit manufacture of equipment for certain color TV theatre and department store uses. It would leave the door open for manufacturers to apply for authority to turn out equipment if it could be shown that there would be no conflict with defense contracts, no drain on engineers and if they used their current black-and-white TV materials allocations.

"Any relief would be much more apparent than real, however," an NPA official told BROADCASTING • TELECASTING. "It would not open the door to authorization but merely tell the manufacturer the combination to the safe. He would still have to hold the lucky number."

The "lucky number" appeared to be the three above-mentioned criteria, according to the NPA official.

If the order is approved by Mr. Fowler and screened by NPA's Clearance Committee for adoption, it could mean in effect that DPA-NPA is steering a course away from actual banning of the end product. In any event, it was emphasized, there will be no greater allocations of materials, with the result that the ban would, in effect, be retained indirectly.

The NPA official also noted that, without actual color TV broadcasting, mass production of colorcasting receivers and related equipment (adapters, converters, etc.) and scarcity of materials, "the relief would be academic."

Mr. Fowler, in response to a newsman's query, said the order is bound to "give some relief." Mr. Fleischmann added that there would be relief "with the passing of time if nothing else." Mr. Fowler indicated that he has not reached a decision whether to press the order into effect.

"We are trying to determine how we can relax the ban without endangering the military electronics program," Mr. Fowler told newsmen, referring to a desire to avert a situation where engineers would be pulled off military contracts.

NPA has been mulling the color TV issue the past three months since the second government-industry conference called by NPA to clarify the intent of M 90 [B•T, Feb. 11, et seq.]. It has been frankly acknowledged that NPA had studied the possibility of exempting color TV theatre applications at the insistence of the Theatre Owners of America, the Motion Picture Assn. of America and National Exhibitors Theatre Television Committee.

The issue is of paramount interest to 20th-Century Fox Film Corp. which, deferring to MPAA and TOA on the legal front, proposes to press its Eidophor projection theatre TV system into action.

Exemption for manufacture of closed circuit equipment used by department stores on an experimental basis also has been under study.

Mr. Fowler has indicated in the past that, whatever action the government takes, no additional materials will be made available to manufacturers for color production, and that the technical shortage remains acute.

Another question that has been raised by industry—particularly by Paramount Pictures Corp. on behalf of Chromatic Television Labs., which proposes to make the Lawrence tri-color TV tube—is whether materials may be used to produce a receiver capable of receiving both color and monochrome TV. NPA promised to clarify that, too.

In the cases of both Eidophor and Lawrence, officials have pointed out that no great quantities of materials would be needed to launch production of necessary equipment. It is this factor which touches intimately on charges that the government has, in effect, banned the end product rather than permitting manufacturers to use available allocations as they choose. The materials picture isn't likely to change substantially during 1952.

Unrest on the labor-management front has virtually dissipated any hope of the government decontrolling vital materials by year's end. These problems apparently will complicate Mr. Fowler's task as he takes over the reins of DPA June 1—subject to Senate approval.

Mr. Fowler was nominated by President Truman last Wednesday to head up DPA and will retain his post as National Production Authority administrator. He succeeds Mr. Fleischmann, who resigns to return to private law practice in Buffalo, and will report to acting Defense Chief John Steelman.

This action highlighted a week of government developments on

KOTV(TV) SALE

Wrather Buying 85%

CONTROLLING interest in KOTV (TV) Tulsa has been sold by George E. Cameron Jr. and John B. Hill to Texas oilman J. D. Wrather Jr. Sum for the 85% interest owned by Messrs. Cameron and Hill was announced as in excess of $2 million. Helen Alvarez, general manager of the station, retains her 15% interest in the licensee corporation and is expected to continue in her present position.

Sale of KOTV brings to two the number of TV stations purchased in the month since the April 14 FCC Sixth Order and Report ending the TV freeze. A fortnight ago, announcement was made of the sale of KPHO-AM-TV Phoenix to Meredith Publishing Co. for $1.5 million [B•T, May 5].

Although in preparation before the freeze-lifting, application for FCC approval of the transfer of KOB-AM-TV Albuquerque to Time Inc. and former FCC Chairman Wayne Coy for $600,000 [B•T, April 28] was filed after the Sixth Report and Order was issued.

All three sales were of TV outlets in one-station markets and all are in the Southwest.

Although Mr. Wrather makes his business headquarters in Dallas, he makes his home in West Los Angeles, Calif. In his late thirties, he is married to movie actress Bonita Granville. He has produced some independent motion pictures.

Associated with Mr. Wrather in the purchase of KOTV is his mother, Mrs. Mazie Wrather. It is believed that Mr. Wrather has his eye on TV in other cities, either through purchase or grant.

Application for FCC approval is expected to be filed in the next week or two.

Separate TV Company

It is understood that the interests of Mr. Wrather and his mother will be incorporated in a separate television company which will be the parent company of the licensee of KOTV, Cameron Television Inc.

KOTV began operation Nov. 30, 1949. It operates on Channel 6, with 16.6 kw visual power, from a 450-ft. antenna atop the National Bank of Tulsa Bldg. Antenna is 490 ft. above average terrain. It is affiliated with ABC, CBS and NBC on a non-interconnected basis. Tulsa is due to be interconnected July 1 when the AT&T throws a microwave relay link into the city from Oklahoma City. Station charges $500 for one-time Class A hour period.

Cost of constructing the Tulsa TV station was $265,988.34, according to the figures submitted in its license application. Major portion of this cost was for studio equipment, $102,958.85, with the transmitter costing $89,506.72 and the antenna system, $29,802.77. As of June 30, 1951, KOTV was reported to have a net worth of $463,368.12. Its net profit at that date for the fiscal year was reported as $82,-604.35.

Mr. Cameron, also an oilman, is 70% stockholder of KOTV and is president of the licensee. Mr. Hill owns 15% of the station and is secretary-treasurer as well as commercial manager.

THERE'S NO BUSINESS LIKE TV TALENT BUSINESS

By DAVE GLICKMAN

THERE'S no business like TV business as far as talent agencies are concerned. It's big business with them today.

Television requirements, both for live and film productions, have created the greatest demand for a constant supply of talent that the entertainment business has ever known.

Demand is for almost any kind of talent that will hold viewers' attention. All concerned feel this demand is hardly in its infant stage of growth. With the FCC freeze lifted and more stations eventually to be on the air, needs will multiply. As a result, talent agencies are scouting the countryside, looking for new personalities that can be developed in stature and thus be available for TV.

Many talent agencies in Hollywood and New York are doing more business with video today than with motion picture studios.

Although top salaries and story prices in television aren't to be compared with those offered by the movie industry, demand for artists of various kinds and material frequently gives an agent greater profit for a week's activity than he gets from motion picture placement. The recall of artists is more frequent too.

Off-setting present comparatively low salaries for the general run of "name" talent are residual rights agencies are creating for clients and themselves through ownership of filmed packages which may have substantial re-release value for many years.

Most of the TV deals with residual rights are along the same pattern, with motion picture stars asking $2,500 and up for making a half hour film, plus 15% to 25% of net on re-sale, over a ten year period or more. Some are asking a 50% interest in the package.

A cost factor partially overlooked in the TV boom is directing and production talent now also seeking residual rights. Musicians also come under the residual rights clause through demanded AFM 5% royalty formula on TV filmed shows.

Besides spotting "name" and lesser known artists and acts on local and network video shows as guests, several agencies package weekly live programs for advertisers or for sponsor consideration. Through talent on their rosters, some of these agencies also own a healthy percentage share in other packages.

TELEVISION's insatiable thirst for material and new faces has the talent scouts probing into every nook and cranny for both tried and neophyte performers. And in TV's post-freeze era that demand will reach even more fantastic proportions. Herewith BROADCASTING • TELECASTING gives a rundown of the current situation in leading TV talent centers.

Shows Seeking Talent

Devouring talent are such network TV programs as NBC-TV *Milton Berle Show, Philco TV Playhouse, Comedy Hour, Robert Montgomery Presents, All-Star Revue, Ford Festival, Kate Smith Hour* and *Armstrong Circle Theatre;* ABC-TV *Celanese Theatre, Personal Appearance Theatre,* and *Pulitzer Prize Playhouse;* CBS-TV *Studio One, Ken Murray Show* and *Toast of the Town,* and DuMont-TV *Calvacade of Stars.*

Not to be forgotten are numerous detective-mystery programs both live and filmed, that need new faces and voices to support starring characters.

Leading the agencies most active in TV are William Morris Agency, Music Corp. of America, Famous Artists Corp. and General Artists Corp. Others are the James L. Saphier Agency, Nat C. Goldstone, Don Sharpe, Sam Jaffe, George Rosenberg, Frank Cooper, Wynn Rocamora, Mel Shauer, Paul Small and many of similar stature on Hollywood's talent row who are busy in the new medium.

* * *

ETHEL BARRYMORE and G. Ralph Branton (l), president Interstate Television Corporation, sign long-term contract under which the stage and screen star will appear as actress and commentator and serve as an advisor on *The Ethel Barrymore Theatre,* series of half-hour filmed TV shows now in production. Lee Savin (center), former New York TV producer now associated with ITC, handles productions of the series.

William Morris Agency, for example, represents Eddie Cantor, Jimmy Durante, Danny Thomas, Ed Wynn, June and Stu Erwin and Groucho Marx, to name but a few in TV.

Mickey Rooney's signing with NBC-TV to star in a comedy situation series was handled through William Morris Agency. The deal is similar to that recently closed with Joan Davis, comedienne.

Peter Coe, featured in Commander Films' *Hellgate,* to be released through Lippert Pictures, turns writer-director for *Port of Embarkation,* TV film series being packaged by William Morris Agency.

Ross Western Series

The 39 half-hour TV-filmed *Tom Keene,* western series to be made by Sidney R. Ross Productions, is another William Morris package. Tom Keene starred in early western movies.

Agency also is handling *The Ruggles,* packaged by Bob and June Raisback. In addition it represents Hal Roach Jr. in Showcase Productions sale of TV filmed *Racket Squad* series sponsored by Philip Morris on CBS-TV.

As agent for June and Stu Erwin, William Morris Agency also is involved in ABC-TV *Trouble With Father,* sponsored by General Mills, which Roland Reed Productions is filming.

Wally Jordan and George Gruskin are in charge of New York radio-television activities of William Morris Agency. Frank Samuels, formerly ABC Western divi-

(Continued on page 87)

AIR HAZARD BILL

Johnson Bill Could Curb Tall Towers

IT APPEARED last week that Congress was suddenly being injected into the radio-aviation deliberation of the possible threat of tall TV towers to air navigation [B•T, April 28].

The new development cropped up last Wednesday with introduction by Senate Interstate and Foreign Commerce Committee Chairman Ed C. Johnson (D-Col.) of a bill (S 3129) that is entitled:

"To authorize the Secretary of Commerce to remove obstructions or hazards to air navigation, to prevent future obstructions or hazards to air navigation, and for other purposes."

The bill's debut in the Senate came as the broadcasting-aviation working committee last week labored over the problem of tower hazards to air navigation.

The bill is as wide and deep in its scope as TV towers are high. It encompasses "any object constructed or installed, including, but not limited to, buildings, towers, smokestacks, and overhead transmission lines."

Object of the legislation is aircraft safety. Air crashes of the past month at locations near airports apparently have brought need for legislation to correct hazards to a head, it was pointed out.

But it also would empower the Commerce Secretary to set up standards for any structure (including radio and TV towers) more than 500 ft. above ground.

As the bill states:

All federal agencies constructing or altering, or authorizing the construction or alteration of, any structure, or furnishing financial assistance in connection therewith, shall adhere to the standards established and regulations issued by the Secretary, or require adherence thereto.

Legal observers were asking whether this legislation if made law would make FCC a subsidiary under the Dept. of Commerce in its authorization of tower heights and sites.

Pertinent Parts Listed

Sen. Johnson's measure would add a new title XIII to the Civil Aeronautics Act of 1938.

Pertinent parts of the bill, follow:

. . . all . . . airspace which is 500 ft. or more above the surface of the subjacent land and which is unoccupied on the effective date of this title or which hereafter becomes unoccupied and remains unoccupied for a period of seven years, is declared to be an easement for the purpose of aerial navigation and its occupancy shall be subject to regulation and control for the furtherance of that purpose.

. . . the Secretary [of Commerce] shall promulgate regulations limiting the height, type of construction, and nature of occupancy to which future structures or objects of natural growth may be extended or built into the airspace.

The measure would permit a "request for relief" to be filed with the Secretary by any person holding that a regulation interferes with property right (must be presented within one year after date of publication of regulation). After the Secretary determines whether any taking has occurred, after notice and opportunity for hearing, he may do one of two things: "(1) fix the amount found due as compensation for such taking, or (2) grant such relief by exception to the regulations, or otherwise, as he may deem necessary."

The Secretary would be empowered to issue permits after application by "any person who desires to construct or alter any structure or to allow any object of natural growth to grow into airspace above 500 ft., contrary to any rule, regulation, or order issued. . . ."

If a structure (including towers) is determined to be an obstruction or hazard to air navigation, the Secretary may "remove, relocate or alter" this structure. In addition, he could prevent its "construction, alteration or growth" or "permit the identification by appropriate means of existing structures. . . ."

Full authority for removal or alteration "of any structure or object of natural growth extending into the airspace . . . above 500 ft. without permit therefor duly issued by the Secretary" would be permitted him.

The new standards would apply to those areas which "(1) underlie the paths of flight through the navigable airspace where substantial air traffic exists or is reasonably anticipated, or (2) are in the vicinity of (a) landing areas owned, leased, or substantially used by the Federal Government, (b) landing areas used or authorized for use by air carriers, or (c) landing areas which in the opinion of the Secretary are essential for use by aircraft engaged in air commerce."

The Secretary would exercise his powers "after consultation with the Secretary of Defense and the Civil Aeronautics Board."

It was understood that the aviation industry has tried sponsorship of similar bills over a number of years but heretofore has been unsuccessful in its attempts.

The bill was referred to Sen. Johnson's Committee on Interstate and Foreign Commerce.

A previous attempt by the Air Transport Assn. for legislation to specify that FCC have the power to deny applications which propose to construct TV towers believed to be hazards to air traffic did not succeed in the House Interstate and Foreign Commerce Committee. The committee then was engaged in consideration of the McFarland bill. ATA recommended its amendment be included in that bill [B•T, April 7].

Meanwhile, radio-TV representatives at the broadcasting-aviation committee meeting last week in Washington hinted that they might prefer not to have any specific national criteria for the use of airspace subcommittees. Meeting was the first of the "ad hoc" group, appointed after the general meeting last month. Another meeting was scheduled for May 16.

National Rules Opposed

Reasons for opposing the establishment of national rules were said to be two: (1) Cooperation between aviation interests and broadcasters has been effective in resolving hundreds of cases, although in some instances there have been failures.

(2) Each situation is unique, and national instructions would be unfair to individual cases—an application for Dubuque should not be considered in the same way as one for Chicago.

There was also the feeling that agreement on criteria might give the airspace subcommittee's recommendations a legal status before the FCC. This would be contrary to the Communications Act, some feel.

On the other hand, if no nationwide standards are established, some fear that there might be several, perhaps conflicting, tests—by CAA, Air Force, Navy and each of the 48 states.

Last week's meeting discussed the alleged problem and ended with the decision to postpone any action until radio-TV and aviation representatives could circularize their respective membership and get their views on the suggested criteria [B•T, May 5].

In the course of the meeting, the Air Line Pilots Assn. representatives disowned the press release put out two weeks ago in Chicago

GRID TELECASTS

Continue 'Harmful Effect' on Gate, NCAA Told

THOUGH colleges whose football games last year had no football TV competition fared worse in attendance than those which did have TV competition, telecasting football games "continues to exercise a harmful effect on college football attendance."

These seemingly contradictory findings are among highlights of the National Opinion Research Center's third report on "The Effects of Television on College Football Attendance," prepared for the National Collegiate Athletic Assn. and released by NCAA Friday.

"Colleges with TV in 1951 reported only a moderate loss of 4% from their 1950 levels, compared to a more serious 10% decline for colleges with no TV competition," the report asserts. It uses graphs to show, however, that the "TV differential"—defined as "the difference between the relative attendance trends of colleges exposed to television competition and those not exposed"—was "significantly" less last year than in 1950, when football TV was unrestricted. This narrowing of the "TV differential" it ascribes to the effects of NCAA's controlled-TV plan.

Slowing of Decline

"While television continues to affect football attendance unfavorably," the study asserts, "the NCAA's 1951 experimental program of limited TV did succeed in slowing the rate of decline among those colleges faced with TV competition."

In large measure the report takes the long-haul look in its comparisons, stacking 1951 figures against those for pre-television 1947-48.

The report concludes that "It is obviously too early to expect basic attendance behavior to have fully adjusted to television competition" and that "The situation is still a fluid one, and any 'final' determination of TV effects must await further years of experience and research." NCAA meanwhile planned to announce its controlled TV plan for 1952 in a few weeks.

Other highlights of the 30-page report, covering results of surveys and studies which were made before, during and after the 1951 season:

● Overall attendance in 1951 was down 6% from 1950 ("due largely to such factors as the pinch of inflation and the decline in student enrollment").

● Compared to 1947-48, "large, medium, and small colleges all reported very much lower attendance figures when they were exposed to television competition than when TV was absent. The 'TV differential' was similarly found both for attractive games, between traditional rivals or involving teams of high performance, and for less attractive games, when the teams were colorless or ill-matched."

● The high school football gate has reflected a TV effect similar to that among colleges, except that NCAA's controlled TV plan did not appear to help the high schools.

● "The personal characteristics of television owners closely resemble those of football fans . . . and TV ownership and interest in football are themselves highly correlated. Football fans are much more likely to own a TV set than are people who lack an interest in the game."

● TV "exerted its greatest depressing effect among those fans with only a small or moderate interest" in football, according to analyses of special Boston and Pittsburgh studies.

● Studies of the effect of length of TV ownership upon attendance behavior showed no differences consistent or large enough to have "statistical significance."

● College football fans "are almost always interested in other sports as well," and watching or attending other sports can "fairly easily" be substituted when no college football is on TV on a particular Saturday.

● "The overwhelming majority of fans concentrate their attendance on the games of only one college. Thus, if the favorite team has a poor season, television rather than actual attendance at another stadium becomes an easy substitute; while if a blackout is unexpectedly encountered, the fan is more likely to substitute some other activity than to patronize the disappointing team of his choice or to visit an unfamiliar stadium."

● Two-thirds of the football fans in TV areas were "completely unaware" of NCAA's Limited-TV plan last fall, "despite the adverse newspaper publicity in a few areas," and "even among the one-third who expressed some familiarity with the plan, the majority lacked accurate information."

● In TV areas small college football attendance was "markedly higher" when no games were available on TV, but such differences did not generally occur among larger colleges (attributed to difficulty in achieving 100% blackouts, since many fans could still tune in games from adjacent cities, and to general awareness of blackouts until too late to attend games personally).

Summary of TV Impact

The report summarized the history of television's impact on college football attendance as going from "imperceptible" in 1948, when there were less than a million TV sets, to "perceptible but small" in 1949; "substantial" in TV areas in 1950 despite attendance gains elsewhere to "falling attendance everywhere" in 1951, but with a "a relatively smaller loss in TV areas with the end of unrestricted telecasting of college games."

The study showed that "colleges competing with televised football in 1951 reported a loss of 1.5 million ticket sales compared to their 'expected' attendance based on the pre-television levels of 1947-48," while "colleges with no TV competition boosted 1951 paid attendance by 318,000 over their 'expected' 1947-48 average." Putting the 15% loss in TV areas with the 6% gain in non-TV areas, compared to 1947-48, the report found a "TV differential" of 21%.

Overall paid admissions to college football games totaled 13,930,000, it was reported, for a decline of about 6% from the previous year's figure.

The following table was presented to show that "in heavily saturated television areas, attendance trends are markedly lower":

Per Cent of Expected Attendance*	Large Colleges	Medium Colleges
Areas where fewer than 40% of families own TV	113.7%	132.2%
Areas where 40% or more of families own TV	85.0%	75.5%

* "Expected" attendance is actual average paid attendance reported by each college for the two pre-television years 1947-48.

Regarding findings that small colleges suffered less from television in 1951 than large ones did, the report cited "the greater importance of student ticket sales among the small colleges" and suggested: "One would expect that the small college game attracts fewer 'marginal attenders' who are likely to succumb to TV competition than the larger schools do."

As between TV owners and non-

THAW TO BE THWARTED?

Law Suit Looms

APPEAL to broadcasters and the public not to be disappointed if the FCC's freeze-end order is held up by court actions was made last week by Washington radio attorney Arthur Scharfeld, president of the Federal Communications Bar Assn., in a speech before the Georgia Radio Institute at Athens, Ga. (see Institute story, page 24).

After reciting some of the possible actions that might be taken against the Sixth Report and Order [B•T, April 14], Mr. Scharfeld warned that the effective date might be suspended.

"If this should happen, I hope that the broadcasters and the country as a whole will realize that the entire future of television in our country is being shaped in these proceedings and they will not feel that further delay—in aid of effort to effect the best possible television system—is unwarranted," he said.

"After all, it has taken the Commission approximately four years to find what it considers to be the best solution to the television problem. If another few months should prove to be necessary to improve the future of television, we should be neglecting our duty to the country and to posterity to strive for immediate advantage at the expense of achieving the finest possible use of this new and great medium of communication," he concluded.

Generally following the lines of the attack on the Commission's report laid down by FCC Comr. Robert F. Jones in his dissent and speech two weeks ago before the Ohio Assn. of Broadcasters in Columbus [B•T, May 5], Mr. Scharfeld cited the following "weaknesses" in the Commission's action:

(1) Only through rule-making may anyone get a channel into a community not now assigned that channel. This means that a prospective TV applicant may expend money, time and energy in convincing the Commission that a certain channel should be reassigned, but there is no certainty that the applicant who got the channel reassigned will be the one who gets the grant.

(2) Technical standards were not established before the assignments were made. Thus, "participants . . . were not informed of the rules of the game until after the game was over." Unfairness of this was illustrated in the case of one prospective telecaster who had a VHF assigned to his community in the proposed 1951 Third Report which nobody opposed, awoke April 14 to find it gone. Because the Commission decided that co-channel separations in his area must be 220 miles, rather than the 180 miles it had proposed, the FCC found it necessary to assign his city's channel to a nearby community which had had its two VHF channels deleted because of the wider separations. Other "rules of the game" changed without notice were maximum powers and antenna heights.

(3) Competitive advantage for VHF stations over UHF illustrates the unfairness of the Report. VHF channels are permitted extra-wide coverage, while UHF channels by their nature are constricted in service areas. Intermixture of VHF and UHF is another "unfair" decision. Cities having VHF service are in most cases close to set ownership saturation, and thus makes it doubly difficult for a UHF station to start as a competitive equal with the existing station or stations.

"There appears to be a basic flaw in the Commission's standards permitting the use of maximum power

Merchandising LOS ANGELES TV HEADLINER!

"Foods for Thought"

with BETTY HOYT and guests

AN OUTSTANDING FOOD MERCHANDISING PROGRAM FOR SELLING THE BILLION-DOLLAR SOUTHERN CALIFORNIA FOOD MARKET

Here's the kind of TV show food advertisers dream about — and the wise ones take advantage of! Results prove it's the kind of show Southern California homemakers like, too. Betty Hoyt gives up-to-the-minute market news... the best buys of the day... menu ideas, etc. Each day the "best buys" come from a different grocery company. A rotating plan gives all markets a chance: supers, small chains, independents. What's more, Betty Hoyt and her staff work right with these stores... arrange for shelf and stack displays and get other point-of-sale merchandising aids. Tie-in grocers' ads feature TV specials. Spots are available on "Foods for Thought" *at the moment!* Time: 3:00 to 3:30, Monday thru Friday. For full details, contact KNBH, Hollywood, or your nearest NBC Spot Sales Office.

'I Love Lucy' Tops In Two Nielsen Polls

(Report 215)

NATIONAL ratings for top ten television programs for a two week period ending April 12 have been released by A. C. Nielsen Co. as follows:

NUMBER OF TV HOMES REACHED

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	11,055
2	Arthur Godfrey & Friends (CBS) (Liggett & Myers Tobacco)	8,354
3	Arthur Godfrey & Friends (CBS) (Pillsbury Mills Inc.)	8,138
4	Red Skelton (NBC)	7,956
5	Texaco Star Theatre (NBC)	7,440
6	Your Show of Shows (R. J. Reynolds) (NBC)	7,136
7	You Bet Your Life (NBC)	7,083
8	Your Show of Shows (Participating) (NBC)	6,915
9	Colgate Comedy Hour (NBC)	6,870
10	Fireside Theatre (NBC)	6,578

PER CENT OF TV HOMES REACHED IN PROGRAM STATION AREAS*

Rank	Program	Homes %
1	I Love Lucy (CBS)	68.2
2	Arthur Godfrey's Scouts (CBS)	60.0
3	Arthur Godfrey & Friends (Pillsbury Mills Inc.) (CBS)	56.2
4	Arthur Godfrey & Friends (Liggett & Myers Tobacco) (CBS)	55.0
5	Red Skelton (NBC)	49.9
6	Texaco Star Theatre (NBC)	46.1
7	Your Show of Shows (Participating) (NBC)	45.7
8	Your Show of Shows (Reynolds, R. J., Tobacco) (NBC)	45.4
9	You Bet Your Life (NBC)	44.1
10	Colgate Comedy Hour (NBC)	43.2

*The Nielsen "per cent of homes reached" gives a relative measurement of the audience obtained by each program in the particular station areas where it was telecast—all TV homes in those station areas able to view the telecast being taken as 100%.

All Night TV Pays Off For WDTV

ALL-NIGHT television, according to Harold C. Lund, general manager of DuMont's WDTV (TV) Pittsburgh, can be a profitable operation. And he has the profitable operation to prove it.

WDTV, currently the only television station operating around the clock, found swing-shift programming a paying proposition from the start, eight weeks ago. Right now, advertisers are waiting to get on.

Mr. Lund conceived of all-night programming in response to letters from swing-shift workers in Pittsburgh's industries who complained that they reached home in time to see only a little TV each night—or maybe none at all. A check of steel mills and other plants indicated there would be a potential audience of about 200,000 swing-shift employes.

So advertisers were lined up and WDTV, which had signed off at 1 a.m. on the average, started programming on through the night, Monday through Friday.

The first feature is sponsored on a rotating basis. After that, the advertising consists of spot announcements. Rates are "a little lower" than the station's class C charges, Mr. Lund reports. WDTV relies on film for its swing-shift programming, and employs about 10 persons through the night. Frequently, films which have been shown previously on the station during the daytime are repeated in the early morning hours. But, Mr. Lund points out, this is an entirely different audience anyway. A serial is carried regularly at 3:30 a.m. and has won a considerable following.

A short time ago, Guidepost Research, Pittsburgh, took some ratings on the post-midnight showings. At midnight, Mr. Lund said, the rating was 29.4. From there it graduated down to about 5 at 3 a.m. From 4 to about 6 o'clock it hovered around 2. Then it started to pick up, and jumped substantially with the advent of "morning" and the start of NBC-TV's two-hour *Today* program at 7 a.m.

Hoffman Sees Annual Set Replacement at 8 Million

SIZE of the TV receiver replacement market was put at a potential of 8 million sets a year when 86% saturation of all the families in the U. S. occurs, according to Hoffman Radio Corp. President, H. L. Hoffman last week at the San Francisco convention of the National Federation of Financial Analysts Societies.

Mr. Hoffman said the 86% mark

Air Hazard Bill

(Continued from page 73)

[AT DEADLINE, May 5]. They admitted that it was ill-advised and done without coordination with the Washington office. The press release by ALPA President Clarence N. Sayen "viewed with alarm the increasing number of TV towers being erected and concurs with recent restrictions on TV tower heights recommended by the aviation industry."

Mr. Sayen also said that "obviously it would be much more to the public's benefit to regulate the erection of such towers now than to have them moved or razed after it is proven through air crashes that they are unsafe."

The ALPA, at a meeting of the Chicago Airspace Subcommittee last March, submitted recommendations to restrict heights and sites of TV antennas [B•T, April 7].

Under present FCC procedures, all antennas more than 500 ft. above ground must be submitted to regional Airspace Subcommittees for "aeronautical study." It is the function of the subcommittees, composed of representatives of the CAA, civil airlines, military services, etc., to determine whether a proposed antenna would be a hazard to air navigation.

The present study was begun after aviation organizations became alarmed at reported 1,000, 2,000 and 3,000-ft. TV antennas. Some have talked of going to Congress for legislation to restrict TV antenna heights, while others have suggested single antenna locations, radio warning devices on towers, a system of short towers and high powers, among others. This limited height idea was specifically frowned on by FCC Comr. Edward M. Webster presiding at the first meeting. He said tall towers were fundamental in the FCC plan.

MONTCLAIR TEST

Educators Hail Results

AN experiment in education by television—an entire day of school programs for classroom use, characterized as "a history-making experiment"—was conducted by the Montclair (N. J.) State Teachers College in conjunction with the Allen B. DuMont Labs. last Wednesday. It was pronounced a significant success.

The college produced live shows on such subjects as Spanish language, music appreciation, map making, etc., which were transmitted by DuMont's UHF experimental station in New York and received on sets installed in a dozen Montclair and Bloomfield, N. J., schools. Eight programs were presented, designed for different grades.

TV work, such as production, direction, writing, camera work, etc., was handled by members of the college's TV workshop, which is assisted by a grant from the Allen B. DuMont Foundation. The pickups were relayed by microwave to the DuMont UHF transmitter in New York for broadcast.

Educational leaders were enthusiastic with the results which they felt were indicative of far-reaching future application of TV to teaching.

New Tenn. Co-axial

AT&T has commenced installing a new coaxial cable between Chattanooga and Knoxville to supplement present wire lines. Cable, scheduled to be ready for service late this year, will contain eight coaxial tubes, four to be equipped for telephone service initially. Others can be also used for phone service or can be equipped for TV program transmission if ordered for that use.

SKIATRON

Second Phase in Sept.

SECOND phase of the Skiatron plan for SubscriberVision is tentatively planned to begin in New York sometime in September, it was indicated last week, with the start of controlled tests similar to those conducted by Zenith in Chicago a year ago. WOR-TV New York is cooperating with Skiatron in the development of the system.

First phase of the pay-as-you-see television is virtually complete with development of the system on paper and on the air, so far by closed circuit, officials reported. Unlike Zenith's Phonevision, which involved the calling of telephone operators for unscrambled sight and sound, the Skiatron plan calls for insertion of a notched key-card which can be purchased for the program well in advance of actual transmission.

The New York organization, headed by Arthur Levey as president, is now working on test programming, time clearance on commercial outlets, selection of test broadcast periods in audience terms, and other related problems, all of which will be completed, spokesmen said, before test permission is requested from the FCC. September is the test goal, but not necessarily the deadline, it was pointed out.

It is assumed that permission will be granted to operate SubscriberVision with several hundred sets—installed in consumer homes—and that tests will run for several months.

POPPELE ELECTED

To Skiatron Board

ELECTION of Jack Poppele, vice president of WOR-AM-FM-TV New York, to the Skiatron Electronics & Television Corp. board of directors was announced by Arthur Levey, Skiatron president.

Mr. Poppele

Mr. Levey pointed out that the addition of Mr. Poppele to the board has important long term significance in view of Skiatron's system of pay-as-you-see TV. He disclosed that WOR-TV has been broadcasting Skiatron's system, known as Subscriber-Vision on an experimental basis for more than a year. Mr. Poppele is a past president of the Television Broadcasting Assn.

POLITICOS TO GET TUTORING

CBS-TV Plans School on TV Technique

PLANS for a television school for political hopefuls were announced last week by CBS-TV, which said all Presidential aspirants and senatorial candidates of the major parties have been invited to enroll and that it was hoped, later, to expand the school to include all members of Congress.

Both group and private instruction sessions are planned, to teach "students" such fundamentals as how to walk, sit, stand, talk and read a script. Films and TV recordings of the candidates will be reviewed and analyzed. Live cameras will be used for classroom practice, and monitoring devices will enable each candidate to study his own performance.

First private sessions, CBS-TV said, will be for Sens. William Benton (D-Conn.) and Irving M. Ives (R-N. Y.). Presidential aspirants who have been invited include Sens. Robert Taft (R-Ohio), Estes Kefauver (D-Tenn.), Robert Kerr (D-Okla.), Richard Russell (D-Ga.) and Brien McMahon (D-Conn.); Gen. Eisenhower, Harold E. Stassen, California Gov. Earl Warren and W. Averell Harriman.

"Faculty" for the school, to be conducted at WTOP-TV Washington studios, will include Bill Wood, Washington director of TV news and public affairs for CBS-TV; Producer Charles von Fremd, and Associate Producer Alma Walker.

"There is no doubt that television will play an important part in the choice of a President in 1952," Mr. Wood said. "How a candidate handles himself in front of the cameras can be decisive to his chances. Anyone with a background of public life can learn the talent requirements of the television medium with a minimum of instruction, and greatly increase his appeal to the average viewer, who represents a lot of votes."

AWARD for modesty in television apparel has been given to Rosemary Olberding, WLWT (TV) Cincinnati, by a Catholic church in Covington, Ky. Miss Olberding is scheduled to appear on new show, *Captain Glenn's Play Club*, beginning May 10.

TV BIDS

Two More File at FCC

(Also see digest, page 73)

TOTAL of two new television applications was filed at the FCC last week, but one of them was immediately returned. Also returned last week were applications from KNOE Monroe, La.; KDAL Duluth, Minn.; WAPA San Juan, P. R.; WILK Wilkes-Barre, Pa.; WFRO Fremont, Ohio, and bids for Albuquerque and Santa Fe by Greer & Greer.

The accepted application was from KITO San Bernardino, the first station to apply for TV outlet in that city. It seeks UHF Channel 18 with an ERP of 81 kw visual. Its antenna would be 3,688 feet above average terrain, located in the San Bernardino Mountain Range north of the city; it would be 110 feet above ground. Construction cost was estimated at $179,821.

The returned application was from KEVT Kerrville, Tex. Besides being filed on the old forms, it gave its frequency, ERP and transmitter location on a "to be determined" basis, not allowable under the Rules as set forth in the FCC's Sixth Report and Order [B•T, April 14].

Meanwhile, five prospective applicants announced their intentions of filing for TV stations.

Ted R. Gamble, director of the nation's war bond program during the war, is president of Northwest Television and Broadcasting Corp., a new Portland, Ore., corporation. He and Mrs. Gamble have 21% interest in KLZ Denver, and he has 4% of WFRS Grand Rapids, Mich., and 49% of KCMJ Palm Springs, Calif.

Other officers are John D. Keating, associated with KPOA Honolulu, KILA Hilo and KYA San Francisco, vice president; Elroy McCaw, Centralia, Wash., treasurer, and Gale Livingston, Portland, secretary. Mr. McCaw has 50% interest in KELA Centralia, Wash., 21% of KLZ, 50% of KPOA, KILA and KYA, and 33% of KYAK Yakima, Wash., and KALE Richmond, Wash.

WTRF-AM-FM Wheeling, W. Va., announced last Tuesday that it planned to file for Channel 7 with an ERP of 316 kw. Cost of the station was estimated at $700,000.

WSTV Steubenville, Ohio, reported that it will amend its pending application and ask for Channel 9 with an ERP of 200 kw. Construction cost was estimated at $400,000, with first year operating cost about $250,000.

In West Palm Beach, Fla., Palm Beach Television Inc. has been formed to apply for Channel 5. President of the firm is William H. Cook, Palm Beach attorney. Vice president and general manager is J. Robert Meachem, owner of WEAT Lake Worth, Fla., and former owner of WEIM Elmira, N. Y. List of 19 stockholders includes Theodore Granik of *American Forum of the Air* fame, and local businessmen.

WJJL Niagara Falls, N. Y., is preparing to file for a TV outlet, the station announced last week. WJJL did not reveal the channel it planned to apply for.

Telestatus

(Continued from page 76)

is the present saturation figure for refrigerators. That would mean a total of 36 million TV sets in use, he said.

With the present 17 million TV receivers in use, the replacement market is estimated at 4 to 5 million, he said. Mr. Hoffman predicted that 5½ million TV sets would be sold in 1952, 6½ million in 1953 and 8 million in 1954.

Glen McDaniel, president of the Radio - Television Manufacturers Assn., earlier this year had quoted industry leaders whose estimates ranged from a high of 5.4 million to a low 4.5 million.

EDUCATORS URGED

Act on TV Channels--Hennock

CALL for action to secure educational TV stations was sounded by FCC Comr. Frieda B. Hennock fortnight ago at the convention of the National Jewish Welfare Board in Detroit.

"Action in the form of applications for TV licenses is needed and needed now, if we are to insure against the loss of this opportunity by default," Miss Hennock said. She added: "See to it that all your community's educators, schools, libraries and museums, civic organizations and public welfare groups of all denominations, join in a combined effort to get this station on the air."

Miss Hennock referred to estimates of 50 million TV sets in the near future, continuing: "Truly, 50 million TV sets could become 50 million of our best equipped classrooms."

WABD(TV) SALES

Separated From Network

SEPARATION of local sales staff from the network sales group was effected in New York last week by Chris J. Witting, director and general manager of the DuMont Television Network, as the first step toward establishing WABD (TV) as an autonomous operation.

Local salesmen will be directed by Richard E. Jones, newly-appointed manager of DuMont's O&O stations, who is assembling WABD's administrative, sales and programming staff at 515 Madison Ave., New York.

Network salesmen will continue under the supervision of Ted Bergmann, DuMont's sales head.

George Monaghan, formerly of the sales staff of WOR New York, was added to WABD's local retail sales. Other WABD sales members are Ralph Baruch, William Vernon, Robert Adams, Richard Hamburger and L. Wynn.

MORNING TELEVISION

Gets Results!

WGN-TV's *"Chicago Cooks with Kay Middleton"* program, now seen at 9:00 - 10:00 a. m., Monday through Friday, came up with an increase in mail the first week at this new time.

Letters came from 58 Illinois cities in addition to Chicago... 13 cities in Indiana... 4 cities in Wisconsin ... 2 cities in Michigan — TOPS in television coverage.

"Chicago Cooks" is a great buy in Chicago, delivering a large, loyal audience, and top results for your advertising dollar. Check your WGN-TV representative for available participations.

FINAL TELEVISION ALLOCATIONS REPORT

EXTRA COPIES AVAILABLE NOW AT $3.00 EACH

This is the complete report—196 printed pages—just as the FCC released it, Monday, April 14, 1952.

This volume shows the complete city-by-city breakdowns for all 2,053 proposed stations in 1,291 communities. There are sections on antenna heights, educational reservations, power, procedures, Hennock's and Jones' opinions, zoning and mileage separation.

You'll want library copies, home copies, tear copies and working copies. Please use the coupon below and order today. Limited Supply.

owners, the study found that in television areas "the overwhelming majority even of non-owners report watching TV programs at least occasionally."

In special studies in Boston and Pittsburgh it was found that "the average 1951 attendance of our past attenders. . . . was less than one game per fan, and even in pre-television years in such cities which had strong teams the average fan would attend no more than two or three games a season."

Thus it was held that "if non-owners can partially satisfy their football interest by watching a few games on television during the season, even a reduction of one game in their annual attendance on this account would make it extremely difficult, from a survey point of view, to establish any significant differences from the behavior of TV owners."

In Boston it was found that TV owners queried had attended an average of .80 games in 1951, compared to .82 for non-owners. Those who had had TV sets less than two years attended an average of .76; those with sets for two years or longer, .84. In Pittsburgh, on the other hand, those with sets less than two years attended slightly more games than those who had had sets longer than two years.

Sampling Not Conclusive

Nationally, it was reported, "during the nine-week football season from Sept. 29 to Nov. 24, 1951, in areas where there was no television competition, an average of 5.3% of all fans attended a game in any given week. In television areas, by contrast, only 3.3% of the fans attended in the average week.

"On blackout days in the television areas, 5.5% of the fans attended a game, but when a game was available on TV, only 2.5% appeared at the stadium. Had our national sample been larger, such differences could have been accepted with complete confidence, but as it is, they must be viewed as suggestive rather than conclusive."

It was pointed out that "the great majority of fans neither attend nor watch a college game on TV on the average Saturday." In Pittsburgh, however, it was found that half the fans either watched a game on TV (30%) or listened to one on radio (20%), while in Boston 17% listened on radio while 16% watched on TV. Nationally, however, there were no figures on radio listenership—a lack which the report termed "unfortunate."

NORC also reported that "when asked how they first became interested in college football, only one attender in 100 mentioned television viewing as the reason."

Among Pittsburgh and Boston fans who said they did not plan to attend a game during the 1951 season, 10% mentioned TV as one reason.

The NORC survey, a $50,000 project, involved two national surveys conducted on a personal interview basis; pre-season questionnaires to college athletic directors; week-by-week game reports from each NCAA college playing football; personal interviews in Boston and Pittsburgh, with telephone callbacks, plus telephone surveys in six other cities; questionnaires distributed at 37 games of 16 colleges; mail questionnaire surveys of a cross-section of alumni of four universities; and collection of game-by-game attendance data for the past five seasons from a cross-section of high schools throughout the nation.

The NCAA TV committee for 1951 was headed by Ralph Furey of Columbia U. and Thomas J. Hamilton of the U. of Pittsburgh, while Edwin S. Reynolds was NCAA television program director for that season. The current TV committee, working up next fall's program, is headed by Robert A. Hall of Yale, with Asa Bushnell, Commissioner of the Eastern Collegiate Athletic Conference, as TV director.

ABC-TV SUSTAINERS

May Cutback in South

ABC-TV last week was pondering a cutback in the amount of sustaining programming it would deliver during this summer to affiliates on a southern leg of the network to Atlanta and Birmingham.

The question, spokesmen said, is being considered in negotiations with WLTV (TV) Atlanta. They conceded the negotiations may lead to an adjustment for the station in its affiliation contract, but insisted the discussions were entirely "amicable."

In response to reports that ABC-TV sustaining service in the South was being substantially curtailed, they said any cutbacks would be for the summer months and that the extent of reduction had not been decided.

They said two affiliates would be affected: WLTV and WAFM-TV Birmingham.

MICHIGAN TV TAX

Levied on Boxing Proceeds

TAXING television proceeds at boxing matches became legal in Michigan when Gov. G. Mennen Williams signed a bill recently enacted by the state legislature.

Without specifically mentioning TV, the measure provides that the present 5% and 10% tax shall be levied on all sources of revenue at boxing matches, excepting food, refreshments and programs. The 5% tax applies to championship matches and the 10% tax to other sports events.

COOPERATIVE grocery advertising as shown here, is used on WTTV (TV) Bloomington, Ind., with 55 members of Independent Grocers Alliance of Central and Southern Indiana and their distributor, John Figg of Bloomington, pointing up featured items during NBC-TV's *Dangerous Assignment* presented on the station, 8 p.m. Wednesday. It is the group's only advertising. Station reports success by noting an example where weekly sales jumped from 20 to 1,000 cases of a private brand of canned fruit as a result of the live commercials, delivered by George Langwell, a participating grocer. Six stores are mentioned on each program.

SPORTS AIDS

RTMA Group Offers Plan

ALL SEGMENTS of the radio-television industry were urged last week by J. B. Elliott, RCA Victor Division and chairman of the Radio-Television Mfrs. Assn. Sports Committee, to join in RTMA's new year-round campaign to promote attendance at sports events [B•T, April 21].

Pointing out that RTMA already has made considerable progress in improving goodwill between radio-television and sports industries through cooperation of set makers, distributors and dealers, Mr. Elliott said his committee has submitted detailed suggestions on steps to be taken by industry segments.

Promotion of televised sports and frequent suggestion to "see the game or event in person" will be contained in consumer advertising.

Manufacturers were advised to ask distributors to aid local Distributor Television Sports Committees, organized in cooperation with RTMA, to build goodwill among local sports officials. The report suggested that cooperation of RTMA members along with plans for the World Series should increase attendance at baseball games as well as increase receiver sales. "The problem of a drop of 20% in attendance in the minor leagues in 1951 is still cause for concern in relation to future telecasts," the report said.

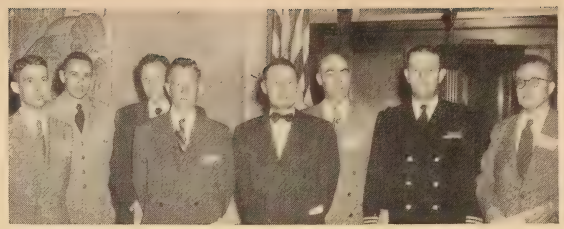
In further recommendations the committee urged RTMA members "to cooperate with the home club, team or arena in purchasing seats or a season box in radio-television row at the ball park; urge employes to attend events and to consider sponsorship of sports events.

Color Ban

(Continued from page 71)

materials which will bear on the ourse of the civilian economy dur- ng the remainder of the year. A ymposium on component parts lso commanded the attention of lectronic industry members (see tory this page).

While NPA is still pursuing its olicy of easing allotments to adio-TV manufacturers and broad- asters, both Messrs. Fleischmann nd Fowler urged Congress last eek to extend controls on ma- erials beyond June 30 when the)efense Production Act expires.)efense needs will not be met be- ore next spring, they testified be- ore the House Banking & Cur- ency Committee.



The prospect for a "free market" n materials has been dampened by trikes and labor unrest, with the esult that steel, copper and alum- num supplies could suffer appreci- ably in coming months. Earlier talk of decontrol has evaporated and, while manufacturers and broad- casters currently are receiving allo- ations for appliance and construc- ion needs, notice has been served, n effect, that the picture could hange even short of all-out war.

Intensified labor strife could affect supply of these three mate- rials for receivers, tower struc- ures, transmitters, antennas, building alterations and various component parts.

Capsule Summation

This is a capsule summation of the status and prospect for each key metal:

- Steel—Threat of a prolonged strike still hangs over industry despite lifting of the freeze on shipments by the government. Over 2 million tons already lost to industry. Could have major long-range effect on new TV station equipment or radio-TV construction projects on which freeze was partly lifted.
- Aluminum—The government is thinking in terms of "possible" decontrol by mid-'53—or perhaps during the second quarter—but not before, it was learned authoritatively last week. Possibility of wildcat strikes among aluminum workers was held out.
- Copper—As with other materials, allocations are slightly higher for May than April but the lowest for refined copper, copper alloy and scrap since controls began. Copper wire is short for loudspeakers. Again, however, threat of strike in the Chilean mines imperils imports of this scarcest metal.
- Nickel and cobalt—Still in relatively tight supply. Industry has used conservation and substitution techniques to meet demands for loudspeakers and other parts using these allows. Both under complete allocation.
- Selenium—There has been a temporary improvement in supply but the outlook is still gloomy for manufacturers of rectifiers, though they may apply for foreign imports.
- Mica—Substitutes are being developed for this material used in insulating electronic items.

LEADERS IN ELECTRONIC components field at the three-day Washington symposium (l to r): J. G. Reid Jr., symposium chairman, National Bureau of Standards; Lt. Col. C. B. Lindstrand, USAF, Electronics Production Resources Agency; A. V. Astin, acting director, NBS; J. A. Milling, Electronics Production Board; Glen McDaniel, president, Radio-Television Mfrs. Assn.; Edwin A. Speakman, Research & Development Board, Dept. of Defense; Capt. Rawson Bennett, USN; G. W. A. Dummer, Telecommunications Research Estab., England.

* * *

D. C. SYMPOSIUM

RTMA and AIEE Sponsor Meet

RADIO and television set manufacturers are operating without the handicap of material shortages and have not curtailed production in 1952 or 1951 because of shortages, J. A. Milling, director of the Electronics Division, National Production Authority, told the Electronic Components Symposium last week. ★

Three-day meeting held May 5-7 in Washington was attended by more than a thousand representatives of industry, engineering and government. Sponsoring the symposium were Radio-Television Mfrs. Assn., Institute of Radio Engineers and American Institute of Electrical Engineers.

Mr. Milling addressed the opening session, along with Glen McDaniel, RTMA president, Capt. Rawson Bennett, USN, and others. In analyzing electronic production problems from the defense standpoint, Mr. Milling said "consumer demand has been the determining factor of most production schedules."

A high spot of the three-day meeting was a Tuesday evening session on transistors. J. A. Morton, Bell Telephone Labs., was chairman of this discussion. Other speakers included W. R. Sittner and P. S. Darnell, both of Bell; R. F. Shea, General Electric Co., and Lt. Col. W. F. Starr, Electronics Production Resources Agency, Dept. of Defense.

Mr. Shea demonstrated a "transistorized" megaphone using only tiny batteries and two transistors about the size of a pea. No external connections were needed.

Potentialities of the transistor were discussed, with speakers commenting on its limitations. These include power and ability to operate only at relatively low frequencies. Advantages include reliability, indefinite life and improved design as a result of saving in space and new circuitry.

A radio set using nine transistors was demonstrated. It was able to pick up seven stations on the sidewalk outside the Interior Dept. auditorium. A power supply weighing only a few ounces is used.

Mr. Shea predicted transistors will be used in TV sets, though probably not in the front end.

Col. Starr said transistors are now available from a number of companies, listing them individually by type and monthly production capacity. He explained that deliveries can be made at this time in small quantities.

Capt. Bennett said the upcoming television boom "is the last of such opportunities," recalling that the electronics industry "in terms of mass production has always been geared to the exploitation of new entertainment media, first radio broadcasting and now television." He added that "within a matter of years no wishful thinking will be able to hide the fact that entertainment equipment markets will be replacement markets."

He was concerned over realiability of equipment, asking manufacturers if they can "any longer afford to allow equipment unreliability with an eye to tube sales."

"People are asking each other, what kind of TV does not require frequent service calls," Capt. Bennett said. "If customer dissatisfaction is bad at present, what will it be when the more ticklish UHF equipment hits the market? Who will service it, if it breaks down too much?"

RTMA President McDaniel cited a remark by Gen. Carl Spaatz that superior electronics will be decisive in the next war. He spoke critically of the lack of project responsibility in military procurement. Efforts of manufacturers to spread work through subcontracting are handicapped by reduction of contractor's profit in such cases and a proposed requirement that prime contractors be responsible for compliance by their subcontractors.

Importance of a free flow of information between tube manufacturers and circuit engineers was stressed by Robert L. Kelly, manager, application engineering field group, RCA Tube Dept.

PARAMOUNT

Scophony Relationship Studied

FOR the second consecutive week, FCC counsel explored the relationship of Paramount Pictures and Scophony Corp. of America as hearings continued on the so-called Paramount case. Basic in the case is whether the Commission will approve the merger of ABC and United Paramount Theatres Inc.

Questions directed by FCC counsel to Arthur Levey, president of SCA (now Skiatron Corp.) implied that at best the dealings between Scophony management and Television Productions Inc. and General Precision Equipment Corp. tended to be in restraint of trade and at worst attempts to suppress the development of TV.

Hearing, adjourned last Thursday, resumes today (Monday) with A. H. Blank, a UPT director, on the stand for cross-examination by FCC counsel on Des Moines theatre acquisitions and booking practices.

Following Mr. Blank's testimony, Mr. Levey will return to the stand on Wednesday. Then Dr. A. H. Rosenthal will testify. Dr. Rosenthal, a physicist and electronic engineer, was connected with Scophony Ltd. of England, the parent company to SCA, for several years before joining the American firm in 1943. While in England, Dr. Rosenthal contributed to some of the more important Scophony developments including the dark trace Skiatron TV tube.

Later, six theatre operators will testify. They are: Mrs. J. M. Anderson, Boone, Iowa; Carl Knudson, Seward, Neb.; Fred F. Curdts, Greenville, S. C.; Charles Waeder, Miami, Fla.; Sam J. Myers, Chicago (a brother-in-law of Barney Balaban, Paramount Pictures president), and Arthur F. Saas, also of Chicago.

After the theatre operators, Dr. Allen B. DuMont will return, and then Barney Balaban is due to come back.

Mr. Levey was questioned about letters he had written to Earle C. Hines, president of GPE, copies of which were sent to Paul Raibourn, a Paramount Pictures executive then. Mr. Raibourn is a Paramount Pictures vice president now and is also president of Paramount Television Productions Inc., licensee of KTLA (TV) Los Angeles.

Letters Exchanged

In some of his letters to Messrs. Hines and Raibourn, Mr. Levey sought aid from GPE and TPI, which he indicated had been promised by the two firms but which was not forthcoming.

When Dr. Rosenthal was hired by SCA, it was apparently with the understanding that a laboratory would be built for him so that he could continue his work. However, GPE and TPI did not furnish the funds for the laboratory as quickly as Mr. Levey had hoped.

In one letter to Mr. Hines, Mr. Levey asserted:

. . . I believe it was generally understood that the engagement of Dr. Rosenthal as Director of Research and Development for SCA and the establishment of an electronic laboratory are indivisible.

In May, 1943, Mr. Levey claimed that the Class "A" stockholders (Scophony Ltd. of England, Mr. Levey and three others) had provided more than their share of work and effort, and asserted that GPE and TPI, as the Class "B" stockholders were acting as "squatters," doing little to aid SCA.

Mr. Levey wrote to Mr. Hines, sending a copy to Mr. Raibourn:

. . . The "A" stockholders of this company are entitled to participate fully in the rewards due pioneering enterprise. They have labored over fourteen years and spent more than $1,600,000 to create and develop the present unique Scophony system of 'supersonic' television projectors, and, *in addition*, have proved by a demonstrable model the advanced *'Skiatron'* method of television which *combines* the best features of *both 'electronic'* and *'supersonic'* methods into a *completely new and novel system of television protected by basic patents* and including (a) *Transmission* . . . (b) *Reception* . . . and (c) *Colour Transmission*, can be reduced from theory to practice. . . .

Experts recently consulted by GPE have stated "The Skiatron inventions enable the achievement of colour television just as monochrome. The inventor—Rosenthal—had a stroke of genius whether by thought or accident."

Similarly the report of the expert engaged by TPI [Paramount] to advise on the Skiatron potentialities is also completely favorable and of such a convincing and compelling nature as to warrant immediate energetic action.

I cannot acquiesce in permitting our licensees (GPE and TPI) to remain simply as 'squatters' *holding very valuable franchises* and doing practically nothing to consolidate and improve our unique patent position, while our competitors energetically proceed to develop 'alternate' methods.

. . . It is therefore for the "B" shareholders now in the fortunate position of benefitting largely by the preliminary work and expenditure of the "A" shareholders, to recognize and energetically support these truly great Scophony inventions which can contribute much in postwar television and *in the public interest*, assist in the nation's recovery program when the present emergency is over.

I do not actually anticipate difficulty (all things considered) in securing approval of GPE and TPI to a sound program of research and engineering development consistent with wartime conditions, as I cannot imagine these companies would wish to be guilty of such business indiscretion.

There were 1,000 shares of both "A" and "B" stock. The "A" stock was distributed to the following:

Scophony Ltd. (of England), 625 shares; Mr. Levey, 125 shares, and one block of 250 shares held b Hans Krafft of London, Englan Otto Augstein of Montreal, Canad and John Augstein of New Yor City.

The "B' stock was owned by GP and TPI, each with 50%.

The English company was puttin in its equipment, transferring it equipment and also its patent ap plications to the American com pany, and in return was gettin stock and having its debts paid of (English funds were "frozen" dur ing World War II).

The Class "A" stockholder elected 3/5 of the board of direc tors, the president and certain other officials. The Class "B" stock holders were entitled to elect 2/5 of the board of directors and cer tain remaining officers.

SCA could not borrow money from any source unless stock holders of each class had been afforded the opportunity to lend the company the same amount of money.

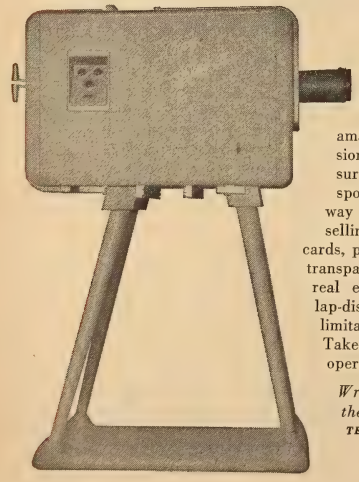
The Class "A" stockholders could not sell their holdings unless they first offered the rights to the Class "B" stockholders. However, the Class "B" stockholders were under no similar compulsion to offer their stock to the Class "A" group and could dispose of it whenever and to whomever they wanted.

The quorum for a board of direc-

ANTI-TRUST SUIT

Includes Eight Producers

ANTI-TRUST suit against National Screen Service Corp. was filed fortnight ago in New York federal court. It also includes the following eight major motion picture producers: Paramount Pictures, Warner Bros., 20th Century-Fox, RKO, United Artists, Columbia and Universal.



Paramount Pictures is the licensee of KTLA (TV) Los Angeles. It is one of the parties to the so-called Paramount hearing now going on which has as it major consideration the merger of ABC with United Paramount Theatres Inc. License renewal of KTLA is also one of the points at issue in that hearing.

All of the producers (United Artists is a distributing organization) are parties to the movie industry's request to the FCC for exclusive theatre-TV frequencies. That hearing was postponed for the third time several weeks ago [AT DEADLINE, April 14] but is expected to be rescheduled in the near future.

The civil complaint by the Justice Department charges violation of the Sherman Anti-Trust Act in that National Screen Service Corp. has a monopoly in the manufacture and distribution of movie trailers and accessories (posters, signs, still pictures and other advertising matter).

The charges link the eight producers with National Screen by claiming that they conspired to assist in the monopoly by giving National Screen sole rights in that field.

PRODUCE PROFESSIONAL COMMERCIALS
AT LOW COST with the New Gray TELOP II

● Now, with the new, versatile Gray TELOP II you can produce and broadcast an amazing variety of professional-quality commercials at surprisingly low cost. Local sponsors will marvel at the way TELOP II presents their selling message with opaque cards, photographs, art work and transparencies. *And* you get the real effect of superimposition, lap-dissolve and fade-out. Only limitation is your imagination. Takes up very little space. One operator does it all!

Write for full information on the new and exciting Gray TELOP II.

GRAY RESEARCH and Development Co., Inc., 598 Hilliard St., Manchester, Conn.
Arthur E. Gilmore, President
Division of The Gray Manufacturing Company—Originators of the Gray Telephone Pay Station and the Gray Audograph

tors meeting was three, but there had to be one representative from each of the Class "A" and "B" stockholders groups present.

Cartel implications are involved in an agreement made in August, 1942, when SCA and Scophony Ltd. agreed to divide the world into two mutually-exclusive non-competing trade areas.

Much of Mr. Levey's testimony revolved around entries he had made in a personal diary which he has kept since 1919. Because he said that the entries were made on the day of the events referred to, or the next day, that part of his testimony—after extended discussions between the counsel for Paramount, former FCC Chairman Paul A. Porter and FCC Counsel Max Paglin—was accepted as part of the record.

Donald A. Stewart, DuMont film manager, preceded Mr. Levey last Monday.

He said that UPT, as a $30,000,000 buyer of film, would put the other three networks to great disadvantage when buying film. Mr. Stewart said that the total buying power of the ABC-UPT would influence the producer to deal with ABC, since purchase of films for TV is not made by competitive bidding.

DuMONT STRIKE

Union Issues Ultimatum

STRIKE was threatened last week by Television Broadcasting Studio Employes Union against DuMont Television Stations WABD (TV) New York, WTTG (TV) Washington and WDTV (TV) Pittsburgh, unless the terms of a new agreement could be reached before this Wednesday.

Local 794 New York, representing about 150 engineers and technicians, voted unanimously Tuesday to call a strike and were assured that the comparable International Alliance of Theatrical Stage Employes locals in Washington and Pittsburgh, representing another 50 workers, would follow suit.

Negotiations for all network-owned stations have been in progress for more than a month. DuMont, through its attorney, Harry Friedman, offered on May 2 to grant a 4% cost-of-living increase, rejected by the union through General Counsel Harold Spivak as being "entirely unsatisfactory and out of line with the prevailing increases given in the industry to employes performing comparable jobs."

DuMont spokesmen said late last week that after their initial offer had been refused, negotiations were to be reopened.

JA Names Brott

LOU BROTT, for past five years head of Washington public relations firm bearing his name, has been appointed sales representative for United Artists Television in that city. Mr. Brott formerly was MBS news editor and public relations director in Washington.

CORONATION COVERAGE

Proposed for Trans-Atlantic Television

COVERAGE of the coronation of Queen Elizabeth II in June 1953, was proposed as first trans-Atlantic telecast last week by J. R. Poppele, vice president of WOR-AM-FM-TV New York, who urged that the Radio and Television Manufacturers Assn. "adopt a spirit of aggressive cooperation by sponsoring the televising of this international event."

Mr. Poppele, who engineered the first trans-Atlantic broadcast when the late Sir Thomas Lipton made a special radio address to the British people over WOR on Oct. 6, 1922, proposed that television could span the Atlantic by one of two methods: A series of ships at fixed locations at sea could be interconnected by microwave relay; or, relays could be installed in airplanes flying circular patterns eight miles above sea level.

"Obviously, the latter suggestion is more practicable since the margin of error will be much less," Mr. Poppele said in his letter to Glen McDaniel, RTMA president. Use of ships would require 100 vessels stationed 30 miles apart, with more than $2 million of TV equipment manned by 200 technicians. The aircraft relay could be established with six planes flying in a circular pattern at altitudes from 30-40,000 feet at 500-mile intervals. In that case, 12 technicians and $500,000 of TV equipment would be required.

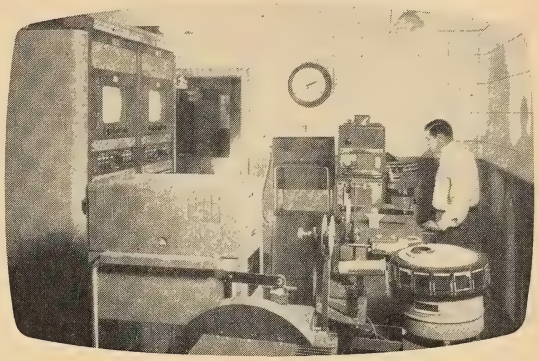
Noting the production cost would be "slight" compared to the overall value to the advancement of the industry, Mr. Poppele said, "the industry regularly televises events of national importance, and while it is not necessary that television continue to prove itself, I believe that this event of universal significance can be brought to the American people."

The WOR-TV vice president estimated that by coronation time there will be another four or five million TV receivers in the U. S. to bring audience potential to 100 million persons.

UTP SHOW GUIDE

To Stress Film Use

A BASIC programming guide which emphasizes the use of film shows will be available to TV station management upon request within the next 60 days, Milton Blink, executive vice president of United Television Programs, New York, said last week in announcing his company's plans for the brochure.



The new service, still in the planning stage, will consider such questions as: why films are used, how a station can merchandise a film, how much sponsors should be charged, and advantages of film over network programming. The brochure also will offer general programming suggestions, Mr. Blink pointed out, and will not be devoted exclusively to film matters.

"Many prospective TV stations are seeking advice from every quarter," the UTP executive said. "We're not going to try to sell them on the idea that film is the answer to all their problems. There are, however, many recognized advantages to film shows, especially for a new station which will be troubled providing suitable programming at the outset.

"UTP is not setting itself up as an oracle in the business," he emphasized, "but lately we have had many requests for advice and suggestions—particularly on the use of films—from station applicants."

DuMont Busy

TWICE an many cathode-ray instruments were shipped by Allen B. DuMont Labs. during the first four fiscal periods of 1952, ending April 21, as for the comparable period last year, Rudolf Feldt, Instrument Div. manager, announced May 2.

IN REVIEW . .

Program: Hats in the Ring, May 4, 43 NBC-TV stations, 2-2:30 p.m.; NBC radio, 2:30-3 p.m.
Film: "The Case for a Republican Congress."
Film Producer: Kirby Hawkes; Byron Studios, Washington.
Cast: Professional actors — Maurice Franklin, Wilfred Lytell, Henry Hamilton. Witnesses—Two Senate, five House members.
Production: Republican Congressional Committee.
Network Producer: Ad Schneider.
Director: Ted Ayres.

THE CASE for a Republican 83d Congress was placed before the American viewing and listening people in what may well be the first political presentation of its kind on television or radio this election year.

As a political venture, the GOP Congressional Committee kicked off NBC's ambitious new radio-TV series, *Hats in the Ring*, with a wind unlikely to sway low political convictions one way or another.

But as broadcast fare, the network has come up with a stimulating series likely to command a faithful share of the radio and television audience before the national conventions in July. This opinion is buttressed by the fact that NBC has come up with both flexible format and key political participants.

Obviously wanting no part of the melange that characterizes the philosophical conflicts of the Taft and Eisenhower forces, the GOP Congressional Committee wisely confined itself to a film on "The Case for a Republican Congress." The format it used was that of trial-by-jury.

The Republicans threw together three professional actors (a judge, and a prosecuting and defense attorneys) and seven GOP Senate-House members to justify the 80th Congress and indict the Democratic administration on foreign and domestic issues.

It will come as no surprise that, while the jury must yet render its "verdict" next November, the court was so packed as to invite recollections of the Roosevelt Supreme Court plan over 15 years ago. The "stopper": the judge constantly overruling objections of the defense attorney, who gave the appearance of being a possible candidate for Alcoholics Anonymous.

"Testifying" were such GOP stalwarts as Sens. Styles Bridges (N.H.) and Karl Mundt (S.D.); House Minority Leader Joseph Martin (Mass.); and Reps. Clarence Brown (Ohio), Charles A. Halleck (Ind.), Daniel A. Reed (N.Y.) and Walter H. Judd (Minn.). One by one, they diagnosed the country's ills, ranging from high taxes to the Korean war, and lauded the achievements of the 80th Congress.

This initial effort was filmed by Bryon Studios, Washington, and written, directed and produced by the congressional committee with the cooperation of the Republican National and Senatorial Committees. In an unusual move, NBC-TV aired the film 2-2:30 p.m. and the tape on radio 2:30-3 p.m.

Aside from the 43-plus TV stations which carried it live, Rep. Leonard Hall (R-N.Y.), Congressional Committee chairman, explained that 16 copies of the film were made for TV showing throughout the country.

The Democrats were to present their case for an administration Congress yesterday (Sunday) after which all Presidential aspirants will have an opportunity to state their qualifications—each to his own format.

Major problem bothering NBC network officials last week: How to cram in every candidate before the conventions with everybody throwing their hats in the ring.

Program: Kentucky Derby, at Churchhill Downs, Louisville. CBS Television, May 3, 5-5:45 p.m. Fed by WHAS-TV Louisville. (Also covered by CBS Radio)
Cast: Bryan Field, Bill Corum, Sammy Renick, Pete French.
Producer: Judson Bailey (CBS); associate producer, Sandy Sanders (WHAS-TV).

EVERYONE and everything clicked to give the nation a good show as the Kentucky Derby was telecast live for the first time in its 78-year history. Racing fans and those attracted by the glamor of the historical event were given 45 fascinating minutes of viewing, climaxed by the two-minute race.

The Gillette-sponsored half-hour segment, starting at 5:15 p.m. EDT, opened with a view of the grandstand from an infield camera, panning the crowd of 110,000. Sammy Renick, ex-jockey, handled early commentary, followed by a Bill Corum commercial.

Pre-race programming was excellent as horses paraded from the paddock and moved toward the starting gate. WHAS-TV Louisville, handling the pickup for CBS Television, had two cameras on the grandstand roof, one on the infield judges' stand and one that looked down into the clubhouse garden and paddock.

Mr. Renick, who tended to overdramatize, had difficulty pacing his description of the individual horses with the camera closeups. In contrast were the calmer narrations of Pete French, WHAS-TV special events announcer, handling color, and Bryan Field, who called the race.

Gillette appropriately used a horsey commercial shortly before the race started and then kept off the screen for 10 minutes. Mr. Field made it easy for viewers once the horses left the gate. Camera work was excellent though the horses almost disappeared from view a few seconds, just before coming into the stretch, because of shadows, obstructions and background. Going down to the wire, Mr. Field went out on a limb by predicting that Sub Fleet, coming up fast on Hill Gail, would never make it. His judgment was authenticated as Hill Gail won by two lengths.

Post-race ceremonies were interrupted by a network bulletin announcing the Supreme Court's ruling in the steel case.

The race was piped to New York and the network by a reversed spare circuit between Louisville and Dayton, possibly losing some quality en route. Betting and crowd both set records, which may be of interest to those who claim TV spoils sports attendance.

Fast time was made by wedging a kinescope of the race into the Ken Murray show on CBS Television the same evening (8-9 p.m. EDT).

Program: White House Tour, May 3, NBC-TV, CBS-TV, ABC-TV; 4-4:48 p.m., EDT Live.
Cast: President Harry Truman, Walter Cronkite, Bryson Rash, Frank Bourgholtzer.
Directors: For CBS, Charles Von Fremd; for NBC, Heyward Siddons.
Coordinating Producer: Ralph Burgin.
Technical Coordinator: Charles H. College.

THAT substantial portion of the public within view of 17 million TV sets has had a chance to know its President intimately in both official and informal capacities. A weekend ago, many millions of U. S. citizens enjoyed a cozy visit in the reconstructed White House, with President Truman as their television host.

Relatively few persons have had a chance to walk from room to room as a President explained the layout, but the May 3 three-network audience heard their Chief Executive spin poignant yarns about famous paintings and historical furnishings as he strolled around. The program involved months of planning.

Three White House radio-TV newsmen—Walter Cronkite (CBS-TV), Bryson Rash (ABC-TV) and Frank Bourgholtzer (NBC-TV)—fed questions to the President as they held microphones under his nose, apparently an unavoidable technical nuisance since experiments with "beer mug" and other miniature transmitting facilities had been futile. All handled themselves well in the difficult role but their task was simplified by the relaxed manner of the President, who seemed to enjoy the whole proceeding.

Lighting difficulties were myriad. Viewers were subjected to brief blackouts as cameras panned into unshaded windows. Three times, furtive figures in the background ducked in obvious and disconcerting confusion as they came within camera range instead of moving along unobtrusively.

Wide public interest in the re-

INTERESTING moment in President Truman's historic tour of White House for TV audience was brief performance at piano. Holding mike is Frank Bourgholtzer, NBC White House newsman.

All Clear

"IS THAT piece cleared?" Bryson Rash, ABC commentator, asked Eugene Juster, WNBW (TV) Washington, as President Truman started playing the Mozart Ninth Sonata during his May 3 TV tour of the White House. "Don't worry," said Margaret Truman, standing with the radio men in the East Room. "It's in the public domain."

furbished White House might have been more completely satiated had cameras provided more panoramic shots instead of concentrating on a microphone and two speakers. Thoughts of color TV must have been stirred among viewers as the President went through the Green, Red and Blue rooms.

The Chief Executive showed professional attainments as a TV commentator in contrast to his piano rendition of a bit of the Mozart Ninth Sonata after a gentle hint by Mr. Bourgholtzer. The President holds a union card presented a few years ago by AFM President James C. Petrillo.

In any case, the program was a notable contribution to American culture and history. If Mr. Truman is wondering about a job next January, he might look into the video field—especially if he will talk instead of read or memorize his lines.

NBC SIGNS BOYD

New 'Hopalong' Series Set

WILLIAM BOYD, known as "Hopalong Cassidy" to youthful television fans, has signed a 10-year contract with NBC, Edward D. Madden, NBC-TV vice president in charge of sales and operations, announced last week.

During the next two years, Mr. Boyd will make new series of 52 half-hour films, all of which will be syndicated by NBC-TV to national video markets, Mr. Madden said. Work on new series—to start on the air in October—is already underway. Negotiations for NBC were made by Mr. Madden and John B. Cron, NBC-TV manager of film syndication.

'TODAY' SEGMENTS

Two Sponsors Added

TWO Chicago firms, Bauer & Black and Armour & Co., last week signed for portions of NBC-TV's *Today* with Dave Garroway.

Bauer & Black, division of The Kendall Co., through Leo Burnett agency, Chicago, bought five-minute segments, one each on Tuesday and Thursday for 16 and eight weeks, respectively, starting June 17.

Armour will sponsor the daily weather reports, aired four times during the two-hour show, starting June 2 for 52 weeks. Agency is Foote, Cone & Belding, Chicago.

Kefauver TV Aid

SEN. Estes Kefauver's (D-Tenn.) primary victories in Broward and Dad Counties "were substantially aided" by his appearances on WTVJ (TV) Miami, according to Judge W. Raleigh Petteway, Sen. Kefauver's Florida campaign manager. Sen. Richard Russell (D-Ga.) and Sen. Kefauver, competing for the Democratic Presidential nomination, parried issues over WTVJ from 9-10:15 p.m. May 5.

WNHC-TV Scores

WNHC-TV New Haven, Conn., took pride last week in a May 2 news beat over two local newspapers whose management's competitive attitude toward radio stations, it was claimed, once extended to the point of refusing to sell them advertising space. A tragic 11 a.m. fire which cost the lives of four women in a convalescent home 20 miles from the WNHC-TV studios was covered by the station with still and motion pictures. Stills were telecast at 2:30 p.m., while the simultaneous afternoon paper had no pictures of the fire; the movies were telecast at 6:30 p.m., while the final edition of the paper, on the streets late in the afternoon, carried a single shot of the fire scene—after the blaze had been put out, according to WNHC-TV spokesmen.

AFM TRUST FUND

Brings Musicians' Protest

LOS ANGELES musicians, protesting through signed petitions that AFM 5% trust fund format deprives them from getting work in TV films [B•T, April 21], have prompted union national headquarters to consider a survey of the situation.

Musicians claim the trust fund, set up as it now stands and to which TV film producers must contribute, discourages filming of video shows with live music. Their contention is backed up by officers of Los Angeles Musicians Mutual Protective Assn., Local 47, who discussed problem with James C. Petrillo, AFM president, in Chicago a few weeks ago.

Mr. Petrillo reportedly agreed to take the protest under advisement and to consult with the AFM executive board. Meanwhile, however, as a result of the Chicago conference, it is understood he may send Clair Meeder, his TV assistant, to Los Angeles within the next ten days to investigate and confer with TV film producers as well as local union officials.

White House Repeat

TELECAST tour of the White House, broadcast live May 3, was to have been repeated over CBS Television yesterday (Sunday), 1-2 p.m. EDT. During filmed repeat telecast, Sig Mickelson, CBS-TV director of news and public affairs, last Friday presented the original television recording to Dr. Luther Evans, director of the Library of Congress, for placement in the Library's archives. Additionally, U. S. Dept. of Education has requested six copies of the White House kinescope for distribution to schools.

KEFAUVER SPOT

Refused After TV Tour

ON-AGAIN, off-again developments marked effort of the Kefauver National Campaign Committee to place spot announcements immediately following President Truman's TV tour of the White House last Saturday, 4-4:48 p.m. on NBC, CBS and ABC television networks [B•T, May 5].

Robert J. Enders Adv., Washington, notified publications and wire services May 2 that announcements would be carried by WTOP-TV Washington and WBNS-TV Columbus.

John S. Hayes, president of WTOP-TV, informed BROADCASTING • TELECASTING May 5 the station had not carried the spot.

Mr. Enders in turn claimed WTOP-TV had accepted the spot through its sales department and had mailed a station contract for the time. "At 6:15 p.m. (May 2), long after the business office of WTOP-TV was closed, the program manager of the station's TV operation advised us that the spot would be carried," according to Mr. Enders. "Then shortly after 7 p.m. we were advised that, on orders of John Hayes, station manager of WTOP and WTOP-TV, the station was cancelling the spot. Mr. Hayes, incidentally, was out of town. The cancellation was made over our most strenuous protests." He added "The WTOP-TV contract covering the Kefauver spot is now in our files."

Mr. Hayes told BROADCASTING • TELECASTING May 7, "WTOP-TV did not broadcast an announcement Saturday following the telecast by President Truman. An attempt was made by the Enders agency to purchase a spot announcement. The station did not broadcast the spot, considering it in bad taste for a Presidential candidate to follow immediately a broadcast by the incumbent President."

Ohio Primaries

PRIMARY ELECTION returns in Ohio May 6 were telecast directly from the secretary of state's office in Columbus for the first time by WLW Television to its three video outlets, WLWC (TV) Columbus, WLWT (TV) Cincinnati, WLWD (TV) Dayton, and the Crosley station fed reports to a regional network emanating in Toledo and to NBC.

S-C UHF Converter

UHF converters for Stromberg-Carlson's earlier TV sets are going to distributors and dealers, C. J. Hunt, radio-TV division general manager, said last week. In production several months, the converters retail in the East for $49.50.

Thaw To Be Thwarted?

(Continued from page 74)

anywhere in the country regardless of the area in and around the community which should be served in the public interest," the Washington attorney declared. That is, he said, because the Commission established standards of power, antenna heights and separations on the basis of the needs of a few large cities "rather than on the basis of the needs of the particular area or community to be served."

This makes for administrative convenience, he stated, but leaves a legal doubt whether the Commission has not abdicated its responsibility to act in the public interest, convenience and necessity.

Mr. Scharfeld stated his belief that a court test based on the inequalities of VHF and UHF channels would be decided against the FCC, on the grounds that the Communications Act's provision for a "fair and equitable distribution of facilities among the states," was not carried out.

Another ground for appeal to the courts, Mr. Scharfeld pointed out, was the fact that none of the existing VHF stations on the air had to change to UHF. Thus, he said, New York's seven VHF assignments prevents any similar assignments to the whole state of New Jersey.

Meanwhile, a major clarification question was being studied by the FCC following the raising of the question in two communications last week. The question: Do separations and antenna heights depend on the zone in which the city is located or the zone in which the antenna is located?

In a question raised by the radio law firm of Fly, Shuebruk & Blume, this point was made: A boundary between Zones I and II cuts through a city. It is proposed to erect a transmitter in Zone II, thus utilizing the 2,000-ft. maximum height permitted. The law firm takes the position that this meets the Commission's intent, rather than the 1,000-ft. limitation in Zone I.

In the exact opposite position, WAVE-TV Louisville notified the Commission that it plans to move its transmitter from downtown Louisville to a site across the Ohio River in Indiana, which would put the antenna in Zone I. However, since its channel is assigned to Louisville, in Zone II, it stated that it was assuming that it could utilize the 2,000-ft. maximum tower height permitted by Commission's rules.

Other such "border" cases are expected to be called to the FCC's attention.

Stinging opposition to the request of WMCT (TV) Memphis to amend the Commission's order [B•T, May 5] was filed last week by WREC of the same city.

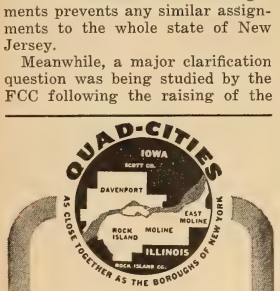
WMCT, now operating on Channel 4, asked the Commission to switch the channel to which it must move from Channel 5 to Channel 3. Among the reasons for this request, WMCT declared, was that the separation between Channel 5 in Memphis and same frequency in Nashville was less than the 190-mile minimum established in the new rules.

Request Termed 'Selfish'

The WREC petition called WMCT request "selfish," due to "fear" that another TV station in Memphis will have equal or better coverage than WMCT.

WREC argued that the WMCT petition should be denied or dismissed because: (1) WREC fought to have Channel 3 assigned to Memphis, has applied for that frequency, while WMCT did not participate to have Channel 3 assigned to Memphis. (2) WMCT agreed to change from Channel 4 to Channel 5, and anyway the separation between Memphis and Nashville Channel 5's is still greater than the proposed 170-mile transmitter-to-transmitter or 180-mile city-by-city minimums proposed by the Commission last year. (3) WMCT cannot increase its antenna height to the 2,000 ft. maximum permitted under the new rules because its antenna is on top of one of the towers in the AM station WMC's directional array and would impair the efficiency of the WMC signal.

Reaction was immediate. Motion to strike the opposition was filed Friday by WMCT, calling it "replete with name calling" and "vituperative." In addition, the WMCT motion claimed that WREC's conclusions are erroneous and unsupported by engineering data, and are "self-serving." The WMCT request was based solely, the Memphis station asserted in its motion, on the fact that if it is required to change to Channel 5 that wavelength will have to be deleted.



WKDA Nashville Friday filed a motion in favor of the WMCT Channel 3 request.

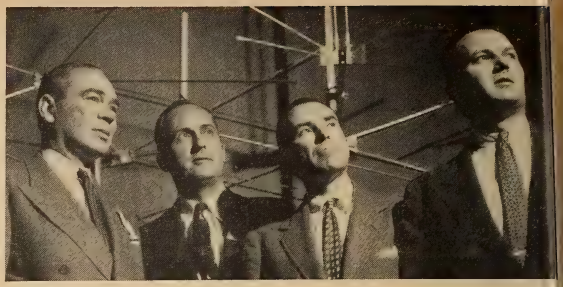
Only other petitions concerning the Commission's final TV order were filed last week by a group of Milwaukee radio stations. They asked that the effective date of the order deleting them from hearing status [B•T, April 14] be changed from immediately to the same date on which the final report becomes effective.

The stations, WFOX, WISN and WEMP, actually had gone through most of their hearing when caught by the TV freeze in 1948. They gave no reason for their request, but it is believed they want more time to study the possibility of court tests.

Official effective date of the FCC's Sixth Report and Order is June 2. The final TV report appeared in the May 2 issue of the *Federal Register*, and according to law becomes effective 30 days thereafter. Since June 1 is a Sunday, the effective date becomes June 2.

Appeals to the FCC for rehearings must be filed within 20 days after the effective date of the order, according to regulations. Petitions to Federal courts may be filed up to 60 days after June 2.

91,563 TV SETS
IN THE QUAD-CITY AREA



EACH month this TV set total is ascertained by Quad-City wholesalers serving this area. Actually, the total of TV homes reached by WHBF-TV is considerably larger as our TV signals are received over an extensive area beyond the Quad-Cities.

Increased power has doubled WHBF-TV radiated strength; the staff and facilities have recently moved into enlarged quarters.

True to a 25 year tradition of service in radio broadcasting, WHBF-TV now also serves Quad-Citians *well*—and advertisers *profitably*.

DuMONT HONORED

In Industrial Exhibit

AN EDISON Institute exhibit showing American industrial progress over the past century includes a range of DuMont television equipment and a tribute to Dr. Allen B. DuMont as an outstanding contributor to the field of home entertainment.

Called "Industrial Progress, U.S.A.," the show was displayed from Sunday through Thursday at the Henry Ford Museum, Dearborn, Mich., and was scheduled to begin a national tour.

PROBE OF MFRS.

Slated to Start Today

FEDERAL investigation of the radio-television manufacturing industry for possible violations of anti-trust laws was scheduled to begin today (Monday), date for which company records, correspondence and other documents were subpenaed last February for presentation to the grand jury [B•T, March 3].

Today's deadline was postponed for some, but not all manufacturers, it was learned last week, when spokesmen for the anti-trust division indicated that the precedent was to grant time extensions when requested. The number and compass of documents asked for was, as in many anti-trust studies, extremely comprehensive, with some information dating back as far as Jan. 1, 1934, and it was understood that major organizations needed extra time to compile the data.

RCA, singled out in the subpena text as a corporation of particular interest, was the only manufacturer among virtually all the nation's major producers of AM, FM and TV transmitting equipment who were served, who took legal steps against the court order, petitioning for withdrawal or change of the action which, RCA charged, was "too broad, unreasonable, and oppressive" [B•T, April 14]. Records of RCA will not have to be delivered until this side action is settled, presumably some time after the next hearing, June 12.

Records only were to be delivered today by the subpenaed corporations to the U. S. Court for the Southern District of New York, with individual witnesses due to be called later after investigators have studied the documentary evidence. Legal authorities emphasized that the closed-door action so far is only exploratory—to determine whether an indictment of any sort appears justified.

Besides RCA, companies known to have been subpenaed include General Electric, Westinghouse, Philco, Hazeltine Corp., International Telephone & Telegraph Co., Zenith, CBS, and DuMont.

There's No Business Like TV Talent

(Continued from page 72)

sion vice president, heads West Coast radio-TV department.

Famous Artists' radio and television department, under Joe Donohue, has set many of its clients on various live video shows in guest spots. Besides James and Pamela Mason and Ann Sothern, they include Corinne Calvet, Virginia Field, Lizabeth Scott, Dana Andrews and Kirk Douglas.

The firm also is in TV film packaging business through President Charles L. Feldman's 50% interest in Jack Chertok Productions, headquartered at General Service Studios. Mr. Chertok, in addition, heads Apex Film Corp.

When Messrs. Feldman and Chertok announced formation of their TV film production company, Famous Artists said many of its own name clients as well as "outside" talent would be utilized in tailored-to-order video shows.

On the planning board for early production are *Harbor Patrol*, a half-hour weekly detective-Coast Guard series, starring Bruce Bennett; *Bush Pilot*, in which Sterling Hayden would star, and a *Private Secretary* series starring Ann Sothern.

Jack Chertok Productions is currently shooting the 26 half-hour TV film *Sky King* series sponsored by Derby Foods Inc. (Peter Pan Peanut Butter) on NBC-TV stations. It stars Kirby Grant, with Gloria Winters and Ron Haggerty. On the shooting schedule is a new series of 52 half-hour *Lone Ranger* TV films for General Mills Inc., starting in May.

Series to Star Irene Dunne

Irene Dunne, one of the top Hollywood motion picture stars, at an over-all salary of $84,500, was set by Famous Artists to introduce, and m.c. as well as act in the *Irene Dunne Television Theatre*, series of 26 half-hour programs being filmed by Edward Lewis Productions. Thirteen in the series have been completed, with the balance yet to be filmed. Joan Bennett was to have had the assignment in the Lewis produced series through deal worked out by MCA, but arrangements were later cancelled. The Irene Dunne film series will be sponsored by Schlitz Brewing Co. starting May 30 on CBS-TV *Playhouse of Stars*. Lennen & Mitchell, new agency servicing account, set deal with budget per film reported as $17,500.

Choice of Irene Dunne series was made by Nicholas E. Keesely, agency's vice president in charge of radio and television, who spent several weeks in Hollywood inspecting many film shows.

George Raft, a Famous Artists client, is starred in *I'm the Law*, TV film series being made by Cosman Productions at Hal Roach Studios. Seven 30-minute programs have been shot, with six to be produced in July.

MCA also is deep in TV activity. Besides placing talent from its extensive roster of names on various live radio and television shows, MCA has its own TV film packaging and production subsidiary, Revue Productions, headquartered at Eagle-Lion Studios in Hollywood.

Besides filming the half-hour packaged dramatic *Gruen Guild Theatre*, (Gruen Watch) and *Chevron Theatre* (Standard Oil Co. of Calif.), Revue Productions has completed the *Kit Carson* 30-minute Western adventure series with Bill Williams and Don Diamond in the leads.

Alan Miller, MCA motion picture vice president and George Stern, of radio-television division, recently were shifted to Revue Productions to turn out jointly the two filmed *Gruen Guild Theatre* and *Chevron Theatre*. They succeed Barney Sarecky who had been handling production.

On Revue's planning board are three additional TV film packages, *Famous Playhouse*, *Regal Theatre* and *From Hollywood*.

Gertz Clients Enter TV

More than a score of Mitchell Gertz Agency clients are also working in TV production at networks and independent production companies. This agency more or less specializes in writers, directors, producers, musical directors, name cameramen and other production personnel.

In addition to controlling TV and film rights to more than 1,000 published stories, Mitchell Gertz Agency also has packaged two video shows. They are *Prestige Theatre* and *Nothing New Under the Sun*. Of the latter, 13 half-hour films are completed and were directed by Bill Heath, with Art Pierce coordinating production. Ed Kelso and Leslie Swabacher wrote the scripts. Others in the series are still to be filmed.

Charles Boyer, Rosalind Russell, Dick Powell, Joel McCrea, Robert Cummings and Douglas Fairbanks Jr. are also joining the fast growing list of motion picture stars going into television.

In a deal worked out through their radio-television representative, Don Sharpe Agency, with Official Films, New York production-distribution company, they will be rotated in the weekly 30-minute *Four Star Theatre*. Series will be produced by Don Sharpe Enterprises, a division of the talent agency. George Jenkins directed pilot film.

Don Sharpe Enterprises also will produce *My Hero*, comedy accentuated mystery TV film series starring Robert Cummings, with Julie Bishop in the feminine lead. Official Films is to distribute. It also will handle distribution of *Impulse*, psychological suspense series written by Larry Marcus which Don Sharpe Enterprises is to produce. Alfred E. Green who directed *The Jolson Story* for Columbia Pictures, has been set in similar capacity on *Impulse*. Cast comprises King Donovan, Paul McVey, Christine Larson and Tol Avery, with filming done at Sam Goldwyn Studios in Hollywood.

Blue-printed for future production are two other packages Don Sharpe is handling. Based on NBC radio series which stars Joel McCrea, the *Texas Ranger* TV film show will be open-end with Craig Stevens in the lead. Mercedes McCambridge, who does *Defense Attorney* on radio, is slated to do a TV film version too.

Comics Provide Material

Another series to be handled by Official Films is *Terry and the Pirates*, produced by Dougfair Corp. Richard Irving will direct, with scripts by John and Gwen Bagni. Cast includes John Baer, Mari Blanchard, Gloria Saunders, William Tracy and Jack Kruschen. Series is based on the comic strip of same title.

Alliance between television and movies continues to grow stronger every day despite refusal of some film leaders to look ahead to the time when their studios will be shooting for video.

Even now, according to Basil Grillo, vice president in charge of production for Bing Crosby Enterprises, more hours of film are being shot in Hollywood for television than for movie consumption.

He predicts the day is not too far off when 75% to 80% of time on all TV channels will be occupied by film programs. Concurring are such industry leaders as Jerry Fairbanks, head of Jerry Fairbanks Productions; Louis D. Snader, president, Snader Telescriptions Corp.; Frank Wisbar, producer of *Fireside Theatre* series (Procter & Gamble Co.), and William F. Broidy, president, William F. Broidy Productions.

Sam Goldwyn, always an independent thinker and worker, in a recent interview predicted a "wedding between TV and motion pictures" within the next two or three years.

Others of the top names being offered for TV by their respective agents include Bette Davis, Loretta Young, Joan Crawford, Barbara Stanwyck and Ginger Rogers, but at figures and on conditions that networks or independents cannot meet at this time.

film report

Production . . .

Newly incorporated, **Wrather Television Productions Inc.**, Hollywood, is starting 13 half-hour sophisticated comedy TV film series, *Boss Lady*. **Lynn Bari**, film star, enacting leading role of feminine head of building contracting firm, is co-featured with film actors **Glen Langdon**, **Nicholas Joy**, **Richard Gaines**, **Lee Patrick** and **Charlie Smith**. Firm president **Jack Wrather** is co-producing with **Bob Mann**, writer of scripts, and **Bill Russell** director.

* * *

Howard Welsch, executive producer with Fidelity Pictures, plans to enter the TV field and independently produce a half-hour film series, *The Lady From Lloyd's*, built around a feminine investigator from Lloyd's of London. Negotiations are being concluded with **Constance Bennett**, film actress, to portray "The Lady." **Norman Foster**, feature film director, has been signed to direct the series. Shooting will start June 1 at the Motion Picture Center. Each film, budgeted at $20,000, will contain a new cast apart from central figure of the title.

* * *

After converting the recently-leased Marcal Theatre in Hollywood to television, Filmcraft Productions plans production this month of *The Bickersons*, a half-hour TV film series based on former NBC Radio program of same name, which will be filmed before live audience from theatre stage.

William Rapp, owner-writer-director of the radio package, will serve in the same capacity, with **Isidore Lindenbaum**, firm president, as executive producer, and **Ferenz Fodor** as production supervisor.

New automatic camera control system, used by the company in filming John Guedel Productions' *Groucho Marx Show* for NBC-TV, will be utilized in this series.

* * *

Availabilities . . .

Olio Video TV Productions Inc., New York, has added seven films—three British and four American—to its feature list, now totaling 36 titles available for TV. Titles include: "Great Guy," "Man Who Lost Himself," "White Legion," "Wallaby Jim of the Islands," "The Man From Yesterday," "The Silver Darlings" and "You Can't Fool an Irishman." The entire group of 36 is available in full-length and specially-edited 26-minute versions.

* * *

Sales . . .

Durkee Famous Foods Div., Cleveland (condiments), has started *Dangerous Assignment*, a half-hour TV film series produced by **Donlevy Development Corp.**, Hollywood, on KNBH (TV) Hollywood, May 1. Series on KRON-TV San Francisco for firm since first of year. Agency is **Leo Burnett Co. Inc.**, Hollywood.

* * *

NBC's WNBT (TV) New York has acquired exclusive New York area rights to *TV Disc Jockey Toons* from **Screen Gems Inc.**, New York. The series includes production numbers, animated cartoons, pantomimes and marionette routines, providing visual elements for use with latest popular record releases.

* * *

Film People . . .

Douglas Fairbanks Jr. will portray his late father, the silent film star, in a new half-hour TV film series, *Tales of a Wayward Inn*, based on **Frank Case's** book dealing with theatrical and literary personnages who frequented Algonquin Hotel, New York. Co-producers are **Hal Roach Jr.** and **Carroll Case.**

* * *

Jane Wyatt and **John Shelton**, film stars, have been signed for *Love Without Wings*, half-hour TV film in *Fireside Theatre* series for **Procter & Gamble.** This carries through plan of **Frank Wisbar**, producer, to include motion picture names in upcoming films.

* * *

Andy and **Della Russell**, night club-recording stars, have been signed by **Arena Stars Inc.**, Hollywood, for half-hour TV film series with husband-and-wife format. The series will be filmed at **Churubusco Studios**, Mexico City, and financed by **Don Frankel**, oil and racetrack industrialist.

* * *

Andy Clyde, motion picture character-actor, has been signed by **Interstate Television Corp.**, Hollywood subsidiary of Monogram, to a long-term TV contract. The first major assignment will be *Buffalo Bill*, half-hour TV films starring **Jimmy Ellison** in title role. Production started last week with **Lewis Collins** directing from a script by **Joseph Poland. Vincent M. Fennelly** is the producer.

* * *

John Archer, film actor, has been signed by **Jerry Fairbanks Productions**, Hollywood, for starring role in *America For Me*, half-hour film for the **Greyhound Corp.**, Chicago (transcontinental busses). Locale will encompass 16 states and film will be photographed in black and white for TV release.

* * *

Harry Zimmerman, musical director, KHJ Hollywood, is to provide musical background from his original score for *The Greatest Mother*, special Mother's Day half-hour TV program being filmed by **Jerry Fairbanks Productions**, Hollywood, for *Family Theatre* presentation. **Edward Paul**, the firm's musical director, will supervise a 32-voice choir.

* * *

Ralph Winters, casting director with RKO Radio Pictures, to **Ziv TV Programs Inc.**, Hollywood, in a similar capacity for all Ziv's TV film series.

* * *

William Tinsman, casting director, Warner Bros., to **Roland Reed Productions**, Culver City, in similar capacity.

* * *

Elmo Billings, feature film editor signed by **Semaphore Film Corp.**, Hollywood, in a similar capacity on half-hour TV film series, *Hot Rails*, scheduled to go into production June 1.

* * *

Sol Lesser, who recently acquired travelogue library of **Burton Holmes** for TV and theatrical release, has been named president of newly-incorporated **Burton Holmes World Productions.** Serving as directors are **Julian Lesser** and Mr. Holmes.

* * *

Mrs. Dorothy Clune Murray has been elected chairman of the board of directors for **Werner Janssen Productions Inc.**, Hollywood.

NEW UTP SALES

Shows Go to 8 Markets

EIGHT recent sales in as many markets were reported last week for United Television Programs by Aaron Beckwith, sales director, who said that the husband-wife program, *Double Play With Durocher and Day*, leads the list with purchase in two markets and debut in a third.

WJBK-TV Detroit, through W. B. Doner agency, bought the sports-discussion series for the Michigan Wine Co., and KMTV (TV) Omaha purchased it for Storz Beer. The program started May 1 on WFBM-TV Indianapolis for the Fehr Brewing Co. with a special press party, at which plans for extensive merchandising—including autographed baseballs, sales displays, and a concerted radio-newspaper campaign—were announced.

Big Town, program developed by Lever Bros. but offered to other advertisers in other markets through UTP, was purchased for WFMY-TV Greensboro, N. C., and WSAZ-TV Huntington, W. Va., by Streitman Biscuit Co. The 26-week package will be distributed nationally on film in early October, Mr. Beckwith said, pointing out that it is currently available only to 29 non-Lever markets.

Other sales were for *Royal Playhouse*, a re-run of the *Fireside Theatre* series, to WDSU-TV New Orleans and KFMB-TV San Diego. WENR-TV Chicago purchased *Hollywood Off-Beat*, a half-hour private detective series starring Melvyn Douglas, and *Movie Quick Quiz* was signed for Dixie Cup sponsorship on WJZ-TV New York.

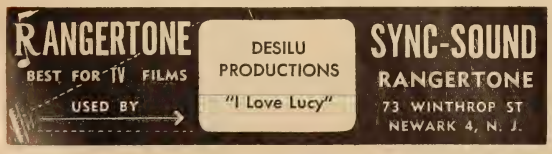
ONE CH. CITIES

Monopoly Inference Answered

MONOPOLY situations in TV—where a total of 902 communities each have but one TV channel allocated in the table of assignments accompanying the FCC's Sixth Report and Order [B•T, April 14]—are no better or worse than similar situations existing in AM, according to FCC sources. Anyway, they say, it is a matter of the "nature of the beast"—radio waves propagation.

FCC comments were solicited after some observers had pointed to the 902 single TV station cities under the allocation plan as instances of monopoly. Commission reaction was along the following lines:

● Of the 902 single-station markets, 26 channels are reserved for non-commercial, educational stations in "primarily educational centers."



● There are 970 cities which have a single AM station in operation today.

● Of the 1,360 radio communities in the U. S. (i.e. having one or more AM stations), about 250 have only 250 w daytime or part-time stations.

Other points made by FCC officials, in countering monopoly inferences, are: (1) All TV channels have not been assigned; it is possible to squeeze in more channels, particularly UHF frequencies; (2) there is a question whether the communities with only one TV channel available are going to be able to support a TV station anyway—the average population size of the 902 single-station TV communities is 9,300.

WTVN (TV) Center

WTVN (TV) Columbus' ultra-modern Television Center will be ready for occupancy shortly after May 15, Edward Lamb, station owner, announced last week. Russell Mock, WTVN promotion director, is arranging formal opening details.

There's No Business Like TV Talent

(Continued from page 87)

are committed. They include Red Skelton, Eddie Cantor, Bob Hope, Danny Thomas, Jimmy Durante, Jack Benny, Donald O'Connor, Alan Young, Martin & Lewis and Abbott & Costello.

In line with the pattern now evolving, Ethel Barrymore was recently signed for a substantial salary, plus residual rights in a contract with Interstate Television Corp., subsidiary of Monogram Pictures, for a series of 26 half-hour TV films tentatively titled *The Ethel Barrymore Theatre.*

Deal was handled by William Morris Agency, which also will supply Interstate with a good portion of the package, including writers, directors and other talent for the series.

Miss Barrymore, actress and narrator on the series, also will act as consultant to producer Lee Savin.

Loretta Young reportedly wanted $100,000 and 50% rights in a proposed TV film series in which she was to star, so the advertiser dropped negotiations. CBS, however, is said to have worked out an agreement with her through William Morris Agency for a planned TV series starting in the fall. Details haven't been revealed, but it is understood the money involved is a flat fee for 26 half-hour filmed programs, plus residual rights.

Despite statements to the contrary, talks between network executives and her agent Paul Small, are still under way for Ginger Rogers to do a weekly CBS-TV show. If it materializes, series will be filmed so she can continue motion picture commitments. Paul Small Agency, incidentally, also set David Rose as musical director on NBC-TV Ezio Pinza program for the five weeks it originates from Hollywood.

Adventure Films

A TV film version is to be made of the new adventure series, *The Chase*, packaged by Frank Cooper Agency for origination from New York on NBC radio. Show was created by Lawrence Klee who writes CBS-TV *Man Against Crime* starring Ralph Bellamy with Camel cigarettes as sponsor.

General Artists Corp., with probably the largest number of recording stars in the popular category of any of the major talent agencies, is active in live TV packaging and artist placement. It also has blueprinted plans to set up a TV film division utilizing much of that talent.

CBS-TV *Perry Como Show*, sponsored thrice weekly by Chesterfield, is a GAC live package. Patti Page, incidentally, is being offered as summer replacement for the *Perry Como Show* with GAC, her agent, discussing the deal with CBS-TV New York executives.

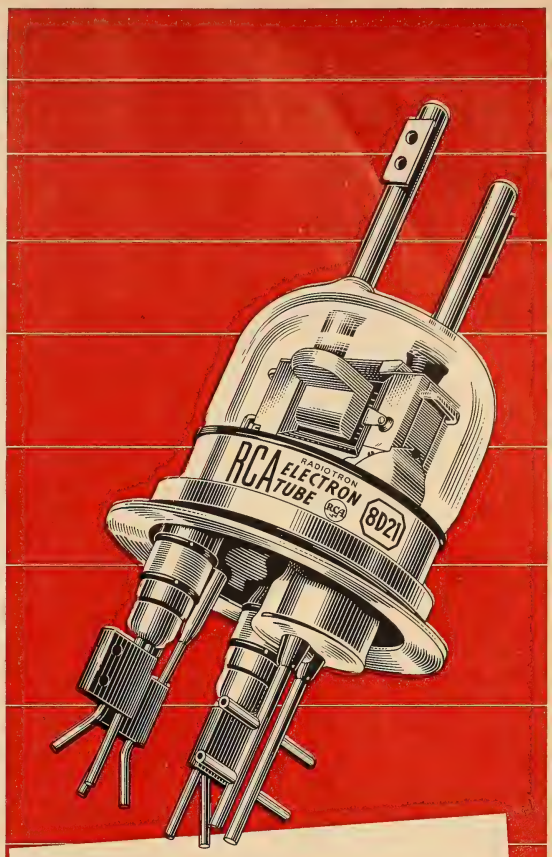
Mel Torme, singer, with a CBS-TV show of his own, is a GAC client. Frank Fontaine, comic, Mindy Carson and Frankie Laine are others on GAC list who have been working in live TV on a rather frequent basis. Mr. Fontaine is to have his own CBS Radio show starting shortly. GAC also will star Mr. Laine in a TV film series starting in the fall.

With Louis Bromfield, author, as narrator-host, deal was recently concluded whereby Bing Crosby Enterprises will film a 30-minute TV dramatic series which GAC, in cooperation with Mr. Bromfield's agent, Stanley Bergerman, has packaged under title of *Crisis.*

Agreement was worked out by Basil Grillo, vice president in charge of production for BCE and Milton Krasny, vice president of GAC. It calls for the latter to handle national sales. BCE will produce and film the series.

Besides handling Bob Hope and Herbert Marshall for radio and television, James L. Saphier Agency, among others, handles placement of Eileen Wilson, singer on NBC-TV *Hit Parade*, and Steve Allen, comedian and m.c. on CBS-TV *Songs for Sale.* Agency is also packager of CBS-TV *Al Pearce Show* and CBS-TV *Meet Corliss Archer.*

Conte, Kennedy Co-produce



Richard Conte, stage and film actor, in early April finalized a deal with Jimmy Saphier and Jay Kennedy for half interest in TV rights to their radio package *The Man Called X*, which stars Herbert Marshall. He will co-produce with Mr. Kennedy and also star himself with his wife, Ruth. Mr. Marshall also is narrator of the Ziv TV film series *The Unexpected*, sponsored by Rheingold beer on Eastern stations.

Wynn Rocamora has blue-printed a proposed TV film series based on the life of Chaminade, French composer, with Diana Lynn, film star and pianist, in title role. He also plans a TV film series starring Dorothy Kirsten, Metropolitan opera star, plus situation comedy package starring Florence Bates and Ellen Corby, stage and film actresses.

Sam Jaffe Agency, in addition to Donald O'Connor, has other star names on its list who guest on radio and television shows. Agency also is negotiating with NBC-TV in the Alexander Korda deal, whereby network would aid in financing of 26 feature films by putting up $100,000 on each. In return, NBC-TV would have exclusive television rights. Agency represents the British film producer in the negotiations. TV film packages handled by Jaffe Agency include *Byline, Washington Lady, Purple Playhouse, Brass McGannon* and *Alarms in the Night.*

George Brent has formed his own company to produce films for video

The tube that "wears spectacles"

Electronic spectacles, so to speak—built right into the tube itself!

Using a unique arrangement of beam-forming electrodes, RCA engineers have combined in this tube advanced principles of electron optics and of cooling to make a push-pull power tetrode *that can handle inputs up to 10 kw in the VHF band.* The techniques used in the 8D21 made high-power television a practical reality!

Power tube development is just one phase of RCA's program to bring you new and better tubes for broadcast operations.

For deliveries in minimum time, call your local RCA Tube Distributor.

(Continued from page 89)

as well as theatrical release. First TV series scheduled is *Address—Tangiers.* Mr. Brent is 50% stockholder in the company with William B. White, his agent, as partner. Firm is listed as George Brent Productions Inc.

Mr. White also is packaging a TV film series, *Her Honor the Mayor* which will star Bette Davis if a deal agreeable to both can be worked out. She made her TV debut with Jimmy Durante on NBC-TV *All Star Revue* on April 19. Eve Arden, starring in CBS Radio *Our Miss Brooks,* will do likewise in the CBS-TV version starting in the fall, in a deal worked out by Mr. White's agency.

Gloria Swanson will be starred in a half-hour TV film series to be made by Tele-Voz Co., Mexico City. Deal calls for salary, plus residual rights. She is under contract to Simmel-Meservey TV Productions, Beverly Hills, subsidiary of Simmel-Meservey Co., which will handle distribution of the series, titled *Gloria Swanson Show.*

Joan Crawford's offer to major networks, through her agent Music Corp. of America is said to be for a five-year TV deal, in which she would get $200,000 per year to star in 26 half-hour films, plus 50% ownership of the properties.

Established names will be used in some of the upcoming filmed *Fireside Theatre,* sponsored by Procter & Gamble Co., in a new policy announced by Frank Wisbar, producer.

Stars Being Sought

Among those he is or will be negotiating for on the new 40 films currently being shot are Andrea King, Geraldine Brooks, Mary Sinclair, Frances Dee, Virginia Grey, Vanessa Brown, Sarah Churchill, Barbara Britton, Mari Aldon and Ruth Warrick. Shooting of the new group of half-hour TV films which started April 14, continues through September 28.

Dan Duryea, available to radio and television through MCA, will be starred in 52 half-hour TV films, *The Affairs of China Smith,* packaged by Tableau Television Ltd., which Edward Lewis Productions is shooting. Proktor Syndication International will handle distribution. Robert C. Dennis has writing assignment for series which is being financed by Messrs. Lewis and Duryea, and Bernie Tabakin, who will produce and direct.

With Arthur Kennedy, Edward Arnold, Diana Lynn and Akim Tamiroff among stars, National Repertory Theatre Inc., newly organized to produce films for TV, has set itself up at Motion Picture Center.

With it will be identified such directors as King Vidor, David Miller, Tay Garnett, Robert Florey, Christian Nyby and Ray Enright.

Tony Owen is president with Donald Hyde, Jay Hyde and Arthur Kennedy, vice-presidents. William Kozlenko is secretary-treasurer.

One of the most ambitious ventures in making TV films, this group will function like a stock company with players alternating as stars and support, it was said. Group will share profits on participation, with Interstate Television, subsidiary of Monogram Pictures Corp. financing and handling distribution.

Completed are two half-hour films, *The Victim,* co-starring Messrs. Arnold and Kennedy, with Mr. Kozlenko, writer, and Fobert Florey, director, and *This Is Villa,* with Messrs. Tamiroff and Kennedy co-starred, and Josephine Niggli, writer, and Ray Enright, director. Lee Savin is supervising production for Interstate.

Virtually every big name in Hollywood, especially those not under exclusive movie studio contract, has an eye on television. Some are talking deals direct with TV film producers or packagers, while others are working it through their respective agents. These include stars and lesser name talent, producers, directors and writers too. Many who appear to shun the new media only await an opportunity to enter the field.

Strictly Business

(Continued from page 16)

the same territory, watching business in Minneapolis, Milwaukee, Cleveland, Detroit and Indianapolis.

A specialist in Canadian stations, Mr. Reilly has worked with outlets there on both jobs. The Adam Young Co., represents 23 Canadian and 20 U. S. stations. While attending the annual broadcasters' convention in Canada this spring for the first time in several years, Mr. Reilly recommended that managers increase their radio rates before television installations are put into operation, presumably this fall.

Spot business, in which he has seen no rate cuts of any kind, is up everywhere, Mr. Reilly says, and will continue to climb as station managers cooperate in local promotion and merchandising for the client.

His stations, in general, report a heavy demand for early morning and daytime spots. CKLW Windsor, which hit its sales peak in October 1950, last year recorded an increase in sales of 104%—with new accounts still coming in.

Mr. Reilly, a native New Yorker, attended Fordham U., for a liberal arts course, later studying law in night school for two years. He acquired financial experience in a bank and a Wall St. brokerage house before the depression, at which time he went to work for the City of New York as a welfare investigator, prosecuting relief frauds. His checking resulted in the first conviction of such a violator.

Bill Reilly lives in suburban Park Ridge and is a member of the Chicago Radio Management Club. He spent a lesiurely vacation in Florida this spring teaching his daughters, Rita, 14, and Adelaide, 11, how to fish in the Gulf waters. Although he knew more than they about the theory, the girls showed him that practice in this case was more successful.

ATTESTING to successful results for its Red Band Flour, General Mills presented pouch of 90 silver dollars to WIRC Hickory, N. C., winner of GM first prize. WIRC competed with 27 other outlets in five southeastern states with listener contest based on theme, "Win Your Weight in Silver Dollars." (Above) Mrs. Mattie Padgett, WIRC program director, receives five pounds of silver dollars from J. C. Lawton of Charlotte, GM district sales manager. Knox Reeves Adv., Minneapolis, GM agency, also congratulated WIRC General Manager Edmond H. Smith Jr. for "splendid job" by station in getting results.

SLOAN AWARDS

To Be Announced May 20

FOURTH annual Alfred P. Sloan radio and television awards for highway safety will be presented at a dinner at the Waldorf-Astoria in New York on May 20. Winners will not be announced until that time.

The awards, administered by the National Safety Council in conjunction with its public interest awards, are "designed to recognize outstanding public service in traffic accident prevention by radio and television stations, networks, and advertisers."

Dramatized themes of this year's award-winning programs will be presented on NBC-TV's *American Inventory* program, which will be telecast at the dinner.

Vandalism Fight

DRAMATIC documentary on window-breaking by young vandals was broadcast Thursday as a one-time production, by WOL Washington, repeated Sunday, and will be repeated at the city's schools in an effort to curb this costly damage. District of Columbia school, church, civic and business leaders took part in the broadcast along with children at a school playground where an organized effort is under way to control breakage. The WOL news staff prepared the program after weeks of recording and editing under direction of George W. Campbell, program manager, and Gene Berger, newsman.

BROADCAST BAN

Moody Terms It 'Mistake'

HOUSE ban on radio and television at committee hearings is a "mistake," Sen. Blair Moody (D-Mich.), former newsman and commentator, said last week in a transcribed radio show, *Meet Your Congress*, which he moderated before he was appointed to the Senate.

Two other former newsmen turned politicians, Sens. A. S. Mike Monroney (D-Okla.) and Fred A. Seaton (R-Neb.), appeared on the program. Sen. Seaton is president of KHAS Hastings, Neb., of KMAN Manhattan, Neb., and vice president of KGGF Coffeyville, Kans.

Program discussed freedom of access of information in government. All three criticized the Presidential order which cloaks some government news with secrecy. The information classification order as a security measure issued by President Truman last September also was "a mistake," Sen Moody said. Sen. Monroney, former *Oklahoma City News* editorial writer, said it was "obnoxious, destructive" while Sen. Seaton described it as "worse than the disease it tried to cure."

On broadcasts of Congressional committees, Sen. Moody said Congress "ought to have better rules covering the conduct of hearings and the protection of witnesses. But the public should be admitted." Sen. Seaton, seeing most meetings open to the public, added, "we shouldn't turn them into a hippodrome, into a circus." Lights needed by newsreel photographers, flashbulbs of still cameramen and the presence of TV equipment, he said, are "not conducive to the peace of mind." Sen. Monroney suggested the telecasting of "educational" hearings but not those in which a witness' reputation may be smirched.

ABC Radio Hollywood Workshop won Net-Workshop Award for "best production of month" with presentation of *The Word*, written by Arch Oboler, produced by Steve Markham and John Eppolito.

NJBA HITS CURBS

Committee To Seek Coverage Rights

APPOINTMENT of a committee to confer with state officials in an effort to clear the way for radio coverage of public hearings conducted by legislative committees was authorized in a resolution adopted by the New Jersey Broadcasters Assn. at its spring meeting last Monday in Atlantic City [B•T, May 5].

Representing the state's 20 radio and TV stations, and acting after WJLK Asbury Park and WTTM Trenton were denied permission to broadcast hearings on a bill concerning bingo, the NJBA adopted a resolution which said, in part: "Any effort on the part of elected officials to deprive the public of immediate access to public proceedings through the medium of radio is an infringement on the right of the electorate to full and immediate information, and an indication of the growing trend to censor and stifle a free press and a free radio."

Meanwhile, NJBA members were told in a speech by FCC Comr. Rosel H. Hyde that the Commission's procedures in handling the new TV allocations are designed to bring television to the largest number of persons as soon as possible. Denver is the largest city without television service and tops the list, he said, explaining that a city 40 miles distant from a TV station is considered a city without TV service.

Comr. Hyde cautioned the broadcasters that with only seven hearing officers and multiple applications for each channel in the major cities, early action cannot be expected.

No Handouts By FCC

With respect to the educational reservations, Comr. Hyde pointed out that FCC cannot hand out endowments or what amounts to land grants in the way of channels for educational institutions. It has earmarked channels for noncommercial educational stations in the public interest. But the policy of the FCC, Comr. Hyde said, is to make changes as changes are required, and any change in the educational reservations will depend upon an examination of the facts. If the present allocations should prove unrealistic and the public interest would be served by some other use, the FCC will examine these reservations on the basis of new evidence, he stated.

At an afternoon session, Walter Erickson, radio director of Gray & Rogers Agency, Philadelphia, gave the broadcasters an insight into the problems that an agency faces in recommending radio and television to its clients.

"On the surface," he said, "it would seem that both radio and television should be used. Unfortunately, in a good many cases that is impossible. . . .

"It's surprising the number of advertisers whose total budget is $50,000 a year or less. When you deduct from that sum allowance for direct mail, point of sale material, the amount left for radio, newspapers and television is considerably less than $50,000.

"In Philadelphia," he continued, "three 20 second spots a week cost approximately $45,000 per year. Granted that television has high visual impact, high ratings and low cost per thousand, are three spots a week sufficient if that is to be the only advertising effort?

"I am not trying to imply," he went on, "that television can't do a job. It can and it's working for advertisers every day. I am just saying that television on a limited budget creates a problem which is not always easily resolved."

Daytime Radio Selling

Daytime radio isn't hard to sell, he pointed out, because survey figures show that listening is at about the same level as it was before TV. Too, some advertisers feel that housewives are too busy during the day to spend an appreciable amount of time watching television, Mr. Erickson added.

Television sets-in-use figures, he said, have often been misinterpreted. Since viewing is high, it is sometimes taken for granted that the bulk of viewers are former radio listeners. But, he continued, television has attracted a good percentage of persons who were not regular listeners. To substantiate this point, Mr. Erickson referred to the Philadelphia Radio Pulse for January-February 1946, which showed 28.8% sets in use between 6 and 12 p.m. Six years later, 1952, the same period showed 58.5% television and radio sets in use.

This, he said, means that there is almost twice the listening and viewing audience between 6 and 12 p.m. as there was listening to radio in 1946. He saw it as proof that the public, given something it wants, will be receptive and, he admonished, it is up to radio to give them what they want.

WVOK WINS SUIT

For Book Ad Debt

JUDGMENT in favor of WVOK Birmingham, Ala., was reported by the station in its suit May 1 for collection of a debt due WVOK for advertising a book for Simon & Schuster, New York publishing firm.

The suit, which WVOK termed as unprecedented in radio annals, was brought directly against Simon & Schuster by Howard B. Cohen, Birmingham attorney, after unsuccessful attempts to collect from National Radio Adv., which placed the ad "a mail order deal," for the book, *1951 Tax Instruction Book*, the station reported.

TRADE RULES

FTC-Industry Conference Slated June 18

SUGGESTED trade practice rules for radio-TV set-makers, based on recommendations drawn up by a special All-Industry Committee, were released by the Federal Trade Commission last Wednesday and tentatively set for discussion at a third government-industry conference June 18.

★

Rules were drafted by the industry group under leadership of Radio-Television Mfrs. Assn. and at the request of FTC's Trade Practices Conference Bureau. They will be circulated to industry members prior to the third and probably final conference before they are adopted.

Standards will guide manufacturers, dealers, distributors and other groups operating in interstate commerce under FTC's jurisdiction. When finally adopted, they will extend radio trade practices on the books since 1939 to cover television.

The industry draft once again poses the colorcasting issue, though this is rendered academic by virtue of the government's ban on mass production of color TV equipment.

Industry committee backed up FTC's suggested provision (last year) touching on certain phases of adaptability and convertibility of video receivers by recommending addition of Section II under Rule 9:

Under this rule and with respect to devices or accessories to convert an existing black and white television receiver to receive a color signal, it is an unfair trade practice to fail to disclose that the result of the installation of such devices or accessories, will be a smaller picture than the original black and white picture of the set if such be the fact.

A related point cropped up during two previous industry conferences held by the commission last June and September, with CBS Inc. arrayed against certain industry segments over the question of picture "degradation". inherent in conversion of monochrome sets under the CBS color system. Advertisements of color converters claiming they will attain actual viewable area commensurate with tube size also were discussed.

Following the second of the two conferences, FTC asked the industry to name a special committee to solicit industry views and work out a draft. The commission's own proposed draft served as the basis for the second session.

The rules touch on misbranding and deceptive selling methods; a set of standard definitions; advertisements to be prohibited; sponsorship; alteration of brand names; deceptive use or change of cabinets; alteration or removal of serial numbers; deception as to size of actual picture, price, discontinued models, identity of manufacturer; misuse of term "factory rebuilt"; misrepresentation as to effectiveness of TV antennas; guarantees and warranties; misuse of the word "free"; false invoicing; imitation of trade marks, names; "spiffs" and "push money"; tie-in sales; threats of infringement suits; use of lottery; coercion to fix prices; defamation of competitors; commercial bribery.

One significant new proposal is that involving deception as to picture actually shown on any TV set, which prompted considerable discussion last year. It would be unfair practice to deceive prospective purchasers as to actual viewable tube, with or without added devices. "It shall not be deemed deceptive to use the size which has become standard and accepted in the industry . . . provided there be a conspicuous and non-deceptive disclosure of the size of the actual viewable picture if it be smaller."

"Standard measurement" was described as that "in inches, to the nearest inch, of the largest bulb diameter or diagonal of the tube," with any tube on a one-half inch dimension being assigned the smaller inch measurement.

The industry recommendations were drawn up by a committee under chairmanship of Louis B. Calamaras, executive vice president, National Electronics Distributors Assn. Other committee members: Glen McDaniel, RTMA president; Edwin A. Dempsey, National Television Dealers Assn.; John Martindale, National Assn. of Cathode Ray Tube Mfrs.; Ross D. Siragusa, Admiral Corp.; Morton Farr, National Appliance & Radio Dealers Assn., and Fred Walker, Arlington, Va., radio-TV dealer.

Omitted from the industry draft was an RTMA proposal, offered in June 1951, that "advertisements . . . stating, purporting or implying that any television receiving set can be adapted to receive color broadcasts in black and white which do not also state that the resulting black and white picture gives materially less picture detail than a standard black and white broadcast picture, if such be the fact," be considered an unfair trade practice.

CBS Inc. let it be known at the first conference, through an attorney, that it felt such a proposal to be discriminatory and traced testimony which eventually culminated in FCC's approval of the CBS color system. National Production Authority, acting for the Office of Defense Mobiliation and in apparent agreement with industry members, than levied its equipment ban.

In recent months, however, there reportedly has been general agreement that the rules as now drafted would not prove objectionable. All segments of the manufacturing industry were consulted before the industry draft was submitted to FTC.

milestones . . .

► FIFTEEN years of broadcasting have been completed by WFTC Kinston, N. C. Celebration was marked by anniversary broadcast featuring greetings from Ernest Lee Jahncke, ABC radio network vice president, as well as from ABC stars. FCC's birthday present to station was announcement of an initial decision to grant change in facilities from 250 w on 1230 kc to 5 kw day, 1 kw night directional on 960 kc [B•T, March 3].

►WLW Cincinnati's farm program, *Everybody's Farm*, has been aired for the 4,000th time. In tribute, Roy Battles, WLW farm program director, presented an account of the history of the program and the 137-acre farm itself, reportedly one of only two farms in the U. S. owned and operated by a radio station. Program is broadcast directly from the fields and farm house.

Mr. Battles

► Jean Hersholt's 15th anniversary as star of the *Dr. Christian* CBS Radio show will be celebrated May 21 by theatrical luminaries at New York's 21 Club, before Mr. Hersholt leaves on a European business tour. The show will continue through the summer on tape. Chesebrough Mfg. Co. (Vaseline brand products) is sponsor.

► HARVEY OLSON, program manager, WDRC Hartford, Conn., observed his 17th anniversary with the station during April.

►WTTM Trenton, N. J., early last month celebrated its 10th anniversary, marking occasion with open house and several "birthday" parties. The station received special commendation from Mayor D. J. Connolly of Trenton.

► HELOISE PARKER BROEG, "Mother Parker" of *Food Fair*, aired daily on WEEI Boston, has marked her 12th anniversary with the station.

► TELENEWS Productions Inc., New York, subsidiary of INS, in April marked beginning of its fifth year of *Telenews Daily*, television newsreel service. Herbert Scheftel, Telenews president, said firm is only independent newsreel producer "that has been supplying television stations with daily newsreel footage for so long a time."

► NATIONAL Assn. of Home Builders noted the first birthday of its national radio program, *Housing Headlines*, May 1. Show has been recognized by builders all over the country as a powerful selling aid and a public relations medium and is now heard in 43 cities.

NSRB CHAIRMAN
Urges Plant Dispersion

DISPERSION of top industries is a key factor in deterring any enemy attack on the U. S., Jack Gorrie, chairman of the National Security Resources Board, declared last Tuesday.

Addressing the annual Armed Forces and Veterans meeting of Brotherhood Temple Ohabei Shalom in Boston, Mr. Gorrie noted that America is "developing programs for the protection of defense-supporting industries" by dispersion of new manufacturing plants and other security measures. About two-thirds of major production centers have organized committees to pursue this program, he added.

CBC Clergy Clinics

SPECIAL CLINICS for Canadian clergy using radio are being held in various parts of Canada by the Canadian Broadcasting Corp. These clinics are conducted to acquaint clergymen with the use of the microphone, radio writing and speaking, religious series on CBC networks and stations, and other broadcast topics intended to familiarize them with the special requirements of the radio audience. About 20 clinics have been held to date and a number are scheduled in various parts of Canada for the early summer months.

Hersholt Contributes

AS a "link in the chain of Danish-American friendship," Jean Hersholt, CBS Radio's *Dr. Christian* for the past 15 years, last week presented his collection of Hans Christian Andersen manuscripts, letters and first editions to the U. S. Library of Congress. Presentation was made to Library Director Luther Evans, and backed by "enthusiastic" approval of the government of Mr. Hersholt's native Denmark. Collection, reportedly valued at $75,000, is in addition to Mr. Hersholt's previous donation of 120 Andersen items.

allied arts

NICK ARCHER, Paramount News, **JOHN PEPPER**, feature writer formerly with *Life, Fortune* and *Argosy* and **ERFORD BEDIENT**, *Courier-Express*, Buffalo, to news staff, Telenews Productions, N. Y.

KENNETH C. MEINKEN Jr., midwestern sales manager, National Union Radio Corp., Orange, N. J., appointed vice president in charge of equipment sales of cathode ray tubes, receiving tubes and government business. **F. W. TIMMONS**, regional sales manager, Allen B. DuMont Labs, joins National as eastern sales manager.

ALLEN B. DuMONT Labs, Clifton, N. J., has released brochure on meaning of UHF. New development in TV is explained in non-technical terms aimed at clarifying problems which UHF presents for perspective station owner. Booklet deals with difference between UHF and VHF, and cost and installation of the former.

WALTER P. CHRYSLER Jr. and **LEONARD SILLMAN** announce formation of Entertainment Management Corp., 33 West 42nd St., N. Y. Firm will manage and represent artists in all entertainment fields.

J. T. McALLISTER, manager of factory service, RCA Hollywood, to Hoffman Radio Corp., L. A., in similar capacity.

Mr. McAllister

VINCENT COLBERT, Western Litho Co., S. F., appointed sales promotion manager for radio, television and traffic appliances, General Electric Supply Corp., S. F.

DR. WINSTON E. KOCK, head of acoustics division, Bell Telephone Labs, Murray Hill, N. J., to receive honorary degree of Doctor of Science from U. of Cincinnati at June 6 commencement.

W. S. HARTFORD, vice president in charge of sales, Webster-Chicago Corp., Chicago, retires May 15 after 25 years in electronics field.

LEE ORGEL, former manager of radio-TV department, Nardella, Collins & Co., N. Y., named head of new West Coast office of Sterling Television Co., producers and distributors. Headquarters are located in Hollywood.

ADELE HAGER, WHVR Ann Arbor, Mich., to Broadcast Productions Inc., Detroit, as account executive.

Miss Hager

RICHARD ROBBINS, Television Film Productions, Columbus, appointed film correspondent for state of Ohio by Associated Press serving Spot News Productions.

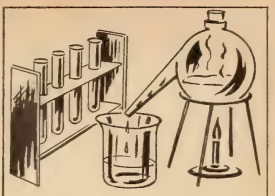
FRANK J. DIELI, chief engineer of Garod Radio Corp., N. Y., named vice president and chief engineer of Majestic Radio & Television, division of Wilcox-Gay Corp., Brooklyn.

Equipment . . .

RCA, Camden, N. J., announces production of new portable radio, Model 2B400, designed to use newly developed RCA long-life batteries providing power for 10 times more playing time than present batteries. Unit also features automatic volume control to eliminate alternate fading and blasting. Radio plays instantly with no warm up necessary.

SIMPSON ELECTRIC Co., Chicago, announces engineering changes in Model 381 Capacity Bridge making unit more compact and useable. Push button arrangement has been perfected to obtain desired range. Bridge arm must be adjusted for maximum meter deflection. Capacity can then be read on the scale.

Technical . . .



JOHN ROGERS, engineering staff, WNBW (TV) Washington, appointed chief engineer at that station and WRC-AM-FM Washington.

JAMES L. PRESTON, chief engineer, KCHI Chillicothe, Mo., to engineering staff, KRVN Lexington, Ky.

JOHN McLEOD, engineer, KFI Los Angeles, recuperating from appendectomy.

AP Radio Style

ASSOCIATED PRESS last week issued a 25-page booklet entitled, "AP Radio News Style Book." The booklet was written by Andrew C. Lang, day supervisor, AP Radio News Report. In a brief foreword, John A. Aspinwall, AP radio news editor, comments that the book "is designed primarily as a guide to the special requirements of processing copy for the AP radio news wire." The booklet was distributed to 100 domestic AP bureaus and to the 1,175 member AP radio and television stations.

Hyde Renominated

(Continued from page 27)

section handling applications for new facilities and assisted in a probe of network broadcasting.

Beginning his international broadcast activity, which later was to place him in a position as top expert at FCC, Comr. Hyde was a member of the U. S. delegation to the Third Inter-American Tele-Communications Conference in Rio de Janeiro in 1945 when he was still General Counsel.

In 1947, he made a flying trip to Havana and Mexico City on NARBA, attempting to work out new uniform standards of potential interference for standard broadcast stations. He was active in the same year during argument before FCC on the clear channel question.

Two years later, Comr. Hyde was chief of the U. S. delegation at the Third NARBA conference in Montreal and again at a similar conference in 1950 in Washington.

Lineup of FCC members is three Democrats, three Republicans and one Independent. Other Republicans, aside from Vice Chairman Hyde, are Comrs. Robert F. Jones and George E. Sterling. Democrats are Chairman Paul A. Walker, Comrs. Frieda B. Hennock and Robert T. Bartley (appointed this year to vacancy caused by resignation of ex-Chairman Wayne Coy). Comr. Edward M. Webster is the Independent.

EXPANSION plans for Edward Lamb Enterprises Inc. were discussed in connection with opening of Mr. Lamb's New York headquarters at the Hotel Barclay. Conferring on advertising budget and other facets of his radio-TV-newspaper properties are (l to r): Bernard H. Pelzer Jr., manager of New York office and national sales manager of Lamb Enterprises; Edward Lamb, radio-TV station owner and newspaper publisher, and Carl F. Hallberg, general manager of WHOO-AM-FM Orlando, Fla. Station managers and newspaper executives convened in Erie, Pa., and accompanied Mr. Lamb to New York for opening of new offices (Suite 250-251) at 111 E. 48th St. Lamb properties include WICU (TV) Erie and the *Erie Dispatch*; WTVN (TV) Columbus, Ohio; WTOD WTRT (FM) Toledo, and WHOO-AM-FM. Office opened late last month.

BALANCED FARMING DAY

WIBW-Instigated Project Gathers Momentum

INTEREST is mounting throughout Kansas in a Smith County farm project instigated by WIBW Topeka, Kan.

The project, entitled Balanced Farming Day, is designed to illustrate improvements which would mean better living for farmers. Activities of Balanced Farming Day will center on a farm near Lebanon, Kan., Aug. 7.

WIBW says that the project will fill "a dire need for dramatization of balanced farming and family living in North Central Kansas."

Alan Young, WIBW promotion manager, announced that the station has scheduled a concentrated build-up campaign. WIBW will air remotes from the project site on Balanced Farming Day.

Cooperating in the project are county, district, state, regional and national soil conservation officials. Kansas State College is helping. And, of course, so is the WIBW farm department.

How will Balanced Farming Day be financed? WIBW emphasized that no cash donations will be solicited. Each agency, organization and business association will contribute time, energy, equipment and facilities, the station added. Several organizations have volunteered to assist with the feeding of workers.

In turn, each business firm and agency will be provided with adequate opportunity to exhibit and demonstrate whatever it uses on Balanced Farming Day.

One project official explained, "We propose to install a complete soil conservation program on the farm in one day. We propose to start a soil building program on the farm which should, if continued, return the farm to its former position of providing a comfortable living for one family.

"We propose to relocate, construct, repair, modernize and paint several of the farmstead buildings," the official added. "We propose also to mend fences and corrals, landscape the property and to modernize the house."

N.Y. AD WOMEN

Miller Named President

NEW OFFICERS of the Advertising Women of New York will be formally installed during the club's 40th anniversary dinner tomorrow (Tuesday) at New York's Hotel Martinique.

Nadine Miller, director of press and public relations for C. E. Hooper Inc., succeeds Helen Berg, vice president and director of her Majesty Underwear Co., as organization president, with Miss Berg continuing to serve as ex-officio board member.

Other officers elected for the new term include:

Ruth M. Volckmann, New York manager of Sawyer-Ferguson-Walker Co., newspaper representatives, first vice president; Harriet Raymond, Plastic advertising manager, Celanese Corp. of America, second vice president; Mary Heeren, assistant to president of Douglas Leigh Inc., treasurer; Hortense Fillion, public relations consultant, assistant treasurer; Hulda Kloenne, director of education, Paper Cup & Container Institute, corresponding secretary, and Marjorie Reiners, *Printers' Ink*, recording secretary.

Newly elected members of board of directors are Beverly Brice, promotion assistant, *Life* magazine; Antoinette M. Casey, assistant director of advertising and sales promotion, Frankfort Distillers Corp.; Rita Otway, executive secretary of Publicity Club of New York, and Virginia G. Smith of the importing firm bearing her name. Continuing as board members are Catherine Owens, Hearst advertising service; Emma Weinstein, associate advertising manager of *Forbes* magazine, and Barbara Wells, WOR-AM-TV New York commentator.

FM'S PULL

Zenith Tests Reported

FM ADVERTISING by Zenith Radio Corp. produced inquiries having an overall cost 55% below AM radio in a recent nationwide spot announcement campaign for hearing aids, according to Ted Leitzell, Zenith public relations director.

Speaking last Tuesday in Birmingham, Ala., Mr. Leitzell said in some areas FM outpulled AM by a substantial margin, with AM leading in others, but the cost per inquiry was lower for FM. There were other areas where AM outpulled FM and had a lower cost.

Duplicate transcriptions were prepared for the AM and FM announcements, identical except for post office box numbers. Some FM-only stations were used and stations normally duplicating their AM and FM were asked to separate their facilities and run individual keyed announcements for each medium.

Since this separation could not be obtained in some cases, Zenith was able to make valid comparisons in limited areas, Mr. Leitzell said. "Full theoretical coverage was secured on both FM and AM separately in only one state, North Carolina," he explained. "Here FM pulled five times the number of inquiries obtained from AM, and cost per inquiry of FM was only one-seventeenth of the AM cost.

"In the state of Michigan, full coverage of AM was obtained while FM coverage included just the areas of Grand Rapids and Detroit. In spite of this, FM outpulled AM two to one, while AM's cost per inquiry ran eight times greater than FM's. In West Virginia only partial coverage on FM was secured. Returns from this state were almost identical for FM and AM, but the inquiry cost for AM was almost twice that for FM."

FM cost was lower in Wisconsin, Alabama and Ohio FM equalled or bettered AM's cost per inquiry, Mr. Leitzell said. In Washington, D. C., FM and AM announcements were separated, numerical returns being almost identical but FM's cost per inquiry was only half that of AM.

CBS-IBEW AGREE

Contract from May 1

AGREEMENT was reached last week between CBS and International Brotherhood of Electrical Workers (AFL) for renegotiation of contract covering all AM-TV technical workers in network-owned stations.

Previous contract had expired May 28, 1951, but renegotiation was halted until IBEW's status as bargaining agent—challenged by National Assn. of Broadcast Engineers & Technicians (CIO)—was certified by workers' vote held a few weeks ago.

Agreement raises salaries from $135 in major centers and $130 in minor centers to $147.50 in all centers, as top in four-year escalator clause, which previously had been for five years. A 10% salary differential was granted midnight-to-7 a.m. workers, extra vacation allowances were given, and other general improvements in working conditions were agreed upon. Contract, still to be signed, is to be effective for two years from date of signing, which will probably be established as of May 1. Subject to Wage Stabilization Board approval, increases will probably be 50% retroactive.

DR. SUITS NAMED

Joins Electronics Panel

DR. C. GUY SUITS, vice president and research director of General Electric Co., Schenectady, N. Y., has been named to the Electronics Committee of the Defense Dept's Research and Development Board.

Dr. Suits will serve as a civilian member of the committee that already includes D. A. Quarles, Western Electric Co. and Sandia Corp., who is chairman; Dr. E. W. Engstrom, research director, RCA Labs., and Dr. William L. Everitt, dean of engineering, U. of Illinois.

Three representatives from each of the military services round out membership of the group, which was set up to conduct research on military applications of electronics. Dr. Suits also is a member of the board's Special Technical Advisory group and Joint Chiefs of Staff.

O'Hara Bill Would Offer Libel Guard

(Continued from page 25)

the Communications Act—Sec. 315.

Because of the relation, it is entirely in legislative setting for an amendment to be proposed to the McFarland bill when it comes up on the floor soon.

This would bypass an important glut in the legislative mill—committee hearings in both House and Senate, committee reports, and passage by both houses.

Thus, in one broad sweep the political broadcast question could ride through both houses on the coat tails of the McFarland bill which in all likelihood is headed for joint Senate-House conference.

It is acknowledged that at least two House members see the solution in this direction and reportedly are ready to introduce the Horan bill as an amendment.

Alternative to this broad plan is to take the slower, albeit more thorough, method of committee hearings and eventual passage.

Since the McFarland bill's fate in the House is the key to the progress made, backers of the Horan measure will wait to see what happens. If no amendment is forthcoming, they will turn their fire on Chairman Crosser, who already has indicated he recognizes the broadcaster's problem of political liability.

Other Committee Studying

Another committee in recent weeks has recognized the problem. This is the Senate Committee on Government Operations, a subcommittee of which has heard testimony on not only the broadcaster's dilemma on libel but also the entire picture of campaign expenditures [B•T, April 28].

Should the House clear the Horan bill as an entity separate from the McFarland bill, the Senate Interstate & Foreign Commerce Committee probably would hold hearings. However, the understanding in the upper chamber is that the bill would have little trouble getting out of Senate committee.

This also brightens the picture should the Horan bill be combined with the multi-faceted McFarland legislation. Either Sens. Ernest W. McFarland (D-Ariz.) or Ed C. Johnson (D-Col.), of the Senate Commerce Committee, and perhaps both, are destined to be conferees on the McFarland bill.

Consensus is they would be inclined favorably toward the bill, which is designed to clarify the political broadcast section.

While the O'Hara bill looked promising as a starter in broadcast circles, certain Capitol Hill authorities privately expressed doubt late Thursday as to the reception it will get from legislators themselves.

As one spokesman expressed it: Will the Congress go along with the apparent theory in the bill that the broadcaster should have the authority over political broadcasts that he enjoys over other types of programming?

In the now famous *Felix v. Westinghouse* case in 1949, the U. S. Court of Appeals ruled in effect that broadcasters can censor spokesmen who speak in behalf of a candidate [B•T, March 20, 1950].

As it appears to those who have given the O'Hara bill a first study, the legislation, if enacted, would extend this to candidates, themselves.

DEFENSE ADVISORY GROUP

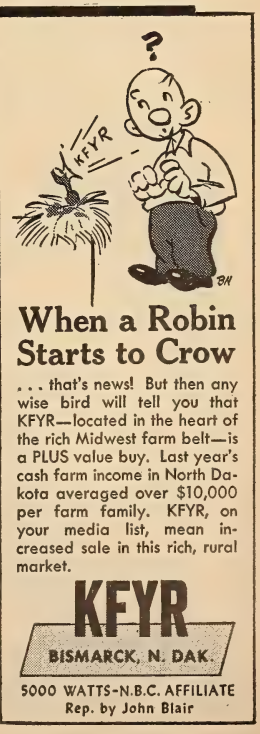
Suggestions Being Adopted

RECOMMENDATIONS of a special committee, designed to spread electronics defense orders around small plants, are being adopted by the Air Force and Small Defense Plants Adm., Glen McDaniel, president of Radio-Television Mfrs. Assn., told a Senate subcommittee Thursday.

Mr. McDaniel testified at a hearing before the Senate Small Business Subcommittee on Mobilization and Procurement, headed by Sen. Blair Moody (D-Mich.). Last year Mr. McDaniel was secretary of a special committee that conducted a small business survey for the Air Force.

Half of the 34 recommendations in the special committee's report have already been put into effect by the Air Force, Mr. McDaniel testified. The others have been passed on to Small Defense Plants Adm.

WIP Music Awards



WIP Philadelphia announced winners in its first annual Showmanship Awards contest last week. Listeners voted for favorites in three categories: band leader, male vocalist and female vocalist. Stan Kenton won the band leader poll, with Billy May and Les Brown runners-up. Buddy Greco led the male vocalists, beating out Eddie Fisher and Johnny Ray, and top spot among the girl singers went to Patti Page, followed by June Christy and Doris Day.

Everywhere You Go . . .

RADIO AMATEUR show by inmates of the big Prince Albert Provincial Penitentiary at Prince Albert, Sask., was held under auspices of 40 members of the local branch of the Associated Canadian Travelers and four members of CKBI there. It is believed to be the first such entertainment program to be broadcast publicly from any Canadian penal institution. Some 27 prisoners took part with listeners' contributions aiding the campaign against tuberculosis. Typical introduction: "Here's Nitro Jake to sing you a song of the West." Prisoners not taking part heard the program on the public address system.

WCCM Moves

WCCM Lawrence, Mass., has moved to new headquarters at 278 Essex St., Lawrence, where the station occupies space including a large auditorium for audience participation programs, two smaller studios, a music library and general sales and executive offices. George H. Jaspert, WCCM president, said the transfer to larger quarters "manifests tangible faith in the future of Greater Lawrence and the Merrimack Valley community."

programs promotion premiums

TWENTY-EIGHT year calendar is being mailed to agencies, clients and the trade by WMAQ Chicago, NBC's m & o outlet which is marking its 30th anniversary celebration. The plastic calendar is printed on a wallet-size card with a revolving wheel. An accompanying memo from Harry C. Kopf, vice president and manager of WMAQ and WNBQ (TV), reminded recipients of the station's anniversary and that the calendar was "guaranteed to keep you up-to-date for at least the next quarter-century."

ON ITS OWN HOOK

REMOTE eyewitness account of the atomic explosion at Yucca Flat, Nev., was broadcast by KSUB Cedar City, Utah, from a plane at 10,000 feet by Art Higbee, manager, and Frank Barreca, news editor, who were being piloted by Royce Knight, local airport manager, toward the scene of the tests when the blast took place. The 1 kw Cedar City CBS affiliate, 140 miles from Yucca Flat, believes it "scooped" all radio stations.

KTUL AIRS COMPLAINTS

NEW show on KTUL Tulsa, *Speak Up Tulsa*, invites listeners to phone in pet peeves for broadcast on the program. Broadcast's success prompted station to allot one hour for its presentation rather than the half hour originally used. Guests appear on the program and attempt to answer questions asked by callers.

STUDENTS TAKE OVER

STUDENTS from Rutgers U. and WRSU, the campus station, New Brunswick, N. J., took over operation of WCTC there last Wednesday. This is the second year the commercial outlet has observed WRSU day. So successful was the initial operation last year that WCTC hired three students as regular staff announcers and a fourth as a remote engineer.

CONSERVATION WEEK

PROGRAM marking WCCO Minneapolis-St. Paul's annual contribution to "Conservation Week" was broadcast last week by Larry Haeg, station farm service director. Seven of the state's top conservationists were his guests on the program. Discussion centered around goods and services provided by the forest products industry "and as a result of keeping Minnesota green, the tourist trade brings in another $200 million" for the state yearly.

TWO YEAR CALENDAR

SIMPLIFIED slide calendar for computing final broadcast dates or talent contract is now being distributed by S. W. Caldwell Ltd., Toronto, transcription distributor. The calendar is calculated on a two year basis from June 1951 to June 1953, and has a pull tab for reckoning 13 week intervals.

RELIGIOUS PROGRAMMING

NEW approach to religious programming has been inaugurated at WHIM Providence. Daily series of 5 minute programs, *What My Religion Means to Me*, features statements from lay people in the community. Listeners of all faiths have been contacted and have recorded their religious philosophies for broadcast on WHIM.

COMBAT TV SHOW

CURRENT WTOP-TV Washington thriller is *The Blue Badge*, Army-produced documentary program showing combat divisions in action during World War II, from 1-1:30 p.m. Sundays in a 13-week series. Lt. Carl Bruton, radio-TV officer for the Military District of Washington, is writer-producer and Col. William Quinn, infantry expert, follows up with comments and demonstrations.

WMAL GUESSING SHOW

GUESSING game show, *You're Hearing Things*, conducted by Bill Malone and Joe Campbell, will be heard from 11:15-30 a.m. Monday through Friday over WMAL-AM-FM Washington, with prizes to be awarded listeners who identify the sounds they hear on the air. Show begun May 5.

LOCATION PLUGS

MOVE to fix WABD (TV) New York's location firmly in the minds of its viewers was begun fortnight ago with a new policy of musical station breaks. Few bars from one of three tunes, "In Old New York," "East Side, West Side," or "Manhattan," are played as background for announcement concerning station's location.

TV HOME DECORATION

DEMONSTRATIONS of new fashions and ideas in home decorating comprise format of new show, *Decorators' Workshop*, telecast daily on WPIX (TV) New York. Grace King, decorator and consultant, will conduct the program which is being sponsored by Sealy Mattress Co. Guest appearances will be made by leading home decorators.

AD STRESSES COVERAGE

SIZABLE ad appeared in Moline, Ill. *Daily Dispatch* giving a resume of flood coverage provided by WHBF Rock Island for its listeners. Pictures of staffers at work during the recent tragedy and accompanying captions were featured in the ad which concluded "all this is how and why WHBF brings you complete, accurate, up-to-the-minute, on-the-scene flood coverage."

PHILADELPHIA STORY

WIP Philadelphia found a silver lining in clouds which hung over the Eastern seaboard in the last days of April. Advertising in daily newspapers, WIP told readers that they could "hear the first news of the sun's arrival by listening to WIP." When the sun finally shone, the station told listeners: "We interrupt this program to bring you a special news bulletin from the WIP news room. The sun has just been seen in Philadelphia; proof that Old Sol is still in the sky. . . ."

TV REQUESTS GRANTED

PROGRAM series, *Request-a-Tune* sponsored by Norman Mitchell, appliance dealer, and Hotpoint, has begun at WAAM (TV) Baltimore. Show enables viewers to write in requests, five of which will be performed by participants on the weekly show. Persons who make the selections will appear on the show to explain their choice.

WWRL MARATHON

SIXTEEN hour marathon was held last week by WWRL Woodside, N. Y., on behalf of a city-wide appeal for the St. Charles School and Community Center Fund, project for the children of Harlem. Show, supervised by Fred Barr, ran from 9 a.m. Tuesday to 1 a.m. Wednesday.

BRITAIN SCIENCE

THE *Johns Hopkins Science Review*, presented over the DuMont Television Network Mondays at 8:30 p.m. for three successive weeks beginning May 12 will show kinescopes of scientific advances in Great Britain. Program claims to be the first to be invited to produce a TV show in a foreign country.

WNAX SCHOLARSHIPS

FOURTEEN students from seven colleges in the Midwest who have successfully completed freshman year requirements and who indicated an interest in majoring in agriculture and related fields or home economics have been granted scholarships by WNAX Yankton-Sioux City, S. D. Each grant is for $300. This is the tenth year the station has made such a presentation.

MOTHER'S DAY CONTEST

MOTHER of the largest family in Angelina County was scheduled to be presented with prizes from KTRE Lufkin, Tex., and several of the city's business firms. Contest to determine the biggest family was conducted on *Q. P. Coffee Club*, daily show on KTRE. Special program honoring the winner was planned for last Saturday.

RECIPE OFFER RESULTS

MAIL map is being distributed to the trade by KSL Salt Lake City showing the station received mail response from 138 counties in eleven Western states, from eleven other states and Canada on its recent Brigham Young U. basketball series sponsored by Utah-Idaho Sugar Co. Offer on the series was for cookie and candy recipe booklet.

STAY-AT-HOME VACATION

DAILY program outlining "package" vacations in New England for its listeners, has been launched at WORC Worcester, Mass. Shows promote a spend-your-vacation-at-home theme. Information on recreation spots in the six New England states was secured from tourist boards for broadcast on WORC.

Why not?
LET LOIS DO IT

Yes, "sales appeal" describes the impact of Lois Kibbe's "Woman's Club of the Air" (3 p.m., Mon.-Fri.) on her wide audience of women. Her comments range from home furnishings to the latest movie. Be among the alert advertisers who let Lois Kibbe sell their products in the southwest.

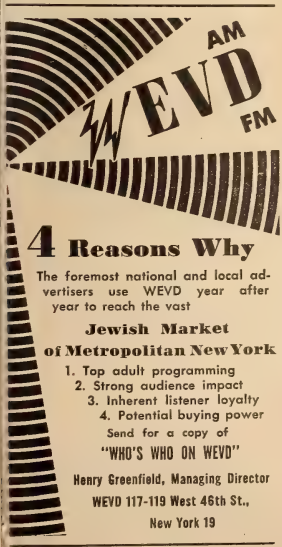
FTC APPEAL

Philip Morris Hearing Set

APPEAL by Philip Morris & Co., New York (cigarettes), from preliminary findings of a trial examiner was set last week by the Federal Trade Commission for hearing in Washington, D. C., June 3.



The initial decision, earlier this year by Examiner Earl J. Kolb, challenged nine advertising claims as "false and deceptive." The firm promptly announced that it would appeal [B•T, Feb. 11].

The tobacco company held in its rebuttal that the decision was not substantiated by evidence and that adverse testimony was subsidized by competing tobacco firms. The trial examiner directed Philip Morris to cease and desist from advertising "certain scientific statements" in broadcast and published continuities.

The complaint had cited a claim that Philip Morris cigarettes are "non-irritating or less irritating than other brands." Company noted that it had offered results of thousands of experiments conducted by noted scientists.

CBS Hollywood Wages

FURTHER wage increase demands by CBS Hollywood and Office Employes International Union (AFL) will be arbitrated shortly by a board composed of Tony O'Rourke, former head of Society of Independent Motion Picture Producers Assn.; Deane Johnson of O'Melveny & Myers, Los Angeles legal firm, and Max Krug, OEIU business representative. On March 24, OEIU accepted a CBS offer of 15% weekly wage increase for 175 office workers in 21 classifications, retaining right to arbitrate further.

New Business

(Continued from page 18)

Co., Valhalla Memorial Park), reappoints Philip J. Meany Co., that city.

U. S. BREWING Co., Chicago, names Abbott Kimball Co., same city. **GEORGE ENZINGER** is account executive.

ST. LOUIS FEDERAL SAVINGS & LOAN Assn., St. Louis, appoints Olian Adv., that city. Radio and TV will be used.

WARREN FOR PRESIDENT COMMITTEE appoints Yambert-Prochnow Inc., Beverly Hills, to handle primary election campaign. TV being used includes two quarter-hours, May 26 and May 29, on KECA-TV Hollywood and KGO-TV San Francisco.

Adpeople • • •

JOHN M. ROYAL, formerly with Don Chemical Co.'s advertising staff, and **JOHN K. LEE**, former Gates Rubber Co. advertising production manager, to Assn. of National Advertisers as secretary to industrial advertising and films steering committees and secretary of radio-TV and display steering committees respectively.

IRVIN W. HOFF, assistant advertising manager, Colgate-Palmolive-Peet Co., appointed advertising manager, effective immediately.

1900 George W. Johnson 1952

GEORGE W. JOHNSON, who was manager of KTSA-AM-FM San Antonio, Tex., from 1937 until 1949, died April 25. He was 52.

Mr. Johnson had retired from radio to his ranch property near San Antonio. He died at his home on Route 8, on the outskirts of the city. Funeral and burial services were held in the Presbyterian Church in the nearby town of Giddings, his birthplace.

He is survived by his mother, Mrs. Laura Johnson, of Cameron, Tex., and by four sisters. Mr. Johnson's sisters were listed as Mrs. W. Bowers Jr. of Beaumont; Mrs. T. L. Denson of Cameron; Mrs. W. S. Brown of Cleburne, Tex., and Mrs. Dorothy Muckleroy of San Antonio.

RADIO FACT BOOKLET

Survey Prepared by ARB

SIGNIFICANT facts about radio listening are presented in a 12-page booklet of that title published by NBC covering the highlights of a survey by American Research Bureau and jointly sponsored by the CBS and NBC radio networks on the distribution and use of radio receivers.

Facts such as the one that TV homes have more radios in working order than "radio only" homes, that over half of all radio listening is done outside the living room and that people spend more time with radio than with television, newspapers and magazines combined, are presented. Survey results were reported in detail earlier [B•T, Dec. 3, 1951].

ARMED Forces Radio Service, Hollywood, has started new radio program, *Jubilee*, musical variety show featuring recording artists requested by members of Armed Forces. It is broadcast live from Hollywood with Will Scott producing from scripts by Peter Brooke.

SETS TO VIETNAM

Aid MSA Anti-Red Drive

RADIO will be heard for the first time by 200,000 persons in the Indo-Chinese state of Vietnam with the current distribution of 400 community listening sets by Mutual Security Agency's Special Technical and Economic Mission (STEM).

Dr. Clarence R. Decker, assistant MSA director for the Far East, said the gasoline generator-powered sets plus a MSA $75,000 improvement program for Vietnamese broadcasting facilities, would renovate the state's broadcasting system for MSA programs featuring American aid and would help programming technique in the state's anti-Communist campaign.

AFRS Training

ALL phases of radio and TV are offered men 18 to 34 by Army Reserve Unit, Armed Forces Radio Service, in an enlistment campaign now under way. On-the-job training in writing, directing, announcing, newscasting and radio engineering will be given, according to Maj. David Bramson, commanding officer. AFRS headquarters are at 7201 Santa Monica Blvd., Los Angeles.

BUILDING FUND

WTHI Puts Drive Over Top

WTHI Terre Haute, Ind., helped teach members of its community a "lesson in brotherhood" by carrying to success a building-fund drive for two hospitals serving all faiths.

Local residents, to increase the number of beds in St. Anthony and Union Hospitals, needed community funds to match those supplied by the federal government. Shy of the goal fixed for contributions some six weeks before the deadline, the group was "bailed out" by WTHI, which donated two five-minute shows daily. The series featured local residents, civic and business officials outlining the need for more hospital space.

Listeners sent up to $500, passing the needed sum and enabling ground to be broken. For the luncheon ceremonies preceding the joint ground-breaking, WTHI personnel broadcast speeches of the governor, a congresswoman and representatives of various medical associations. That evening, staffers joined with those at WTTV (TV) Bloomington for a telecast. The United Hospital Campaign story was picked up by *News of America* on CBS, with Bob Kimbro of WTHI feeding the story to the network.

PROPERTIES OF Crown Corporations, including Canadian Broadcasting Corp., are now subject to municipal taxes on property occupied and owned by the corporations. A ruling to this effect has been obainde by Toronto's Mayor Allan A. Lamport from Canadian Finance Minister Douglas Abbott. CBS property at Toronto will bring about $15,000 in city taxes.

in public service . . .

TOTAL of $20,800 has been donated to the American Red Cross Flood Relief by NBC network listeners of the *Ruth Lyons' 50 Club*, which originates at WLWT (TV) Cincinnati five days weekly. In return for $1 donation, Miss Lyons sent 8x10 photograph. An estimated 15,000 prints are to be mailed to every state and to Canada.

* * *

Emergency Appeal

WHEN American Red Cross appealed for emergency quota to aid rehabilitation of families along Montana's flooded Milk and Missouri Rivers, KMON Great Falls volunteered to raise the money. Hurried consultations with program and announcer staffs paved the way. Within 24 hours, KMON was on the air with a variety Red Cross Jamboree which lasted until midnight Saturday and was resumed intermittently Sunday with the result that the emergency quota was oversubscribed. In all, 18 hours of programming was consumed.

* * *

Donates Transmitters

WWVA Wheeling, W. Va., turned over its former mobile unit—a 100 w transmitter and one of 50 w—to the American Red Cross Disaster Committee and the Ohio County Civil Defense Organization. William E. Rine, managing director of the station, presented them to officials of the Wheeling-Ohio County Chapter of Red Cross. One unit was installed in Wheeling's Red Cross headquarters while the other was used as a stand-by.

* * *

Blood Type Obtained

LARRY HOMER, announcer for WEEI Boston, aired a request one day at 8 p.m. from the Union Hospital in nearby Lynn, Mass., for a special type of blood. At 11 p.m., the hospital phoned to say that it had received 150 offers from WEEI listeners willing to donate the needed type of blood. Some of the calls had come from as far away as Bangor, Me.

* * *

Basketball Tapes

WDAN Danville, Ill., has added another item to its growing list of public service features. The station shipped tape recordings of state championship high school basketball games to the 130th Infantry Regiment, Danville segment of the 44th Infantry Div., stationed at Camp Cooke, Calif.

* * *

KFBI Aids Youth

KFBI Wichita, Kan., showed radio works where other media fail recently when broadcast appeals brought $800 donations to pay costs of special treatments for Jimmy Essex, 18-year-old paralyzed youth, after a newspaper story with picture brought only $100, according to George E. Wells, KFBI program director.

* * *

All-Night Telethon

TELETHON on WDSU-TV New Orleans featuring staffers of both the television outlet and its sister AM station, WDSU, continued 13½ hours, starting at 11 p.m. one Saturday and concluding 12:30 p.m. Sunday. The drive was for the benefit of United Cerebral Palsy Assn. of Greater New Orleans and netted $80,000 for the charity. All-night telethon starred Dorothy Lamour, Chico Marx, Rosemary Clooney and Sunny Skylar in addition to WDSU personalities and several disc jockeys from other local stations.

* * *

Pilot Dog Fund

PILOT DOG Inc., Columbus, Ohio, has announced that the first fund-raising campaign of that organization which was conducted in central Ohio through WBNS-TV Columbus exceeded its goal of $6,000 by netting $6,527.44. More than 2,550 individual contributions were received during the week-long drive. Need for contributions was driven home over 17 locally-produced programs. Viewers were asked to send their donations to their favorite WBNS-TV personality. Seven of the shows oversubscribed their particular quotas. Non-profit group provides seeing-eye dogs to the needy blind at no cost.

* * *

WSIX Aids Foundation

WSIX Nashville and the ABC show, Ted Mack's *Original Amateur Hour*, raised more than $2,000 for the Cordell Hull Foundation for international education when 12 amateur acts selected from 500 auditioned by WSIX put on a 45-minute show in Nashville which went over ABC. The foundation furthers Latin American student exchange with Nashville's Vanderbilt U., Scarritt College and Peabody College for Teachers.

* * *

Guide Dog Fund

KING Seattle, through spot announcements, appealed for contributions to obtain another guide dog for a blind woman whose first canine companion was killed in an automobile accident April 9. A goal of $2,000 was set by Harry Jordan, KING news director, and Hal Davis, program director. Within a few days KING had raised more than $4,000. Incidentally, the blind woman's name is Mrs. Melba King, who said she now refers to herself as Mrs. K-I-N-G.

FINAL DECISIONS

AM—1460 kc

WBET Brockton, Mass.—FCC granted application of Enterprise Publishing Co. for CP to change from 990 kc, 1 kw-D, to 1460 kc, 1 kw unl., DA-N; cond. Decision May 6.

AM—960 kc

WFTC Kinston, N. C.—FCC granted application of Kinston Bcstg. Co. for CP to change from 1230 kc, 250 w unl., to 960 kc, 5 kw-LS, 1 kw-N, DA-N; cond. Decision May 6.

AM—1400 kc

Tacoma, Wash.—FCC granted application of Tribune Publishing Co. for new AM station: 1400 kc, 250 w unl.; cond. Estimated construction cost $24,900, first year operating cost (combined existing FM operating cost and expected AM cost) $138,692, first year revenue (combined existing FM revenue and expected AM revenue) $180,000. Applicant is licensee of KTNT (FM) Tacoma and is publisher of *Tacoma News-Tribune* (evening and Sunday). Simultaneously, FCC denied application of KBRO Bremerton, Wash., for CP to change from 1490 kc to 1400 kc with 250 w unl., and FCC denied petitions of KBRO seeking to reopen record in this proceeding. (Comr. Hyde favored grant of KBRO application.) Decision May 5.

INITIAL DECISIONS

AM—1230 kc

Sparta, Ill.—FCC Hearing Examiner Leo Resnick issued initial decision looking towards grant of application of Hirsch Communication Engineering Corp. for new AM station: 1230 kc, 250 w unl.; cond. Estimated construction cost $13,542.96, first year operating cost between $30,000 and $35,000, revenue between $40,000 and $50,000. Principals in applicant include President Robert O. Hirsch (26.6%), recent graduate of M.I.T. and stockholder in KFMO Flat River, Mo.; Vice President Geraldine F. Hirsch (6.6%), stockholder in KFMO and KFVS Cape Girardeau, Mo.; Secretary-Treasurer Oscar C. Hirsch (40%), president and principal stockholder in KFMO and KFVS, licensee of WKRO Cairo, Ill., and director and minority stockholder of KSIM Sikeston, Mo., and James F. Hirsch (26.6%), student at Washington U., St. Louis, Mo., and stockholder in KFMO. Simultaneously, Hearing Examiner Resnick denied application of Hawthorn Bcstg. Co. for new AM station on 1230 kc with 250 w unl. Initial decision May 5.

AM—920 kc

KGAR Garden City, Kan.—FCC Hearing Examiner Hugh B. Hutchison issued initial decision looking towards grant of application of Ark-Valley Bcstg. Co. to change from 1050 kc, 1 kw D, to 920 kc, 1 kw D, 500 w N, DA-N; cond. Estimated construction cost $14,718.90, first year operating cost $76,418.40, revenue $119,344.52. Vice president and general manager of KGAR is Dale E. Kern. Simultaneously, Hearing Examiner Hutchison denied applications of (1) KLMR Lamar, Col., for CP to change from 1340 kc, 250 w unl., to 920 kc, 1 kw D, 500 w N, DA-N, and (2) KFNF Shenandoah, Iowa (now operating non-DA on share-time basis with KUSD Vermillion, S. D., on 920 kc, 1 kw D, 500 w N), seeking permission to move from Shenandoah to Lincoln, Neb. Decision May 7.

License Renewal

WMCA New York—Granted renewal of license for regular period (FCC addenda to April 30 decisions, B•T, May 5).

WLAC PURCHASE

Application Filed

IN ADDITION to a purchase price of $1,250,000 for 50 kw WLAC Nashville, Life & Casualty Insurance Co. of Tennessee will pay 10% of the net profits after taxes over $200,000 for 5 years to present owner, J. Truman Ward. Details were revealed in an application for FCC approval filed last week.

Insurance company is repurchasing the Nashville station (on 1510 kc) after 17 years from the man who bought it for $75,000 when it was a 5 kw station on 1490 kc [B•T, April 21]. WLAC replacement value was estimated at $370,685.

Terms of the sale also include a life-time management contract for Mr. Ward at $30,000 per year. Provision is made that if Mr. Ward dies before the seventeenth year of his contract, the insurance company will continue its payments to his heirs until the seventeenth year.

Total current assets of WLAC were listed at $103,816.68, with cash assets of $38,041.36. Total current liabilities were shown as $15,253.03. Total assets of the insurance company was indicated as $137,013,424.53.

WLAC is a CBS affiliate, was established in 1925.

Change of ownership will not affect personnel, it was said. F. C. Sowell is general manager of the station.

RCA Report

(Continued from page 26)

elected at the meeting—the largest RCA session ever, with almost 81% of the vote represented in person or by proxy—were: Walter A. Buck, John T. Cahill, Gano Dunn and Edward F. McGrady. Arthur Young & Co., New York, was again appointed to serve as RCA's accounting firm, and the resolution, which would allow stockholders to cast their total votes—based on shares held, multiplied by number of directors to be elected—for a single candidate, was thoroughly defeated.

Retirement of Lewis MacConnach, RCA secretary, after 37 years' service was announced by Gen. Sarnoff, who also commended the officer for never having missed a directors' or stockholders' meeting.

BMI Clinics Continue

(Continued from page 38)

to farmers.

"Farmers feel a close tie with the station who keeps him abreast with the rest of the world. . . . Don't talk down to your rural audience. If you do, you won't have one."

Glenn Griswold, MAB president, presided. Schedule included a joint talk by Harry K. Renfro and Foster Brown, assistant manager and promotion director respectively, KXOX St. Louis, on promotion and public relations.

COLUMBIA, S. C., May 6

John M. Rivers, SCBA president and general manager, WCSC Charleston, said radio today is "the cheapest mass medium of communication. . . . Let's keep our messages believable, forceful and truthful."

Joe Kirby, general manager, WKRS-AM-FM Waukegan, Ill., talked on the value of local news, saying his station gave local stories first importance. He said:

"The people in our area with all the metropolitan papers and network radio stations to listen to, would just as soon hear about things in this state that aren't particularly earth-shaking as to be told three or four hundred times that the peace negotiators in Korea are still arguing with the Russians."

Dorsey Owings, BMI field representative, acted as chairman. Other talks were made by Robert R. Tincher, vice president and general manager, WNAX Yankton, S. D.; Frank McIntyre, production manager, KLIX Twin Falls, Idaho; Mackie Quave, chief announcer and production director, WIS Columbia, and Hale Bondurant, general manager, KFBI Wichita, Kan.

ATLANTIC CITY, MAY 6

"Light classics, pop concert selections, great vocal arrangements and the best of instrumental soloists" were suggested to New Jersey broadcasters by Charles F. Payne, commercial manager, KIXL Dallas. "We never compromise on quality . . . it must be the best," he said, adding that KIXL music "is screened and auditioned carefully to throw out even the great classics which are short on melody and long on 'finger exercise.'

"Music . . . and more good music is radio's only salvation," he said.

About 50 attended the sessions, with Paul Alger, NJBA president and vice president and general manager, WSNJ Bridgeton, presiding.

SEATTLE, May 6

"Promotions can be profitable for radio stations—even in a small station market—if they are planned with a purpose in mind," Pat O'Halloran, commercial and promotion manager, KPQ Wenatchee, Wash., told Washington broadcasters.

"Many promotions don't give immediate dividends but really pay off in good will and increasing your audience—in turn they will indirectly pay off in dollars and cents valuation," he said.

MINNEAPOLIS, May 7

Four-point results come from public service programming, according to C. D. Miller, director of staff operations, WTCN Minneapolis, who addressed Minnesota broadcasters. They are: "(1) establishes the station as an integral part of community life; (2) sells service for the common good of the community; (3) exposes station personnel to contact with key business men and potential listeners; and (4) establishes the fact of station leadership in the community."

John Meagher, MBA president and general manager, KYSM Mankato, presided at the meeting, with speakers including most of the Milwaukee slate, Messrs. Squire, Slater, Rich, Smith, Haganah and Safford.

OKLAHOMA CITY, May 7

Sam Schneider, farm editor, KVOO Tulsa, speaking on "The Farm Audience," said today's farmer is the "greatest market for the goods of industry."

He told Oklahoma broadcasters

OHIO Assn. of Radio and Television Broadcasters sessions and BMI Clinic May 2 at Columbus included these speakers and guests (l to r): Seated—Carl E. George, general manager, WGAR Cleveland; Ed James, senior editor, BROADCASTING • TELECASTING; Harold Fellows, president, NARTB; Sydney Kaye, vice chairman of board and general counsel, BMI; Louis Oswald, promotion director, WHK Cleveland; William Stubblefield, station relations director, NARTB; standing—Walberg Brown, vice president and general manager, WDOK Cleveland; Robert Tinchner, general manager, WNAX Yankton, S. D.; Hal Bumpus, news and sports director, KVOR Colorado Springs, Col.; Robert Fehlman, president, OARTB, and manager, WHBC Canton, Ohio; Gen. Carlton Dargush, counsel, OARTB; Lin Pattee, field representative, BMI; Robert Ferguson, vice president, OARTB, and executive vice president and general manager, WTRF Bellaire, Ohio.

CHARLESTON, W. Va. BMI Clinic April 29 included at speakers table (l to r): Seated—E. Finlay MacDonald, manager, CJCH Halifax, Nova Scotia; Jack Knabb, president, Jack Knabb Adv., Rochester, N. Y.; Eric Lund, farm director, WLVA Lynchburg, Va.; Lin Pattee, field representative, BMI; Mrs. Mary Chilton Chapman, *Charleston Gazette;* standing—Michael R. Hanna, general manager, WHCU Ithaca, N. Y.; Gordon Capps, vice president and general manager, KSRV Ontario, Ore.; John Gelder, president, West Virginia Assn. of Broadcasters, and general manager, WCHS Charleston; Charles A. Wall, vice president, BMI, and Joe L. Smith Jr., general manager, WJLS Beckley, W. Va.

BMI Clinics Continue

(Continued from page 103)

that "service is the basic way of reaching this farmer because a service broadcast hits him right in the pocket book and helps him to make a living."

Allan Page, OBA president and general manager, KSWO Lawton, presided. Ralph Wentworth, BMI field representative, was chairman. Other talks were made by Karl Jensen, program manager, KTUL Tulsa; C. O. Langlois, president, Langworth Feature Programs Inc.; Carl Vandagrift, program director, WOWO Fort Wayne, Ind.; Robert J. Burton, vice president, BMI, and in charge of publisher relations; Norman Glenn, president, *Sponsor* magazine; Bob Watson, program director, KGNC Amarillo, Tex.; and Ted Cott, vice president, NBC.

PORTLAND, ORE., May 7

Frank H. Loggan, president and general manager, KBND Bend, Ore., advocated promotion of local sales, saying, "Knowledge, enthusiasm, confidence and hard work are the things that build business. There are no other ways to gain commercial success; no magic that can be employed; no safe shortcuts. In radio, as in any other business, there are rewards awaiting those who apply each of these elements as they build. . . ."

DES MOINES, May 7

John M. Outler Jr., general manager, WSB-AM-FM-TV Atlanta, told Iowa radio men that "radio's tomorrow is now."

"As long as we can provide the advertiser with a reasonable return on his dollar, there is no real apprehension over radio's fiscal future," he said. He told listeners that his station received 2,000 greetings on its 30th birthday recently.

"We belong to the audience much more than the audience belongs to us. . . . Let's not sell that audience and that confidence on a short market. . . ."

William Quarton, IBA president and manager of WMT Cedar Rapids, presided. Other speakers were Ben Sanders, general manager of KICD Spencer, Iowa; Allan Schrock, program director of KFJB Marshalltown, Iowa; and Herb Plambeck, farm director of WHO Des Moines. Other speakers, who also appeared at clinics listed above, included Messrs. Marlin, Graham, Trace, Rosenberg and Yocum.

SYRACUSE, May 8

Members of the Upstate New York Broadcasters Committee and guests heard Charles F. Phillips, vice president and general manager, WFBL Syracuse, urge better programs to make more sales.

"Radio and TV can complement each other. Together they build greater audience for both mediums," Mr. Phillips said. "We in radio and television must continue to make our fare more attractive if we are to make the most of the opportunity which is ours," he said.

Simon Goldman, general manager of WJTN Jamestown, told the broadcasters to "be sure your station and yourself are the 'big wheels' of your community."

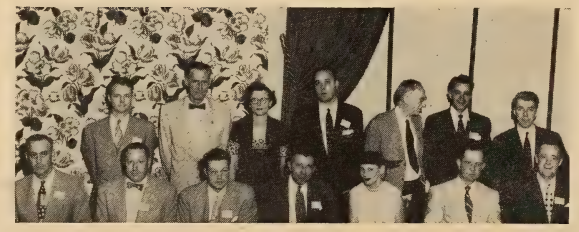
He advised radio men to "charge for program content; don't sell your station short. Stick to your rate card and adopt standards and policies which will give you self-respect and gain the respect of your advertisers. . . . Serve your community, your listeners and your advertisers . . . and you will take your rightful place in Radio Heaven. . . ."

Others on the speaking progam were Ken Sparnon, BMI field representative; E. R. Vadeboncoeur, chairman, upstate group committee and vice president and general manager, WSYR-AM-FM-TV Syracuse; Sam Carey, program service manager, WRVA Richmond, Va.; Seymour Siegel, director, WNYC New York, and Sydney M. Kaye, vice chairman of the board and general counsel, BMI. Other speakers, listed also at clinics above, were Messrs. Payne and Hanna.

SAN ANTONIO, May 8-9

Bob A. Roth Sr., commercial manager, KONO San Antonio, said the KONO staff "is continually on the alert for and seeking out public service projects."

Mr. Roth said KONO had a "city wide reputation of being very generous in this respect, and citizens and organizations seek our aid. This is not only gratifying but pays big dividends." He warned stations not to allow "over-stating the worth of products, false claims and gross exaggerations."



TBA members were told by Bob Watson, assistant manager, KGNC Amarillo, that they should thoroughly analyze their markets, fitting programs to their station's power, area-wise.

"Be individual—be distinctive—be different. Make your station stand for something. Give it personality. . . . Build local personalities and use authorities where possible. You will find your station will grow in importance and financial security as your programming depends less and less on networks," he said.

J. M. McDonald, TBA president and general manager, KCRS Midland, presided. Other speakers included Karl Wyler, owner-manager, KTSM El Paso; James A. Byron, news editor, WBAP Fort Worth. Others on the program, who appeared at clinics listed above, were Messrs. Wentworth, Langlois, Vandagrift, Burton, Glenn, Roth and Cott.

SAN FRANCISCO, May 9

Speaking on "A Locomotive Named Programming," Russ Coglin, program director, KROW Oak-

RALEIGH, N. C. BMI Clinic May 2 saw this group at speakers table (l to r): Seated—T. H. Patterson, president, North Carolina Assn. of Broadcasters, and general manager, WRRF Washington, N. C.; Charles A. Wall, vice president, BMI; Gordon Capps, vice president and general manager, KSRV Ontario, Ore.; Paul Marion, promotion supervisor, WBT-AM-FM WBTV (TV) Charlotte; Frances Jarman, director of women's affairs, WDNC Durham; Richard Mason, general manager, WPTF Raleigh; Ken Sparnon, field representative, BMI; standing—William S. Page, president and general manager, WFTC Kinston, N. C.; Robert M. Wallace, general manager and chief engineer, WOHS Shelby; Mrs. Wallace; Jack Younts, general manager, WEEB Southern Pines, N. C.; Jack Knabb, president, Jack Knabb Adv., Rochester, N. Y.; Michael R. Hanna, general manager, WHCU Ithaca, N. Y.; E. Finlay MacDonald, manager, CJCH Halifax, Nova Scotia.

land, told members of the California State Radio and Television Broadcasters Assn.:

". . . Programming is the motivating force of radio, and the impetus upon which a station either 'makes' or 'breaks'. . . . It's a long uphill pull which can be accomplished only by the strongest of vehicles. . . ."

Fred Ruegg, program director, KCBS San Francisco, said:

"We are making money; radio is still the best advertising buy, dollar for dollar. And we do serve the public. Actually, we are a success. Let's start acting like it," he said, denouncing radio's "inferiority complex."

Paul Bartlett, CSRTBA president and president and general manager, KFRE Fresno, presided. Jim Cox, BMI field representative, was chairman. Other speakers, who have been listed in clinic stories above, included Messrs. McTigue, Holm, Baylor, Csida and Aldridge.

BOSTON, May 9

Edmund J. Shea, media director, James Thomas Chirurg Co., Boston, presided, with Lin Pattee, BMI field representative, acting as chairman. Speakers included Dan Jayne, general manager, WELL Battle Creek, Mich.; Patrick J. Montague, business manager, WHYN Holyoke; Fred Gamble, AAAA president; Daniel Kops, manager, WAVZ New Haven, Conn., and John Hurley, manager, WNEB Worcester. Others, also listed in clinic programs above, included Messrs. Payne, Carey and Siegel.

ATHENS, GA., May 10

Participants at the Athens clinic included John W. Jacobs Jr., general and commercial manager, WDUN Gainesville; Frank Butler, WRFC Athens; Charles A. Wall, BMI vice president in charge of finance, and Ben Williams, GAB president and commercial manager, WTOC Savannah. Others, listed in clinic programs above, were Messrs. McIntyre, Kirby, Bondurant and Tincher.

The other BMI program clinics held last week were at Baltimore, May 5; Gainesville, Fla., May 8; Regina, Sask., and Chicago, May 9.

But Does Ike Like?

NOVEL promotion campaign by WISR Butler, Pa., is going the rounds, according to Joseph T. Mathers of the station. When a staffer fixed up a campaign lapel button to read, not "I like" you-know-who, but "I like WISR," the idea caught and 140 persons, mostly young people, have requested the button, which also drew "quite a bit" of comment at the meeting of Pennsylvania Broadcasters Assn., Mr. Mathers said.

Credit Lift Effects

(Continued from page 23)

conditioned to not buying," he told BROADCASTING • TELECASTING Thursday. "The government's action comes much too late to have any great effect." Mr. Shouse had criticized government credit controls at the NARTB convention as restrictive to the American economy. Similar sentiments were expressed by William A. Blees, vice president and general sales manager of Avco's Crosley Div. He conceded, however, the action "unquestionably will improve business by giving business men an opportunity to sell," although he felt the action came six or eight months too late.

BAB President William B. Ryan felt that "it certainly makes sense to think that the lifting of credit restrictions will mean big drives for installment business by companies which have adequate stocks to sell. This will mean more advertising, which in turn means an opportunity for radio to get additional business and, at the same time, again demonstrate its effectiveness as a salesman."

T. F. Flanagan, managing director of the National Assn. of Radio and Television Station Representatives, said it is logical to expect that easing credit restrictions "will spur sales of many products, some of which have been dragging their heels."

Spot's Flexibility

"Advertising" he said, "will bear the burden, as usual, of creating the desires and consummating the sales. Spot radio and TV will be most useful to advertisers under these circumstances, since it can be so quickly employed and is so promptly effective."

Optimism was the byword for Benjamin Abrams, president of Emerson Radio & Phonograph Corp., who stated: "It will mean the increase of employment in the television and radio industry by about 25% and it will bring television within the reach of people who could not afford to own a television set . . ."

Richard Cooper Jr., president of R. Cooper Jr., General Electric distributor, noted that appliance sales had been restricted by the regulation and termed the board's action "a stimulating thing." He said slackened consumer demand in some fields was attributable to the credit curbs.

Robert Sampson, executive vice president, Sampson Co., Chicago, predicted that the time payment schedule probably would revert to pre Regulation W days, with items payable over a two-year period in many cases.

In Washington, D. C., Lacy's Inc., radio-TV appliance chain, expects some sales improvement. William Warsaw, Lacy's president, put it this way: "Lower terms will cause the patient to rally, but it will take lower prices to make him well."

There were favorable comments, too, from dealers handling refrigerators, household furniture, washing machines and other appliances —all heretofore subject to the 15% down and 18 months-to-pay terms —as well as from retail groups and used car dealers.

Household equipment, appliances and supplies ranked eighth in product listings for local radio used last year with nearly $19.5 million and ninth in spot TV with nearly $2 million. Home appliances rated third with over $6 million in local TV.

Terms presumably would vary for different manufacturers. There were indications that car buyers still would pay 33% down in many cases but receive 24 instead of 18 months to pay, according to the National Automobile Dealers and Mfrs. Assns.

Home furnishing firms greeted the action with the split reaction of a man watching his mother-in-law run off a cliff in his new Cadillac. Some complained that the public is not in the mood to buy now—the only remedy for which seemed to be hard selling through advertising and lower prices to stimulate interest anew.

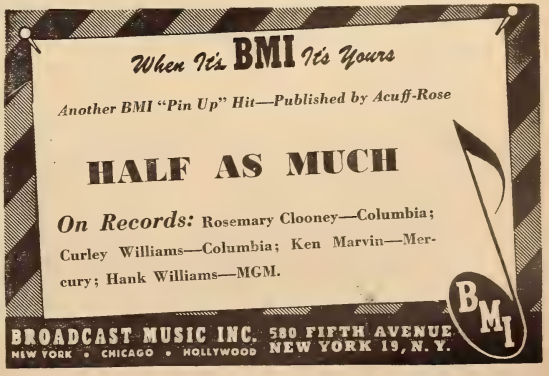
The National Retail Furniture Assn. (representing some 9,000 stores) asserted that "uncontrolled consumer installment credit is essential to successfully distribute mass production of home consumer goods."

Mort Farr, president of the National Appliance and Radio-TV Dealers Assn., sounded one warning about the lifting of credit restrictions: "We can look forward to a large number of 'no down payment' ads," he was quoted as saying, "but it will be a wise precaution for dealers and local organizations to check the legitimacy of these offers."

With most of the summer broadcast time schedules set and a number of accounts lined up for fall, the effect on national network accounts could be infinitesimal at the outset. It was felt, however, that local stations would enjoy an immediate local and spot time bonanza where short-notice commitments were possible.

FRB said that it made its move because of "developments in the economy generally and in the markets directly affected by the regulation." But it was known that Congress and appliance-auto dealers had urged removal of restrictions, and that the board itself was concerned over lagging sales in the appliance field.

At his Thursday news conference, President Truman was asked if the board had discussed the action with him. Mr. Truman said the board had told him the plan. He agreed the situation should be flexible and heatedly denied a suggestion that "politics" might have been involved. Mr. Truman felt, however, that Congress should retain the power for FRB. Similar charges had been voiced in connection with easing of raw materials.



The suspension also represented a victory for Sen. Homer E. Capehart (R-Ind.), who last month proposed to the Senate Banking & Currency Committee that all credit curbs be abolished. His amendment was rejected, however.

Committee Chairman Burnet Maybank (D-S. C.) also expressed satisfaction with the ruling, claiming that it fell "in complete conformity with the intent of Congress." The Maybank committee has been at odds with the administration, which earlier this year demanded retention of credit controls.

James Carey, CIO secretary-treasurer, told the House Banking Committee earlier last week that all credit curbs on installment plan buying should be repealed—or at least "liberalized" and removed from the board's jurisdiction. He charged that they discriminated against lower income groups.

The National Foundation for Consumer Credit, which had plumped consistently for credit repeal, described the suspension as "the worst possible thing that could happen to business."

The action means, according to William J. Cheney, executive vice president of the foundation, that the board "might possibly say on Monday, 5% down on a TV set and on Tuesday, 50% down, "and that such authority would result in "chaos."

L. A. INDEPENDENTS REACH ACCORD WITH ANNOUNCERS

AGREEMENT reached by Los Angeles area independents and staff announcers, carrying 5% overall wage increases, effective May 1. Proposed health welfare insurance plan to be paid for by employers plus other working conditions were not included. New contracts negotiated by AFRA. Union originally asked 10% increase [B•T, April 14]. KMPC Los Angeles, Liberty affiliate, now classified in network category by AFRA.

Pro rata pay granted parttime announcers with four-hour minimum call, also pro rata vacation and sick leave.

ILLINOIS BROADCASTERS HEAR PROGRAM TIPS

MEANS of strengthening radio programming were outlined in Chicago Friday at Illinois Broadcasters Assn. program clinic conducted by Broadcast Music Inc. in Sheraton Hotel. IBA President Charles Caley, WMBD Peoria, presided with clinic chairman Burt Squire, of BMI Chicago.

Speakers and topics were D. Gordon Graham, WCBS New York, "Programming in Mood and Sequence"; Ed Yocum, KGHL Billings, Mont., "Local News Builds Sales" Sydney M. Kaye, BMI counsel and vice chairman of board, "Copyright Hints and Pitfalls"; John M. Outler Jr., WSB Atlanta, "Radio's Tomorrow Is Now"; Manuel Rosenberg, editor, *The Advertiser*, "The Advertiser Looks at Radio"; Gus Hagenah, Standard Radio Transcription Services, "Music Hath Charms"; Gene Trace, WBBW Youngstown, Ohio, "After Sale, What Then?"; Hugh Boice, WEMP Milwaukee, "Music Is What You Make It."

KAUFMAN LEAVES SNADER

REUB R. KAUFMAN, president of Snader Telescriptions Sales Inc., Beverly Hills, Calif., and minority stockholder, has resigned in disagreement over policy. E. Johnny Graff continues as national sales manager headquartered in New York. Louis D. Snader is principal stockholder and president of Snader Telescriptions Corp., parent corporation which is unaffected by change. Under new setup production is to be stepped up with two new half-hour dramatic TV film series getting under way immediately.

TV COMMERCIALS

RUBEN ADV. AGENCY, Indianapolis, will produce TV commercial series for Gibson Co., Indianapolis (distributors of automotive supplies, electric appliances and Arvin TV and radio sets) and for EMGE Packing Co., Anderson (meat packers). New accounts include Holland Custard and Ice Cream Co. and American Electric Corp.

BORROW WALKIE-TALKIES

ARMY Signal Corps "walkie-talkies" will be loaned to networks on request for floor coverage of political conventions in Chicago in July, it was learned Friday. ABC had requested loan of "several" instruments for coverage purposes and Signal Corps authorized cooperation with all networks who may request them. "Walkie-talkies" manufactured by Raytheon Mfg. Co.

CANADIAN CUSTOM

CHECK for $5, received from Toronto, Ont., viewer, returned by WBEN-TV Buffalo to Canadian viewer who sent money "in appreciation of the wonderful programs which your station has been televising. Receiving sets in Canada are being contemplated as a source of revenue for licensing. Therefore, I think it only fair that seeing you are doing all the work and we are deriving a tremendous amount of pleasure from it you should receive a fee for this also." In acknowledging check, WBEN-TV wrote that "written expression" was "adequate compensation."

markets. Agency, Doherty, Clifford & Shenfield, N. Y.

SOUTHERN CAMPAIGN ● Lever Bros. (Lipton's Iced Tea), N. Y., buying six-week campaign to start June 2, using daytime minutes and chain-breaks. Radio markets are mostly in South. Agency, Young & Rubicam, N. Y.

WALKER NAMED ● WCHV Charlottesville, Va., ABC affiliate, has named Walker Representation Co. as national representative.

BABBITT CHANGE ● B. T. Babbitt Inc., N. Y. (BAB-O), sponsors of alternate-week half-hours of Kate Smith on NC-TV, effective July 1 will no longer be handled by William H. Weintraub Agency. New agency not yet named.

GULF NEWS ● Gulf Oil Co. for Gulfspray and other products, signed for new John Daly news program, ABC Radio Network, Mon.-Fri., 10-10:15 p.m. (EDT), to start June 16 for 52 weeks. Agency, Young & Rubicam, N. Y.

NBC RADIO NAMES DAVIDSON EASTERN SALES MANAGER

WILLIAM DAVIDSON, sales member of Free & Peters, station representatives, appointed eastern sales manager for radio, NBC National Spot Sales Dept., according to announcement being made today (Monday) by Robert J. Leder, department manager for radio.

Mr. Davidson's background of 14 years in broadcasting includes extensive service on NBC and ABC station relations staffs and experience as timebuyer with J. Walter Thompson and Benton & Bowles agencies. He assumes new post June 2.

TRUMAN GETS FILM

KINESCOPE film of May 3 White House television tour (see page 84) presented to President Truman Friday by William R. McAndrew, NBC-TV public affairs director, and Eugene Juster, general manager of WNBW (TV) Washington, NBC O&O station. Copy of film also will be presented to National Archives by NBC. Filmed version was repeated on NBC-TV network May 10, 4-4:50 p.m. Program widely hailed as outstanding TV documentary.

PEOPLE...

WILLIAM S. HEDGES, NBC vice president, and **KEN R. DYKE**, vice president of Young & Rubicam, among those named to special American Assn. for United Nations Committee to plan guided tours through UN headquarters.

ROBERT (BOB) BAUER, timebuyer, Dancer-Fitzgerald-Sample, N. Y., to Cunningham & Walsh, that city, as senior timebuyer effective today (Monday).

PHIL WILLIAMS, formerly television public relations director and theatrical sales manager for *March of Time*, to join 20th Century-Fox Short Subjects Sales Dept.

BERNARD MUNSON, assistant vice president in commercial department of All America Cables & Radio Inc., subsidiary of American Cable & Radio Corp., elected vice president.

EUGENE J. FLECH named assistant to general sales manager at Standard Transformer Corp., Chicago, after working as chief specification engineer.

GEORGE HEINEMANN, TV program manager at NBC Chicago, serving two weeks' active duty with Navy at Glenview, Calif. He is reserve lieutenant commander.

N. (Bert) COLMAN O'LEARY, ABC studio engineer and previously TV engineer at NBC, appointed to new ABC post, master control supervisor.

DONALD L. MILLER, director of research for Crosley Broadcasting Corp., has joined Burke Marketing Research Inc., Cincinnati, as vice president. He will serve WLW radio and TV stations in consulting capacity.

M. F. MAHONY, vice president and manager of New York office of Maxon Inc., elected director of company.

THEODORE KIENDL, prominent New York attorney, retained as ASCAP counsel to be associated with ASCAP general attorney, Herman Finkelstein, and Schwartz & Frohlich, general counsel, in current TV rate-making proceeding before U. S. District Court for Southern District of New York, Mr. Finkelstein announced Friday. In this capacity, Mr. Kiendl succeeds late Robert P. Patterson, killed in plane crash last winter. Mr. Kiendl is member of firm of Davis, Polk, Wardwell, Sunderland & Kiendl.

CLEAR ARMOUR PLAN

NBC-TV reportedly has secured enough clearances from affiliates to indicate early go-ahead with proposed Armour & Co. (Dial soap) sponsorship of four half-hourly 35-to-60-second weather reports on its morning *Today* show (Mon. through Fri., 7-9 a.m.). Plan to sell these reports, charge Armour for equivalent of five-minute segment, and pay affiliates one-third of 15-minute rate had stirred up affiliate resistance when first proposed [B•T, April 14].

JCET GETS FORD FUNDS

JOINT COMMITTEE on Educational TV received $145,000 from Ford Foundation for second year of operation, it was announced Friday. Ford grant for 1952-53 year was $55,000 more than last year. JCET also gets personnel and special operating financial assistance from educational institutions. JCET announced establishment of field consultation service to educators. This will take form of local and regional meetings where consultants with legal, engineering and programming experience will advise educators interested in going into TV operations.

Congratulations

for

THE SIGMA DELTA CHI AWARD FOR RADIO NEWSWRITING in 1951

and for

"establishing new standards of excellence and maturity in the field of newswriting"!

KMBC-KFRM *and your associates are mighty proud of you and your achievement!*

John Farmer

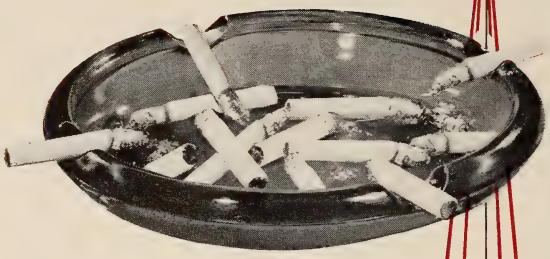
Henry Wheat

Jack Benton

Hal Harvey

Bill Griffith's recognition by Sigma Delta Chi for Radio Newswriting in 1951 was given for the same brand of outstanding news preparation turned in day after day by all five members of the KMBC-KFRM news staff.

These men, all journalism graduates, each one writing and broadcasting his own material, are the reasons why The KMBC-KFRM Team enjoys the highest-rated news programs in the great Kansas City Primary Trade Area.



TO SELL THE WHOLE HEART OF AMERICA WHOLEHEARTEDLY, IT'S

The **KMBC-KFRM** *Team*

CBS RADIO FOR THE HEART OF AMERICA

OWNED AND OPERATED BY MIDLAND BROADCASTING COMPANY

To a time buyer with no time on his hands

YOUR CROWDED DAY consists of crowded hours . . . and if the day isn't long enough you crowd some night hours. All day long you run into characters talking off the top of their heads, throwing it on the table for what it's worth, willing to pool their brains, thinking out loud, but who won't buy it. When you get the bugs ironed out after suitable woodshedding, the ball is back in court, money-wise, and you're tuned in on the right antenna. But before plans are finalized, the thing comes unwrapped and, copy-wise, has to be updated. It figures.

No matter how many gimmicks there are in the hopper, you don't need a survey to prove that a day has only so many hours. That troubles us too . . . we also have little time on our hands. We're sold out Mon. thru Sat., 5:30 AM to midnight. except for a couple of good half-hours on Friday & Saturday evenings. Sundays are sold, or not for sale, 6:45 AM to 11:30 PM, except for a popular hour in the morning. (Details on request.)

We used to dream of the day when the schedule would be filled like this and we could go fishing. But the dream was better than reality. It's not easy to fight off two good customers who want the same thing. And we're not cocky about having little time to sell. Seasons come and go. Changes occur and it's just a matter of time until we can handle any good account.

Please spot-check us anytime. Or tune in on our antenna via our national reps, The Katz Agency.

"very gratifying response..."

Early this year, the Lancaster Free Public Library and WGAL-TV jointly sponsored a "Friends of the Library" project which had its inception during a WGAL-TV studio telecast.

A follow-up program took televiewers behind the library scene to show its needs and the services offered. "Friends of the Library" had as its goal one thousand contributing members.

Mr. Joseph A. Benner, Lancaster's 1951 citizen of the year and project chairman, said, ". . . the result—1450 active contributing members . . . far beyond expectations. We are deeply appreciative of this television cooperation and the very gratifying response . . ."

A by-product of the campaign was greatly aroused public interest which has given added impetus to plans for a new library building.

Active, responsive participation in all worthwhile public service projects is an outstanding principle of WGAL-TV's operation.

CLOSED CIRCUIT

SYNDICATE composed of Bob Hope and several broadcasting and movie executives, with big financial backing from Lehman Bros., N. Y. investment bankers, negotiating for big-scale entry into radio-TV. Deal reportedly in wind for acquisition of radio and television properties in Midwest and East. Presence in negotiations of Lehman Bros., among biggest investment bankers in country, suggests number and importance of properties involved are substantial.

OMINOUS talk about further network rate adjustments continues to pervade Madison Avenue. Who will make first move, if any, is touchy question. If it's CBS, then NBC will follow and vice versa, though no network indicates it's anxious to be "first." Talk surrounds adjustment of nighttime rates into closer juxtaposition with daytime but with differential in favor of nighttime, premised upon larger available audiences during evening leisure hours.

ABC-UNITED PARAMOUNT THEATRES shortly expected to petition FCC to sever its case from that involving DuMont and Paramount Pictures. Petition will contend that protracted proceedings are working severe hardship on ABC and that other cases have no relation to factors involved in merger. Hearings began Jan. 15 and have revolved largely around matters not pertaining to merger per se, it will be contended.

PREDICTIONS that radio network rate situation would settle down by mid-1953 now are being revised to mid-1954 in network circles. That's premised upon slow progress being made in TV allocations. Thought was that licensing of any substantial numbers of TV stations would tend to stabilize overall radio-TV relationship.

SHORTLY TO BE announced will be election of J. Glen Taylor, heretofore director of government operations of General Tire & Rubber Washington activities, as a vice president of Thomas S. Lee Enterprises Inc., parent of Mutual, Don Lee, Yankee and WOR Divisions. He will become general executive at New York headquarters and a right hand bower to Thomas F. O'Neil, Lee Enterprises president and chairman and president of Mutual.

UPCOMING is plan for coordination of Mutual-WOR operations involving consolidation of certain activities on usual network-key station plane. This logically expected coordination is being evolved by President Tom O'Neil with top executives of divisions to transform Mutual from cooperative network to centrally operated organization as means of introducing greater efficiency and strength. Incidentally, change of corporate name from Thomas S. Lee Enterprises to General Teleradio Inc. should come any day now.

YOU CAN take it or leave it, but political soothsayers predict that Democrats will make heavier use of TV during upcoming campaign than Republicans, with GOP relying mightily

N. Y. MOVES TO KEEP TV FILM BUSINESS

ALERTED by growing shift of TV filming from New York to West Coast, New York Board of Trade Friday announced formation of a TV and Motion Picture Committee, to start functioning immediately. M. D. Griffith, board's executive vice president, was elected temporary chairman with David Pincus, head of Caravel Films and member of Film Producers' Assn., vice chairman. Others present at organizational meeting included William Ganz of William J. Ganz Co.; Dermid MacLean, Paul Hence Prod.; Peter J. Mooney, Audio Prod.; Walter Lowendahl, Transfilm; Edward Lamm, Pathescope; Elizabeth Calhoun, All-World Prod.; Gil Boag, Bedford Park; Lucile Sullivan, Annie Laurie Williams; Herbert Robinson and Fletcher Smith of Fletcher Smith Studios, and Otto H. Sutter of Seaboard Studios.

AMERICAN CHICLE ON CBS

CBS RADIO's new two-program, three-sponsor summer sales plan—similar to NBC's "Tandem" and ABC's "Pyramid"—may start off one-third sponsored on network basis (by American Chicle Co.) and with two-thirds available for sale by affiliates locally (unless network lines up one or more additional sponsors before Tuesday, scheduled effective date of American Chicle purchase). Programs and time periods involved are *People Are Funny* (Tues., 8-8:30 p.m.) and *Mr. Keen, Tracer of Lost Persons* (Thurs., 9:30-10 p.m.).

NARTB ELECTION GROUP

MEMBERSHIP of special "register and vote" campaign committee, in which NARTB will participate with American Heritage Foundation and Advertising Council [B•T, May 12], announced Friday by NARTB President Harold E. Fellows. Serving with Chairman John F. Patt, WJR Detroit, will be Frank Fogarty, WOW-TV Omaha; Joseph Wilkins, KFBB Great Falls, Mont.; Roger W. Clipp, WFIL-TV Philadelphia; Kenneth D. Given, WLBJ Bowling Green, Ky., and Paul W. Morency, WTIC Hartford.

BUSINESS BRIEFLY

SPOTS FOR HATS ● Adam Hats, N. Y., through Hirshon-Garfield, that city, preparing radio spot announcement campaign for Father's Day promotion, effective June 1 for two weeks in about 15 markets.

CANDY CAMPAIGN ● Peter Paul Inc., N. Y. (candy bars), through Maxon Inc., same city, preparing one-month radio campaign, daytime minutes and chain breaks, effective June 1 in about 25 markets.

RCA VICTOR BUYS ● RCA Victor division, through J. Walter Thompson Co., N. Y., effective June 1, will sponsor *Meredith Willson's Music Room* on NBC Radio, Sundays, 8-8:30 p.m. EDT, as summer replacement for the *Phil Harris-Alice Faye Show*. *Music Room* is currently heard on network as sustainer in Wednesday, 10:35-11 p.m. EDT slot.

READY MIX INTRODUCTION ● Swansdown Ready Mix (angel food), N. Y., preparing radio and TV spots and participations in about ten markets for an introductory offer, starting June 9 through June 27.

AEROSOL SWITCH ● Colgate-Palmolive-Peet Co., N. Y., names Street & Finney, same city, to handle advertising for its Florient aerosol air deodorant.

PITTSBURGH BUYS ● Pittsburgh Paint Co., through BBDO, N. Y., lining up radio availabilities on women's participation shows for probable campaign.

BREWERY HALF HOUR ● Smith Brewing Co., Philadelphia, placing half hour transcribed show *Obsession* in New England markets. Placed direct.

STU ERWIN RENEWED ● General Mills, through Dancer-Fitzgerald-Sample, N. Y., renews *Stu Erwin Show* on ABC-TV (Fridays, 7:30-8 p.m.) for 52 weeks effective June 6.

GOSPEL HOUR RENEWED ● Gospel Broadcasting Assn., Los Angeles, through R. H. Alber Co., that city, has renewed *The Old Fashioned Revival Hour* on ABC radio, Sundays, 4-5 p.m. EDT, for 52 weeks.

NCAA Ban Makes Atlantic Go Pro

FOOTBALL telecast ban of National Collegiate Athletic Assn. has resulted in cancellation by Atlantic Refining Co. of future sponsorship of college grid game broadcast. Firm sponsored 115 such contests on radio last season (see early story, page 60).

N. W. Ayer & Son, Atlantic's agency, in announcement Friday said that in place of college football on radio, refining company plans "a major program" of professional football telecasts. In letters to colleges with which agreements had been made, Atlantic explained: "Audience studies made last year showed that regardless of the importance of the game on radio, the game televised has an average of nearly four times the audience, even though it was in some cases being brought from a remote area."

Several of nation's largest colleges were involved.

Spokesman added that recent activities by NCAA-TV panel indicated that Atlantic "was likely to be blocked from televising college football in 1952."

Since N. W. Ayer & Son could not recommend radio without TV, letter said, "it is therefore necessary for us to recommend that Atlantic discontinue broadcasts of college football, because of this shift of radio listeners to television, and our loss of television position through the action of the NCAA."

Although Atlantic originally backed up radio audience losses by increasing video coverage, as regional sponsor, company was eliminated from last season's NCAA-TV plan which gave sponsorship on national basis to one company (Westinghouse), official stated.

Atlantic began sponsoring football broadcasts in 1936; it reputedly became first TV sponsor of college games in 1940 via Philadelphia experimental station.

FCC LETTERS INTERPRET POLITICAL BROADCAST RULE

MORE light on what stations can and can't do regarding political broadcasts was shed by FCC Friday when it released text of two letters interpreting Section 315 of Communications Act.

According to FCC, stations can't hold candidates' speeches to advocacy of office for which they're running. And, once a candidate announces for public office, any time afforded him must also be afforded other candidates for same office.

First clarification was contained in renewal of license of WMCA New York. Station had been put on temporary license after Socialist Labor Party complained WMCA had refused to carry sixth of series contracted for in behalf of Eric Hass, candidate for president of New York City Council. Station claimed Hass' broadcasts were not devoted to advancement of candidacy, but to advancement of Socialist Labor doctrine, that after being warned that some tie-up of series with office for which he was candidate must be accomplished, Haas and his party refused to comply.

FCC said station erred. Candidate's campaigning up to him, cannot be confined to office he is seeking, Commission stated. To permit that concept would empower stations to tell candidates how to campaign, it said.

Comr. Robert T. Bartley dissented, said Commission should have approved license renewal on ground WMCA had serious doubt about candidacy of Mr. Hass.

Other interpretation was in answer to request for declaratory ruling from KNGS Hanford, Calif. Station had been running weekly transcribed *Report from Congress* by Senator William Knowland (R-Calif.). Sen. Knowland announced candidacy for re-election on both Republican and Democratic tickets March 5. Station ran last of *Report from Congress* series April 9. On March 28, Rep. Clinton D. McKinnon (D-Calif.) asked for same time and facilities since he had announced his candidacy for Senate on Democratic ticket. Station refused Mr. McKinnon's request on ground Sen. Knowland's broadcasts were not political.

Commission said that since KNGS had given Sen. Knowland time on air after he was a candidate, other candidates must have equal opportunities. FCC also said Section 315 says nothing about nature of candidate's speeches, can be political or not but they're still candidate's broadcasts and thus equal time must be provided others.

WABD PROMOTION DEAL

MUTUAL promotion deal completed between WABD (TV) New York, key station of DuMont Television Network, and *New York Journal-American*, Richard E. Jones, recently appointed WABD manager, said Friday.

Journal-American was to introduce new, boxed feature on its radio-TV page same day, "WABD highlights of the day," and planned to start all its regular program schedules with WABD listings.

WABD, in turn, was to use *Journal-American* local news photos during newscasts, flashing newspaper's masthead on screen "several times" daily and suggesting to viewers, at end of each news program, that they obtain further details by reading *Journal-American*.

In this Issue—

Has the coincidental interviewing technique now used by C. E. Hooper Inc. deflated radio sets-in-use figures? John Blair & Co. says it has and comes up with a lot of research to support its charges. *Page 23.* But Mr. Hooper says he hasn't shortchanged radio a bit, and he believes his technique improves the accuracy and lowers the cost of both radio and TV measurements. *Page 29.*

Liberty Broadcasting System suspends service. It's all because the "baseball monopoly" wouldn't part with rights to enough games, says Gordon McLendon, LBS president. But Liberty will be back, he says, if it wins its $12 million suit against organized baseball. Meanwhile, 360 Liberty stations are out in the cold. *Page 25.*

Aspiring to occupy the TV channels reserved for them, educators hope they have a Ford Foundation in their future. They're putting the pressure on the world's biggest endowment to ante up enough money to get some educational TV stations on the air. Coincidentally, Sen. William Benton is asking the Foundation to create a national radio-TV commission which would bail him out of an embarrassing political position. *Page 59.*

If one station refuses the request of another for permission to rebroadcast a show, the refusal must be justified to the FCC. Here's a new rule that ought to make lawyers richer and give a lot of stations headaches. *Page 24.*

There's a flurry of radio and television network buying. Four advertisers snap up two-and-a-half hours of time dropped by others. Additionally, Wrigley gum starts saturation campaign, and Gulf Oil Co. buys 15 minutes across the board. *Page 25.*

Senate confirms reappointment of Comr. Rosel Hyde after Interstate and Foreign Commerce Committee, at confirmation hearing, tells Mr. Hyde it wants the FCC to speed the granting of TV stations and urges the Senate Appropriations Committee to recommend a $600,000 budget boost for the FCC to help it do the job. *Page 59.*

The House authorizes a committee to investigate immoral and offensive radio-TV presentations. Drys and do-gooders in the House push the investigation resolution through, while only two dozen Congressmen are present. *Page 27.*

Upcoming

May 19-20: BMI television clinic, New York.
May 22-23: Florida Assn. of Broadcasters, Royal York Hotel, Miami Beach.
May 22-23: BMI television clinic, Chicago.
May 23-24: Indiana Broadcasters Assn., Athletic Club, Indianapolis.

(Other Upcomings page 36)

Closed Circuit

(Continued from page 5)

on radio hitting into hinterlands. That's because Democratic strength lies largely in urban centers which are TV-covered for most part, while Republican strategy must be to get out the vote in hundreds of smaller communities and rural areas. Appointment by Democratic National Committee of J. Leonard Reinsch as TV executive [CLOSED CIRCUIT, May 12; see story page 60 this issue] tends to confirm this speculation.

FCC AUTHORITIES now doubt licensing of even one new TV station prior to November elections in any major market. There's some possibility of authorizations in secondary markets where no competition for facilities will result and where applicant has equipment readily at hand. But such grants, too, are regarded as remote now.

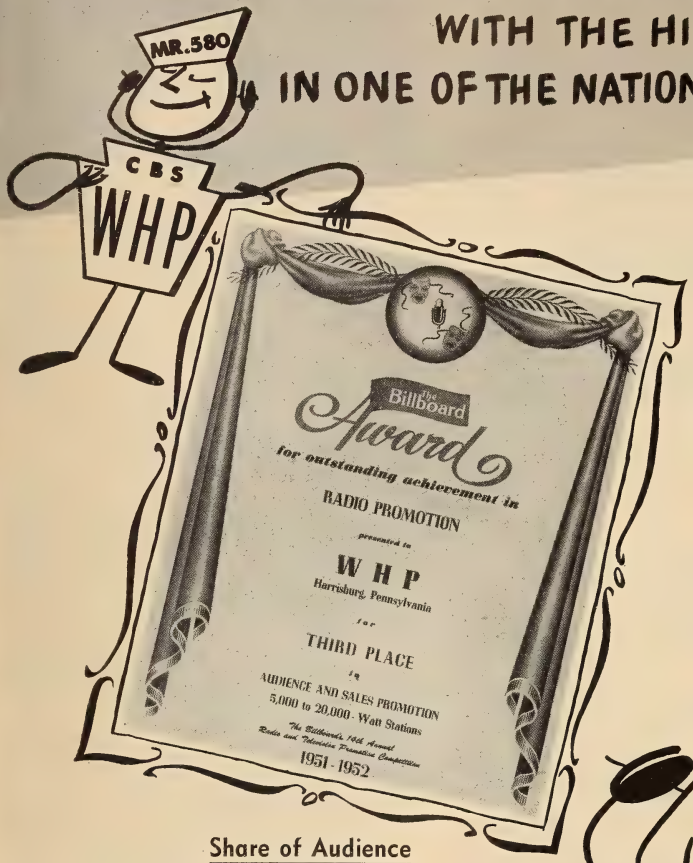
C. E. HOOPER Inc. is under fire from more quarters than John Blair & Co. which last week issued blast against present coincidental techniques (see story page 23). Charles W. Balthrope, station manager of KITE San Antonio, has sent letters to clients and others announcing KITE "is going to try to run the Hooper radio survey people out of San Antonio." Mr. Balthrope says Hooper surveys have been unstable and have outlived usefulness.

WDET (FM) TRANSFER

TRANSFER of WDET (FM) from United Auto Workers (CIO) to Wayne U., Detroit, was approved by FCC Friday. Auto Workers gave station, which had been losing about $4,000 per month, to educational institution [B•T, April 21, 7]. Wayne U. is subdivision of Detroit Board of Education, which already has non-commercial educational FM station WDTR in same city, used for class-room instruction. However, early this year, FCC determined that duopoly rules did not apply to educational stations. Interestingly enough WDET (FM) operates on 101.9 mc (Channel 270), commercial channel. However, Wayne U. declared that it intended to run station non-commercially. Comr. George E. Sterling concurred in approval, but emphasized that since station was on commercial channel it would have to abide by commercial rules. Comr. Robert T. Bartley also concurred, but thought station should be shifted to non-commercial, educational frequency.

RCA THESAURUS SALES

RECENT survey of station subscribers to RCA's Thesaurus commercial library packages indicated—for three shows only—number of half-hour segments sold weekly totals 942. Since over half of sponsors signed for 52-week contracts, total sales of three shows average 24,497 half-hours per year. Three programs included in study are *Wayne King Serenade, Phil Spitalny's Hour of Charm,* and *Music by Roth.*



ABC REPORTS LOSS

ABC and subsidiaries reported estimated loss of $198,000 for first three months of year, tabulated after reduction of $222,000 for recovery of federal taxes under carry-back provisions of internal revenue code. Net income for same period last year, after taxes, was $222,000. Network noted its operations were on profit basis during March following losses in first two months of 1952.

REPRESENTED BY **BOLLING**

Summer 'Boom-State'

The tremendous impact of Station WGY on an enlarged summer-time audience is ably demonstrated by one of WGY's sponsors—the Catskill Game Farm. In 1951, this organization abandoned its advertising schedule in newspapers and other radio stations to use WGY *exclusively*. Through spot announcements in the morning and night-time stations breaks, the result was a 250 percent increase in attendance.

Reaching all the summer resorts in the Adirondack, Catskill and Berkshire Mountains and Vermont, sales messages carried by WGY also reach the many tourists and vacationers in Saratoga Springs, Lake George, Lake Champlain and Cooperstown, New York. The WGY area is surely one of America's foremost vacation areas.

Motorists visiting "WGY-Land" learn the station's location on the dial through seven striking, colorful 8' x 24' Scotchlite billboards which are located on the major traffic arteries leading into the WGY area.

You can realize outstanding results by doing your summer selling on Station WGY.

20 ways meat packers reduce costs from farm to table

Only about 50% of a meat animal is *meat*. But by saving "everything but the squeal" from *the other half*, meat packing companies are able to "cancel-out" many of the costs of processing your meat.

Parts of the animal which once were destroyed or thrown away now are the source of hundreds of valuable by-products. Some of them have many uses. At least one of them is used to make (or help make) every item on this page. How many do you recognize?

1. **Bone for bone china.**
2. **Horn and bone handles for carving sets.**
3. **Hides and skins for leather goods.**
4. **Rennet for cheese making.**
5. **Gelatin for marshmallows, photographic film, printers' rollers.**
6. **Stearin for making chewing gum and candies.**
7. **Glycerin for explosives used in mining and blasting.**
8. **Lanolin for cosmetics.**
9. **Chemicals for tires that run cooler.**
10. **Binders for asphalt paving.**
11. **Medicines such as various hormones and glandular extracts, insulin, pepsin, epinephrine, ACTH, cortisone . . . and surgical sutures.**
12. **Drumheads and violin strings.**
13. **Animal fats for soap.**
14. **Wool for clothing.**
15. **Camel's-hair (actually from cattle ears) for artists' brushes.**
16. **Cutting oils and other special industrial lubricants.**
17. **Bone charcoal for high-grade steel, such as ball bearings.**
18. **Special glues for marine plywoods, paper, matches, window shades.**
19. **Curled hair for upholstery. Leather for covering fine furniture.**
20. **High-protein livestock feeds.**

Money from sale of by-products frequently makes it possible for the packer to sell the beef from a steer for less than was paid for the animal on the hoof.

Every hour one or more by-products of the meat packing industry is used to make your life more enjoyable . . . to help produce something you need . . . to make America a better place to live in.

AMERICAN MEAT INSTITUTE • *Headquarters, Chicago* • *Members throughout the U. S.*

BY VIRTUE OF PERFORMANCE

"Toledo's Leader In Sales Results" is the affirmation of the many sponsors who have used WSPD's consumer impact to help build their business over the past Quarter of a Century. Always the right medium for a product is the one with acceptance in its community and, in Northwestern Ohio radio, the leader is WSPD. "You Buy With Confidence", is the recommendation that comes direct to you from over 50 of our long term local sponsors—men selling and sold on WSPD by virtue of performance for 31 years . . . so to sell the Nation's 36th market choose the outstanding SALES LEADER —value proven to the men who know—Toledo's leading Businessmen.

on all accounts

WICKCLIFFE W. CRIDER on May 1 joined Kenyon & Eckhardt, New York, to assume complete charge of its extensive radio and television department. To get where he has, Mr. Crider has had to move fast, for he still is a young man with a record of talent and steadiness which has taken him near the top in each of his two previous agency affiliations.

Before joining Kenyon & Eckhardt, he was vice president and director of radio and television creative service and talent at BBDO. He joined that agency in 1945 as administrator of new programs and was elected a vice president in 1948. Some of the most successful programs in radio and TV were created there under his supervision. The accounts he was closely associated with include American Tobacco Co., General Electric Co., U. S. Steel, Goodrich Tire and Rubber Co., De Soto-Plymouth, Schaefer Brewing Co. and Emerson Drug, among others.

Mr. Crider joined his first agency, J. Walter Thompson Co., New York, in 1936 as a messenger apprentice. He soon moved from that position to the publicity department and eventually into radio production and finally general radio supervision. Among the accounts he served at JWT were Standard Brands, General Cigar, P. Lorillard & Co., Lever Bros. and a host of others.

At Kenyon & Eckhardt—only his third agency in 16 years—Vice President Crider heads an operation which includes as its clients Ford Motor Co., Hudnut Sales Co., Lincoln-Mercury Division, Kellogg Co., Industrial Tape, Piel Bros., White Rock Corp., Wesson Oil and many others. Some of the programs under is steward ship are *The Ed Sullivan Show* on CBS-TV, *Your Show of Shows* on NBC-TV and *Space Cadet* on ABC-TV.

Mr. CRIDER

The Criders — she is the former Frances Nalle — have been married since June 1940. They have two children, Amanda, 11 years, and Wickcliffe Jr., 9. The family owns a summer home in Weston, Conn., and lives in New York during the winter.

His hobbies are baseball and photography.

Little Station, Big Job

EDITOR:

We enjoyed your article on Detroit radio station coverage of the recent riots at Southern Michigan Prison in Jackson. You may be interested in additional details which were not included in your original article.

WJR, in its daily coverage of the riots, was tremendously impressed with the cooperation offered by WIBM Jackson. From 9 a.m. April 21 until midnight April 25 WIBM served as a clearing house and origination point for radio and television networks and several individual radio and television stations. All this in addition to their regular broadcast schedule. . . .

WIBM is a 250 w station. It is a small operation when compared with the networks it served. Yet coast-to-coast radio and television audiences received immediate and accurate coverage . . . in quality to be envied by many a "big time" production.

WJR feels that the industry should recognize the outstanding public service performance turned in by WIBM Jackson, Mich. Particularly, commendation is due William Cizek, general manager, and Jack Underwood, program director. . . .

Worth Kramer
Vice Pres. & Gen. Mgr.

Facts of Life

EDITOR:

Having just read of Rep. Gathing's resolution to clean up radio and TV programming, the following occurs to me:

Compared to printed media, broadcast ones aren't even in it for filth and forthrightness. For lurid sex thrills, nothing beats the good old daily newspaper, large and small, with its meticulously detailed accounts of rapings, attacks, kidnapings, love-nests and divorce-court testimony.

For spicy stories and anatomical information, TV can't come anywhere near *Esquire*, *True Detective*, *True Story*, et al.

For information on woman's ills and the facts of life, any woman's magazine from the *Journal* to *Woman's Day* is a mine of information and if you even want to see a baby being born, there's always *Life*.

Now since these worthy publications are readily available to persons of all ages via home subscription or news stand, it surely must follow that the august bodies on Capitol Hill have decided that even though relatively innocuous, the broadcast media are having so much more attention paid them by the American public than are the printed ones, that their comparatively minor sins are thereby magnified greater than all the rest. In other words, in spite of all the dirt that's being printed, nobody's looking at it.

It's nice to have our faith in the superiority of radio and TV thus affirmed by so high an authority. Sponsors and agencies should get the point.

Segregation

EDITOR:

Your May 5 editorial, "Non-Kissin' Kin," is an admirable job of straddling a sharp picket fence. How it must hurt when you sit down.

Sure, "competition between broadcasters and newspapers should be vigorous." But, does ANPA have to use half-truths and distorted facts to club an industry that's coveted by its own members?

Just hang around a group of newspaper-radio owners for a while, and you'll soon learn which media gets lower-cased in their little black galleys. (Gallies? I seldom use the word, it's that repulsive.)

Yours for better segregation of the rectifiers and the rotaries.

Tim Elliot
Pres.-Operations Mgr.

Score an Error

EDITOR:

We were sorry to read in the May 5 issue of BROADCASTING • TELECASTING, page 89, that "plans have been dropped for feed to Rock Island" of the Chicago Cubs and White Sox games.

Not so. WHBF-TV carries all Saturday and Sunday home games of the Cubs and Sox, beginning with the Saturday, April 26 game.

The local sponsor is the Schmiers Co., Rock Island, the Philco distributor in this area.

30 Years have seen some changes

This month—on May 25—WFDF will have completed 30 years of broadcasting in Flint, Michigan. From a station beamed to a small city of 108,000 in 1922, WFDF has grown to be a key factor in the big $315,840,000 retail market of more than 270,000 people in 1952. Over 600 local merchants who spend their radio dollars with WFDF offer convincing evidence that WFDF is FIRST in Flint in '52, just as surely as it was first in Flint in '22.

feature of the week

KRNT Des Moines spearheaded a "deathless days" traffic safety drive which set a new city record at 145 days.

The "deathless" span was finally ended May 2 when a 5-year-old boy cyclist was fatally injured when struck by a 10-ton truck.

For three months virtually every KRNT quarter-hour newscast pounded listeners' ears with the safe walking-safe driving theme.

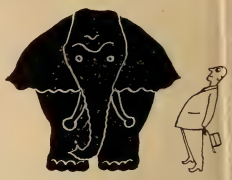
Each day that there had been a traffic death on the corresponding day of the previous year, KRNT newscasters recapped the story along with a warning against taking chances in traffic.

KRNT Newscasters Paul Rhoades, Don Soliday and Russ Van Dyke together with Bob Hassett, manager, Des Moines Safety Council, made a concerted effort to make the city traffic-safety conscious.

Mayor A. B. Chambers proclaimed a "Set-A-Record Week" and in the proclamation commended KRNT for its efforts.

Vice President Alben Barkley, visiting the city, congratulated KRNT and Des Moines for the drive.

Scores of firms cooperated. Many sent safety-reminder bulletins to all their personnel. Dozens of pastors and ministers spoke from their pulpits on the necessity for cooperating with the campaign. Schoolteachers reminded pupils to be careful. One large grocery chain printed safety banners for display on member-store windows.



KRNT in theatre programs devoted prominent space to this message: "A KRNT news department reminder: You've had a wonderful evening at the theatre . . . Drive safely, walk safely . . . We wouldn't like reporting your death."

During the campaign, KRNT established an annual "KRNT National Traffic Safety Record Award" for cities over 100,000 reporting to the National Safety Council.

The plaque award will be given each year to the city with the longest string of deathless days in the traffic record dating from Jan. 1.

On May 2, KRNT notified Little Rock, Ark., that it was the winner of the first annual "KRNT National Traffic Safety Award." It was suggested that formal presentation be made at the October meeting in Chicago of the National Safety Congress.

ALLEN HENRY, Belmont Radio Corp., Chicago, an engineer by training and preference, was enjoying a well-earned vacation. The telephone rang.

It was W. L. Dunn, then vice president in charge of engineering, calling from Chicago.

"Come back to work tomorrow," Mr. Dunn told Mr. Henry, "you're the new advertising manager."

Mr. Henry hung up the receiver slowly. As he has frequently remarked since, "I was the least qualified person in advertising. I'm an engineer—and some people would question that."

Nevertheless, Mr. Henry laid aside the slide-rule and logarithms of his chosen field and took up the tools of the advertising trade.

It wasn't long before Belmont knew that its confidence in Mr. Henry had been justified.

Engineering field tests had proven that Belmont's staff had developed an exceptionally good television receiver. Company officials decided to merchandise the receivers under the name, "Raytheon TV."

An overall merchandising program precipitates the need for an advertising director. That was Mr. Henry's cue.

Mr. HENRY

16,500 DRY HOLES

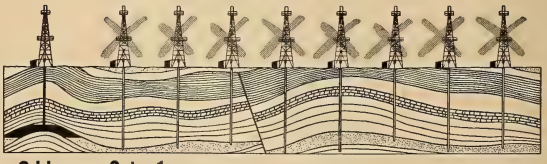
Oilmen Work Against Big Odds to Find Record Amount of New Oil For You

The search for oil is a risky business. To meet the greatest need in history, U. S. oilmen last year expended over two billion dollars in drilling for new oil supplies.

Much of this huge sum was lost in 16,500 costly dry holes. But by drilling thousands of wells to expand known fields and by drilling exploratory wells in entirely new areas, a record amount of new oil was found to assure your future needs.

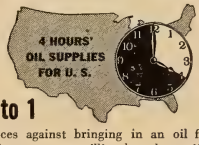
Finding oil is only part of what it takes to keep your family car rolling and to fill other record demands for fuels and lubricants. Year after year, U. S. oilmen plow back into their businesses over fifty cents out of every dollar earned.

In 1951 this plowing back of earnings was biggest in history. It helped set new crude oil supply records. It also added new refinery capacity, miles of new pipelines—tankers, tank-cars, barges and tank-trucks, new research facilities, millions of gallons of additional storage space as well as thousands of new and improved service stations.



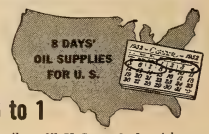
It is only by planning ahead, by taking risks and plowing back earnings, that America's thousands of privately-managed oil businesses are able to provide you with the finest oil products at the world's lowest prices.

Oil Industry Information Committee
AMERICAN PETROLEUM INSTITUTE
50 West 50th Street, New York 20, N.Y.



OIL WELL? MAYBE. No one *knows* the answer. The only sure way to find out is by drilling. If the well turns out to be a dry hole, the operator will have lost his investment. Even a well that *starts* to produce doesn't always pay out. In spite of risks involved, U. S. oilmen last year found greatest volume of oil in history.

HERE ARE THE ODDS AGAINST FINDING OIL*



Odds are 8 to 1 against bringing in a producing well in an area where oil has never been found before. Of the 6,189 new field exploratory wells drilled last year, 5,505 were dry holes. The remaining 11,000 dry holes were drilled in or near known oil producing areas. ***Odds are even greater against finding a big producing area . . .***

43 to 1

Chances against bringing in an oil field yielding over one million barrels are 43-1. Recovering this million barrels takes many additional wells. Yet a million barrels is only enough oil to fill U. S. needs for 4 hours.

966 to 1

Odds against finding a field that will yield over 50 million barrels—enough to supply U. S. for 8 days—are a staggering 966 to 1.

*From "Exploratory Drilling in 1951" by Frederic H. Lahee, Bulletin of the American Association of Petroleum Geologists, Volume 36, to be released June, 1952.

in public service . . .

Safety Contest

WPIC Sharon, Pa., for the third year conducted an eight-week drive to reduce traffic mishaps. The station offered $500 in cash prizes to grade and high school pupils in WPIC's listening area who wrote the best 50-word essays on highway safety.

Flood Victims Aided

NINE - HOUR *Parade of Disc Jockeys* by WTTM and WBUD Trenton, N. J., with 15 disc jockeys putting on a request program in a downtown store window, raised donations for the Red Cross Flood Appeal fund there fortnight ago.

* * *

Bloody Good Work

WERI Westerly, R. I., went to bat when a cold epidemic caused cancellation of 50 appointments by prospective blood donors. Result was that the Red Cross Bloodmobile unit met its quota in that city after the station saturated the air with appeals.

* * *

Flood Service

DURING its 24-hour flood crisis operation, KOIL Omaha succeeded in obtaining a jeep for a local America Red Cross official, thereby winning his "profound admiration." Raymond H. Sayler, manager of the local ARC chapter, called the station between 3:30 and 4:30 a.m. one morning and told announcer John Shinker he needed a four-wheel drive jeep. Within 20 minutes, Mr. Shinker called back to inform Mr. Sayler the station had obtained the vehicle. KOIL reported it received "many calls and letters of appreciation" for its public service activities.

* * *

Finds Lost Child

WHEN all else fails, *Easy Does It* is what they're saying of Easy Gwynn and his program on WIBC Indianapolis after police asked him to broadcast a description of a lost three-year-old girl they found there. Five minutes later the mother showed up to claim her child.

* * *

Fight Fire With TV

RECRUITING of firemen spurted after WBAL-TV Baltimore answered an appeal from the city board of fire commissioners asking help in obtaining new firemen. The station telecast a quarter-hour program publicizing the work of the firemen and the coming recruiting examinations, causing applications to double.

Radio Therapeutics

MARINE patients at the Naval Hospital at Camp Lejeune, N. C., select a disc jockey from among themselves to air *Bed Side Disc Jockey* over WJNC Jacksonville, N. C., every Friday morning. Every week a different ward at the 1,400-bed hospital becomes "studio for a day." Patients in that ward elect a disc jockey from their ranks, submit record lists, work out a script and block the show together with the aid of Sgt. John Buchanan, of the PIO radio section. Records are furnished free by a local record shop and become the property of the ward after the show. Show was suggested by the Camp Lejeune Chapter of the American Red Cross last year.

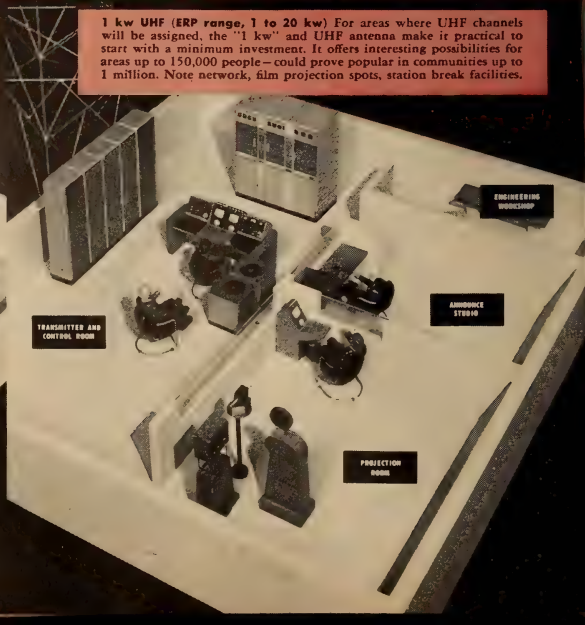
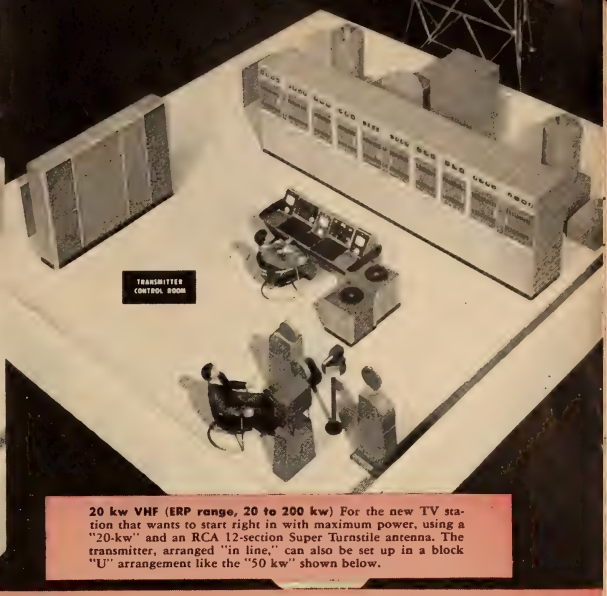
500 watts VHF (ERP range, ½ to 2 kw) This is a control-room set-up—complete with an RCA 500-watt transmitter, announce booth, and film facilities. The arrangement, and an RCA 5-bay Super Turnstile Antenna, provides up to 2 kw ERP*—gets you on the air for minimum outlay.



2 kw VHF (ERP range, 2 to 20 kw) Similar to 500-watt plant, but uses an RCA 2-kw transmitter. The ideal set-up for getting up to 20 kw (ERP) for a small investment. "In line" racks at left of control console are: monitoring, audio, and video equipments, sync generator, and power supplies.

"Tailored" transmitter plants

50 kw VHF (ERP range, 50 to 200 kw) Block "U" set-up for RCA's "50 kw." This arrangement is well suited for local building situations—or where physical limitations call for an antenna of medium gain and high ERP. Note film camera control and preview monitor next to operator for his convenience.



1 kw UHF (ERP range, 1 to 20 kw) For areas where UHF channels will be assigned, the "1 kw" and UHF antenna make it practical to start with a minimum investment. It offers interesting possibilities for areas up to 150,000 people—could prove popular in communities up to 1 million. Note network, film projection spots, station break facilities.

10 kw VHF (ERP range, 10 to 100 kw) Using a "10-kw" and a high-gain antenna, this plant provides up to 100 kw, ERP. It includes film facilities for breaks and spots during network shows. Stations of this class and larger usually have studio facilities, along with program switching equipment (not shown).

20 kw VHF (ERP range, 20 to 200 kw) For the new TV station that wants to start right in with maximum power, using a "20-kw" and an RCA 12-section Super Turnstile antenna. The transmitter, arranged "in line," can also be set up in a block "U" arrangement like the "50 kw" shown below.

...for any TV power up to 200 Kw!*

10-kw UHF (ERP range, 10 to 200 kw) Using an RCA "10-kw UHF" type TTU-10A and a TFU-24B high-gain antenna, this set-up offers the next logical step above the "1-kw" range. Or, you can start with 1 kw now—and increase power later simply by adding RCA matching amplifiers and associated equipment.

These models represent seven typical TV transmitter room arrangements for various power classes—from 500 watts to 200 kw, ERP*. They include the film equipment required for spot, station breaks, and network operation. They show the basic or minimum facilities you need to go "on the air" for a given power. The set-ups are worked out in accordance with tried-and-proved operating procedure and provide a handy means for estimating your space requirements. There is ample leeway to meet the particular needs of every station.

Your RCA Broadcast Sales Representative is ready to give you planning help like this—throughout your station! By all means, call him.

DOES HOOPER UNDERSELL RADIO? *Blair Study Says Yes*

A CHARGE that the coincidental method of audience measurement "grossly underestimates" the extent of radio listening was fired last week by John Blair & Co., radio station representative, on the basis of more than six months' studies.

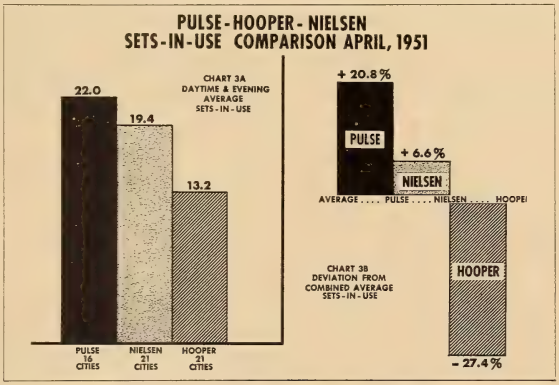
Target of the broadside was the coincidental method's inclusion of both radio and television in the same question: "Were you listening to the radio or looking at television, etc.," The Blair company recommended that such "duplex" questions give way to a radio-only query such as "Were you listening to the radio?"

The Blair project, financed by the representation firm and three of its client stations—KHJ Los Angeles, WBNS Columbus and WDSU New Orleans—was set up under the overall direction of W. Ward Dorrell, a veteran of some nine years in the radio research field with C. E. Hooper Inc., one of the foremost exponents of the coincidental survey technique. (For Hooper reply to Blair study, see page 29).

In a letter sent with copies of the Blair study to clients, Mr. Dorrell emphasized that "this presentation takes no sides in the current controversy between audience measurement services" and that "it is not our desire to suggest" that coincidental measurements be eliminated as a system of radio audience measurement. Indeed, he said, "coincidental measurements have much to recommend them."

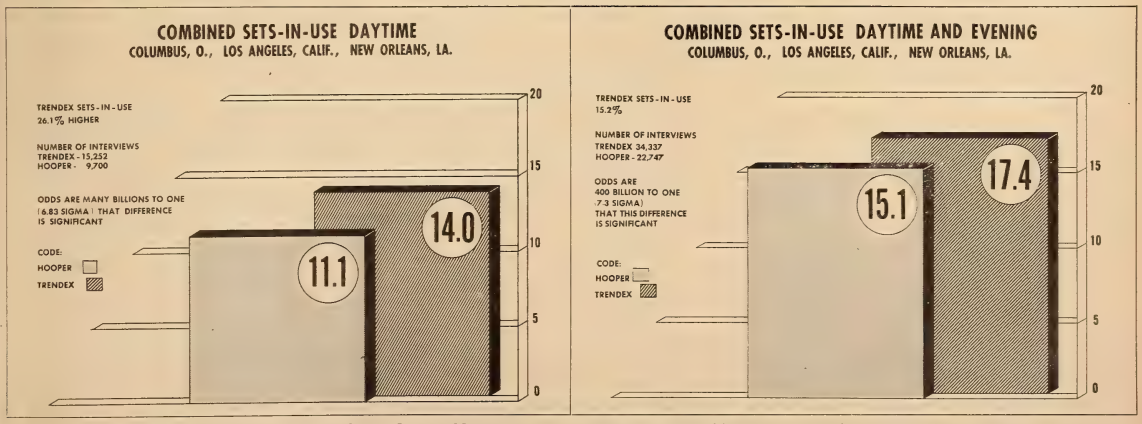
But "it is tremendously important to you that the radio audience is given the full stature it deserves," he wrote. "You will be pleased to learn that radio can be given *full* credit by a simple modification of the coincidental question. It represents only the return to the technique used for many years preceding the advent of television."

He suggested that "all buyers of radio audience measurements" should "order telephone coincidental surveys based on the single question concerning radio only."



Blair & Co. President Richard D. Buckley, in a foreword to the presentation, pointed out that there were 42 million radio homes as of last Dec. 31, and that the $723 million total spent for radio time during 1951 was greater than during any preceding year. And yet, he recalled, 1951 heard "a greater clamor by people in high and low places that radio was a declining advertising value . . . that the prophecy of a few years ago, 'radio is doomed,' was actually coming to pass."

"Why did these believers in radio's doom think the way they did?" he asked. "How could they support their position? One support was the decline in radio sets-in-use as indicated by radio research. The reports of one research firm in particular, the proponent of the telephone coincidental method, disclosed an alarming decline in sets-in-use, particularly in TV markets."



Thus, he said, the Blair study originated. It was designed as a service to the radio industry and copies of the results are being distributed not only to Blair stations but to the National Assn. of Radio and Television Station Representatives. Mr. Dorrell also is making presentations to agencies.

To show "the seriousness of the problem," the presentation noted that Hooper measurements of radio sets-in-use in Los Angeles reflected a decline of 68.5% in nighttime, 46% in afternoons and 33.3%

REBROADCAST RIGHTS

FCC Issues Policy

IN A POLICY decision interpreting the rebroadcast provisions of the Communications Act, the FCC last week issued a strict definition of the meaning of "originating station" and threw the burden of justifying a refusal to permit rebroadcast on the station declining such permission.

In fact, the FCC more or less threatened the unconsenting station with a citation under the public interest provisions of the Communications Act if its reasons were not "good and sufficient."

Essence of the policy, adopted unanimously but with Comrs. Rosel H. Hyde and Robert F. Jones absent, is this:

1. A station's signal is its own and may not be rebroadcast simultaneously or later without its permission.

2. Neither a network nor a sponsor may approve the rebroadcast of a program which it owns if the station whose signal will be used refuses permission.

3. Conversely, a station may approve the rebroadcast of its signal, but unless it also owns the program its approval may be valueless.

4. If a station refuses to permit the rebroadcast of a program it has aired, it must furnish the Commission with the reasons why. Unless they are significant, the Commission said it might question the qualifications of the licensee under the public service provisions of the Act.

The Commission's decision was the result of an appeal for a declaratory ruling sought by WJIM-TV Lansing in 1950, when WWJ-TV Detroit refused permission to rebroadcast some NBC-TV programs [B•T, July 17, 1950]. That fall, the Commission issued a proposed clarification of Sec. 325(a) of the Act and called for comments [B•T, Oct. 9, 1950].

Among the comments was one from Gordon P. Brown, owner of WSAY Rochester, N. Y., who has been feuding with the networks for several years. He urged that the section be interpreted to mean that if a sponsor approved a rebroadcast of a program it owned, neither the network nor the affiliate carrying the original program could object [B•T, Nov. 6, 1950].

Rep. Sheppard Approves

Another was from Rep. Harry R. Sheppard (D-Calif.) who urged the same [B•T, Nov. 13, 1950]. Rep. Sheppard averred that the legislative history of the provision bore out this interpretation. He also charged that the networks were attempting to stifle competition.

Network authorities declined formal comment on the FCC action pending opportunity to study it in text and in detail.

First reaction of one legal expert, however, based solely on a verbal relay of the gist of the rules, was that the Commission appeared to be going much farther than it is entitled to do in "putting pressure on stations to require them to permit rebroadcasting."

The FCC's requirement that refusals to permit rebroadcasts must be explained in writing to the Commission, this authority asserted, is in itself "compulsion" to make stations grant such permission.

Rep. Sheppard has introduced legislation in the last few Congresses calling for a revision of the Communications Act to accomplish this rebroadcast privilege and also to license networks. His bills (HR 10 and HR 73) were referred to the House Committee on Interstate & Foreign Commerce [B•T, Oct. 15, March 19, Jan. 8, 1951].

In its ruling FCC said, "Congress . . . intended the words 'originating station' to be applicable solely to the station whose signal was received and rebroadcast." The FCC report reviewed the legislative history of the provision and referred to the Radio Act of 1927 and prior regulations to substantiate its interpretation.

Suggestions that the rebroadcast provision was meant to require only the approval of the owner of the program were dismissed as not properly within the purview of the Commission. Such an interpretation would require Congressional revision of the section, the Commission said.

In amending its AM-FM-TV rules to require that stations refusing rebroadcast rights justify their rejections, FCC stated:

. . . It does not follow that Section 325 sanctions arbitrary refusals of consent for rebroadcast on the part of network affiliates or other stations who may have the power or authority to give such consent. In our opinion, a station's operation must be in the public interest in respect of its exercise of the power conferred by Section 325 (a) as in other respects, and such powers cannot and were not intended to be used for the monopolistic purposes which the Chain Broadcasting Rules were intended to prevent. A refusal either by a network affiliate, or a non-network station, to permit a rebroadcast where based upon no reasons at all, or upon unreasonable grounds, may well constitute conduct going to the qualifications of a licensee to operate in the public interest.

The following amendment was ordered to Secs. 3.191, 3.291, 3.591, 3.655 and 3.790 of the Commission Rules and Regulations, effective July 1:

Any station which refuses authority for the rebroadcast of a program broadcast by it, or any part thereof, shall file with the Commission within 10 days of such refusal a statement containing the following information: The station requesting authority for the rebroadcast; the date of the request; the program or programs, or parts thereof, for which authority to rebroadcast was requested; the date of refusal; the reason, or reasons, for denial of the request. A copy of the statement filed with the Commission shall also be sent to the station whose request has been denied.

The Commission also decided that Sec. 325(a) did not apply to the rebroadcast of programs of foreign stations. It cited the legislative history of the provision to deduce that Congress did not have foreign stations in mind when it adopted the section in the Com-

Legalized Larceny . . . . . AN EDITORIAL

WITH TIME on its hands in the stillness of the post-TV thaw, the FCC last Thursday ingeniously contrived to enmesh itself in the most preposterous mischief-making since the infamous 1946 "Blue Book" episode.

It rendered a new interpretation of its rule governing rebroadcasting of programs. It added a provision that would not only subject stations and networks to constant jeopardy, but which also defies every legal concept ever enunciated on the sensitive matter of private property rights. The FCC did this without taking a second look at the vicious document served up to it by its legal minions. It did this without the vote of two of its top lawyer-Commissioners.

The gist of the astonishing ruling is that an "originating" station (whether radio or TV) can refuse to give another station the right to pick up its signals for rebroadcast. So far, so good, because Congress so decreed. But if the "originating" station so refuses, then it must file an explanatory statement, within 10 days, with the FCC. If there are *no* reasons, or if the refusal is upon *unreasonable grounds*, the ruling threatens, this "may well constitute conduct going to the qualifications of a licensee to operate in the public interest." This, we submit, is coercion with a crowbar, not the lifted eyebrow.

For crass unreasonableness, if not stupidity, there's probably nothing like this in regulatory annals. It falls in the category of an ordinance requiring a citizen whose home is robbed to write a letter to the chief of police explaining why he didn't turn his wallet over to the robber.

We can conceive of nothing that would do more to stifle creative talents and initiative in the broadcast arts if this order is ever carried to fruition. Programs like the WLS *National Barn Dance*, or the WSM *Grand Ole Opry*, or *Amos 'n' Andy* would become fair game of stations and possibly other networks. The pick of the network programs could be preyed upon by stations which had nothing to do with their creation or production (with spot announcements interspersed). The penalty of refusal to grant permission would be a *reasonable* explanation to the complete satisfaction of an FCC, or whatever licensing authority that might be functioning at the time.

Here, as we see it, is how it would work: A station operator would write letters to all networks and to selected enterprising stations. He would demand permission to rebroadcast specified programs or parts thereof, "originated" by these entities. Each inquiry would cost him a three-cent stamp. The stations and the networks would refuse for diverse reasons—dissipation of their creative talents, copyright clearances, unfair competition, good will, safe-guarding of property rights.

But within 10 days, each such refusal would have to be explained to the FCC. Beleagured stations and networks would have to stand the expense of batteries of attorneys to carefully prepare these pleadings—because their licenses would be on the line.

The FCC lawyer (we understand he was the General Counsel, Benedict P. Cottone) ostensibly pegged his ruling on a short-lived relatively insignificant case between WJIM-TV Lansing and WWJ-TV Detroit. The truth is that it was stirred up by the incessant crusade of Gordon P. Brown, owner of independent WSAY Rochester, who, after losing his several network affiliations, has spent innumerable man-hours lobbying Congress and the FCC against the networks. Mr. Brown even had the audacity to call a news conference in Washington following the FCC's ruling to proclaim the victory.

Mr. Brown's "giant-killer" approach is bunk. There's hardly an independent in the country that wouldn't go major network, if it could, or wouldn't become clear channel—if it could.

The FCC decision, like many others before it, arrogates control through indirection. It admits the essential right of the "originating" station to control its programs. But it imposes the penalty of intimidation, by requiring the station to explain its refusal.

In some saner moment, we must believe that the FCC will see the error of its ways. This may come when Vice Chairman Hyde and Comr. Jones, who were absent from that abortive session, express themselves. It may come after the writers, directors, arrangers, performers, musicians and all other creative artists fashioning the radio and television programs, realize the impact of this ridiculous bid for legalized larceny.

Keep in mind: The Commission which adopted this *unreasonable* rule would determine the *reasonableness* of any refusal to grant permission to rebroadcast the product of the station's enterprise and genius.

LIBERTY SUSPENDS

McLendon Hits Baseball 'Monopoly'

LIBERTY Broadcasting System suspended service to nearly 400 affiliated stations Thursday night.

Formed in the spring of 1948 as a southwest baseball hookup, the network had operated nationwide since Oct. 2, 1950.

As of noon Friday, many affiliates said they had received no official notice that service had been suspended. Their information came from Liberty's last broadcast, a bitter denunciation of the Dept. of Justice and organized baseball by Gordon McLendon, LBS president.

Intimation that trouble was ahead came a week previous to the suspension when Mr. McLendon told affiliates by closed circuit the network was cutting service from 16 to eight hours a day [B•T, May 12].

The burden of nationwide telephone line charges was a major factor in the slicing of network hours, affiliates were told. In addition, many affiliates were informed they would receive "C" instead of "A" telephone line service. Since that time, affiliates have claimed they had difficulty contacting LBS officials at Dallas headquarters.

In his Thursday night broadcast, Mr. McLendon broke the news in these words, "The Liberty Broadcasting System must suspend operations." He followed with a heated criticism of the Dept. of Justice for failure to enforce laws and the Bill of Rights, or to protect citizens from the "baseball monopoly."

"If this can happen in America," he said, "you can tell your grandchildren you saw an American dream die like a dog in a ditch."

Says Justice Has Proof

The Dept. of Justice has had proof of the "illegal baseball conspiracy" for years, he charged, with many department attorneys anxious to bring action against organized baseball. He claimed department officials were "afraid their good friends in baseball would get mad at them."

Liberty is plaintiff in a $12 million suit against 13 major league baseball clubs [B•T, Feb. 25], claiming it suffered business damage through loss of rights to broadcast games.

Even as he was announcing the network's suspension of service, Mr. McLendon made this prediction: "You will again hear the voice of Liberty Broadcasting System if, as and when we are successful in our attempt to bring baseball back to the people."

He thanked network officials for their cooperation, voiced appreciation for affiliates' part in the network and called H. R. Cullen, co-chairman of the LBS board since last summer, "one of America's great men." Mr. Cullen was a financial backer of the network, along with Gordon's father, B. R. McLendon, other co-chairman of the board.

Hint of troubled days ahead came during the May 6 closed circuit talk when the younger McLendon said, "We don't have the solid family feeling we used to have." He blamed himself for "not having shared my problems with all of you," but didn't discuss these problems, "lest it weaken us in the radio industry generally." The result of the policy was an undermining of confidence among many affiliates, he conceded.

Mr. McLendon said he was making that talk because of "another crisis."

"I have decided to share this one with you," he said, recalling that while the network had made a "small profit" in the first three years, it had lost "continuing large sums of money" since night service was started in 1950. LBS broke even for a while last year when Falstaff Brewing Co., St. Louis, sponsored baseball, he said.

"But for the most part during the last two years," he noted, "the story of Liberty has been a story of money lost, hard work lost, fighting a huge monopoly." He said this explained why LBS had to ask "for free time for one-third of the sporting events, for the five minutes before and after the game, why no reduction in affiliate fees has ever been possible."

If LBS wins its court battle, he predicted, it will become "the No. 1 network in the country."

The eight-hour plan instituted a week ago was designed to put LBS on "a break-even basis," according to Mr. McLendon's closed circuit talk, permitting economies in operation. He planned to go back on the air personally and do many of the baseball games.

Schedule This Year

LBS has broadcast 50 games this year, he said, and had 103 live games to come plus 38 re-creations, a total of 191 games during the season. He called this a "pitifully inadequate list of afternoon games authorized" and blamed the LBS troubles on inability to break the organized baseball ban against baseball broadcasts in the northeast major league territory as well as the ban against night games. He claimed LBS needed an eastern American League and western National League team to bolster its schedule of games.

"It has been a baling wire and sawdust network many times," he said in his May 6 talk to affiliates.

No suggestion of trouble was found by affiliates in the LBS instruction received at 1 p.m. (EDT) Thursday. This simply said: At 7:45 p.m. (EDT) tonight Gordon McLendon is going to give a public address to the nation. It is for broadcast. The title of his subject is 'Radio and Baseball.' All stations are urged to carry it. Please advise as to what you want done to this show."

Many reasons for the network's suspension were offered by affiliates. One contention was that it grew too fast. According to this theory, Liberty offered a good baseball service when it was a daytime hookup. When it decided to become a fifth nationwide network, however, it was believed not to have

(Continued on page 93)

CANCELLED TIME

Quickly Taken On Networks

By FLORENCE SMALL

IN a continuing answer to the prophets of doom who point, out of context, to periodic cancellations in radio and TV, at least four advertisers last week snapped up a minimum of two and a half hours of released network time at almost the moment the time became available.

Moreover, one advertiser, Gulf Oil, for its Gulfspray insecticide, purchased a new hour and a quarter of radio time a week—15 minutes across the board on ABC—while William Wrigley Jr. Co. signed for 36 half-hours on CBS Radio between June 3 and Aug. 25 in a renewal of the summer saturation campaign it has conducted on that network for the past two years. Gross billings on the Wrigley purchase were estimated at more than $400,000.

An interesting and perhaps significant feature of the week's transactions from a programming point of view was that, aside from the Wrigley saturation campaign, each of the purchases was for a basic quarter-hour segment aired at least twice a week.

Lever Bros., New York, for its Pepsodent toothpaste will sponsor a musical program (format still being worked out) in the Tuesday and Thursday 7:45-8 p.m. EDT period on CBS-TV, effective late this month. Latter time period had been dropped by Liggett & Myers (Fatima cigarettes), New York [B•T, May 5], together with its *Stork Club* program. McCann-Erickson, New York, is the agency for Pepsodent, while Cunningham & Walsh, New York, is agency for Fatima.

American Cigarette & Cigar Co. (Pall Mall cigarettes), will sponsor *Doug Edwards and the News*, CBS-TV Tuesday and Thursday, 7:30-7:45 p.m. EDT, effective in late May [B•T, May 12]. This marks an increase in its radio-TV budget for Pall Mall. Cigarette firm also sponsors *Big Story* on NBC radio and NBC-TV in addition to radio and TV spot campaigns. The news program, twice weekly, had been dropped recently by Columbia Records. Sullivan, Staffer, Colwell & Bayles, New York, is agency for Pall Mall.

Kellogg Interested

The 7-7:15 p.m. EDT period on NBC-TV currently is being offered to advertising agencies, with Kellogg Co. understood to be actively interested in this early-evening time. *Kukla, Fran and Ollie*, now in that time slot, may be slated for change to a half-hour, once a week format at another time. The 15-minute strip following *The Goldbergs*, 7:15-7:30 p.m. EDT is also being offered to advertisers for next fall, with or without the program. Bidding for the time is understood to be active. On the other hand the present advertisers on *The Goldbergs* may renew in the same time with the same show.

On CBS Radio, when Liggett & Myers (Chesterfield cigarettes) notified that network that it would drop one quarter-hour of its half-hour participation in the early morning Arthur Godfrey strip, each advertiser moved forward one quarter-hour thus leaving the first 15 minutes of the program open for a new advertiser whose signing is said to be imminent.

In addition, the program, which is now telecast one quarter-hour (with Lever picking up the radio-TV time), will be extended in simulcast form to one hour in the fall. As a result of the simulcast decision, at least one advertiser—Realemun Co., which sponsors the 10-10:15 a.m. EDT radio segment on alternate days with Toni Co.—has been forced to abandon the program because it was understood the firm's budget could not stand the addition of TV.

The relinquished time has been sold to Owens & Corning Glass Co., starting early in September. Toni Co. has not decided yet whether it too will continue sponsorship, in view of the increased costs for TV. This marks one of the unusual cases where radio has been used to sell television.

Effective early in September, the Godfrey line-up of sponsors will be as follows (all time EDT):

Owens Corning Glass alternating the 10:15-30 a.m. period with Toni (or replacement); Lever Bros., 10:30-45 a.m.; Pillsbury Mills, 10:45-11 a.m., and National Biscuit Co., 11-11:15 a.m., with Chesterfield retaining the last quarter hour, 11:15-30 a.m. on radio alone.

This new sequence of Godfrey sponsors presents yet another prob-

"Pick a card. . . . any card."

PROETZ AWARDS

Presented in St. Louis

PRIZES in radio and TV categories of the 1952 Erma Proetz Awards were presented last week at a banquet at St. Louis' Hotel Statler.

The awards are given annually by The Women's Adv. Club of St. Louis for creative work by women.

Top honor in radio was won by Phyllis Edmonds, vice president, Home Federal Savings & Loan Assn., Tulsa, Okla.

A newly-established television award was won by Bonnie Dewes, D'Arcy Adv., for work on the Laclede Gas Co. show on KSD-TV St. Louis.

Inscribed plaque and $100 went to each first-prize winner. In all, 14 advertising women were honored.

Stuart Symington, former chairman of National Security Resources Board and Reconstruction Finance Corp., spoke on "Truth Through Advertising."

NBC AFFILIATES

Western Division Meets

OPTIMISM over radio's future prospects sparked a two-day NBC Western Div. affiliates meeting at Beverly Hills, Calif., which ended last Tuesday with more than 50 station men and women representing 28 affiliates in the western states and Alaska attending.

The affiliates met in conjunction with a network series of promotion, press and merchandising sessions on radio. Station managers attending reported increased local business and greater listening audiences—even in areas where there is TV competition.

A network survey introduced indicated more people spend more time listening to radio than with TV, newspapers and magazines combined.

Thomas C. McCray, NBC Western Div. director of radio network operations in Hollywood, presided at the promotion-press-merchandising sessions with Richard O. Dunning, president of KHQ Spokane and West Coast representative on NBC's Stations Planning and Advisory Committee, conducted the closed meetings.

Common Problems Studied

Summer and fall programming and common station and network problems occupied the two-day meetings.

Speakers included:

John K. West, NBC Western Div. vice president; John A. Evans, manager of advertising and promotion; Fred N. Dodge, director of merchandising; Clyde L. Clem, supervisor of audience promotion; John Thompson, manager of news and special events, KNBC San Francisco; Helen Murray Hall, western network promotion manager; Leslie Raddatz, Western Div. press manager; Jane Sandner and M. G. O'Dell, Hollywood and San Francisco network merchandising supervisors, respectively. Walter O'Keefe, star of NBC radio show, "Double or Nothing," entertained at Tuesday luncheon.

Those attending sessions included:

Thomas Sharp and John Merino, KFSD San Diego; Charles Hamilton, Albert Price, Ron Manders, Mort Cook, Pat Kelly, Winifred Scott and Claude Mills, KFI Los Angeles; Harry Butcher, KIST Santa Barbara; Paul Bartlett and Gene DeYoung, KERO Bakersfield; William Sanford, KMJ Fresno; Lloyd E. Yoder, John Thompson, Dean Moxley and M. G. O'Dell, KNBC San Francisco; Gene Kelly, Gerald Hansen and Irma Davis, KCRA Sacramento.

Hugh Kees, KOH Reno; Jennings Pierce, KMED Medford; H. Q. Cox and Showalter Lynch, KWG Portland; William Warren, Ray Baker and F. J. Brott, KOMO Seattle; Carl Haymond and James Murphy, KIT Yakima; Richard Dunning, KHQ Spokane; Richard Lewis, E. W. Harvey and Robert Pollard, KTAR Phoenix; Ray Smucker and Roy Jorgenson, KYUM Yuma; R. B. Williams, KOVA Tucson; Henry Fletcher, KSEI Pocatello; Florence Gardner, KTFI Twin Falls; Walter E. Wagstaff, KIDO Boise; E. B. Craney, KXLF Butte; Ed Yocum, KGHL Billings; S. B. Fox, George Provel, Holly Moyer and Del Leeson, KDYL Salt Lake City.

Charles Bevis Jr., Cy Penley and William Day, KOA Denver; Roy Chapman, KTSM El Paso; William Paine, KGU Honolulu; S. W. McCready, C. H. Fisher and C. O. Fisher, KUGN Eugene; Gilbert Wellington, KFAR Fairbanks-KENI Anchorage, Alaska; David McKay, KORK Las Vegas.

RADIO 'READJUSTING' Says CBS Sales' Karol

CONTINUING study of the basic pricing structure may lead to either upward or downward revisions of CBS Radio's rates—or to no changes at all—Sales Vice President John J. Karol declared last week.

But, he asserted in a speech to the Minneapolis Advertising Club on Wednesday, advertisers are now approaching radio realistically again rather than emotionally, with the result that radio stands to come out of its current "readjustment" period a stronger medium.

Mr. Karol said radio is "undergoing a relatively calm period of readjustment," through a type of "outer turmoil and inner readjustment" which "has come into focus many times in the 22 years that I have been in radio.

"Every time," he said, "radio has emerged stronger. This is happening again."

Alluding to the sensitive subject of rates, Mr. Karol said:

"For many years, radio has been underpriced. At the time, it didn't seem to matter much. Sustaining time periods were infrequent; net profits were good. Radio is still delivering more people at lower costs than any other medium, but it has been undergoing pressures from within and without to be still more efficient.

"This resulted in 'deals'—a type of business operation that CBS Radio withstood for a long time. In an effort to eliminate this dangerous and demoralizing bargain basement practice, we initiated a flat rate reduction last summer.

"From that time on, we have never stopped analyzing our audience delivery against our cost. It is and will be a continuing practice. As this process continues, we may find that the basic pricing structure requires further change. If we do, we shall make the change—*up* or down.

"And whether changes are made or not, our thinking will always be within the framework of the creation of a rate structure that is equitable—one that will offer the *same* prices to *all* clients and *no special prices* to *any* client.

"When this type of business relationship between network and client and agency again is the generally accepted standard of our industry, network radio will be a stronger medium than ever before. It will have the complete respect it has enjoyed in the past and it will hold the same unparalleled position among media that it has enjoyed in the past."

'Realistic Appraisal'

Where radio was getting an "emotional" judgment last year, Mr. Karol said, today it is benefitting from "a more basic and realistic appraisal of advertising practices." He noted that CBS Radio's fall schedule "is already more than 80% as far along as last year's schedule was on Sept. 1," [B•T, May 5], and that "our salesmen's reports show 40% more advertiser interest than at this time last year."

He told his audience that "The size of radio is so much with us that it's easy to forget. And the size of radio is so great that it's difficult to comprehend." It encompasses, he pointed out, 105 million sets with listening both inside and outside the home. Although he voiced "great respect" for the A. C. Nielsen Co.'s rating organization, he insisted that "Nielsen penalizes radio *in general* by measuring only about one-third of secondary sets."

Even so, he continued, "on the basis of what Nielsen does report, the average CBS Radio Network program in 1952 reached over four million persons in the average Monday-Friday daytime broadcast and approximately 8½ million in the average nighttime broadcast."

On a cumulative basis, he added, a five-a-week daytime program reaching four million persons in a single broadcast is able to reach nine million different persons in a week, or more than 15 million in a month.

Mr. Karol scored "fabulously" high TV ratings as "one thing that throws us off balance in comparing radio and television.

"What we are apt to forget," he said, "is that these Nielsen ratings are percentages—percentages of the whole of radio and only the station coverage area of television."

Accordingly, he noted, a 32 rating for a TV show can represent 3.8 million homes while a 15 rating on a radio show equals 6½ million.

"No long-term comparison with television is possible," he conceded. "However, the current cost-per-thousand people of radio is about 40% of the cost of television. In other words, radio is about 2½ times more efficient than television on a cost basis.

"To reduce these facts to the lowest common denominator, network radio delivers 9½ advertising messages for a penny. It costs at least three cents to deliver *one* message on a 'penny' postcard. Television and magazines deliver a little more than three messages per penny, newspapers 2½—all compared with radio's 9½ messages per penny."

Connor to OPS

THOMAS F. CONNOR, programming and congressional liaison specialist for the State Dept.'s Voice of America, has been appointed special assistant to the director of the Office of Price Stabilization, it was announced last Wednesday.

'MORALS' PROBE

Course Unset; Crosser 'Cool'

IN WHAT direction will Capitol Hill's investigation of radio-TV programs go?

Only the chairman of the House Interstate and Foreign Commerce Committee can answer that question, spokesmen for the committee acknowledged last week.

Rep. Robert Crosser (D-Ohio), chairman of the group authorized to conduct the probe, was scheduled to return to Washington from Cleveland last Saturday.

Meanwhile, newsmen who had contacted Mr. Crosser in Cleveland found he had no comment to make.

But the United Press reported, "Informed sources said Crosser is cool to the whole idea."

The investigation was voted by the House last Monday. Action came on a resolution (H Res 278) offered by Rep. E. C. Gathings (D-Ark.) [B•T, May 12, 5]. A little more than two dozen congressmen were on the floor when the resolution came up. Vote was by voice.

Later that afternoon, the House also approved Rep. Gathings' resolution to investigate comic books, pocket-sized books and other such material. In both instances—radio and television as well as the printed medum—"immoral and offensive material" would be ferreted out.

Inquiry To Subcommittee

While Rep. Crosser has not disclosed his plans for the probe, it was understood the inquiry would be turned over to a subcommittee. Since Rep. Lindley Beckworth (D-Tex.), who was originally slated for the chairmanship of the subcommittee, is campaigning for the Senate, it is expected the assignment will go to Rep. Oren Harris (D-Ark.). Rep. Harris has acted as the committee's communications leader in the past few months.

Following House passage of the Gathings resolution, radio-TV industry spokesmen bristled in defense.

NARTB President Harold E. Fellows said the probe could produce "censorship of the most obvious and deplorable sort." He said it "seems to be contrary to the language and intent of the Constitution."

NBC and MBS spokesmen pointed out that the industry has its own decency code policed by NARTB.

NBC said:

NBC's programs have always maintained the highest standards of good taste and decency in their content. NBC from its very inception voluntarily assumed the obligation of establishing high standards. It was the first network to adopt its own code of standards and practices for radio and again for television. Beyond this, it now subscribes to the code of the NARTB and certainly will continue to maintain the highest possible standards in its radio and television programming.

At Mutual, Executive Vice President William H. Fineshriber Jr. said:

Mutual maintains a very competent group of continuity acceptance personnel who are responsible for administering our own code of standards and practices, designed to keep our programming on a high moral level. In addition our industry has its own decency code which is governed by the NARTB. The Mutual network is proud of its record in adhering to the highest possible standards in its radio programming.

Although Mr. Fellows denounced the probe, he also said:

. . . we welcome the opportunity of receiving the observations of legislators, as similarly we welcome the observations of clergymen, teachers, educators, citizens' organizations and all others. If this is the intent of the Gathings proposal — to encourage industry in strengthening its own purpose and plan of self-regulation, the public interest will be served.

[But he warned] if the intent is to go beyond this, to legislate even one minute of programming out of existence on the tenuous ground of 'morality and improper emphasis,' we have arrived at a point where freedom of press and speech indeed are seriously threatened in a nation that has become the last great bulwark of those liberties of the people.

In addition to seeking out "immoral or offensive" matter, the resolution calls on the committee to determine the extent that radio-TV programs "place improper emphasis upon crime, violence and corruption. . . ."

Rep. Joseph R. Bryson (D-S. C.), who has been a perennial sponsor of bills to outlaw all alcoholic beverage advertising from interstate commerce, noted that he had joined with the late Sen. Arthur Capper in supporting a joint Senate-House bill to do the same thing.

The House committee has not held hearings on his "dry" bill, he asserted.

Consequently this, of course, is not dealing with the same subject but no one can deny that the subject in the resolution introduced and now pending before us is of a related nature.

Anyone who listens to the radio and witnesses exhibitions on television cannot but be impressed with the fact that the untrained, unsuspecting youth of the land is being corrupted, wilfully and maliciously by those who would break into the nursery rhymes and childhood stories . . . by the introduction not only of words of mouth, but by exhibitions of delicate fingers, beautiful ladies elegantly dressed, telling not only how interesting it is to drink intoxicating liquors, but teaching the youth how to pour that hellish fluid which has caused so much sickness and suffering and death.

Rep. Fred L. Crawford (R-Mich.) cited "fraud and deceit and the untruthfulness of the ads [in magazines] . . . The [advertising] industry is getting entirely too bold for its own good or for the good of the people . . ."

Rep. Edward H. Rees (R-Kans.), who has supported Rep. Gathings

(Continued on page 72)

Gathings' Plans

REP. E. C. GATHINGS (D-Ark.), author of the resolution which has set up a House probe of radio-TV programs, told BROADCASTING • TELECASTING last week: "I will have nothing to do with the investigation proper. However, I expect to appear before the committee as a witness and present information such as surveys made and program logs of some stations." Rallying of the "drys" in the House behind his resolution, he said, was not of his doing. Anti-beer, wine and liquor advertising "is not an issue with me," he said.

NEW HAMPSHIRE

97.3% of Homes Own Radios

RADIO homes comprised 97.3% of all occupied households in New Hampshire when the 1950 census was taken, or a total of 149,035 having reception, according to the state breakdown just compiled by the U. S. Census Bureau.

Highest radio concentration in the state was found in the city of Berlin, 98.7%. Among counties the leader was Strafford, with 97.9% saturation. Manchester, the largest city, had 98.1% radio ownership. New Hampshire is fourth in the series of state radio-TV census breakdowns to be completed. Others will be compiled during the year, with completion of the series scheduled in late autumn.

In breaking down TV ownership as of April, 1950, the bureau found that 9.3% of homes in the state had television receivers at that time. Total national TV set ownership when the census figures were collected amounted to less than a third of current TV-ownership.

SOURCE: Bureau of the Census, Department of Commerce, Washington 25, D. C.

The statistics in this table are extracted from a final report of the 1950 Census of Housing, Series H-A, No. 29, for New Hampshire, which will be available in about six weeks from the Superintendent of Documents, Washington 25, D. C., at 25¢ per copy.

Statistics on distribution of the population in New Hampshire are presented in a final report of the 1950 Census of Population, Series P-A, No. 29, now available from the Superintendent of Documents at 15¢ a copy. Descriptions and maps of "urbanized areas" are presented in this report.

Statistics on characteristics of the population in New Hampshire are presented in a final report of the 1950 Census of Population, Series P-B, No. 29, available from the Superintendent of Documents, at 30¢ a copy. Descriptions of Standard Metropolitan Areas are presented in this report.

A Standard Metropolitan Area is generally described as a county or group of contiguous counties with at least one city of 50,000 or more. In New England, it is defined on a town or city rather than county basis.

An urbanized area contains at least one city of 50,000 or more and includes surrounding closely settled incorporated and unincorporated areas.

duPONT AWARDS

Harsch, WCAU, WEEI Receive Top Honors

COMMENTATOR Joseph C. Harsch, WCAU-AM-TV Philadelphia and WEEI Boston were honored Saturday night as winners of the annual Alfred I. duPont Foundation Awards in radio, television and allied sciences.

The winners were cited for "outstanding and meritorious service to the American people" during 1951 at the Foundation's presentation banquet in Washington's Mayflower Hotel.

Awards were presented by Dr. Francis P. Gaines, awards committee chairman and president of Washington & Lee U., administrator of the awards.

Other commentators and stations were commended by the committee. Howard K. Smith, CBS, London; Edward R. Murrow, CBS, and the NBC program, *Three-Star Extra*, received special mention.

In the large station classification, special commendations went to WAAM (TV) Baltimore; WBBM Chicago; WLW Cincinnati, and WHAS-AM-TV Louisville.

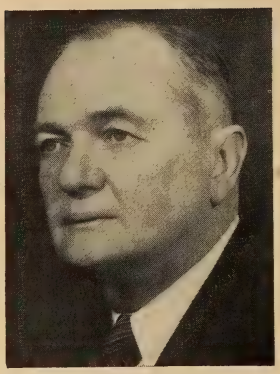
Honored in the small station category were WHCU Ithaca; KFBI Wichita and KUOM Minneapolis.

Harsch in Europe Now

Mr. Harsch, now in Europe covering activities of Gen. Eisenhower, was unable to accept his award personally. He sent a tape recording from Paris acknowledging the honor and expressing appreciation.

His award was accepted by Mrs. Harsch and Herbert E. Evans, general manager, Peoples Broadcasting Corp., to whom Mr. Harsch is currently under contract.

The former Washington correspondent for the *Christian Science Monitor*, whose commentaries during 1951 were aired via LBS, on May 11 began a transcribed weekly series of commentaries from Europe for WOL Washington and WRFD Worthington, Ohio.



Mr. Harsch was cited for his "consistently excellent and accurate gathering and reporting of news by radio." The citation also called attention to his "expert, informed and reliable interpretation of news and opinion."

WCAU-AM-TV, winners in the large station category, were lauded for "encouraging, fostering, promoting and developing ideals of freedom and for loyal and devoted service to the nation and to the communities served by them." This award was accepted by Donald W. Thornburgh, president-general manager.

WEEI also was cited for promoting and developing ideals of freedom. This award was accepted by Harvey J. Struthers, WEEI general manager. Former WEEI general manager is Harold E. Fellows, now NARTB president.

Mr. HARSCH

Mr. THORNBURGH

Mr. STRUTHERS

INDIVIDUAL WINNER:
Joseph C. Harsch, Commentator

STATION WINNERS:
WCAU-AM-TV Philadelphia
WEEI Boston

★ ★ ★

COMMENDED:
Howard K. Smith, CBS, London
Edward R. Murrow, CBS
***Three Star Extra,* NBC**
WAAM (TV) Baltimore
WBBM Chicago
WLW Cincinnati
WHAS-AM-TV Louisville
WHCU Ithaca
KFBI Wichita
KUOM Minneapolis

The three top winners received a plaque and cash awards of $1,000 each. Under new provisions of the duPont Foundation, winners may apply their cash awards toward individual scholarships for American youth to further advanced study in the broadcast media.

A panel of five judges reviewed 1951 activities and decided winners. They were, in addition to Dr. Gaines, Mrs. Jessie duPont, who established the awards in 1942 as a memorial to her late scientist husband; Ben McKelway, editor, *Washington Star* (WMAL-AM-FM-TV; Dr. Hadley Cantril, psychology professor and director, Office of Public Opinion Research, Princeton U., and Mrs. Hiram Cole Houghton, president, General Federation of Women's Clubs.

Prof. Riegel

Last fall, Prof. O. W. Riegel, director, Lee Memorial Journalism Foundation, Washington & Lee U., was named curator of the foundation to supervise the awards and the administration of the scholarships thus created.

Roger W. Clipp, general manager of WFIL-AM-FM-TV Philadelphia, presented a check for $1,000 to establish the first scholarship under the new educational objectives of the duPont Awards Foundation. WFIL-TV was a duPont winner last year.

At Banquet Saturday

Among those expected to attend the banquet were Adrian Murphy, president, CBS Radio; Frank M. Russell, vice president, NBC; Justin Miller, NARTB board chairman and general counsel; Paul A. Walker, FCC Chairman; Sol Taishoff, editor and publisher, BROADCASTING • TELECASTING; Chris J. Witting, director, DuMont Television Network; Charles Vanda, vice president in charge of television, WCAU; Oliver Gramling, assistant general manager, Associated Press; C. Edmonds Allen, director of special services, United Press Assns.; H. A. Lowe, *Variety;* W. H. Goodman, of the Florida National Bank; Richard W. Slocum, general manager, the *Philadelphia Bulletin* (WCAU-AM-FM-TV); William H. Fineshriber Jr., executive vice president, MBS; John W. Pacey, director of public affairs, ABC; J. L. Van Volkenburg, president, CBS Television; Charles O. Voigt Jr., information secretary, Alfred I. duPont Awards Foundation, and M. H. Aylesworth, broadcasting consultant.

Mrs. HOUGHTON

Dr. GAINES

Dr. CANTRIL

Mr. McKELWAY

HOOPER REPLY

'No Revisions Necessary'

C. E. HOOPER, president of C. E. Hooper Inc., last Friday released a detailed answer to the John Blair & Co. study attacking the question employed in the coincidental method of audience measurement in radio-TV cities (story page 23), in which he asserted that "it is not apparent to us that our firm needs to revise any of its procedures."

He also said he had told President Richard D. Buckley of the Blair firm early last week that Blair might be subject to litigation if it released its study, because it "carries material protected by copyright which is used without Hooper's permission." Liability, he said, could extend to any publication carrying the report or a story on it. But "despite the practical possibility of recalling the report, John Blair & Co. proceeded with its release," the Hooper announcement asserted.

The Blair report claimed that the coincidental method's practice of asking about both radio and TV audience in the same question had the result of "grossly" underestimating radio audiences. It proposed that a radio-only question be used.

Mr. Hooper asserted, however, that "any radio station, agency, advertisers or network desiring an audience measurement by us based on asking about 'radio listening only' . . . (1) has been able to obtain it from us, (2) is still able to obtain it from us anywhere at any time."

Must Use Care

But he said "that is not because we have had any reason to believe the 'radio-TV' question . . . to be wrong. Both can be used to produce the same, the correct, answer, but only if interviewers are trained and supervised with extreme care."

He contended that the public has not separated radio and TV in its mind as well as members of the industry have; that "the separation is confined to the suffix letters 'TV' (Example: WDSU-TV) added to call letters which always have, and still mean, the call letters of a radio station (Example: WDSU)."

Mr. Hooper continued in his statement, part of which the announcement said had been released earlier to a publication "under pressure of time and before Mr. Hooper had an opportunity to investigate his legal rights on the subject," as follows:

"In one survey, the details of which we will show to qualified individuals, 100% of the credits given by the public to a radio station should have been given to its TV brother. In that instance the radio station could not, and the TV station with companion call letters could, be heard in the county surveyed. When, in a re-survey, we made the proper clarification to the public by asking for both 'radio and TV,' a complete correction took place.

"In a city, or area, where half the broadcast audience is looking at television it takes expert interviewing to ignore TV in the question and still get valid results on radio."

The Hooper firm's "motives in asking the question on both 'radio and TV'" in radio-TV areas he said, are "laudable" in that "(1) it contributes to *accuracy* in TV areas, (2) it cuts the *cost* of broadcast audience measurement in half."

Further, he declared:

"Given the choice, radio station owners in TV areas, including those without TV stations, have preferred that we ask the radio-TV question. By getting information on both the AM and TV audience they say, 'We know what we are up against.' It has given them needed help in budgeting and scheduling their radio programs to know the periods of peak TV audiences in their cities. . . ."

Mr. Hooper said that his use of the radio-TV question, rather than radio only, was not introduced simultaneously in all cities, but rather was introduced "when and where TV audiences began to show up in answer to our 'radio listening only' question."

And, he continued, "nothing abnormal happened to the audience record when the substitution took place. Typically the TV audience reported during that first month after the change was a fractional per cent of the total tune-in. Not infrequently the radio audience reported for that month showed higher radio sets-in-use than the month before or the same month the year before when we had used [the radio-only] question. . . .

TV Figure Grows

"During ensuing months this TV figure was seen to grow from month to month: Fast in 'live' TV program markets, slowly in non-interconnected cities, reflecting the purchase of new TV sets and the quantity and quality of TV programs offered."

Mr. Hooper maintained that "much of this three-to-four year old record is in the hands of two-score advertising agencies and advertisers" and said "it and more may be observed in our offices by qualified persons on request."

He said "it will satisfy observ-

(Continued on page 36)

Does Hooper Undersell Radio?

(Continued from page 23)

in mornings for November 1951 as compared to January 1948.

The study next compared Hooper and A. C. Nielsen Co. sets-in-use figures for 21 identical cities during the same periods (April 1947 and April 1951). For 1947, the Hooper figures were 22.4% below Nielsen's in the case of evening listening, and 26.4% below Nielsen's for daytime listening. In 1951 the difference between the two services was approximately the same with respect to evening listening (Hooper's was 24% lower), while for daytime the Hooper figure was 34.6% lower than Nielsen's.

The Blair investigation then looked at average sets-in-use figures provided by Pulse, Nielsen, and Hooper, as shown in chart 3-A entitled "Pulse - Hooper - Nielsen Sets - in - Use Comparison April 1951." [See chart, page 23.] The right side of that chart shows how the results of each service ranks in comparison to the average for all three—Pulse is 20.8% above the average, Nielsen is 6.6% above, and Hooper is 27.4% below.

(Fact that Pulse figures are higher than the two others was "to be expected," the presentation said, "since Pulse is a measurement of total audience, while the Hooper and Nielsen figures are average-audience measurements.")

A comparison of Hooper and Pulse studies in Los Angeles showed "a high degree of correlation" in their measurement of TV sets, but a "marked and significant" difference with respect to radio sets, it was pointed out. Hooper's radio figures here were 34% below those of Pulse. It was noted that the Hooper method combines the radio and television question, while the Pulse technique involves separate radio and television interviews.

Similarly, in Los Angeles, there was found "a high degree of correlation, repeated on each of the seven nights [of the week,] between Pulse and Hooper television sets-in-use," but "wide disparity between the two series of radio sets-in-use figures."

"Because the same interviewing was used by each service for both their radio and television reports," the Blair study asserts, "the radio figures should show roughly the same correlation, or lack of it, that the TV figures show, and vice versa. Quite obviously, they do not."

Averaging Pulse, Nielsen, and Hooper radio sets-in-use figures in Los Angeles for a "typical" Sunday, 6-11 p.m., the study found "Pulse 24.8% above the average, Nielsen almost exactly on it—0.5% over—but Hooper 30.8% below the level of the combination." On the other hand, when the television sets-in-use figures of Pulse, Hooper, Tele-que, and Videodex were averaged, Pulse and Hooper proved to be "fractionally above the 100% average, Tele-que about 3% above the average and Videodex about 5% below."

Relationships 'Close'

Pulse-Hooper comparisons of TV sets-in-use in Columbus showed that "with minor exceptions, the relationships between the two are again very close," while in another Columbus study, it was said, "Pulse credits radio with more listening in TV homes than Hooper finds in all homes."

This series of studies, Blair spokesmen said, led to the launching of a "controlled experiment." Trendex was named to conduct interviews in New Orleans, Columbus and Los Angeles during the same weeks and days that interviewing was being done by Hooper. They used the same methods—"except that Trendex asked a radio-only question and Hooper asked the combined radio-television question."

The results were shown in Blair's presentation as follows:

Columbus, daytime and evening combined — Trendex figures on radio sets-in-use ran 22% higher than Hooper's ("odds are 1.7 million to 1 . . . that this difference is significant" statistically).

Los Angeles, daytime and evening combined—Trendex radio sets-in-use figures were 16% higher than Hooper's ("odds are 7,000 to 1 . . . difference is significant").

New Orleans, daytime and evening combined—Trendex radio sets-in-use figures were 6.1% higher than Hooper's ("odds are 27 to 1 . . . that this difference is significant").

It was noted that "statisticians recognize the fact of significance whenever the odds exceed 20 to 1."

The combined Columbus-New Orleans-Los Angeles radio sets-in-use totals of Hooper as compared to those of Trendex are shown in accompanying charts—one for daytime, one for evening, and one combing daytime and evening. In daytime, Trendex sets-in-use figures are placed 26.1% higher than those of Hooper; evening, Trendex 13% higher; daytime and evening combined, Trendex 15.2% higher.

'Grossly Underestimated'

"Our controlled experiment has proved," the presentation contends, that "the inclusion of radio and television in the same question by the telephone coincidental method grossly underestimates the radio audience," and that "therefore, the conclusion cannot be escaped: To estimate more accurately the true dimensions of the vast radio audience, this type of audience measurement should employ a question concerning only radio listening."

The presentation quotes a letter from Robert Ferber, research assistant professor, U. of Illinois' Bureau of Economic and Business Research, as saying in part:

"Since the data collection procedure used by Trendex was apparently identical to that used by Hooper with the exception of question wording, the latter is clearly indicated to be the source of the difference. I might note that this result, though striking, conforms with our present knowledge regarding the effect of question wording on survey results. A question concerning two district items tends to elicit less recognition on either, or both, of them than would be the case if the items were incorporated in separate questions."

RADIO POWER

Proven in Tacoma Press Strike

DO CITIES dry up and blow away when newspapers go on strike?

Definitely not, judging by business conditions in Tacoma, Wash., during the period the northwestern community's only newspaper, *Tacoma News Tribune,* could not publish because of a pressman's strike [B•T, April 28].

A study of the Tacoma scene by the Sales Committee of the Washington State Assn. of Broadcasters, of which Joe Chytil, KAPA Raymond, Wash., is chairman, showed:

● Bank clearings are up in Tacoma.

● Merchants who were consistent and wise purchasers of radio before the newspaper strike have had no deviation from normal operations.

● Radio has found it difficult to accommodate large department stores that stampeded to radio for heavy spot schedules after the strike began, only to find regular and consistent radio users there first with the heavier schedules.

● The department store that didn't know how to use radio and had no department setup for radio is feeling effects of the strike far more than normal radio advertisers.

Bank clearings for weeks preceding the strike follow: March 17-21, $75,762,000; March 24-28, $66,003,000; April 7-11 (Easter week), $68,406,000.

The *Tribune* stopped publication April 12, when the strike started. Bank clearings for the week of April 14-18 rose to $76,981,000. For the week of April 21-25 they were $71,299,000.

The report of the Washington broadcast association included these comments by Tacoma businessmen:

Large downtown store operator, a heavy newspaper advertiser who took ten spots a day during the strike—"I am quite amazed at the results we are getting. Considering all general business conditions, I am satisfied with my business."

Chain store operator—"My feeling is that business isn't as bad in Tacoma as some are making it out to be."

Leading jewelry store operator—"After two weeks of the strike, my business is not down. I am up 8% over the same period last year."

Advertising representative of leading food chain store—"Business is considered normal for this time of year. We are not feeling the effects of the newspaper strike. After increasing our radio schedule, we find it sufficient to maintain store traffic."

Earl Weiss, director of largest music festival ever held at Pacific Lutheran College—"More than half of all season ticket buyers said they heard of them through Tacoma radio."

The state association listed these comments from "Tacoma generally":

Frank Walters, owner of city's largest funeral home—"Radio stations putting on the obituary notices have been a great public service. City florists tell me they have used these broadcasts to keep up to date on the location and time of funerals."

Tacoma citizen—"I appreciate the way radio pitched in. Although I consider this the normal service the listener gets, I noted that extra newscasts were added just to make sure the listener did get the news when he could hear it."

Transit company official—"Our riders are down, but so far we cannot reach any conclusion other than this is due to a lot of reasons, such as emploment generally being down, less people at Fort Lewis, and certainly television has cut down the night traffic. I couldn't hazard a guess as to the actual shopper traffic to the downtown district."

Mayor John Anderson of Tacoma—"We of the city administration can't thank Tacoma radio stations enough for their usual good job of backing community promotions and keeping our city well informed."

Fred Sandstrom, Tacoma Chamber of Commerce—"I believe the way Tacoma radio publicized and brought out a large crowd for the celebration of the arrival of the naval ship *Falgeout* (while the strike was on) is a typical example of Tacoma radio performance."

Two civic events made out nicely despite the strike. The Lakewood ice show had a full house opening night and good attendance thereafter. The Shrine circus made good use of radio with "good attendance."

FLOOD REPORT

Given Library of Congress

HOUR-LONG radio documentary, described by the Librarian of Congress as the first of its kind in the library's history, was presented by Robert Tincher, WNAX Yankton, S. D., general manager, at ceremonies in Washington, D. C., last Wednesday.

The tape recording is a running account of news interviews and coverage of the recent Missouri River flood that WNAX broadcast as part of a series on top regional news events.

Mr. Tincher said he presented the documentary as an illustration of what part radio can and does play in fully covering a special event. The station broadcast a similar documentary at the time of last February's big blizzard that left farm people stranded and cut-off from belongings and cattle.

Dr. Luther H. Evans, Librarian of Congress, accepted the recording. Among those attending the ceremonies were Sen. Karl E. Mundt (R-S. D.), NARTB President Harold E. Fellows and Director Robert K. Richards of association's Public Affairs Dept.

The "Operation Flood" documentary was billed a week in advance of actual broadcast, Mr. Tincher explained, thus arousing high audience reaction to the recap. Same procedure, he added, was applied with WNAX's coverage of the blizzard.

HANNA HONORED

By Editors, Publishers

SURPRISE tribute to a radio man was to be paid at Ithaca, N. Y., last Saturday by more than 100 newspaper editors and publishers of some 40 small community newspapers, when Michael R. Hanna, general manager of WHCU Ithaca, Cornell U. CBS affiliate, was honored for his Sunday half-hour *Radio Edition of the Weekly Press* program.

Mr. Hanna began the program in 1946, digesting editorial comment by the area's weekly newspapers. The program in 1949 became a feature on the 13-station Rural FM Network with a membership of 110 newspapers. The program received a special Peabody Award.

WHCU has notified cooperating editors that the program leaves the air this month for an indefinite period, pending reorganization.

Mr. Hanna was to be awarded a special citation at the dinner at which he was guest of Cornell Vice President John E. Burton.

Attending Library of Congress presentation made by WNAX are (l to r) ← Mr. Fellows, Mr. Tincher, Dr. Evans and Sen. Mundt.

O'HARA'S BILL

May Be Added to S 658

REP. JOSEPH P. O'HARA (R-Minn.) served notice last week he will offer his bill (HR 7782) that would give the broadcaster the right to censor a political candidate's talk, as an amendment to S 658 when the FCC-remodeling bill reaches the floor.

Rep. O'Hara introduced his anti-libel proposal a fortnight ago [B•T, May 12]. His plans were given during debate on political campaign expenditures last Monday (see story, page 93).

His remarks follow:

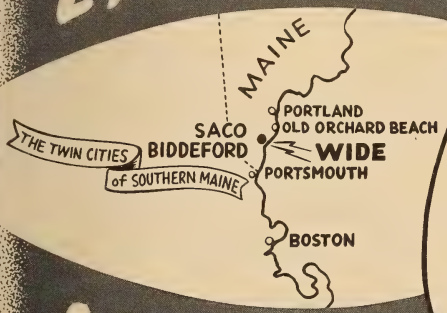
". . . Soon the Committee on Interstate & Foreign Commerce, which has been granted a rule upon a bill [McFarland bill] which amends the Communications Act, will bring that bill to the floor.

"I call the attention of the House to the fact that under the law which now exists a radio broadcaster has no power of censorship as to any statement a political candidate himself may make upon the radio during a political campaign. In other words, it offers the facilities, and there is no censorship on the part of the broadcaster over the kind of statements, no matter how defamatory or how libelous they may be, that the candidate may make. They have no power or control over his statements.

Cites Horan Bill

"Our colleague from Washington [Rep. Walt Horan (R-Wash.)] has introduced a bill which absolves the broadcaster from libility in such a situation. Personally, I think I have a better approach to it, and I have introduced a bill, which I hope to offer as an amendment when [the McFarland bill] . . . comes before us, which does not give the broadcaster any censorship over partisan or political matters but does give him the right to control the defamatory statements, to eliminate them, or to deny the candidate, unless he does eliminate that language, the use of his broadcasting facilities.

"The present situation to which I refer is analogous to your handing a loaded shotgun to some reckless individual and then saying you have no responsibility because you have given him the shotgun and loaded it and said, 'Go ahead and pull the trigger.'



"That is the situation the candidates for public office are in under the present conditions. . . .The broadcasters are themselves in a bad situation because they are subject to suit. . . .

"I do think we should clear up the hiatus that exists and put the responsibility on the broadcaster at the same time giving him the power of censorship, the power to eliminate defamatory matter from the candidate's statement over the radio, but we should place some responsibility upon the broadcaster to see that those defamatory statements are not made in political campaigns over radio or television."

Vic RADIO PROFIT Diehm Says:

It's All Sales and 29 Million Dollars

WIDE

Ali Ben Diehm the great merchant of the radio airways has added another great station, in a great state to his "airem" of proven and profitable purchases for your client's products . . . WIDE . . . located in the Biddeford-Saco market . . . second largest industrial center in Maine. Here are located the famous textile plants of Pepperell, Bates and Saco-Lowell. Here, too, is Old Orchard Beach and the Kennebunk region, making the Biddeford-Saco market Maine's leading vacation area. Retail sales for 1951 amounted to $29,442,000. Want some of this market? Write, wire or phone . . . Vic will give you complete details!

HIGGINS TO MCA

Leaves CBS Radio Post

HUGH M. P. HIGGINS, market research counsel for CBS Radio, has left that post to join Music Corp. of America as head of its TV Syndication Div.'s new Promotion-Publicity - Research Department, and as salesman.

The division is headed by David Sutton, former CBS-TV vice president in charge of sales.

Mr. Higgins joined CBS Radio last fall after serving as director of BAB from September 1950. For two years prior to that time he was part owner, vice president and general manager of WMOA Marietta, Ohio, and before that he was assistant director of the NAB Broadcast Advertising Dept. from 1945-48. Before World War II, during which he served in the Army Air Force, he was with NBC in Washington.

FOOD RETAILERS' BUDGET

To Spend Over $300 Million

FOOD retailers will spend over $300 million in advertising this year—more than the top 35 national advertisers combined—the Super Market Institute was told at its 15th annual convention in Cleveland last Monday. This prediction was voiced by Max Buck, advertising and sales manager, Kings Super Markets, East Orange, N. J.

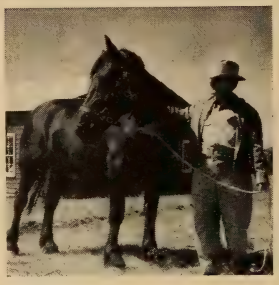
Citing the tremendous success achieved by super markets through advertising, Mr. Buck said the $300 million outlay would make the food retailer a larger advertiser than the following combined companies: Procter & Gamble, General Foods, Colgate-Palmolive-Peet, General Electric, General Motors, Lever Brothers, General Mills, American Tobacco, Liggett & Myers, R. J. Reynolds, Sterling Drug, Campbell's Soup, Ford Motor Co. and Pillsbury Mills. All are heavy radio-TV users.

Mr. Buck suggested use of more newsworthy and "emotional" copy to attain better results and urged the super market industry to unite in a better advertising campaign to drive home to the consumer the benefits of that industry.

RADIO MEMORIES FROM TEXAS

Harold Hough Recalls WBAP's Beginning

"IN the winter of 1921, Amon Carter allotted us $250 to go into the broadcasting business with a warning not to come back when that was gone," recalls Harold V. Hough, director of the *Fort Worth Star-Telegram* broadcast operation, WBAP-AM-FM-TV.



Mr. Hough, who was the station's earliest personality as *The Hired Hand,* was reminiscing on the occasion of the WBAP's 30th anniversary [B•T, May 5].

The media veteran's stories of early radio were recounted in the *Fort Worth Star-Telegram.*

Chuckling over WBAP's humble beginning, Mr. Hough relates that, "At any rate, we started May 2, 1922, with 10 watts; now we have 50,000. We also have call letters, frequencies, pictures, studios, personalities, temperaments and taxes."

WBAP's anniversary was observed quietly and without fanfare. "We considered getting up an anniversary program and patting ourselves on the back last Friday, but the staff voted to do something for our audiences—so we bought the radio rights to the sensational new show, *I Was A Communist for the FBI,*" Mr. Hough explains.

Discounting his role as a radio personality, Mr. Hough admits that "In the beginning of radio, I used to hang around the mike some. But radio soon grew up and it was

Once The Hired Hand, *radio pioneer Hough admires four-footed Texas beauty.*

* * *

time to begin selling soap.

"This was a slick job, requiring smooth gab, so the boys with lace on their tonsils moved in and crowded me off the air.

"However, I've had a lot of fun with the game in the last 30 years and expect to have more during the next 30."

N.Y. Pioneers Elect

DOROTHY GORDON, moderator of the *New York Times Youth Forum* on WQXR New York, was elected president of the New York chapter of radio Pioneers at a dinner meeting Wednesday. Patrick Henry Barnes, WOR New York, was named first vice president; Frank G. Silvernail, BBDO, second vice president, and Charles Butterfield, AP radio editor, third vice president. Charles A. Wall, BMI, was re-elected treasurer, and Bruce Robertson, BROADCASTING • TELECASTING, was re-elected secretary.

PRESS, RADIO PROTEST

Bolivian Suppression

INTER-AMERICAN Assn. of Radio Broadcasters joined with the Inter-American Press Assn. last week in condemning suppression of the daily newspaper *La Razon* in La Paz, Bolivia.

In a joint statement they said they consider that "an act of aggression against the free and independent press and radio of the western hemisphere has taken place in Bolivia where the government has denied the right to publish freely to the . . . *La Razon.*"

An IAPA committee said investigation showed that "the government of Victor Paz Estenssoro has through intimidation and coercion prevented . . . *La Razon* from publishing since April 14" and that "the government, up to this date, has indicated no intention of permitting the newspaper to publish" or of restraining governmental "partisans from attacking the newspaper plant should it attempt to publish. . . ."

REC-ATS Merger

BUSINESS meeting of the Radio Executives Club in New York last Thursday lacked a quorum, with the result that the group was unable to vote on the proposal to merge with American Television Society. It was agreed after much argument, however, that President I. E. (Chick) Showerman should appoint one committee to revise the by-laws of REC and submit a new name for the organization, and another committee to meet with ATS representatives to discuss the method of fusion.

RADIO PROMOTION

NARTB Discs Readied

SECOND of NARTB's transcribed radio promotion broadcasts will be released this week as one of the "Radio on the Record" series. It features Edward R. Murrow, CBS news analyst, in a quarter-hour discussion of the effectiveness of radio news.

Opposite Mr. Murrow on the disc are the voices of two Cabinet members, Secretary of the Treasury John W. Snyder and Secretary of Agriculture Charles F. Brannan, who discuss what radio means to them. Other voices are those of Maj. Gen. Floyd L. Parks, chief, Information Division, U. S. Army; Herschel Newsom, master of the National Grange, and Dan Tracy, IBEW president.

The promotion transcriptions are produced for NARTB by Drex Hines, with recordings distributed through Columbia Transcriptions Inc.

The series is designed to tell the national audience about radio's effectiveness as a medium of news, education, entertainment and public interest programming.

CONVENTIONS

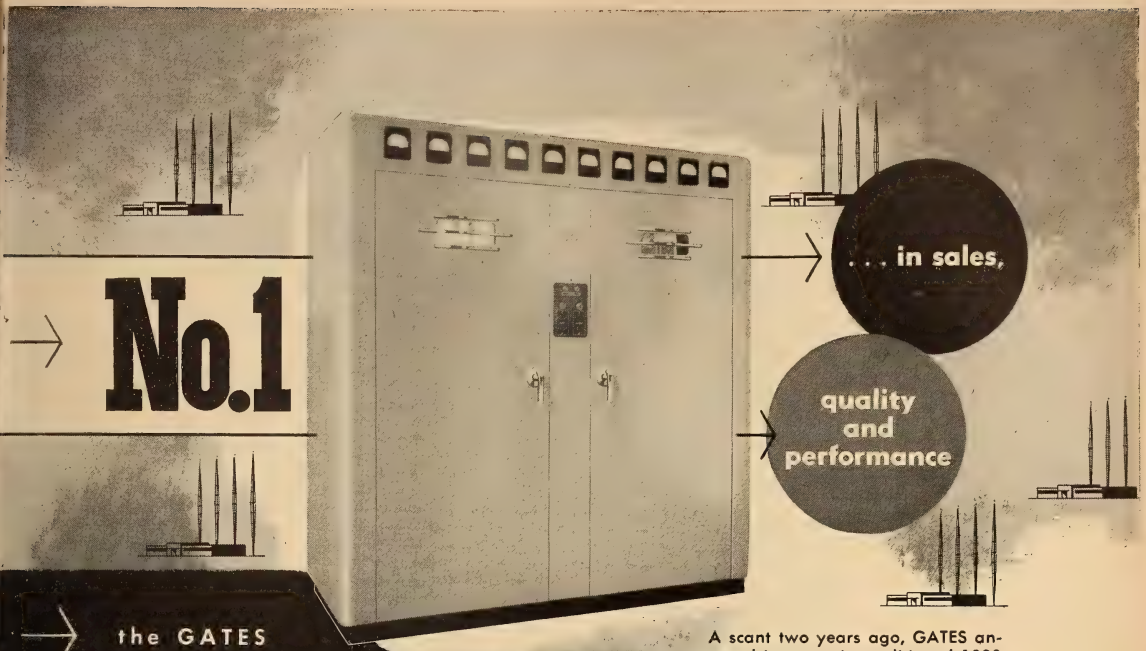
NBC to School Reporters

TEN newsmen will be handpicked by NBC and Northwestern U. for a special course in political convention reporting and each man will be an accredited representative of the network for the conventions in Chicago this summer.

The clinic, offered on a graduate level, will feature lectures by authorities in the broadcast news and political fields, including Ken Fry, radio-TV director, Democratic National Committee; Edward T. Ingle, who holds the same job for the Republican Committee; James Reston, political staff writer, *The New York Times;* Francis McCall, NBC-TV news and special events director, and Charles Cleveland, political reporter for the *Chicago Daily News.*

Eight of the ten have been chosen. They are:

Michael Radock, professor of journalism and director of public relations, Kent State U., Kent, Ohio; Burton Marvin, dean, William Allen White School of Journalism, U. of Kansas; Jack Fahey, news director, KGA Spokane; Sidney Kobre, professor of journalism, Florida State U.; Milo Ryan, journalism professor, U. of Washington; O. J. Buc, journalism professor, U. of Montana; J. Douglas Perry, chairman, Dept. of Journalism, Temple U., Philadelphia, and William Swindler, director, School of Journalism, U. of Nebraska.



To Double Budget

NORTH STAR Aircoach, New York, purchaser of the Flying Irishmen Air Reservations Agency, New York, plans to retain the latter's agency, Cavanaugh - Shore, New York, for all local radio advertising. Current billings in 12 markets are expected to be expanded in a few weeks when the advertising budget is to be doubled.

FARM STATION?

Yes! For almost a quarter-century our entertainment and services have been planned for farmers in Kansas and adjoining states.

the GATES

BC-1F

1000 watt transmitter

A scant two years ago, GATES announced its new air conditioned 1000 watt Broadcast Transmitter, the BC-1F.

Then, as now, it was described as a large, heavily built, rugged and full fledged transmitter — as fine as a broadcast transmitter can be made.

The enthusiastic acceptance with which the BC-1F has been greeted is unquestioned verification of quality, since only quality of the highest order could build such an impressive "owner list" as that below!

Why not ask those who own one?

OWNERS OF GATES BC-1F BROADCAST TRANSMITTERS*:

ANTI-TRUST PROBE

Is Launched in New York

GRAND JURY investigation into the conduct of the electronics manufacturing business, probing for possible anti-trust violations, started in the U. S. Court for the Southern District of New York last Monday when the first company records were submitted, per subpoena.

Major block to a full study, at this date, is understood to be the motion by RCA—singled out as a subject of particular interest—which sought to "quash or modify" the original subpoena [B•T, April 14]. Since success of the RCA motion would change and limit the federal investigation considerably, it was assumed last week that basic questions would not be considered and witnesses would not be called to testify until after a ruling on the RCA motion, scheduled for hearing June 12.

Records only of electronics manufacturers were to be produced at the opening session Monday. A few unnamed manufacturers among those subpoenaed—virtually all major producers of AM-FM-TV transmitters and receivers—needed more time to collect the extensive records asked for and sought time extensions which, following usual procedure, were granted.

Operating Methods

Modus operandi of anti-trust suits usually starts with Justice Dept. consideration of public records and hearings of individual complaints. If preliminary research indicates possible illegal practices, the department institutes a full investigation, conducted through the grand jury.

Since this phase is emphasized as only a study, all meetings are conducted behind closed doors to avoid harmful publicity or unnecessary exposure of subpoenaed witnesses and documents. It was this stage that the electronics investigation entered last week.

If the grand jury decrees that formal action may be necessary, then charges may be filed publicly and actual court proceedings begin.

NBC played host to representatives of 30 Midwest network-affiliated stations at promotion-press-merchandising sessions in Chicago fortnight ago [B•T, May 12]. Among NBC executives was Harry C. Kopf (l), Central Division vice president. Mr. Kopf chats with (l to r) Alex Keese, WFAA Dallas; Jack Zinselmeier, WLW Cincinnati and Fred N. Dodge, NBC merchandising director. Session was second in network series of meetings on various facets of radio operation.

'PURE SCIENCE' PROGRESS

U. S. Must Lead, Dr. C. B. Jolliffe Warns

THE U. S. must take the lead in developing fundamental knowledge—the advancement of "pure science"—because "our continuing safety and progress depend upon it," Dr. Charles B. Jolliffe, RCA vice president and technical director, said in an address before the National Conference on Airborne Electronics at Dayton last Tuesday.

He noted that Europeans, especially Germans and Britons, have been historic leaders in this field while greatest U. S. accomplishments have been in engineering, but said the time has come when "Americans should be the 'Pioneers of Science' of the future. . . . Russia, we may be sure, is not neglecting this all-important field. . . .

"Discoveries of supreme importance to such sciences as physics, chemistry, and biology will come from studies of the atom," he declared. "In fact, mankind is on the verge of an era in which new scientific knowledge can provide the basis for substantial advances in human health and happiness."

Dr. Jolliffe said the development of the transistor, tiny germanium device capable of performing many functions of the electron tube, will "of itself help materially in the advance of fundamental knowledge.

"With greater development of transistors, smaller, lighter, more rugged and more efficient electronics controls will be developed for airplanes and missiles. It may even make new weapons possible. New, better and smaller control equipment may well result in new types of planes.

"Here, indeed, is an outstanding example of how an advance in the fundamental knowledge of one field can be of inestimable value in another," Dr. Jolliffe said.

N.Y. AD CLUB

McMillan Re-elected

GEORGE S. McMILLAN, vice president of Bristol-Myers Product Div., was re-elected president of the Advertising Club of New York Tuesday.

Other officers include Stanley Resor, president of J. Walter Thompson Co., who was named vice president, and James A. Brewer, chairman of the Brewer-Cantelmo Co. board, treasurer.

SHOW MUST GO ON

Flash Fires Withstanding

WARM welcome was extended Don McNeill and his ABC *Breakfast Club* troupe on tour through five eastern cities when the group arrived in Baltimore. Flash fire on stage of the Hippodrome Theatre where the network show was to originate almost completely destroyed broadcast equipment and dimmed hope of ever going on the air with only a few hours to remedy the damage that had been done.

WFBR, ABC's affiliate in that city, came to the rescue with engineering and musical assistance which made it possible for Mr. McNeill's show to go on the air on schedule from the Town Theatre, substitute originating point.

SCOTT PETITION

Filing Renewed at FCC

ATHEIST Robert H. Scott renewed his petition to the FCC last week asking that ABC stations' licenses be revoked because the network would not give him time to reply to what he considered an attack on his anti-deity cause [B•T, March 17, 10].

In a letter to the Commission, Mr. Scott rebutted an ABC communication of last month which informed the FCC it had no intention of answering Mr. Scott's charges.

Mr. Scott had charged that ABC networked a Canadian Broadcasting Corp. play last November which was "an outright attack upon atheism as a point of view and upon atheists as a class." The play was entitled *Blasphemy*, and was a radio adaptation of an *Ellery Queen Magazine* story, "The Trial of John Nobody," by H. A. V. Carr. Mr. Scott said that ABC refused to give him time to answer what he termed the anti-atheism propaganda expressed in the broadcast.

ABC's letter on the subject last month to the Commission stated: "We did not furnish a statement [to the Commission] specifically directed to the petition because we believe . . . that an analysis of the script which we sent you on Feb. 21, 1952, would substantiate our statement that the program was a dramatic fictional presentation designed solely for entertainment and that it did not constitute an attack on atheism.

"We have examined Mr. Scott's complaint and find nothing that would lead us to change our view as to the character of the program presented."

Mr. Scott was the protagonist in the FCC's famed "Scott Decision," enunciated in 1946. That decision held that station licensees must present all sides of a controversial subject, even though one attitude may be strongly distasteful to the licensees and their listeners. The Commission, however, also added that not every controversy is of general interest and licensees must exercise their judgment.

Hooper Reply

(Continued from page 29)

ers that the trends are the product of two very real things: Owning TV and watching it." He asserted that "Ward Dorrell of the Blair firm was completely conversant with this record when in our employ." Further, he said, "I have recently turned over to him several volumes of original data on the subject to refresh his memory and bring him up to date."

He struck out at Pulse Inc. data in the Blair report saying that "Pulse would have you believe that radio sets-in-use reached a new high in Los Angeles last summer" even though "Los Angeles families, with seven TV stations to choose among, increased their ownership of TV sets 239% (from 335,000 to 830,000) and from 26% to an estimated ownership level of 65% of the families."

Mr. Hooper said that with reference to other reported findings of the Blair study, "I have but one comment. They raise a question. I welcome it. But the answer should not have been attempted by any but disinterested parties."

He suggested the reconstituted Advertising Research Foundation as a proper agency for impartial handling of the question. If ARF should indicate "need for the complete separation of radio and TV reporting," he said, "our course will remain unchanged except that the choice between the two questions will disappear and costs will increase."

Mr. Hooper felt that "such an analysis will uncover the source of a Trendex error, because I sincerely believe that there is an error." (Note: Trendex handled the "controlled" study of the issue for the Blair organization.)

"In fact," Mr. Hooper said, "if the city-by-city, period-by-period results for the three cities [studied by Trendex for Blair] had been released by the Blair firm, the source of one error might be apparent now, namely:

"In all three of these cities the call letters of more than half of the TV stations are identical with radio stations serving the same city except for the suffix. Television credits are, therefore, most likely to be given erroneously to radio (with the 'radio listening only' question in use) where the TV share of audience is biggest."

Must Show Hooper Higher

He expressed confidence "that the city-by-city, period-by-period figures, which are in the possession of Blair, must show Hooper to be higher during some periods, particularly in New Orleans—[One of the cities surveyed, along with Los Angeles and Columbus] — where the overall percentage difference [between Trendex and Hooper] is 6.1% and where a minimum of radio-TV confusion would, therefore, be created by the 'radio listening only' question. Furthermore, there is but one TV station in New Orleans. . . .

"If Hooper is the same or higher, during a significant number of time periods, the reason for the Trendex *average* being higher lies somewhere *outside* the differences" between the radio-only question and the combination radio-TV question.

Additionally, he said, much of the difference between Trendex and Hooper results might result from "Trendex reporting actual 'listening' not to a radio *but to television*," in cases where there is no watching of the TV picture. Thus, he said, the AM affiliate might get credit which actually is due the TV station, if the interrogator does not require distinction between radio and TV.

"Much daytime TV programming," he said, "and not a little of TV daytime commercial treatment, is already slanted to appeal to the 'audio only' daytime TV audience."

He charged that "if these errors are established it will not lead to the conclusion, drawn by the Blair Release, that 'radio listening as reported by the coincidental method has been grossly under-estimated,' but rather that some poorly executed or poorly conceived research has been done which creates that impression."

Rebroadcast Rights

(Continued from page 24)

munications Act. The Commission implied that an international treaty might take care of that question.

In referring to the fact that consent to rebroadcast may be of little value, since the consenting station might not own property and other rights to the program, the Commission said that clarification of this impasse would be required through Congressional action.

Sec. 325(a) states in part: ". . . nor shall any broadcasting station rebroadcast the program or any part thereof of another broadcasting station without the express authority of the originating station."

TALENT MERGER

'University Study' Set for N.Y. Talks

SUGGESTIONS for or against merger of entertainment unions are to be discussed in New York today (Monday) by member unions of the Associated Actors and Artistes of America (AFL), it was indicated late last week as results of a university study on stage-radio-TV performers and their labor organization were being distributed to union officials.

Research on each union's organization and jurisdiction, interviews of officials and members and study of previous attempts to establish a single-card organization for all entertainers have been conducted during the past few months by labor relations experts at Cornell U. and the U. of California at Los Angeles. These experts volunteered their services—for the first such analysis made in this particular field—when total merger again became a real consideration last winter.

Heretofore described as a "blueprint" for merger, the university plan is actually a series of "open-ended proposals," according to Prof. Robert L. Aronson of the New York State School of Industrial and Labor Relations at Cornell. The proposals were understood to include various possible alternatives to a total merger and could, he said, be modified as more complete information becomes available. Asked if he were satisfied that the proposals are the result of all currently available information, Prof. Aronson said he had no comment.

Officials of the union involved —all of which are AAAA members —plus representatives of the two universities, are scheduled to meet in New York's Hotel Astor at 2 p.m. today for their first discussion of the proposals.

Whereas all unions agree that a total merger would be welcomed by their individual members, establishing that unity without sacrificing the control of individual units is the major political problem. A partial merger of one or two AAAA groups is considered by excluded unions even a more serious threat to their status.

It was not known last week when the proposals would be public. It was assumed again that since each organization is to consider total merger and vote on it in time for effective action to be taken by July 1, the study could not remain private for long.

Unless total merger is effected by July 1, Television Authority and American Federation of Radio Artistes will unite into an all-broadcasting union, to be called the American Federation of Television and Radio Artists. Constitution for the merger has been drawn up and ratified by membership of both groups.

N.Y. AD AWARDS

Art Directors Club Opens Exhibition

THIRTEEN awards for advertising associated with the broadcasting industry were designated last week when the Art Directors Club of New York announced winners in its annual exhibition of advertising and editorial art.

For the first time this year, a special category was set aside for television commercials, with the medal won by United Productions of America whose art director, Ray Lind, and artist, Abe Liss, turned out a commercial for Benton & Bowles' Brewing Corp. of America account.

Largest single winner among advertisers was CBS, whose combined awards totaled nine: Three for CBS Radio advertisements and six for CBS Television ads.

Speaker at the awards luncheon, held at the Waldorf-Astoria Tuesday, the day that the exhibition opened at the Grand Central Galleries, was Marion Harper Jr., president of McCann-Erickson, who warned that "a period of 'hard-sell advertising' is ahead."

Winners of the Art Directors 31st annual competition were chosen from more than 8,500 proofs, with selection and analysis handled through committees of top advertising directors and final votes by the entire membership. A total of 12 club medals and the Kerwin H. Fulton Medal were awarded winners in various categories and an additional 30 certificates of distinctive merit were given.

Broadcasting winners were:

★

For design of complete unit TV commercials on film, with live technique: Award of distinctive merit to Jerry Fairbanks, producer; Barbara DeMaray and Pyrmen Smith, art directors; Les White, photographer; Young & Rubicam, agency; and Bigelow-Sanford Carpet Co., advertiser.

For TV commercials on film, full animation: Medal to United Productions of America and a merit award to Ray Patin Productions, producer; Mr. Patin and Tom Oreb, art directors; Fred Madison, artist; Fitzgerald Adv., agency; and Godchaux Sugar Corp., advertiser.

For TV commercials, limited action: Merit award to Transfilm, producer; Ray Lind, art director; Jack Zander, artist; Benton & Bowles, agency; Post Raisin Bran Div., General Foods, advertiser. Second merit award to Edward Carini, artist; William R. Duffy, art director; McCann-Erickson and General Electric.

For TV commercials, miscellaneous techniques: Merit award to George Olden, CBS-TV graphic arts director, for promotional design on the *Big Top* program.

No winners were named for live TV commercials.

CBS Radio Network advertisements won three honors:

Club medals were voted to Lou Dorfsman, director of the art division of CBS Radio Sales Promotion and Advertising Dept. for his Red Skelton advertisement, and to freelance artist Andrew Warhol for his drawing on CBS Radio's *Nation's Nightmare* documentary series.

Distinctive merit award went to Irving Miller, director of art service for CBS-owned radio stations, for design of booklets and direct mail ads.

CBS Television advertisements took five honors, in addition to Mr. Olden's TV commercial award:

William Golden, creative director of CBS-TV advertising and sales promotion, received two distinctive merit commendations: For a Robert Q. Lewis advertisement titled "He's Moving" and for "The Egg and I and You" ad entered in trade periodicals.

Artist Rene' Robert Bouche' also won two honors for CBS-TV: A club medal for trade periodical advertising, won by his sketch of Frank Sinatra, "The Voice That Sells," and a similar drawing of Edward R. Murrow, "Ambassador For Television," which received a distinctive merit rating.

Photographer Ben Rose won an award of distinctive merit for trade periodical advertising with his illustration of "They're Buying A New Product."

CONVENTION BOOK

Planned by CBS, 'Time'

CBS Radio and Television networks, in cooperation with *Time* magazine, have produced a special guide to this summer's national political conventions, to be offered voters free as a public service.

The 24-page booklet is being written and published by the editorial staff of *Time* and offered to the public through the facilities of CBS Radio and Television networks. Described as a non-partisan pamphlet, the guide covers the history, highlights and high-jinks of past political conventions and gives procedures and regulations for this year's sessions.

CBS Radio Network inaugurated spot announcements offering the guide on May 8 and the CBS Television Network started similar announcements, coupled with visual material, last week. Special kits for use by affiliated stations also were to be mailed last week.

To Use Radio, TV

MOST comprehensive advertising campaign to date in behalf of El Producto cigars—including radio this summer and TV in the fall—was announced last week by Sol Bornstein, president of G. H. P. Cigar Co. Summer radio and fall plans are being formulated and will be announced in the near future, according to Elkin Kaufman, executive vice president of William H. Weintraub & Co., New York, agency for the cigar company.

PIONEERS CITED

Sylvania Awards Given

SOME 23 pioneers of the radio industry—all of whom have served for at least 20 years and a few of whom are radio veterans of 32 years—were presented Broadcasting Pioneers Awards at a luncheon given in New York's Waldorf-Astoria by the Sylvania Electric Products Corp. Wednesday.

Dr. Lee deForrest, inventor of many electronics devices which have helped build the industry, was guest of honor at the luncheon, held by Sylvania to celebrate the production of its billionth radio tube.

Broadcasting veterans whose length of service was acknowledged included such radio personalities as Jack Benny, *Burns and Allen*, *Amos 'n' Andy*, Kate Smith, H. V. Kaltenborn, Ben Grauer, John Gambling, Patt Barnes, Lanny Ross, Lowell Thomas, Gertrude Berg, Paul Whiteman, Arthur Godfrey, Jessica Dragonette, Thomas H. Cowan and Sigmund Spaeth.

Zenith Names Wright

JOSEPH S. WRIGHT has been named assistant general counsel for Zenith Radio Corp., Chicago, Irving Herriott, Zenith general counsel, announced last week. An attorney for the Federal Trade Commission since 1936, Mr. Wright since 1947 has been the FTC's assistant general counsel and chief of its compliance division.

Mr. Wright

Morris Joins Equity

NEWBOLD MORRIS, recently discharged as special assistant to the Attorney General to help clean up corruption in government, has been appointed special assistant to Clarence Derwent, president of Actors' Equity and Chorus Equity Assns. His main assignment will be to help effect a merger between various branches of Associated Actors and Artists of America.

Spotlighting another engineering triumph by *Continental*

...the new 314-2 1 KW AM TRANSMITTER*

The smart, two-toned gray cabinet features the Transview glass door styling used in larger CONTINENTAL Transmitters, providing greater visibility and accessibility of all tubes and parts. Unified, frameless construction permits vertical members and partitions to serve as panels on which the transmitter components are mounted. This arrangement lends itself ideally to the forced air ventilation system used.

Here's a brand new 1,000 watt transmitter that sets the pace in streamlined simplicity. It's the Type 314-2 Transmitter, engineered with up-to-the-minute features to meet the rigid requirements of modern AM broadcasting.

Conventional high level modulation type of circuitry is even more simplified and improved in performance. Only three tuning controls are used. Two of the new CONTINENTAL crystal oscillator units are incorporated in the design of the 314-2. Only two RF amplifiers, including the output stage, are employed. These amplifiers utilize modern, high gain tetrode type tubes that eliminate the necessity of neutralization and require very low driving power.

A high quality push-pull audio amplifier, utilizing fixed audio feedback, drives the modulator, which employs the same type of tubes used in the Power Amplifier. Only 17 tubes of but eight types are used in one complete set! Of these eight types, four are the inexpensive radio receiver version. Tube costs are sharply reduced.

D.C. AD CLUB
Elects Sanders President

CLAYTON R. SANDERS, advertising manager of Peoples' Drug Stores Inc., heavy regional radio timebuyer, was elected president of the Advertising Club of Washington, D. C., at a luncheon meeting last Tuesday. A vice president of ACW the past year, he succeeds Tom Griffin, advertising director, Washington *Daily News*.

Other officers elected were: William E. Coyle, Washington *Evening Star*, first vice president; Stuart Armstrong, National Radio Institute, second vice president; Stanley Bell, WRC Washington, treasurer; Ward Guthrie, Guthrie Lithograph Co., secretary.

Board of directors elected were: Ben Strouse, WWDC - AM - FM Washington; William Sigmund, Henry J. Kaufman & Assoc.; Mary Pitsch, Ad Print Screen Co.; Arnold Fine, Washington *Daily News*, and James Rotto, advertising manager, the Hecht Co.

NEWS SECURITY
Senate May Probe Truman Order

MACHINERY was readied last week in the Senate for an inquiry into President Truman's controversial information security order.

The order, which was issued by the White House last September, set up classification of information on the same order as the military. It applied to civilian agencies, however, as well as to the military.

The impending probe grew out of a resolution introduced by Sen. Blaire Moody (D-Mich.), a former Washington-Detroit newspaperman and radio commentator. The resolution (S Res 309) calls for a "full and complete study and investigation" into:

(1) "Policies and procedures in the executive agencies with respect to the dissemination of information,

(2) "Free and unobstructed flow of news regarding government action, and government policy from its source to the public."

The inquiry would attempt to determine:

(1) "Whether any censorship is depriving the public of information to which it is entitled. . . .

(2) "Application of Executive Order 10290, dated Sept. 24, 1951. . . . the so-called 'President's Security Order,' and its effect on the dissemination of public information. . . .

(3) "Functions of government information officers, and (4) what methods can best be used to protect the nation's actual military secrets without keeping any information from the American people for any other reason."

When President Truman's order was issued, it was received with skepticism and opposition both by the radio and the press.

The resolution has been assigned to a subcommittee of the Senate's Permanent Investigating Committee, an arm of the Senate Committee on Government Operations.

Sen. Moody is slated to serve on the subcommittee along with Sens. A. S. Mike Monroney (D-Okla), a former newsman, and Andrew F. Schoeppel (R-Kans.). Two other members, not yet selected, will serve on the group.

Under the resolution, an advisory council of five to seven Washington newsmen—who are "reporting the news by newspaper, periodical, radio, television, or other media of public information—" would be appointed to advise the Senate unit.

The subcommittee would be authorized to recommend legislation necessary to assure the public free access to information on federal activities while protecting the nation's military secrets.

Canadian Set Sales

RADIO receiver sales dropped in Canada during last quarter of 1952 to 93,197 sets valued at $9,982,334, as compared to 164,714 sets valued at $13,970,696 in the same period in 1951, according to Radio-Television Mfrs. Assn. of Canada. Inventories at end of March 1952 were 164,193 sets as compared to 143,221 sets at the same time in 1951.

Walk, Don't Run

A WSPD Toledo announcer is rueing his rashness in running to the teletype and yanking off enough news to fill the closing minutes of a newscast. Here's what he found himself reading over the mike: "Smith says the best way to describe government language is to call it 'bafflegab.' And what is 'bafflegab'? Smith defines it as 'Multiloquence . . . characterized by consummate interfusion or periphrasis . . . inscrutability . . . incognizability . . . and other familiar manifestations of abstruse expatiation . . . commonly utilized for promulgations . . . implementing procrustean determinations by governmental bodies.'"

JONES PROMOTED
KRMG Also Names Lane

APPOINTMENT of Robert B. Jones Jr. as vice president and general manager and promotion of Frank S. Lane from commercial to station manager have been announced by KRMG Tulsa, Okla., ABC affiliate. Mr. Jones also has purchased an interest in All Oklahoma Broadcasting Co., KRMG licensee.

Mr. Jones

He has been station manager since 1949, and succeeds C. B. Akers, who has resigned to join WEEK Peoria, Ill. Before coming to KRMG three years ago, when it went 50 kw daytime, 25 kw night, Mr. Jones was station relations manager for ABC Central Division, and later general manager of WIRL Peoria, Ill. Previously he was associated with NBC in New York.

Mr. Lane joined KRMG as commercial manager in 1949. Previously he had been active in management of WDEF and WDOD Chattanooga and WSPB Sarasota.

Listen to what $250,000,000 says about the BROADCASTING MARKETBOOK

N. W. AYER—Thomas McDermott: "Your 1951 Marketbook surpassed your excellent 1950 Marketbook."

MORSE INTERNATIONAL—Chet Slaybaugh: "The Marketbook is indispensable in my end of the business."

COMPTON ADVERTISING—Frank Kemp: "A most valuable tool. Convenient and time saving."

FOOTE, CONE & BELDING—Lillian Selb: "The new BROADCASTING Marketbook is not a gold mine, it's pure uranium, and the Spot Rate Finder is terrific."

LEVER BROS.—Stanley Pulver: "A masterfully-designed one volume reference source for blueprinting network spot and television campaigns quickly and intelligently; the greatest possible help when it is necessary to—'get this out fast.'"

S S C & B—Frank Mineham: "We find BROADCASTING's Marketbook very helpful when we need data on radio markets."

HARRY COHEN ADV.—Mary Dunlavey: "The BROADCASTING Marketbook is one of our important timebuying yardsticks."

B.B.D.&O.—Frank Silvernail: "It's the timebuyers' Encyclopedia. He has all the market answers from Andalusia to Zanesville."

BIOW COMPANY—Terrence Clyne: "We find the BROADCASTING Marketbook invaluable for buying Bulova's radio and television time."

BENTON & BOWLES—Mary McKenna: "It's a very useful tool and has a convenient assemblage of data."

What YOU should say?

"Sure, reserve my space today and put my ad near my own listings."

CONCENTRATED COVERAGE AND NO WASTE CIRCULATION

REP. FORJOE & CO. INC.

Special to Time Buyers: Don't let Summer Static cut your radio audience

Include FM and get complete coverage all summer long

In many places in the country, your toughest competition is static. The folks you're trying to sell simply can't hear your commercial . . . because "radio climate" garbles the AM signal and shatters it with static. That's why more and more advertisers are insisting on FM, too—and getting their message across with all the sell and sense left in.

REMEMBER, this summer—

Far More people will listen to **FM** stations to avoid summer static

Far More people will listen to **FM** for baseball broadcasts

Far More people will listen to local news and events broadcast only on **FM**

So, in making your time schedules, don't overlook **FM**

AM, FM CAMPAIGN

Opened by NARTB-RTMA

FOURTH of the series of joint radio promotion campaigns conducted by NARTB and Radio-Television Mfrs. Assn., based on distributor-dealer-station cooperation, opens today (Monday) in New York State (New York City excluded).

Emphasis will be spread over both AM and FM in the New York campaign, first in which AM has been included. Past campaigns, confined to FM, were conducted in North Carolina, Wisconsin and District of Columbia.

Several hundred dealers and salesmen attended a meeting held Wednesday in Syracuse, according to John H. Smith Jr., NARTB FM director who is coordinating the campaigns. Clinics have been held in Buffalo, Utica and other areas preparatory to opening of the drive.

State broadcaster chairman of the New York promotion is H. S. Brown, of Rural Radio Network. Robert Child of RRN is vice chairman. The campaign will run to June 19. In areas where FM offers special programming service, the emphasis will be placed on that medium. In other areas, the campaign will carry a "Radio Month" theme, although FM will be stressed in set-selling material.

Belmont Radio Corp. joined other set manufacturers in the New York promotion on behalf of its new Raytheon FM set.

ATTENDING 30th anniversary celebration of WCAO Baltimore [B•T, May 12] are (l to r) Earl H. Gammons, CBS Washington vice president; Joseph Katz, president, Joseph Katz Co.; L. Waters Milbourne, president, WCAO-AM-FM; Ed De Gray, CBS station relations, and Sen. John M. Butler (R-Md.).

AM SPEEDUP

Objections to FCC Plan Received

FIRST objections to the FCC's proposal to set up two processing lines for AM applications—to give priority to those providing first service in communities not now receiving signals [B•T, May 12, April 28, 21]—were filed at deadline for comments last week. Deadline for responses to comments is May 22.

Those opposing the Commission's plan objected on the ground that giving precedence to applications for non-AM cities is discriminating against applicants on file for lengthy periods.

That is the position of Consulting Engineer A. Earl Cullum Jr. of Dallas, Tex. He suggests that the AM processing line could be speeded up by making public the Commission's processing forms, tabulations of limitations and other data so that consulting engineers could submit the required information with the applications. This would enable the FCC's staff to check the data submitted rather than to prepare it in detail.

Mr. Cullum calls attention to the average five applications per month, advancement of the present AM processing line. At the same time, he says, an average of 10 applications per month have been submitted. Average time new applications have been on file is thus about 12 months, he points out.

Unfairness to those applicants whose applications have been on file for many months is cited by Mr. Cullum. He points to the substantial sums of money expended by applicants due to the delays, claims it would work an undue hardship if their applications were placed even farther back on the processing line than at present.

Among other objectors are E. H. Pate, Twin Cities Adv., Kansas City; WBEL Beloit, Wis.; KSJV Sanger, Calif., and KDNT Denton, Tex.

WBEL declares that the rights of 170,500 people who would benefit by its improved service would be forfeited under the new rule. KSJV wants the new procedure to provide the same priority for daytime stations wanting to go fulltime as for new stations.

Mr. Pate is the potential purchaser of KPRS Olathe, Kan. KPRS is scheduled to be moved to Kansas City and is now off the air, awaiting FCC approval. He dissents from the plan on the ground that it makes no distinction between cities having primary service and those not so situated. He also claims the proposal makes no provision for hardship cases.

Patuxent Radio Inc., Lexington Park, Md., filed a counter to the recommendation of Bingham, Collins, Porter & Kistler that proposed Line I processing (for cities with no service) be arranged so that all applications for the same city be considered at the same time [B•T, May 12]. This would, the Washington law firm points out, ensure that action on a prior application would not put other applications for the same city in the slow-moving Line II.

The Maryland applicant claims that the suggestion to be fair would require that applicants for adjacent communities be considered at the same time as all those for one city. This might get out of hand and thus undercut the very purpose for which the FCC proposed its plan—to speed up processing, it claimed.

Strong support for the Commission's proposal—with the added recommendation that the priority for applicants for cities without AM stations be extended to hearings, initial decisions, oral arguments and final decisions—was filed by Delta Broadcasters Inc., Thibodaux, La.

Applicant for Thibodaux filed in April 1948, its comments point out. Hearings started in December 1949 and were completed in February 1950 in conjunction with the application of KCIL Houma, La., to change from 1490 kc and 250 w to 630 kc and 1 kw, the same wavelength Delta applied for. Due to amendments and rehearings, the official date of the close of its hearing was March 1952. Thus, four years after it filed, Delta is still awaiting the hearing examiner's initial decision, it points out.

279 Day Interim

In a study made for Delta by its attorneys, Cohn & Marks, the average time between the close of a hearing and the issuance of an initial decision was found to be 279 days, and between initial decision and scheduled oral argument, 252 days—or 531 days between close of hearing and oral argument. Since it usually takes four to six months after oral argument for the Commission to come out with its final decision, the study concludes that it takes a minimum of two years between the end of the hearing and final decision.

SENATORS NETWORK

WWDC to Feed 12 Stations

FORMATION of a Washington Senators Baseball Network by 12 stations in four states has been announced.

All games are to be fed to the network by WWDC. Under the arrangement, network stations air all Washington Senator day games. Network stations in addition to WWDC include WINC and WRFL (FM) Winchester, WHAP Hopewell, WFVA Fredericksburg, WANT Richmond, WNNT Warsaw, WCHV Charlottesville, all Va.; WARK Hagerstown, WTBO Cumberland and WASL Annapolis, Md.; WEPM Martinsburg, W. Va., and WARD Johnstown, Pa.

WRITERS' TALKS

Strike Held 'Unavoidable'

UNSUCCESSFUL negotiations between NBC, CBS and ABC radio networks and Federal Mediator J. R. Mandelbaum have convinced the Radio Writers Guild that a strike by news and continuity writers is "unavoidable," union spokesmen said last week.

Strike committee was scheduled to meet late last week, it was noted, with spokesmen adding, "We are not trying to find a means to avoid the strike . . . we're past that stage."

Vote of eastern members on strike assessments resulted in go-ahead by some 200 writers, with a similar report expected from the West Coast unit shortly. A picket committee has been set up with Murry Karmiller as chairman.

Guild last week was further irked at "partiality" shown by networks to some labor groups while writers' rights were side-stepped. Initially seeking contract on a national scale and night differential for newswriters, RWG dropped those demands in negotiations. Spokesmen said it was "interesting" that a 10% night differential had been offered engineers at CBS a week ago and that possibility of a national contract was to be discussed by all three networks with the Radio and Television Directors Guild.

Network refusal to discuss national contract for radio writers was cause, the union said, for loss of several shops in Chicago and Hollywood where NBC and ABC writers, disgruntled with lengthy RWG negotiations, shifted to National Assn. of Broadcast Engineers and Technicians. CBS writers in both cities, still RWG affiliates, have promised coordination of strikes in their cities with action in New York even though the union is not now striking for a national contract.

Newswriters for all three networks in New York seek a commercial pool in which extra pay resulting from sponsored newsprograms will be divided among writers on all news programs. Satisfactory formula has been worked out and is ready for presentation to the companies, guild spokesmen said.

Besides salary increases, continuity writers seek retention of the literary rights to their television material.

PULSE RATINGS

Mar.-Apr., Jan.-Feb. Radio

TOP 10 network radio programs, comparing March-April ratings to those of January - February, for evening, Monday-Friday daytime, and Saturday and Sunday daytime, respectively, for first seven days of each month, were reported last week by Pulse Inc., as follows:

Evening

	Program Average Rating	
	Mar. Apr.	Jan. Feb.
Jack Benny (CBS)	11.3	11.8
Lux Radio Theatre (CBS)	9.8	9.9
Bergen-McCarthy (CBS)	9.4	9.7

Weighted program average ratings for 19 regular Pulse radio markets.

May Appointed

DR. MARK A. MAY, Yale U., has been appointed chairman of the State Dept.'s U. S. Advisory Commission on Information, succeeding Erwin D. Canham, *Christian Science Monitor*, who continues as a commission member. Dr. May has been a member since the commission was set up and also heads its Film Advisory Committee.

MEDIA COMPETITION

Papers Face Big Fight

NEWSPAPERS face "tougher competition" from other advertising media this year than they've ever confronted before, director Harold S. Barnes of the American Newspaper Publishers Assn.'s bureau of advertising declared last week in the bureau's annual report. But he expressed the view that they can stay on top.

He said preliminary estimates placed total newspaper advertising revenue in 1951 at $2,226,000,000, or one-third of the total for all media, and that final official figures showed national advertisers invested $513 million in newspaper space during the past year. It was, he said, the third straight year in which newspapers surpassed all other media.

'OVER 45' DAYTIMER

KPOL Takes Air in July

KEYING programming to the "above 45 years of age" bracket, KPOL Los Angeles, 5 kw daytime station on 1540 kc, expects to start operating in late July, according to Hugh R. Murchison, president of Coast Radio Broadcasting Co., owner.

With a 38-acre site atop 790 ft.-high Ascot Hill having been cleared, construction has started on the transmitter-studio building at 5000 Carter Drive to house operations. Gates transmitter equipment and a 204-ft. non-directional vertical radiator built by Modesto (Calif.) Welding & Tank Works have been delivered. Completed structure with equipment will represent an investment of more than $100,000.

Tower Crash

SAVAGE 125 mile-an-hour wind which caused extensive damage in the Piedmont section of the Carolinas, destroyed WMRC Greenville's FM tower last week. Tower, which overlooks the city from the top of Paris Mountain, just missed the apartment of George Tate, chief engineer at the station, when it crashed to the ground. Shortly before the storm, FM operations for WMRC had been moved to the AM tower. Air operation was not affected by the storm.

how "consumer markets"

can help you sell more national advertising

1952-1953 edition, to be issued in September, closes July 1st, 1952.

this is the place your prospects look when they want facts about your market.

The facts about your market are in CONSUMER MARKETS. Every day, all year 'round, they help busy men make important market and media decisions—

Advertising managers with campaigns to make out, or revise.

Account executives drafting original proposals . . . or defending recommendations.

Research directors making comparative market studies.

Media directors with lists to plan and prepare.

Sales managers with market development plans to work out.

The data in CONSUMER MARKETS tell *what* your market is. Population. Retail sales. Income.

To connect these facts with your station, you can take space next to your market data to talk coverage . . . to show *how* your station serves the trading area, *why* it does a job in its market.

CONSUMER MARKETS users call these advertisements Service-Ads, when they *serve* the ultimate aim of the users —which is to pick the stations that best cover the people who can buy their products.

Your *market* story is already in CONSUMER MARKETS. Isn't that the natural place for your *coverage* story, too? More than 450 station managers and publishers placed Service-Ads in the 1951-52 edition.

Here's how advertisers USE it.

Owner of Advertising Agency Service: "We always start with CONSUMER MARKETS; and most of our work is analyzing markets and organizing marketing plans which, to us, means detailing management of sales, sales promotion and distribution."

Research Manager: "A great deal of information packed into one place, ready to use, and a good map right there to go with it."

Assistant Director of Research: "We are constantly developing new yardsticks of measuring sales and performance and advertising performance. CONSUMER MARKETS helps in what we call market diagnosis."

Agency Vice President: "A magnificent collection of data to gladden the heart of any researcher interested in gathering market facts. Your data and maps most helpful."

Assistant Research Director: "We tend to go first to the data book that has the more comprehensive data, and we find that CONSUMER MARKETS does, in fact, supply the most complete data."

SRDS

consumer markets

The comprehensive single source of authoritative market data

PUBLISHED BY STANDARD RATE & DATA SERVICE, INC.

New York · Chicago · Los Angeles

an important fact — CONSUMER MARKETS is used almost continuously by men seeking market information . . . but it is *never* used without an underlying purpose—*the purpose of finding the best way to reach the right people in the markets selected.*

Your Service-Ad can serve the CONSUMER MARKETS user by helping him see how your audience represents the people he wants in your locality. This is truly point-of-purchase advertising.

NPA LIST READIED

Covers Radio-TV Building

INKLING on how radio-TV broadcasters will fare on materials for new construction and alteration projects after July 1 may be forthcoming next week.

The National Production Authority is preparing a list of grants based on new applications for scarce metals since its six-months' compilation last month. At that time, it was indicated that some broadcasters already in the midst of building would receive quotas for the third quarter, while bids for others were still pending [B•T, April 21].

Meanwhile, the government has announced it will partly thaw the freeze on entertainment-amusement construction after July 1 and further relax restrictions on commercial building. Radio-TV broadcasting falls within the industrial category.

In announcing these actions, Henry H. Fowler, NPA administrator who June 1 also assumes the reins of the Defense Production Administration [B•T, May 12], stated relaxations were in order "because the needs of the defense construction program will be substantially reduced during the last half of the year." Easing of controls is "subject to change," however, NPA emphasized.

At the same time NPA issued allocation quotas for $337 million worth of commercial, religious, entertainment and municipal projects, with materials to be delivered in third or subsequent quarters. The grants cover applications processed by NPA's Construction Controls Division and thus no radio-TV projects were included.

The forthcoming industrial list is expected to show grants for new broadcast projects as well as actions taken on applications still pending, with building requests covering past or future quarters.

As of mid-April, applications were still pending in the Industrial Expansion Division for the following radio-TV broadcasters:

NBC New York and Hollywood, three radio-TV studios projects, $67,000, $85,000, $90,000.

WHUM Reading, Pa., experimental TV station applicant, $125,000.

WJBK-TV Detroit, television studios, $299,504.

In addition, applications were pending for Lycoming TV Co., Southern Radio-TV Co., and Havens-Martin—community TV antenna system firms.

WERE-FM Ups Power

WERE-FM Cleveland claims it became the city's most powerful FM station May 9 when it boosted power to 20 kw. The station's FM tower is 630 ft. above average terrain.

JDA Chairmen Named

ASSOCIATE chairmen in the Joint Defense Appeal's national $5 million campaign to combat bigotry and safeguard human rights, conducted on behalf of the American Jewish Committee and the Anti-Defamation League of B'nai B'rith, according to Franklin Bruck, JDA chairman and president of the Franklin Bruck Adv. Corp., are: Frank Commanday of Commanday-Roth; Samuel Dalsimer of Cecil & Presbrey; Henry Jaffe of the Jaffe & Jaffe, law firm, and Sol Leon of William Morris Agency. All firms are in New York.

CAMPBELL RENEWS

Signs CBS, NBC Programs

CBS Radio's Network Sales Vice President John J. Karol last week cited Campbell Soup Co.'s renewal of the three-a-week *Club 15* on CBS Radio, part of the sponsor's fall expansion in broadcast advertising [B•T, May 12], as new evidence of advertiser acceptance of radio as a "top" sales medium.

Pointing out Campbell's move came in the wake of the Procter & Gamble renewal of the three quarter-hour segments from 6:45 to 7:30 p.m. Monday-through-Friday on CBS Radio for 52 weeks, also starting next fall [B•T, April 7], Mr. Karol said:

"These two significant renewals by major national advertisers offer continuing proof that sponsors still consider radio the top selling medium—the medium that guarantees top circulation at the lowest cost-per-thousand."

The *Club 15* musical series has been sponsored by Campbell on CBS Radio since June 30, 1947, it was pointed out, and is heard Monday, Wednesday and Friday 7:30-7:45 p.m.

Other Plans

Campbell also announced it is renewing the half-hour *Double or Nothing* on NBC Radio five days weekly (10:30-11 a.m.), continuing the half-hour *Aldrich Family* weekly on NBC-TV (Fri., 9:30-10 p.m.), and will add three half-hours of daytime television weekly through sponsorship of a TV version of *Double or Nothing* on CBS-TV (2-2:30 p.m., three days a week).

Campbell said renewals of *Club 15* and *Double or Nothing* in radio are "evidence of our conviction that radio continues as a potent and profitable purchase"—that radio "certainly reaches many markets and many homes we cannot touch on television."

Decision to move into daytime TV, the spokesman said, was made because Campbell is "impressed" with the growth and development of TV as a daytime medium.

Ward Wheelock Co., Philadelphia, is agency for Campbell.

NATIONAL ADVERTISERS GO LOCAL WITH WINS!

When national advertisers want to get their selling message right down where consumers live and buy in the metropolitan New York market, they use *local* radio.

That means WINS to a blue list which includes:

- Anacin
- Ballantine
- Bayer Aspirin
- Bell-Ans
- Bromo-Seltzer
- Carolina Rice
- Crosley TV & Radio
- Fry's Candy Bar
- Kirkman's Soap
- Ladies' Home Journal
- Manischewitz Wine
- Metropolitan Life Ins. Co.
- Pepto-Mangan
- Phillips Milk of Magnesia
- Rem
- TWA
- 20th Century-Fox
- Union Pacific

You can reach this market economically while it's listening, relaxed. Just buy . . . 1010 WINS . . . it *sells!*

1010 WINS 50,000 watts Day and Night . . . New York

SEATTLE AWARDS

Ad Citations Presented

SEATTLE Advertising and Sales Club fifth annual awards for radio and television advertising were presented May 9 at an ad club banquet.

Awards, made on the basis of selling merchandise or promoting communtiy service, were as follows:

Radio Awards

Best commercial announcement copy: First prize—KRSC Seattle ("Value Week") on behalf of several food accounts. Honorable mention — Alaska Steamship Co. and the agency, Frederick E. Baker & Assoc.

Best commercial program: First prize —Columbia Brewery ("Heidelberg Harmonaires") and its agency, How J. Ryan & Son. Honorable mention—Lang & Co. ("Gold Shield Coffee Cup") and Pacific National Adv.

Best announcement copy promoting public relations and/or community service: First prize—Junior Safety Patrol, Seattle Safety Council and KOMO Seattle, for series of transcriptions last September.

Best program or programs promoting public service and/or community service: First prize—Weyerhaeuser Timber Co. ("Youth Views the News") and the agency, MacWilkins, Cole & Weber. Honorable mention—Frederick & Nelson, Seattle department store for its daily "Concert Hour."

Television Awards

Commercial on film or slides, one minute or less: Bardahl Mfg. Co. and its agency, Wallace Mackay Co.

Commercial filmed program, five minutes or more: National Bank of Commerce and MacWilkins, Cole & Weber.

Commercial live program, five minutes or more: Peoples National Bank and Frederick E. Baker & Assoc.

Winner of the newly-created Roy S. Marshall Memorial Award for the most effective integrated advertising campaign was Fisher Flouring Mills Co. and the Pacific National Adv. Agency. Award was accepted by Earle G. Lawrence, sales manager, Fisher's packaged products division, and William H. Horsley, PNAA president.

Trevor Evans, awards committee chairman, said the Fisher campaign utilized six media. Radio received about 40% of the total budget.

Honorable mention for the integrated-campaign award went to Weyerhaeuser Timber Co. and MacWilkins, Cole & Weber.

Mayor William F. Devin observed that success in administering a city in the best interests of all the people is not possible without the kind of public understanding and support which advertising men know how to create.

IBA MEET SET

For Indianapolis May 23-24

INDIANA Broadcasters Assn. will meet at the Athletic Club in Indianapolis May 23-24 with guest speakers including Jim Luce, J. Walter Thompson Co., New York; FCC Comr. E. M. Webster and Joseph M. Kittner, assistant chief, Broadcast Bureau of the FCC.

A sales panel of Indiana broadcasters also will attend, according to President Dan Park, commercial manager of WIRE Indianapolis. The group will see the Indianapolis Speedway trials for the 500 mile race.

Strictly Business

(Continued from page 16)

vision sales boomed throughout the nation.

This success as an advertising manager came as a pleasant surprise to Mr. Henry. He still felt that he was basically an engineer.

Even as a boy, in his native Danville, Ill., he toyed with radio. In high school, he qualified as a "ham" operator and became thoroughly familiar with the inner workings of electronic equipment of that day.

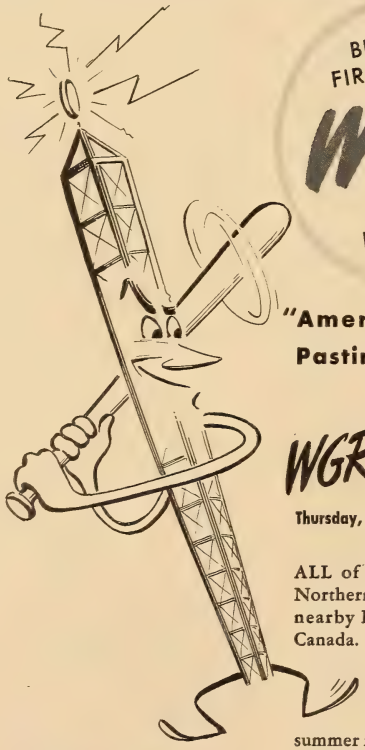
His informal engineering helped him to obtain his first job—with the Dayfan Electric Co., radio manufacturer in the 1920's at Dayton, Ohio.

Subsequently, he joined the radio manufacturing division of General Motors. Later, he joined Crosley Radio and Stewart-Warner. Then he moved to the Belmont Radio Corp., a subsidiary of the Raytheon Manufacturing Co., as executive assistant to Mr. Dunn. In this capacity, he kept things moving through engineer to production.

Then came the telephone call which interrupted Mr. Henry's vacation.

Returns to Engineering

After the advertising department began functioning smoothly, Mr. Henry told company officials that he was ready to return to engineering. He was drafted as military contracts administrator, then later promoted to his present position of product manager for Belmont.



In his present capacity, Mr. Henry is in full charge of forward planning for all Raytheon television and radio products. His work includes the coordination of design, engineering and production to make all merchandise available to the Belmont sales department on schedule.

Mr. Henry is a past president of Hinsdale Countryside, the suburb where he lives with his wife, LaVelle, and three children, Jimmie, 14; Clifford, 10, and Lynne, 7.

Civic activities consume much of his leisure time. He is currently president of the district school board. Also, he likes to garden. And, as he expressed it, "Each year seems to bring a different hobby."

BAB Strength Up

BAB has shown an increase of 36 radio stations in the past month, for a total membership of 608 outlets, President William B. Ryan announced last week. Talking at a sales clinic in Omaha, he said the annual BAB budget now is $595,000, a rise of $32,000 during the past 30 days.

THE LATEST WCKY STORY

In the "Musical Mystery Melody" contest in Cincinnati, an advertiser (name on request) used four stations. Here are the results:

Station	Leads	Expenditure	Cost Per Lead
WCKY	**15,312**	**$6,459**	**0.42**
Sta. B	10,708	10,100	0.94
Sta. C	4,900	4,400	0.90
Sta. D	3,976	2,000	0.50

WCKY pulled 43½% of all mail received —almost as much as the other three stations combined.

WCKY cost per inquiry was almost one-half that of the average of the other three stations.

Here's proof that in Cincinnati,

WCKY

gives you the best results, and at the lowest cost per thousand.

et's Face Facts!

To get results at lowest cost, you have to have:

editorial

Hooperuckus

JOHN BLAIR & Co. has done an important service to radio and its customers in conducting the study of how the coincidental interview technique has deflated radio sets-in-use figures, as reported elsewhere in this issue.

The study proves that for the past 3½ years the buyers of the coincidental service have been neglecting to investigate the fundamental nature of the thing they were buying. Apparently no one, before Blair, really wondered whether the questions upon which the coincidental service is based were the right questions.

Unless the Blair study is wrong, and it is difficult to see how such a thorough job could be, the questions that Hooper has been asking were wrong. How many shows were rejected, dropped or cancelled in those 3½ years because of deflated sets-in-use figures?

However definitive this piece of Blair research, it only goes to show how very much more of the same kind of diligent investigation is needed if the radio measurement muddle is to be straightened out. Here, it seems to us, is the chief value of the Blair study. By so thoroughly exploring and exploding one theory that had been accepted as gospel, it suggests that maybe other theories are equally incorrect.

Are other research services above question?

A part of the Blair study compared Hooper and Nielsen sets-in-use, finding that Hooper averages had fallen proportionately below Nielsen averages since the introduction of the combined radio - television question in the Hooper surveys. There is evidence that the true situation is even worse than the one turned up by Blair, for research experts have questioned whether Nielsen is adequately measuring listening to secondary radio sets.

Though the Nielsen figures are confidential, agency research men who know them say that the Nielsen sample of Audimeters attached to secondary sets is way below what it should be. If that is so, the probability exists that the Hooper deflation is more severe than shown by Blair because the Nielsen figures with which it is compared are also deflated.

We hope the example set by Blair will be followed by others and that intelligent reappraisal of radio research will be forthcoming, by independent effort or through the Advertising Research Foundation or, preferably, both.

Blue-Nosers Anonymous

THOUGH its author may not have intended it to take that direction, there is every indication that the Congressional investigation of "offensive" radio and television presentations may be turned into another prohibitionist campaign for alcoholic beverage advertising restrictions.

In the debate last week that preceded the House's adoption of the Gathings resolution, the most vehement advocates of the investigation were drys. One, Rep. Joseph R. Bryson (D-S. C.), was co-sponsor with the late Sen. Arthur Capper of a joint House-Senate bill to ban advertising of alcoholic beverages. That bill died, but Congressman Bryson lingers on. His remarks of last week are worth quoting:

> **Anyone who listens to the radio and witnesses the exhibitions on television cannot but be impressed with the fact that the untrained, unsuspecting youth of the land is being corrupted, wilfully and maliciously, by those who would break into the nursery rhymes and childhood stories which we ourselves in other days learned at the knees of our honored mothers, by the introduction not only of words of mouth, but by exhibitions of . . . beautiful ladies elegantly dressed, telling not only how interesting it is to drink intoxicating liquors, but teaching the youth how to pour that hellish fluid which has caused so much sickness and suffering and death . . . I propose to continue to cooperate . . . in delving into this important subject.**

These are the remarks of a dedicated man and it must gloomily be added that he has equally dedicated company.

As reported months ago in this journal, the prohibitionists have set out to get some kind of anti-alcohol legislation passed in the 82d Congress. Their first effort, the Johnson-Case bill to prohibit hard liquor advertising on radio and television, was killed in the Senate Interstate and Foreign Commerce Committee, but only by the cliff-hanger margin of one vote.

The House investigation authorized last week is intended to determine whether new legislation is needed in the radio-TV field. We shall be surprised if the dry lobby and its Congressional errand runners don't attempt laws that would not only ban liquor advertising on the air but also limit references to drinking.

If anyone thinks we're too alarmed about this, he is reminded that the Johnson-Case bill almost got through committee and undoubtedly would have if the anti-dry forces had not, at the last moment, got off their seats and put together a convincing argument against it.

The time to begin preparing arguments against the prohibitionists' campaign in the House radio-TV investigation is now. Last-minute efforts may not be as successful there as they were in the Senate.

We Vote O'Hara

FOR THE first time truly sensible legislation has been introduced to relieve the broadcaster of the be-damned-if-he-does and be-damned-if-he-doesn't dilemma now confronting him in programming political speeches.

The amendment to Sec. 315 of the Communications Act introduced a fortnight ago by Rep. Joseph H. O'Hara (R-Minn.) would give the broadcaster a power he does not now enjoy to censor from political speeches defamatory, obscene "or other material which may subject [the broadcaster] to any civil or criminal action in any local, state or federal court."

The superiority of this approach to that of Rep. Walt Horan (R-Wash.) is obvious. The Horan bill would continue the present absolute prohibition against censorship of political speeches by broadcasters, would expand the provisions of Sec. 315 to include not only qualified candidates but also spokesmen authorized to appear on their behalf and would immunize broadcasters against court actions ensuing from defamatory or obscene speeches.

The Horan bill, however well intentioned, is obtuse, awkward and, in the opinion of some able attorneys, unconstitutional. The argument against its constitutionality hinges on the question of whether a federal law can abrogate the rights of citizens to sue in protection of their reputations in local or state courts.

Unfortunately, the NARTB has endorsed the Horan bill as the best then available. On the advice of the NARTB, many broadcasters have written letters to their Congressmen in support of it. It could be said, and probably will be, that to switch support from the Horan bill to the O'Hara bill at this point would delay the legislative relief broadcasters are seeking.

Though delay may be entailed, we believe the wiser course is to throw the industry's support behind Rep. O'Hara's measure. It would be better to get his eminently practical amendment into the law, even though not until after the 1952 elections, than to push through the Horan bill, with its impractical and possibly unconstitutional elements.

our respects to:

ADNA HAROLD KARNS

IF VERSATILITY is a necessary quality for executive success, Adna Harold Karns is destined to become the J. P. Morgan of broadcasting.

In addition to being vice president and general manager of three radio stations, WING Dayton, WCOL Columbus and WIZE Springfield, all Ohio, Mr. Karns paints in oils, shoots golf in the low 80s, presides as vice president of the Ohio Assn. of Radio and Television Broadcasters, participates energetically in a variety of community affairs and civic clubs, and can claim experience in such random skills as ceramics manufacture and American Indian dancing.

One of the few (unavoidable) strikes against him, he believes, is his first name, purloined from a Methodist bishop who lived next door. He's a charter member of a club which was never organized, the My Name Is Adna (Dammit) Club. Since Feb. 25, 1913, when he was born in Dayton, he's only learned of five other men with the same first name.

The name has brought humor, as well as pathos, to his life. His wife, the former Florence Dykstra, used to sign her name as F. G. Dykstra when managing WING. When she, Adna and other company officials attended conventions, "Mr. F. G. Dykstra" was invariably co-registered by mistake with another while "Miss Edna Karns" had a single room.

He's operated in and around Dayton most of his life, with stops in and between New York and Montana. He joined WING in 1943 as announcer and six weeks later moved to WIZE as production manager. In less than a year he was promoted to program director and manager. In 1948 he was named general manager of WING and WIZE.

Last January, Mr. Karns became vice president and general manager of the two stations, plus the newly-acquired WCOL Columbus. He also is executive vice president of Transcription Sales Inc., which syndicates 360 quarter-hours of *Singing Sam* as well as the *Golden Gate Quartet* and Emil Cote's *Wing of Song*.

Mr. Karns sees radio progressing from adolescence into manhood at the prodding of television. TV, he says, "is bringing more honesty to radio." The initial problems of radio are to adopt an industry-wide standardized rating service and to base time rates solely on performance.

"We need a complete re-evaluation of the job radio can do. Radio can and always will fill a need and we should see that this need is very well defined," he contends.

To enable the audience for his three stations

(Continued on page 55)

NBC's MEN IN THE NEWS: *Chaplin*

"The average politician has to carry water on both heads..."

To his off-record comment, W. W. Chaplin might have added that a good newsman should be an ambidextrous phrenologist.

In his thirty years in news, Bill Chaplin has personally experienced enough history to fill considerably more than the three books he's written. He has covered: the Ethiopian war, the fall of France, the Russian resistance, the Invasion, the surrender at Rheims, the Bikini test. He traveled with Dewey in 1948 and has covered five Democratic and Republican Conventions.

Now, Chaplin is right in the middle of the biggest story of the year — the presidential campaign. So far he has reported the primaries from New Hampshire to Illinois. During the conventions, Bill Chaplin and over 100 other NBC men of news will be putting together the story of politics' greatest show.

Why is NBC's News Center supreme in radio and television? Chaplin is one good reason . . . Harkness, Henle, Utley, Fleming are others. NBC News Center's larger staff consistently broadcasts more hours of news, more special events on both radio and television than other networks. And day-to-day NBC news programs are highest rated in both radio and television. The fact is . . . most people hear the news first and hear more of it from NBC.

NBC *radio and television*
a service of Radio Corporation of America

front office

WALTER B. DAVISON, director of West Coast operations, Lang-Worth Feature Programs, named manager, NBC Radio Spot Sales, Hollywood. WILLIAM DOTY EDOUARDE, until now manager, NBC Radio and TV Spot Sales, will now devote attention exclusively to television.

ALBERT T. FISHER, sales promotion manager, WTRF-AM-FM Wheeling, W. Va., promoted to sales manager.

KENNETH M. COOPER, sales manager, WORC Worcester, Mass., elected vice president and named general manager.

Mr. Cooper

DOYLE SEELEY, program director, KRUL Corvallis, Ore., promoted to sales manager.

SINN, president, World Broadcasting System, N. Y., awarded plaque from Veterans of Foreign Wars for World's *Forward America*, one of six shows cited for public service. . . . DON DAHLMAN, WLWT (TV) Cincinnati salesman, father of girl, Patricia.

CANADIAN RATINGS

U. S. Shows Dominate Top 10

FOUR CANADIAN evening network programs again made the April list of the ten most popular programs, according to the national rating report of Elliott-Haynes Ltd., Toronto. *Charlie McCarthy* was first with rating of 30.9, followed by *Radio Theatre* 29.3, *Amos 'n' Andy* 27.5, *Our Miss Brooks* 26.2, *Ford Theatre* (Canadian) 20.5, *Great Gildersleeve* 19.8, *Treasure Trail* (Canadian) 19.1, *Wayne & Shuster* (Canadian) 18.3, *Your Host* (Canadian) 18.2 and *Suspense* 17.8.

Daytime five most popular network programs were *Big Sister* 18.2, *Ma Perkins* 17.6, *Happy Gang* (Canadian) 17.4, *Pepper Young's Family* 16.5, and *Road of Life* 15.9. Five most popular French-language evening shows were *Un Homme et Son Peche* 43.4, *Radio Carabin* 36.4, *Metropole* 30.5, *Jouez Double* 24.3, and *Theatre Ford* 23.9. Five most popular daytime shows were *Jeunesse Doree* 28.2, *Rue Principale* 27.8, *Francine Louvain* 26, *Les Joyeux Troubadours* 24.4, and *Je Vous Ai Tant Aime* 23.

SALES CRUSADER

Behold Sir PLUS, in armor plate,
The Mutual knight-errant.
He sallies forth to demonstrate
Two plusses here concurrent:

This network's famed efficiency
Is up, like Sir P.'s visor;
While costs are like his spurs, you see,
Way down — to please a miser!

— the difference is MUTUAL!

Famed Tabernacle Choir takes to tape

for rebroadcasts over KSL-Salt Lake City

Because of the immense popularity of the weekly Tabernacle Choir broadcasts, Station KSL has inaugurated a recorded Sunday evening rebroadcast for local listeners. The Choir's performances are now captured on "Scotch" Sound Recording Tape in all their brilliance and power, from the soaring notes of solo voices to the rumbling basses of the magnificent Tabernacle organ.

"Scotch" Sound Recording Tape was selected for this exacting recording job on the basis of many points of superiority: Lower noise level than any other tape • Greater output sensitivity than any other tape • Better reel-to-reel uniformity than any other tape • Erases cleaner than any other tape • No curling or cupping—always lies flat on head • Lubricated for longer tape life.

J. SPENCER CORNWALL is the distinguished conductor of the Tabernacle Choir. Working with Dr. Frank W. Asper and Alexander Schreiner, the Choir organists, he has brought the Choir to a level of tonal grandeur seldom equaled by choral groups.

RICHARD L. EVANS has acted as commentator on Choir broadcasts since shortly after their inception in 1929, helps set the impressive tone of the programs.

3M COMPANY

The term "SCOTCH" and the plaid design are registered trademarks for Sound Recording Tape made in U.S.A. by **Minnesota Mining & Mfg. Co., St. Paul 6, Minn.**—also makers of "Scotch" Brand Pressure-sensitive Tapes, "Underseal" Rubberized Coating, "Scotchlite" Reflective Sheeting, "Safety-Walk" Non-slip Surfacing, "3M" Abrasives, "3M" Adhesives. General Export: 270 Park Avenue, New York 17, N. Y. In Canada: London, Ont., Can.

CBS STAFF SPLIT

Divides Labor, Personnel

CREATION of separate labor and personnel relations departments for CBS and three of its operating units was announced last week by CBS Vice President Lawrence W. Lowman, who ascribed the move to the pressure of general company expansion.

William C. Fitts Jr., an assistant general attorney for CBS Inc., was named director of labor relations for CBS Inc., CBS-TV, CBS Radio and CBS Labs.

Robert E. Kalaidjian continues as director of personnel relations for these units but will concentrate mainly on administration of overall company personnel practices and policies, at the same time continuing to participate in formulation of labor policies.

Both of the new departments will report to Mr. Lowman. Heretofore, a single labor and personnel relations department has served the four units.

Mr. Fitts' Responsibilities

Mr. Fitts, who will be responsible for union negotiations, grievances and contract interpretations, has been with CBS for the past 20 months, handling all labor law problems. He formerly was associated with the law firm of Fly, Fitts & Shuebruk for five years, and, before that, was a member of Cates, Smith, Long & Fitts, and also had served as a general counsel for the Tennessee Valley Authority.

Mr. Kalaidjian joined CBS in November 1939, as a member of the research department, after a brief association with Newell-Emmett Co. He served in the Navy from September 1941 to January 1946, when he returned to CBS as assistant employment manager. He was named employment manager in July 1946, and director of personnel relations in July 1950.

air-casters

JAMES DUFFY named promotion manager at ABC Chicago replacing **DEAN LINGER**, who has resigned to join KNX Los Angeles in same capacity.

JAMES J. ANDERSON, former political science and marketing professor at Cornell U., to Crosley Broadcasting Corp., Cincinnati, as research director replacing **DONALD L. MILLER** who resigns to join Burke Marketing Research Inc., Cincinnati.

Mr. Anderson

Mr. Miller

to listen effortlessly but still keep up with the world, Mr. Karns has launched an intensive news and music block program schedule on WING, with plans for news feeds and roundups among all three outlets. He has six men covering local news on the Dayton staff alone.

Mr. Karns attended Antioch College, a cooperative school in Yellow Springs, Ohio, where students work and study alternately. In his first two years he worked in fields unrelated to his majors, English literature and dramatics.

During his third year, however, he served as student assistant in the art and aesthetic division, conducting laboratory sessions in art, ceramics and American Indian dancing.

Primarily interested in drama, he received permission from school officials to omit the regulation fifth year and enroll at the Yale Drama School, which normally did not accept students without a degree. He later received his B.A. from Antioch.

Putting classroom and personal theorizing to the test, Adna Karns donned espadrilles and tee shirt after graduation at age 17 to open the Yellow Springs Summer Theatre. He made money every year during the seven years he labored as producer, director and business manager in the old town opera house. His success was occasioned by, in addition to high-quality plays, a liberal public relations policy which insisted on a clean theatre, courteous ushers and weekly visits (with free tickets) for nearby residents who could have been highly vocal in their complaints about the noisy sound effects.

He skipped intermittently to New York, where one season he produced experimental plays at the Provincetown Playhouse in the Village. His group of 18, including a cook, folded up their collective tent after a frigid Christmas Day when the boiler broke down and they had to burn orange crates picked up in the streets.

Mr. Karns also spent a year teaching drama, English and radio at the U. of Montana. His "missionary work" the first day centered on 39 students in elementary acting, only three of whom had ever seen a stage play. He's still a part of faculty history, as his class requirements for the beginning thespians were so rugged that 24 of the 39 dropped before the second session.

Mr. Karns took up painting a year ago as a challenge to his wife, who has a master's degree in fine arts and has painted professionally for several years. When she was away one evening, he started dabbling in her paints and had finished a picture, a circus abstract, by the time she returned. His paintings are impressionistic or abstract, complementing Mrs. Karns' more realistic approach.

Mrs. Karns, who retired from radio after their marriage in 1948, does a lot of portraits and is also a sculptor. They also share an enthusiasm for golf.

Both are interested in many community affairs. Mr. Karns, a member of the taxation committee of the Ohio Assn. of Radio & Television Broadcasters, on May 1 was elected vice president of OARTB. Also, he is a member of the Dayton Sales Executives, the Advertising and the Agonis Clubs, and a member of the board of directors, Dayton Better Business Bureau.

Pittsburgh Club Elects

PITTSBURGH Radio & Television Club has elected Joe Jenkins of Ketchum, MacLeod & Grove as president. Other officers named: first vice president and program chairman, Harold Lund, general manager of WDTV (TV) Pittsburgh; second vice president, Bill Coffman of Cabbot & Coffman Inc. Adv.; third vice president, C. A. Wingerson of Danforth Co.; secretary, Mary Lou Tardio, of Cavanaugh-Morris Co.; treasurer, Bill Kelley of WDTV (TV); directors, Don Ioset, vice president, manager, and commercial and program manager, WPIT; Jake Hoffman, Bell Telephone Co.; T. J. MacWilliams, Smith, Taylor & Jenkins; Ray Scott, Ketchum, MacLeod & Grove.

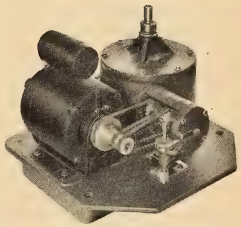
NEW! Fairchild 3-Speed Turntable

It's the only one with a built-in synchronous drive for ALL 3 SPEEDS!



...and costs less than other professional turntables!

Operates quietly...no turntable vibration or rumble!

Geared belts and geared pulleys insure accurate timing for all 3 speeds.

It's a Fairchild exclusive! The new Model 530 Turntable has the *only* synchronous drive integrally designed and built for three speeds. No attachments, no kits are necessary. It reaches *stable speed*—less than ½ revolution at 33⅓ without overshooting. Offers *guaranteed accurate timing* within limits of AC line frequency. Turntable rumble and vibration are practically non-existent.

And . . . the new Fairchild Model 530 *costs less* than other quality turntables. Bulletin PB10 contains complete data on Fairchild's new, wide-range line of playback equipment. Write for your copy.

Pontiac Names Irving

CHARLES IRVING, producer-director of CBS-TV's *Search for Tomorrow,* has taken leave to serve as consultant to Pontiac Div. of General Motors in its 1953 promotion campaign. His association with Pontiac will be on an independent basis and has no connection with the company's advertising agency.

What Has TV Done to RADIO in Syracuse?

In spite of the fact that Syracuse is a two-TV-station city—even though 71% of the homes in the Syracuse area have TV sets—two separate surveys* show that radio is very much alive and kicking.

3.07 Hours a Day

is the average daily radio-listening time in TV homes in Syracuse. These same homes watch TV an average of 4.52 hours a day. Non-TV homes listen to radio 4.4 hours a day. TV has not replaced radio in Syracuse—merely supplements it as a source of entertainment and information.

TV sponsors once said
"HANG THE EXPENSE"

. . . Now they say
"IT'S MURDER"

Television is a business now—not a spending spree.

Shows are judged by their value, not by their costs. And sponsors who used to say "whatever the cost, produce it" now ask "will it produce"?

If you don't get dollar-for-dollar advertising value for your investment—if television doesn't work for you at a reasonable, economic cost, then you, too, should bring your TV thinking up-to-date.

Du Mont has always considered television a business—advertising business, with the same values as any other medium. And Du Mont has consistently worked to give sponsors value for their money—not just glamour. That is why Du Mont costs have been and still are *always realistic, always reasonable*. It is why an advertising budget on the Du Mont Television Network *always produces results*.

If your TV advertising is murder to your budget, find out how Du Mont can stretch your dollars into the greatest value in television advertising today.

FORD FOUNDATION

Will It Open Its Till to Educational TV?

By EDWIN H. JAMES

THE FORD Foundation, whose half billion dollar endowment is the biggest in the world, is seriously considering new and lavish grants which would help establish an educational television system and create a national commission to investigate broadcasting, the latter a device that would provide an escape hatch for a Senator who has trapped himself in an awkward political position.

Quite probably, the decision on whether to commit the foundation to this expensive program will be made at a New York meeting of the foundation's board of trustees July 15-16. In the meantime, educators and sympathetic politicians are doing everything possible to see that the trustees open the till.

Although no official information concerning these activities has been released by the foundation, whose policies run true to the traditional reticence of big philanthropies, the following developments may be reported with authority:

● Foundation officers are studying a proposal by Sen. William Benton (D-Conn.) to set up a national citizens commission for radio and television, with an initial appropriation of about $50,000. This commission, composed of prominent citizens in many fields, would study broadcasting with a view toward recommending improvements.

Sen. Benton, it may be recalled, is the author of a Senate bill to create a National Citizens Advisory Commission for Radio and Television. If a similar body were established privately by the Ford Foundation, there would be even less need for the Senator's government-sponsored commission than there is now. The Senator then could withdraw his bill from the pigeonhole where it has been mouldering, with the graceful excuse that the Ford Foundation's work had made his proposal unnecessary.

It is known Sen. Benton suggested the foundation take an interest in forming such a commission in a conversation early this year with C. Scott Fletcher, director of the Ford Foundation and president of the foundation's subsidiary, the Fund for Adult Education [CLOSED CIRCUIT, Feb. 4].

The Senator's words carry some weight with Mr. Fletcher, who is a former Benton employe. Before joining the foundation Mr. Fletcher was president of Encyclopedia Britannica Films, which Sen. Benton owns. As of last week, the proposal was reportedly under careful study at foundation headquarters in Pasadena, Calif.

● Foundation officers also are screening requests of an unknown but reportedly substantial number from educational interests who wish to occupy some of the TV channels reserved by the FCC for non-commercial, educational use.

These interests have only the will. What they are seeking desperately from the foundation is the way.

Last year, long before the thaw in which the FCC definitely reserved 242 educational channels, the Ford Foundation was reported by its consultant, James Webb Young, who is also senior consultant to J. Walter Thompson Co., not to be of a mind to finance construction of such stations.

There has been no statement of the foundation's policy on this question since then. Conceivably, the policy could change. It must be emphasized that Mr. Young's statement was issued well in advance of the thaw, when no final allocations had been made; hence the foundation could not have built educational stations if it had wanted to. Further, since that time educational pressure on the foundation has been mounting steadily.

Comr. Frieda B. Hennock, the educators' advocate, has been stumping education meetings ever since the thaw, urging a speed-up in plans to occupy the non-commercial facilities. A get-the-money-somewhere urgency is in the educational air these days, and a likely somewhere is the vast treasury of the Ford Foundation.

There is reason to assume Sen. Benton will not confine his suggestions to the foundation to the mere proposal of a national commission. It would be uncharacteristic of him not to seize whatever opportunity were afforded to advance others of his theories on broadcasting.

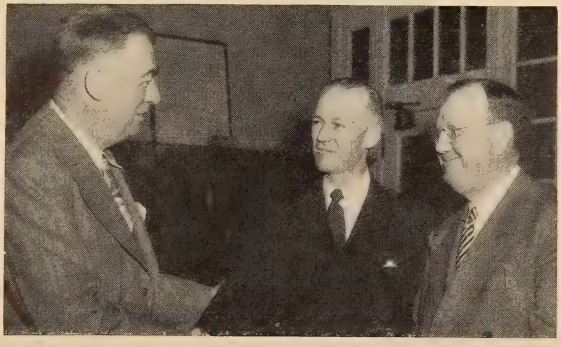
One such theory is that subscription television would provide an excellent means to elevate the general quality of broadcast service. Indeed, one of the major issues to which he hoped his own National Advisory Commission would ad-

(Continued on page 68)

GET TV GOING

Senators Tell FCC

AN AROUSED Senate Interstate and Foreign Commerce Committee last week urged FCC to speed its processing of TV station applications, a procedure slated to begin July 1.



The commerce group did this by action on two fronts:

(1) It formally called on the Senate Appropriations Committee to recommend a $600,000-plus increase in the FCC budget to be used specifically for the hiring of additional hearing teams. This figure may be raised to $700,000-plus, it was reported at the week's end.

(2) In effect asked Vice Chairman Rosel H. Hyde of FCC to act as an emissary to the Commission conveying the Senate committee's desire for swift processing.

Setting for these demands was the committee's hearing room where Comr. Hyde was questioned last Wednesday on his nomination for re-appointment to the Commission [B•T, May 12].

Shortly after the brief questioning ended, the committee unanimously approved President Truman's re-appointment of Comr. Hyde. He was confirmed by the Senate late Thursday.

Sen. Johnson (D-Col.) greets Comr. Hyde (c) as hearing on the Commissioner's re-appointment to the FCC gets underway. Sen. Capehart (R-Ind.) seconds greeting. Johnson Committee later approved the nomination.

Discussion on the TV application load was set off by the commerce committee's Chairman Ed C. Johnson (D-Col.). He asked how rapidly the Commission could expect to handle applications.

"You have a log jam," Sen. Johnson noted, "What do you expect to do about it?"

Comr. Hyde painted this picture:

(1) FCC expects to first make TV grants to the "larger cities" in areas where there is currently no television service.

(2) However, all applicants will be given equal opportunity since the cut-off date of July 1 assures a "period of protection for filing."

(3) FCC hopes to be able to appoint additional examiners for processing.

"Our greatest difficulty," Comr. Hyde said, will be in expediting those cases in which there are conflicts of interest. In time, he said, by working from the larger cities where conflicts are great to the "smaller markets" where "there are fewer conflicts of interest," FCC hopes to process applications at a faster pace.

He said the Commission expects a contest for each channel in every large market—that is, where there

NCAA BACKFIRE?

Researchers Catch Fumbles

NATIONAL Collegiate Athletic Assn. fumbled its football research project, designed to back up the monopoly blackout television policy enforced last fall, judging by the observations of two leading research specialists.

Published a week ago [B•T, May 12] by NCAA, the research study drew quick comments from Richard M. Allerton, NARTB research director, and Lt. Jerry Jordan, independent researcher who has made extensive studies of TV's relation to sports.

Said Mr. Allerton: "There is nothing in the NCAA report that definitely proves TV has a negative effect on attendance at college football games."

And Lt. Jordan—"The real facts in the NCAA research do not support the claim that television hurts college football attendance badly."

Having found that NCAA's stacks of tables fail to prove the point on which NCAA bases its football monopoly policy, Lt. Jordan caught NCAA in a bit of publicity legerdemain, to wit:

"The most important fact proved by the NCAA survey was omitted from the publicity release. This was the admission, in the research report, that colleges in TV areas 'reported only a moderate loss of 4% from their 1950 levels, compared to a more serious 10% decline for colleges with no TV competition.' "

Mr. Allerton dug up a statistical blunder that was declared to throw the whole National Opinion Research Center survey under a cloud of suspicion.

● NCAA's official report carries a table (18) which claims that 34% of TV owners are in the "lower economic level," with 9% of non-owners in that level.

● Then NCAA accompanies the table with this completely contradictory statement, "Nationwide, only 9% of the TV owners are found in the lowest economic level, compared with 34% of the non-owners."

Most studies show that TV owners are more numerous among the lower and middle income classes, Mr. Allerton pointed out in noting the NORC claims that TV owners are largely in upper and middle groups.

That's not the only major blunder, according to Mr. Allerton.

Table 19 on TV ownership by interest in college football, divides the adult public into three groups, as follows (percent of TV owners in each group):

Great interest in college football, 47%
Some interest in college football, 39%
No interest in college football, 24%

By a type of mathematics whose secret was not divulged, NCAA's figures add up to 110%, a research device that left Mr. Allerton thoroughly confused.

Mr. Allerton observed that NCAA's report "is contradictory in a number of ways, perhaps by the very nature of the mixture of variable interviews, inadequate samples and types of investigations made."

In his observations, Mr. Allerton chided NCAA for failure to use base data showing average attendance at football games in pre-television and television years. Dept. of Commerce figures, he continued, show college football game receipts were $91 million in 1947; $96 million in 1948; $106 million, an all-time record, in 1949, and $103 million in 1950.

Cites Lower Enrollment

"It might be pertinent," Mr. Allerton said, "to ask why in 1950, a year of unlimited college football game telecasting, admissions declined only $3 million from the all-time peak in 1949, and in 1949 at the peak point, with considerable telecasting of college games, there was an increase over 1948 of $10 million. Actually, the decline in admission figures in 1950 could well have been accounted for by the decreased enrollment in all colleges." He added that the "normal growth factor" in college football attendance prior to the war and after it should be shown.

This statement in the NCAA report caught Mr. Allerton's eye, "Over-all attendance, both in TV and non-TV areas, was down from 1950 largely as a result of declining student enrollment and the pinch of inflation."

He asked:

"Why is it concluded in the report: That limited television in the television areas caused a relatively less decline in television areas than the decline in non-television areas? Doesn't this mean that television in 1950 so stimulated interest in college football that attendance in 1951 in television areas went contrary to the trend in non-television areas?"

The sampling methods used in the survey fail to meet professional standards, judging by this comment in Mr. Allerton's analysis:

"Nowhere does there seem t have been undertaken a samplin procedure which would be a tr cross-section of all the people, an certainly not, as set forth in th introduction, a true cross-section o those attending college footba games; for example, 'arrangement with 16 colleges to distribute ques tionnaires to the stadium audienc at a total of 37 games.' "

Mr. Allerton was completely be wildered by this observation in th report: "The personal characteris tics of television owners closely re semble those of football viewers."

"What does this mean," he asked "and how is this very general con clusion arrived at?"

As to the type of formula tha would produce usable results, Mr Allerton offered these suggestions

"To arrive at the effect of tele vision on college football attend ance, studies should be made in

(Continued on page 70)

DEMOS MEET

Map July Radio-TV Plans

MILLION and a half dollars may be spent on behalf of the Democratic ticket on radio and television time during the campaign period between the convention and election. This was reported Thursday in Chicago as members of the executive committee of the Democratic National Committee met for the first time at the international Amphitheatre to make plans for the convention starting July 21.

Committee Chairman Frank McKinney outlined plans for the convention, calling special attention at the closed-door session to the importance of television and radio. He pointed out the necessity of using television, especially, "to the utmost." In general discussion about the medium, mention was made of hall decorations and the need for delegates to be in their seats and meetings to start on time.

The appointment of J. Leonard Reinsch, managing director of the James M. Cox radio-TV properties, as committee executive in charge of television also was announced by Mr. McKinney. (See separate story).

Ken Fry, radio and television director for the committee, presented a detailed convention and campaign promotion plan for the use of broadcast media, but details were not revealed. Shows will be produced for local and network spotting by the Joseph Katz Agency, New York and Baltimore, which will handle all advertising in the campaign. Projects will include construction of shows for minority groups and for specialized groups such as women, labor and farmers.

Convention and campaign plans were discussed by some 20 members of the executive committee, headed by Chairman McKinney, which will meet two days before the convention in Chicago for a "dress rehearsal." Among those present was Mr. Reinsch, whose appointment was effective last Thursday.

Camera Assignments

Last Tuesday, representatives of broadcasting and affiliated film interests met with Republican and Democratic party men to lay plans for positioning television, newsreel and still cameras. Live TV cameras, TV newsreels and theatre newsreels will each be assigned four platform-bays on the floor of the Amphitheatre. Each will have an unobstructed view of the speaker's desk, platform and entire floor area.

The men also checked nine coaxial cables and more than 2,000 pairs of telephone and telegraph lines which are being installed permanently in the Amphitheatre and convention building. Those attending include Sig Mickelson and Tommy Thompson of CBS-TV New York; Dave Klein, NBC-TV New York; Bill Birch, NBC-TV Chicago; Ed Genock, Telenews, New York; Ted Church, CBS New York, and Gil Kingsbury, WLW Cincinnati.

REINSCH NAMED

Will Direct TV For Democratic Committee

J. LEONARD REINSCH, managing director of the James M. Cox radio and television stations, has been named by Frank McKinney, chairman of the Democratic National Committee, as executive of the committee in charge of television during the Presidential campaign [CLOSED CIRCUIT, May 12].

★

The appointment was effective May 15. Mr. Reinsch has been granted leave of absence by Gov. Cox, and James M. Cox Jr., vice president of the Cox newspaper and radio-TV organization.

Mr. Reinsch

Serving without compensation, Mr. Reinsch will report directly to Chairman McKinney and will be in full charge of all television activities.

With extensive background and experience in political affairs, Mr. Reinsch served as director of broadcast activities of the Democratic party in the 1944 Presidential campaign. He was radio consultant to President Truman after he assumed office in 1945 and has been a party adviser since the 1944 campaign.

Commenting on the appointment, Chairman McKinney said, "The committee is fortunate indeed in getting Mr. Reinsch. He directs the operations of WSB and WSB-TV in Atlanta; WHIO and WHIO-TV in Dayton, Ohio, and WIOD Miami. He is vice chairman of the NARTB Television Code Review Board and a former member of the association's board. He is currently a director of Broadcast Music Inc. and is a recognized authority in radio and television station management and operations."

Mr. Reinsch entered radio in 1924 with WLS Chicago, working in all divisions of broadcast stations except engineering. Back in 1930-31, he appeared on experimental TV programs in Chicago. He joined the Cox organization in 1934 and became managing director of the radio properties in 1942 and put WSB-TV and WHIO-TV on the air. He holds many awards for broadcast service and industry achievements.

TWO TV BIDS

Four Amendments Filed

ONLY two new TV applications were submitted to the FCC last week—they were both for VHF stations — but there were four amended applications filed.

Filing for the first time is KXA Seattle, which is 20% owned by Wesley I. Dumm, president of KSFO and KPIX (TV) San Francisco. Other stockholders include Ray V. Hamilton, of Blackburn-Hamilton radio station brokerage house; Philip G. Lasky, general manager of KSFO and KPIX (TV); Robert B. Gaylord and Robert B. Gaylord Jr., partners in the law firm of Gaylord & Gaylord, San Francisco, and stockholders in KSFO and KPIX (TV), and Lincoln Miller, general manager of KXA. Group seeks Channel 7 and plans to build a 200 kw transmitter on Newcastle Hill, ten miles east of Seattle.

The other new application was from WGTC Greenville, N. C., which is applying for Channel 9. Transmitter and studios will be in the same building about four miles from Greenville. Construction cost for the 56 kw station is estimated at about $201,000.

Amended application came from WTAD-AM-FM Quincy, Ill., affiliated with Lee Newspapers Inc., which has substantial daily newspaper holdings through the Midwest and also owns KGLO-AM-FM Mason City, Iowa, and WKTY La Crosse, Wis. It asks for Channel 10 with 316 kw.

WPTF-AM-FM Raleigh, N. C., owned by the Durham Life Insurance Co., amended its earlier bid for a channel in the tobacco country. It requests Channel 5 with 100 kw and expects to spend $523,000 on construction.

KMBC Amends Bid

Arthur B. Church's KMBC Kansas City, Mo., filed an amended application for Channel 9. Cost was given as $611,251. Mr. Church and his wife own about 72% of KMBC and its sister-station, KFRM Concordia.

The *Youngstown Vindicator*, which owns WFMJ - AM - FM Youngstown, Ohio, amended its application and asked for UHF Channel 33 with 185 kw and a 1,000 ft. antenna. The estimated cost is nearly a million dollars, with first year operating cost estimated at $131,000 more than the expected revenue.

KTSA San Antonio, Tex., owned by the *San Antonio Express* and *Evening News*, announced that it would file an amended application asking for Channel 12. Plans call for 1,000 ft. tower with 316 kw ERP.

WICC Bridgeport, Conn., reported last week that it plans to file for UHF Channel 43. It will build a 500 ft. tower north of Bridgeport and will use a 10 kw transmitter.

WHEN (TV) Syracuse, N. Y., was authorized by the FCC last week to change its transmitter location from Court Street and Oswego Blvd. to Sentinel Heights, South of Syracuse. The station will re-build its present 537 ft. tower while using a temporary tower. The re-built tower will be 930 ft. above average terrain. The station has requested a power increase of 200 kw ERP at the new site. WHEN (TV) is owned by Meredith Pub. Co., Des Moines, publisher of *Better Homes & Gardens* and recent purchaser of WOW-AM-TV Omaha and KPHO-AM-TV Phoenix. Meredith also has TV applications for Albany and Rochester.

FIRST shipment of TV equipment believed to have arrived in that city is received for WROV Roanoke, as Frank E. Koehler (l), WROV general manager, checks out RCA equipment and Gorden Phillips (r), assistant manager, "handles with care." Applicant for Channel 7 for over a year, station expects more equipment this month.

Listed by States

† **QUINCY, Ill.—Lee Bestg Co.,** Ch. 10 (192-198 mc), ERP 316 kw visual; antenna height above average terrain 890 ft., above ground 804 ft. Estimated construction cost $305,949.48, first year operating cost $171,432, revenue $200,148. Studio location 510 Maine St., Quincy. Transmitter location 4½ miles N. E. of Quincy, 39° 58′ 22″ N. Lat., 91° 19′ 54″ W. Long. Studio equipment DuMont, transmitter DuMont, antenna RCA. Legal counsel Pierson & Ball, Washington. Consulting engineer E. C. Page Consulting Engineers, Washington. Applicant is licensee of WTAD-AM-FM Quincy, 60% owned by Lee Radio Inc., which in turn is licensee of KGLO-AM-FM Mason City, Iowa. Lee Radio Inc. is owned by Lee Newspapers, which publishes *La Crosse* (Wis.) *Tribune & Leader Press*, affiliated with WKTY La Crosse. Lee Newspapers also publish *Davenport* (Iowa) *Times* and *Democrat & Leader, Ottumwa* (Iowa) *Courier, Muscatine* (Iowa) *Journal, Mason City Globe-Gazette, Madison* (Wis.) *State Journal, Hannibal* (Mo.) *Courier-Post, Kewanee* (Ill.) *Star-Courier* and *Lincoln* (Neb.) *Star*. Principals include President **Lee P. Loomis** and Vice President **Herbert R. Ohrt** (also executive vice president of KGLO-AM-FM).

† **YOUNGSTOWN, Ohio—The Vindicator Printing Co.,** UHF Ch. 33 (584-590 mc), ERP 185 kw visual; antenna height above average terrain 951 ft., above ground 1,000 ft. Estimated construction cost $971,943.81, first year operating cost $446,104.56, revenue $315,000. Studio and transmitter location Mabel Ave. between Gibson and Zedaker, 41° 04′ 46″ N. Lat., 80° 38′ 25″ W. Long. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Fisher, Wayland, Duvall & Southmayd, Washington. Consulting engineer James C. McNary, Washington. Applicant owns WFMJ-AM-FM Youngstown and publishes *Youngstown Vindicator*. Principals include: President and Treasurer **William O. Brown** (1%), vice president, director and stockholder of WFMJ-AM-FM; Vice President **William F. Maag Jr.** (18%), president and general manager WFMJ-AM-FM, and Secretary **William J. Brown** (10%), national advertising manager Vindicator Printing Co., and secretary and director WFMJ-AM-FM.

† **KANSAS CITY, Mo. — Midland Bcstg. Co.,** Ch. 9 (186-192 mc), ERP 31 kw visual; antenna height above average terrain 499 ft., above ground 507 ft. Estimated construction cost $611,251.53, first year operating cost $743,198, revenue $990,000. Studio location West 222 Eleventh St., Kansas City. Transmitter location 1330 Baltimore Ave., 39° 05′ 51″ N. Lat., 94° 35′ 04″ W. Long. Studio equipment RCA, transmitter DuMont, antenna RCA. Legal counsel Loucks, Zias, Young & Jansky, Washington. Consulting engineer Jansky & Bailey, Washington. Applicant is licensee of KMBC Kansas City and KFRM Concordia. Principals include: President and Treasurer **Arthur B. Church** (38%), director for Midland Radio & Television Schools of Georgia Inc., president and director for Mutual Interests Inc. (investment corporation); **Cicely I. Church** (34%), wife of Mr. Church, and Vice President **George J. Higgins** (3%), managing director of KMBC and KFRM.

GREENVILLE, N. C. — Carolina Bcstg. System, Ch. 9 (186-192 mc), ERP 56 kw visual; antenna height above average terrain 538 ft., above ground 537 ft. Estimated construction cost $200,966, first year operating cost $100,000, revenue $150,000. Transmitter and studio location on North Side of U. S. Highway #264, about four miles S.W. of Greenville City Limits, 35° 34′ 17″ N. Lat., 77° 26′ 41″ W. Long. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Phillip Bergson, Washington. Consulting engineer Commercial Radio Equipment Co. Applicant is licensee of WGTC Greenville. Principals include: President **Earl McD. Westbrook** (24%), 12% owner of WCKB Dunn, N. C., and Chevrolet dealer; Vice President **John H. Adams** (6%), owner Adams Radio Repair Shop; Secretary **A. Hartwell Campbell** (7%), 12% owner of WCKB and 49% owner of A.A.A. Tower Co.; Treasurer **Mrs. Virginia J. Adams** (6%), interest in Chevrolet dealership; Director **Mrs. Mary E. Jones** (10%), farming interests; Director **Fred Jones** (6%), no other interests, and three other minority stockholders.

† **RALEIGH, N. C.—WPTF Radio Co.,** Ch. 5 (76-82 mc), ERP 100 kw visual; antenna height above average terrain 625 ft., above ground 537 ft. Estimated construction cost $523,000, first year operating cost $415,000, revenue $480,000. Studio location Insurance Bldg., Raleigh. Transmitter location ½ mile East of Cary, N. C., on U. S. Routes 1 and 70, 35° 47′ 38″ N. Lat., 78° 45′ 41″ W. Long. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Loucks, Zias, Young & Jansky, Washington. Consulting engineer James C. McNary, Washington. Applicant is licensee of WPTF-AM-FM Raleigh. Principals include: President **S. B. Coley** (0.2%), president and director for Durham Life Insurance Co. and president of WPTF-AM-FM; Vice President **E. T. Burr** (0.2%), vice president Durham Life Insurance Co. and WPTF-AM-FM; Vice President **R. H. Mason** (0.2%), vice president and general manager of WPTF-AM-FM; Secretary-Treasurer **D. L. Cozart** (0.2%), secretary and director for Durham Life Insurance Co. and WPTF-AM-FM, and Director **Graham B. Poyner,** program director for WPTF-AM-FM. Durham Life Insurance Co. holds 99% of stock of WPTF Radio Co.

SEATTLE, Wash.—KXA Inc., Ch. 7 (174-180 mc), ERP 200 kw visual; antenna height above average terrain 1,422 ft., above ground 300 ft. Estimated construction cost $340,678.33, first year operating cost $510,000, revenue $590,000. Studio location 320 Third Ave. West, Seattle. Transmitter location Newcastle Hill, 10 miles East of Seattle, 47° 32′ 38″ N. Lat., 122° 06′ 24″ W. Long. Studio equipment RCA, transmitter RCA, antenna RCA. Legal counsel Fly, Shuebruk & Blume, Washington. Consulting engineer A. E. Towne, Universal Research Labs.,

(Continued on page 70)

CRAVEN APPROVES

Gives Support To TV Plan

FIRST support for the FCC's TV allocations plan [B•T, April 14]—tempered somewhat by an expression of doubt regarding its economic bases—came last week from former FCC Commissioner T. A. M. Craven, now a Washington consulting engineer (Craven, Lohnes & Culver).

At the same time, the first concrete statement that the allocation plan would be taken to court was made by Paul M. Segal of the Washington law firm of Segal, Smith & Hennessey.

Mr. Segal said that WWSW Pittsburgh would appeal that city's assignments in an action to be filed before June 12 in the U. S. Court of Appeals in Philadelphia [B•T, April 28, 21].

Further opposition comments are expected from FCC Comr. Robert F. Jones when he addresses the Pittsburgh Advertising Club May 20, and a luncheon meeting of the Federal Communications Bar Assn. in Washington May 22.

Comr. Jones dissented in toto, and vigorously, from the Commission's Sixth Report and Order. He repeated his opposition to the final TV allocation plan in a slashing attack on the differences between VHF and UHF coverage as provided by the report before the Ohio Assn. of Broadcasters meeting in Columbus early this month [B•T, May 5].

Mr. Craven said, in a speech prepared for delivery to the Institute of Radio Engineers' Southwestern conference in Houston, Tex., Saturday, that the FCC approach in the allocations plan "makes sense, provided the policy objectives are practical and provided there is not too much inflexibility in making necessary changes in detail."

He termed Comr. Jones' approach flexible and containing "engineering common sense."

Basis of his talk was the unknown factors in UHF propagation which as in most allocation problems, he pointed out, makes engineers wish "that we could have had foresight equal to our hindsight."

". . . . I do not intend to imply that the Commission's plan of allocation is unsound from an engineering standpoint, assuming, of course, that their basic policy is correct. On the contrary, it represents, and has taken into consideration, the best engineering knowledge available today. At least it is a plan which we can use in an orderly fashion to commence operating television stations throughout the country."

The Commission's plan, however, "does not parallel the economics of the television broadcasting business," Mr. Craven admonished. "There is a dearth of frequencies in some markets which could support more stations than are provided for by the Commission, and an abundance of channels in markets which possibly might not support even one television station.

"Any inflexible plan of allocation of a limited number of television channels which affords an abundance of facilities to poor markets will prevent the establishment of the necessary number of stations in the better markets.

"Therefore, it is possible that, as experience is gained in the future, the Commission will recognize economic laws and, in so doing, they may resort to a reallocation, as was found necessary in Standard Broadcasting. Likewise, they may abandon their rigid rules, based solely on mileage separation, and employ more precise engineering methods of determining service interference."

In reference to the oft-expressed hope that all TV be assigned in a continuous VHF band, Mr. Craven pointed out that if TV was allocated in the 54-402 mc band, it would result in only 58 channels—not sufficient for a nationwide service. Therefore, he said, UHF must be made to work.

"I can assure you that a UHF television channel will be an extremely valuable franchise in any good market," he added.

What caused him pause, he explained, was the FCC's lack of consideration of sporadic E and F$_2$ layer reflections. He called it "amazing," predicted trouble when there are many stations operating co-channel with high powers.

Mr. Craven's speech was the third public analysis on the TV final report by a member of the radio-TV industry. In addition to Comr. Jones' Ohio talk, attorney Arthur W. Scharfeld, president of the FCBA, enumerated some of the possible causes for court actions in a talk before the Georgia Radio-TV Institute at Athens, Ga., two weeks ago [B•T, May 12].

Cites Minute Difference

Essence of WWSW's court appeal will be, it is understood, the minute separation differential on Channel 4 between the Commission's 170 mile minimum and the actual 169.39 miles between Pittsburgh and the transmitter of WLWC Columbus. It will accuse the Commission of "arbitrary and capricious" action in failing to assign this additional VHF channel because it would be 3,000 feet below the minimum.

It will also claim that the Commission avoided its responsibilities under the public interest and fair and equitable distribution of facilities clauses of the Communications Act in maintaining so rigidly the separation formula.

Meanwhile, WHIS Bluefield, W. Va., asked the Commission to put all of that state in Zone I—rather than dividing it between Zone I and II [CLOSED CIRCUIT, May 5]. If that is done, VHF Channel 4 could be substituted for Channel 6 in Beckley and Channel 6 could be reassigned to Bluefield, the station said.

WHIS asked that the Commission's prohibition against any changes in the allocations plan for one year be waived in this instance.

ZIV SHOWS

Business Increases Require Expansion of Operations

AN INCREASE in business has prompted realignments and expansion of operations for Ziv Television Programs, major film production-distribution firm, M. J. Rifkin, vice president in charge of sales, said last week in announcing six additions to his staff and expansion of a seventh post.

★

Albert Goustin, formerly with the Blair representation organization, has joined Ziv as Mr. Rifkin's assistant in the eastern division, while the duties of Michael M. Sillerman, eastern sales manager, have been increased to include the charge of sales for New York City.

Other additions to the sales staff are Charles Britt, named an account executive in the Memphis division; James Bonfils, formerly with KSD-TV St. Louis, appointed account executive in the Cleveland division; Leon Bernard, to assume the comparable position for upstate New York; Martin Katz, formerly with WOR-TV New York, assigned New York account executive and Vincent Van Buren, Bothwell Advertising Agency, named to specialize in television drug cooperative programs.

A package that new staff members will have a chance to handle, Mr. Rifkin said, is the latest series of *Fireside Theatre* programs, to be distributed locally by Ziv as *Your TV Theatre.*

Reviewing recent sales successes of Ziv TV properties, which include *The Cisco Kid, Boston Blackie, Story Theatre, Yesteday's Newsreel, Sports Album* and *Living Book,* Mr. Rifkin recalled that his company's *The Unexpected* was the first AM or TV program ever to be sponsored by the Liebmann Brewing Co., producers of Rheingold beer and reputedly the largest advertiser in the New York market.

The program was introduced in a midweek, late-evening time spot as a direct bid for the large audience viewing simultaneous coverage of fights on an opposing network. Previous occupant of the same time slot had drawn less than a 3.0 rating, he recalled. The first program of *The Unexpected* drew what, for others, was an unexpected 10.0 rating, Mr. Rifkin explained four weeks later the drama was topping the fights 17 to 14 and beating out by four points another popular drama series.

Narrated by film actor Herbert Marshall, *The Unexpected* produced equally good results in other markets, the Ziv sales manager continued, drawing a 55.0 rating on KING-TV Seattle where it competed with other highly rated programs and a 27.0 on KRON-TV San Francisco, a multi-station market.

Similar results have been demonstrated by other Ziv film packages, Mr. Rifkin said. *Boston Blackie,* produced only for television with Kent Taylor assigned to the leading role, averages a 32.1 rating in 20 markets, only six of which are single-station, he noted.

Coupling familiar Hollywood names with stories based on well-known works of fiction has proved as a successful element in the formula which has helped build Ziv successfully. An example is *The Cisco Kid,* which stars Duncan Renaldo in the title role with Leo Carillo as Pancho and other Hollywood actors filling supporting roles.

Story Theatre is another series utilizing such movie names as Jeanne Cagney, Eva Gabor, John Beal, Hurd Hatfield and Robert Alda in stories that have included Guy de Maupassant's *Diamond Necklace,* Henry James' *The Real Thing,* Mark Twain's *Celebrated Jumping Frog* and Charles Dickens' *Cricket on the Hearth,* it was noted.

Hollywood players also are featured in *The Living Book,* a pictorial history of the Bible which has been praised by church leaders throughout the country.

Yesterday's Newsreel, narrated by top network voices, is a review of men and events in the first half of this century, and *Television Sports Album* is a five-minute film program with Bill Slater as narrator, reviewing sports highlights.

WCBS-TV RATES

Increases Announced

A BOOST in the station rates of CBS-owned WCBS-TV New York, with the Class A hourly rate going from $3,750 to $4,000 and Class A announcements rising from $775 to $800, is being announced today (Monday) by General Sales Manager George R. Dunham.

Effective with the increase on June 1, a new volume discount of 45% also will be applicable, after other earned discounts, on schedules of 12 or more daytime announcements per week. This new discount is designed to encourage the use of greater frequency by daytime advertisers.

The new rate card, No. 11, will introduce a new time classification—Class D—covering broadcast periods before 10 a.m. and after midnight. Base hourly rate on Class D time will be $750.

Mr. Dunham said the new rates represent an increase of 6.7% for Class A time and 3.1% for Class A announcements, whereas set circulation in the New York area will have gone up 22.2% by June 1.

WHAS-TV
covers the Derby for CBS...

and the nation Applauds!

New York Times
"the camera coverage was excellent and the set owner had a fine view of the entire event as well as the finish."

Variety
"in some respects . . better than . . afforded to in-person patrons. Technical details were handled locally by the WHAS-TV crew headed by Orrin Towner. Sandy Sanders, WHAS-TV camera director, used good judgment in making the camera switches."

Broadcasting-Telecasting
"Racing fans and those attracted by the glamor of the historical event were given 45 fascinating minutes of viewing, climaxed by the two-minute race."

Salt Lake City Tribune
"It came through better than I was able to see from the infield in the 1946 race."

New York Journal-American
"a TV show as lovely as the sunny day delivered to Wm. Corum."

New York Daily News
"the cameras were expertly handled and seeing the event was so superior to hearing about it, that there simply could be no comparison."

Racing Form*
"This was the first TV Derby and it couldn't have been better. This was racing at its best. This was television at its best."

* from those who know racing best

The same know-how makes WHAS-TV local shows tops in 7 out of 8 categories. *(PULSE)*

ABC-UPT

Merger Hearing Seen Running Two or Three More Weeks

FAR from being in the home stretch, the ABC-United Paramount Theatres merger hearing appears to have 2-3 weeks to run as the FCC counsel announced last week that it wants to examine ten more witnesses.

The week before, FCC attorneys said they planned to call six theatre operators to testify [B•T, May 12]. Last week they added four more names to their list: Ralph Goldberg, Dave Edwards, Donald B. Leverette and Edwin Silverman.

According to the proposed schedule, the ten Commission witnesses would be on the stand through the last of May. And still to return for more examination are Dr. Allen B. DuMont, president, Allen B. DuMont Labs, and Barney Balaban, president, Paramount Pictures Inc.

The augmented list of FCC witnesses caused anguished reactions from attorneys representing Paramount Pictures and United Paramount Theatres, who were hoping that last week would see the end of the four-month hearing.

After a lengthy off-the-record discussion, FCC Hearing Examiner Leo Resnick suggested that FCC counsel and attorneys for UPT get together in "their leisure hours" to reduce the length of the list.

But, big as it was, FCC attorneys indicated that their array of witnesses was not as large as it might have been. Many of the individuals they wanted to interrogate are either dead or too infirm to testify, they reported.

On the stand last week were A. H. Blank, a UPT director who was questioned for three days about theatre practices and acquisitions during the 1930's, and Arthur Levey, president of Skiatron Corp. (formerly Scophony Corp. of America), who returned for his second week of testimony.

Mr. Levey revealed that in 1944 Waddill Catchings, a director of Warner Brothers, had become interested in the Scophony system of television and the firm's other developments. Mr. Catchings—who was said to have been responsible for Warner Brothers' pioneering in sound motion pictures 25 years ago—was said to have had contacts with several motion picture companies which he thought might be brought into the situation.

However, Mr. Levey said, the plan was never carried out because SCA Class "B" stockholders (Paramount Pictures and General Precision Equipment Corp.) put too many hindrances in the way.

Mr. Levey reported that his plan for the new Scophony envisioned such stockholders as Metro-Goldwyn-Mayer, Warner Brothers, Paramount, 20th Century-Fox, RKO, and possibly United Artists, Columbia and Republic Pictures. The contemplated firm would have been controlled by a board of directors including a representative from each of the motion picture companies.

According to Mr. Levey, the participation in Scophony by the motion picture producers would have developed television to a high degree, while at the same time giving the film companies a chance to see what TV might hold for them.

Mr. Blank, a midwest theatre man, was examined by Benito Gaguine, legal assistant to FCC Comr. Rosel H. Hyde.

Profitable Film Booking

One of the highlights of Mr. Blank's examination concerned a contract with a Sioux City theatre owner which gave Mr. Blank 40% of the profits of the theatre for booking its motion picture films. But only the owner had to stand the losses if the theatre failed to make money.

Another question Mr. Gaguine raised was how Mr. Blank happened to be appointed trustee in bankruptcy for his own chain of theatres after it had been sold to Paramount.

Mr. Gaguine evoked much of the past history of Tri-States Theatre Co. and Central States Theatre Co., apparently looking for evidence of restraint of trade or monopoly of theatre ownership in various cities.

KING-TV, AT&T

Live Network in July

KING-TV Seattle has been promised "live" network coverage of the national political conventions in Chicago this July, it was announced Thursday by Otto P. Brandt, vice president and general manager, King Broadcasting Co., station licensee.

Mr. Brandt praised quick action by AT&T in approving KING-TV's request for the service. AT&T, he said, has confirmed plans by July 6 to complete microwave interconnection to Seattle from Portland, Ore., where cable has been laid from San Francisco.

The Republican convention begins July 7 with the Democratic conclave set July 21. KING-TV announced it will couple the connection arrival with a promotion campaign. It plans to set up 300-400 sets at the Portland (Ore.) Municipal Auditorium for closed circuit showing to the public.

KING-TV's coverage will be fed by CBS Television with Westinghouse the sponsor, Mr. Brandt said. As of May 1, he noted, the count of telesets in the area (Pacific Northwest including Puget Sound) was 144,200.

It also was noted that originally AT&T had marked its target date for Seattle microwave interconnection by 1953.

ALEXANDER QUITS

Joins RHC-Cadena Azul

CLARENCE G. ALEXANDER, operations director of the DuMont TV Network, joins the new U. S.-Cuban ownership of the RHC-Cadena Azul radio-TV network in Cuba on June 1 as network manager of operations.

Mr. Alexander

He thus becomes the second U. S. broadcaster to take a key operating post in the Cuban network, which CBS Radio's News and Public Affairs Director Edmund A. Chester joined as general manager and part owner when the new ownership took over from the Amando Trinidad interests in a million-dollar cash transaction in April [B•T, April 14].

Mr. Alexander's resignation from DuMont to join the Cuban operation was announced by Chris J. Witting, DuMont director and general manager.

One of the pioneers of television, Mr. Alexander has been associated with DuMont for approximately two years. He moved to that network from Kenyon & Eckhardt in 1950, serving as administrative assistant to Mr. Witting before advancing to network operations director.

Mr. Alexander assisted Thomas E. Hutchinson, then manager of NBC-TV, in setting up the NBC television organization in 1936, and held several administrative posts at NBC-TV before he was called into the Air Force in World War II.

'INTERIM' TV

Asked During Conventions

REQUEST to bring TV to non-TV Chattanooga during the political conventions was made to the FCC last week by WAPO there, video applicant.

In a letter to the Commission, WAPO explained it had all its TV equipment on hand and had permission from WSB-TV Atlanta to pick up and rebroadcast its convention telecasts. It said it could put out a 5 kw effective radiated power signal on Channel 3 from a single-bay antenna to be installed atop the 100-ft. tower of its defunct FM station situated on the top of Signal Mt., outside Chattanooga.

There are more than 10,000 TV sets in the Chattanooga area, WAPO said. None of them get good primary signals, it pointed out. Since Chattanooga is the home of Sen. Estes Kefauver (D-Tenn.), one of the leading Democratic candidates for the Presidential nomination, interest is at "fever heat," the station said.

If the Commission gave permission to go on the air, WAPO said it would telecast only the proceedings of both conventions. The transmissions would be on a non-commercial basis, it pointed out.

The Republican convention is scheduled to begin July 7; the Democratic, July 21. Both will be in Chicago.

STILES RESIGNS

Joins Oregon Television Inc.

WALTER STILES Jr., who resigned last week from the engineering department of ABC-TV Western Div., Los Angeles, has joined Oregon Television Inc. as general manager. Oregon Television is expected to apply in the near future for a TV channel at Portland, Ore., and for other northwest cities.

Mr. Stiles

Before joining ABC-TV in Los Angeles in 1950, Mr. Stiles supervised construction of KPHO-TV Phoenix, Ariz., and the change of KPHO from 250 w to 5 kw. KPHO-AM-TV was sold recently to the Meredith Pub. Co. for $1.5 million [B•T, May 5].

In 1935, Mr. Stiles joined CBS in New York as an engineer, moving in 1942 to become chief engineer of that network's owned and operated WEEI Boston. In 1946 he opened an engineering consulting office in Boston and the following year in Washington, under the name of Stiles & Waring. Mr. Stiles was the first winner of the William S. Paley Award for technical achievement in 1935.

Principals Involved

Oregon Television is owned by Portland businessmen Jack Meier, Huntington Malarkey and Henry White. Mr. Meier, the son of a former Oregon governor, is a member of the family that owns the Meier-Frank department store in Portland. Mr. Malarkey has lumber interests in the Northwest. Mr. White is a shipbuilder.

They plan to spend $400,000 in building the Portland TV station and estimate $255,000 as cost for the first year of operation. Equipment has already been purchased, it is understood, and a closed circuit operation is planned for the near future.

KECA-TV Sales Up

MORE than $500,000 in new local business was signed by KECA-TV Los Angeles during the week ending May 9, according to Phil Hoffman, manager, and Frank King, sales manager. April and May of this year are the largest two months' billings on the station since its start in September 1949, they said.

KNXT (TV) Business

SETTING a new high, KNXT (TV) Hollywood made $200,000 in new program sales for the week ending May 9, including eight quarter-hours totaling $150,000 in business, plus one renewal and two sales of segments of *KNXT 10 O'Clock News*, according to Wilbur Edwards, general manager.

FOR STATION ACHIEVEMENT
IN SAN FRANCISCO

AWARD TO KRON-TV

By Academy of Television Arts and Sciences,
San Francisco Chapter, for year 1951

HERE IS further proof that among the three San Francisco TV stations, KRON-TV has established—and maintains—clear-cut leadership. Evidence of this leadership grows month after month because . . .

- **With the market's highest TV antenna, KRON-TV provides unparalleled "Clear Sweep" coverage**
- **KRON-TV presents the largest number of top-rated shows — more than the other two stations combined *(Pulse and Tele-Que)***
- **KRON-TV attracts the most viewers in every audience segment—men, women, teenagers, children *(Tele-Que—Pulse does not measure)***
- **KRON-TV serves the largest number of advertisers *(Rorabaugh)***
- **KRON-TV offers the greatest percentage of audience . . . both day and night, and throughout the week *(Tele-Que)***

TV CODE

NARTB Names Bronson To Direct Liaison

NARTB'S television code enforcement machinery was completed last week with appointment of Edward H. Bronson, station director of WBNS-TV Columbus, as director of Television Code affairs. The appointment came as organized civic and religious groups began to contact NARTB on code enforcement problems.

Harold E. Fellows, NARTB president, said Mr. Bronson will serve primarily as liaison executive on code matters with the general public and interested organizations. He will report directly to Thad H. Brown Jr., NARTB director of television.

Mr. Bronson

No successor had been named for Mr. Bronson at WBNS-TV as of last Thursday. Richard Borel, general manager of the station, will assume active direction of WBNS-TV on a temporary basis.

The job of directing Television Code Affairs was authorized by the NARTB board at its February meeting. Details of the post were drawn up by the Television Code Review Board in March.

Mr. Bronson's attention will be devoted to problems of code interpretation, processing of complaints, correspondence, relations with the public and contacts with legislative and civic groups concerned with code matters as well as with stations subscribing to the code.

Now near the end of its third operating month, the TV Code is drawing a steadily rising amount of attention from viewers and organizations. The job of processing this work has been handled by Mr. Brown's staff in cooperation with the Legal Dept. The Code Review Board is an industry advisory group directly assigned to code matters, and it in turn can recommend punitive action to the NARTB Television Board.

Signs of growing interest in the TV Code begin to appear as the review board's next meeting approaches. The board will meet June 5-6 in Washington, just prior to the June 9-10 meeting of the full TV Board of Directors.

Already, the code has drawn the wrath of the National Assn. of Evangelicals. This group will appear before the review board to claim "the same right to purchase time on television and radio as any other interests in America." Dr. Theodore Elsner was recently elected president of National Religious Broadcasters, serving a third term.

Dr. Elsner is chairman of the radio commission, National Assn. of Evangelicals, and will represent NAE before the NARTB code review group. NAE is on record with a resolution calling for elimination of paragraph 1 (g) in the NARTB TV Code's section on "Presentation of Advertising."

The code paragraph reads: "A charge for television time to churches and religious bodies is not recommended."

NAE describes itself as "the strongest body of believers in the nation, as confirmed by the number of denominations and churches affiliated and delegates in attendance at their annual conventions," according to Emma B. Veacock, of NAE's eastern division.

Mr. Bronson is expected to assume his new NARTB duties June 1. He has an extensive radio industry record, starting his career at WCOL Columbus in 1936. Serving as continuity director and then assistant manager, he moved to the Office of Censorship with outbreak of World War II. There he served as an assistant to J. Harold Ryan, of Storer Broadcasting Co., and later as assistant to John E. Fetzer, who succeeded Mr. Ryan as assistant director of censorship for broadcasting.

After the war Mr. Bronson joined WJEF Grand Rapids, Mich., as station manager, in association with the station's owner, Mr. Fetzer, now chairman of the NARTB code review body. In 1949 Mr. Bronson returned to Columbus to aid in putting the new WBNS-TV on the air serving as station director. He is married and is father of two children; member of Sigma Delta Chi, and member of SDX's Central Ohio Professional Chapter board.

Howard H. Bell, formerly of WMAL-TV Washington, who joined the NARTB TV organized last autumn, serves as executive assistant to the television director.

WTTG(TV) POSTS

Edwards Named Sales Mgr.

PROMOTION of Neal J. Edwards, account executive at WTTG (TV) Washington, to sales manager of the DuMont O & O Washington outlet, was announced last Wednesday by Walter Compton, WTTG general manager. The appointment is one of three involving realignment of the station's sales department.

Gordon Williamson, WTTG producer-director for four years, also was named to the sales department, along with Alex W. Sheftell, for the past year in charge of WTTG public relations and publicity. All appointments are effective immediately.

Mr. Edwards, a cameraman at the DuMont station for several years, had previous sales experience in other fields. He was elevated to the sales department as account executive in October 1950. Mr. Williamson was active in sales and programming at other D. C.-Maryland stations before joining WTTG. Mr. Sheftell previously was in the station's traffic department before assuming publicity chores.

BALABAN IS HONORED

Dr. Wilson Compton Cites

DR. WILSON COMPTON, International Information Administrator for the Voice of America, joined with civic and religious leaders last week to pay tribute to Barney Balaban, president of Paramount Pictures Inc.

Dr. Compton addressed a luncheon session of the Washington Area Clergymen, held last Monday at the Shoreham Hotel in Washington, D. C. Mr. Balaban was praised for his interest in general welfare and his contribution of an historic document to the New York Avenue Presbyterian Church.

MATERIALS' BAN

NPA Mulls Easing of M 90

COMPROMISE regulation designed to ease restrictions on production of color television equipment was still under consideration by the National Production Authority last week.

The proposed revised order (M 90) did not come before the agency's Clearance Committee, meeting in executive session last Friday. Authorities held out hope, however, it would be issued by this month's end.

The present plan is to relax the prohibition against manufacture of colorcasting receivers and adapter-converter equipment in certain instances. Department stores, experimenting with closed circuit theatre telecasting and theatre video interests, as well as electronic manufacturers who show just cause for authorization to use existing materials, would stand to benefit.

NPA has made plain that, regardless of degree of relief, shortage of technical skills will necessitate retaining the lid on mass production of colorcasting sets [B•T, May 12].

NPA Administrator Henry Fowler re-emphasized this factor anew last Thursday. Addressing the Construction Mobilization Committee of the U. S. Chamber of Commerce, Mr. Fowler stated the shortage of engineers "could well become a serious impediment to defense" in the event of all-out mobilization. He urged coordination of technical skills among all industrialists.

Mr. Fowler also told the Senate Banking Committee there is little hope of decontrolling steel before spring 1953—a statement of paramount interest to existing and potential TV broadcasters. He also threw cold water on any prospect of overall decontrol this year. Mr. Fowler appeared before the committee on behalf of his nomination as Defense Production Administrator (to succeed Manly Fleischmann, resigned), which was unanimously approved.

BMI CLINICS

TV Sessions Begin Today

FIRST of three two-day television clinics scheduled by BMI opens today in New York, on the heels of BMI's completion of 42 radio program clinics in the U. S. and Canada within a two-week period.

Subjects to be considered include low-cost local TV programming, reduction of production costs; handling of local programs and special events; film buying; selling; programming; public service, educational, religious, agricultural and political coverage; camera techniques; short-cuts; low-cost music programs, and music clearance and legal problems.

Speakers for the clinics are scheduled to include Robert Swezey, WDSU-TV New Orleans; Chris Witting, DuMont Network; Chuck Holden, ABC-TV; Paul Adanti, WHEN (TV) Syracuse; Ralph Burgin WNBW (TV) Washington; Joel Chaseman, WAAM (TV) Baltimore; Don Fedderson, KLAC-TV Los Angeles; Klaus Landsberg, KTLA (TV) Los Angeles; George Moscovics and Bill Edwards, KNXT (TV) Los Angeles; Robert Purcell and Richard Moore, KTTV (TV) Los Angeles; Philip Lasky, KPIX (TV) San Francisco; Donn Tatum, KECA-TV Los Angeles; Walter Preston, WBKB (TV) Chicago; Bruce Wallace, WTMJ-TV Milwaukee; Theodore Streibert, WOR-TV New York; Walter Emerson, WENR-TV Chicago; Don Norman, KNBH (TV) Los Angeles; Ward Ingrim, KHJ-TV Los Angeles; Jules Herbuveaux, WNBQ (TV) Chicago; Frank Fogarty, WOW-TV Omaha; Ted Cott, WNBT (TV) New York, and Roger Clipp, WEIL-TV Philadelphia.

Second of the three TV clinics will be held Thursday and Friday at the Palmer House in Chicago, and the third will be next Monday and Tuesday at the Beverly-Wilshire in Hollywood.

DUROCHER SERIES

Stations Buy UTP Program

TWO more television stations contracted last week for United Television Programs' film series, *Double Play with Durocher and Day*, according to Aaron Beckwith, UTP sales director, who said the package had been sold to KFMB-TV San Diego and WDTV (TV) Pittsburgh.

The program, which Mr. Beckwith said has received added impetus from the start of the baseball season, features Leo Durocher, manager of the New York Giants, and his actress wife, Laraine Day, in a series of informal interviews with persons prominent in sports.

Other sales completed last week by the TV film distributor include *The Chimps*, produced by Bing Crosby Enterprises, to WMAL-TV Washington; *Hollywood Off-Beat*, which was purchased by the Graybar Electric Co. for WJIM-TV Lansing, Mich. Reliance Foods, through its agency, Pacific National, signed for 26 weeks of *Big Town*, to start on KING-TV Seattle Wednesday.

This Is Hollywood Playhouse!

A steady habit . . .

of steady buyers!

When Hollywood Playhouse hits the screen at 2 o'clock TV tune-ins *really* jump. Here is a show that literally captures audiences . . . it's become an afternoon habit with thousands of TV fans. Ford Foundation

(Continued from page 59)

dress itself, if, of course, the commission had materialized, was the discovery of means to force FCC adoption of subscription television.

It may be speculated he would be no less interested in seeing such a project undertaken by a private commission organized by the foundation.

Although it would be extreme to say Sen. Benton exerts control over any activity of the Ford Foundation, his past associations and personal friendships with several of the foundation's officers would indicate he must have at least some influence.

In addition to Mr. Fletcher, his former employe, Sen. Benton has more than passing acquaintance with Paul G. Hoffman, foundation president now devoting his time to the Eisenhower campaign, and with Robert Hutchins and Chester Davis, foundation associate directors.

Mr. Hoffman is a director of Encyclopaedia Brittanica Inc., which is Sen. Benton's property, and was chairman of the board of trustees of the Committee for Economic Development at the time Sen. Benton was vice chairman.

Dr. Hutchins was president of the U. of Chicago when Sen. Benton was vice president (1937-45) and was chancellor of that university when Sen. Benton was assistant to the chancellor (1945-46).

Mr. Davis, former president of the Federal Reserve Bank of St. Louis, was a member of the board of trustees of the Committee for Economic Development when Sen. Benton was vice chairman of the board of trustees.

At the Pasadena headquarters of the Ford Foundation last week a spokesman admitted the organization, which he characterized as "extremely interested in the field of radio and television," was considering two basic problems: the allocation of television channels for educational use and the general future of radio-TV programming.

He emphasized that no plans had been made and that it was unlikely any would be until the July meeting of the board of trustees.

In the past year, the foundation and its subsidiaries have made grants to radio and television activities totalling about $2 million. The biggest sum, $1.2 million, went to the Television-Radio Workshop which is producing programs for broadcast over commercial facilities. A fortnight ago the Joint Committee on Educational Television, central agitating body for educational TV, announced a new Ford grant of $145,000, or $55,000 more than it received from the foundation the year before. Additional grants of $260,000 and $300,000, respectively, have gone to Iowa State U., owner of WOI-TV Ames, Ia., for experimental TV programming and to Lowell Institute, Boston, for production of educational radio programs in cooperation with the National Assn. of Educational Broadcasters.

"LULU" award for best television commercial spot campaign is presented in the sixth annual Frances Holmes Award Competition. L to r: Film star Barbara Stanwyck, awarding statuette; Gunther Shirley, vice president, Metropolitan Federal Savings; Doria Balli, president, TV Ads, and Kirke Beard, account executive, Anderson-McConnell Adv. The Los Angeles firms, Metropolitan and TV Ads, which produces TV film commercials, shared in the honors. Anderson agency services the account.

Get TV Going

(Continued from page 59)

is "a large concentration of population."

Committee Chairman Johnson said it is his understanding that only five hearing teams (examiner, engineer, attorney, secretary, clerks) will be available to process applications in television and at the current pace of processing it would take a "long time" for them to wade through the present allocations. He said he was disappointed that FCC "has not made this clear to Congress."

Sen. Homer E. Capehart (R-Ind.) asked whether newspaper applicants would be given equal opportunity to obtain TV stations.

'No Discrimination'

Comr. Hyde asserted there would be no discrimination against "any business activity."

No one applicant, regardless of business interest, he said, should be precluded from the granting of a license in the public interest because of his legitimate business interest. Neither does FCC intend to discriminate against AM station licensees, he said.

However, the Commissioner said he could not discuss the AM licensee situation at length because AM station applicants may be contested in hearing by other interests and the "other party may invoke the argument of diversification" of media in the community. But, he noted, the factors of experience, objectivity in operation and recognition of public interest, may weight the presentation of many AM station licensees who seek TV licenses.

In answer to a query by Sen. Lyndon B. Johnson (D-Tex.), who pointed to a complaint from a constituent on the one-year wait before asking for local revision of the final FCC allocations report, Comr. Hyde said it would be desirable if administration changes could be made in the report but that the Commission does not want to re-litigate the issue.

If FCC did not have to hear applicants on the grant of each channel, it would have tried to improve its allocation report, Comr. Hyde explained. However, he said, FCC has announced it would not be able to consider local changes until one year has passed—otherwise, it would have "to re-open the allocations proceeding." This, he said, is a "reasonable regulation."

The Texan cited the case in his state where the constituent is located in a "rather small city" which is 183 miles from a larger city which has been assigned two VHF stations. At this time, Sen. Lyndon Johnson said, there are no applicants for the stations and his constituent would wish to apply for one of the stations but does not come within FCC standards which preclude two stations operating on the same channel unless 190 miles apart.

Comr. Hyde explained that hearing officers now have on their desks "25 proceedings involving some 59 cases other than TV matters." They had hoped to handle 15 cases per year. But, he said, in 1951 the number was eight and in 1950 it was 10.

"Efforts of litigants to present strong cases" will slow the hearing procedure in TV even further, he added.

Sen. Capehart, doing some quick accounting, estimated it would take 10 years for FCC to put 1,000 TV stations on the air, according to current facilities. Committee Chairman Johnson noted that the average potential telecaster ties up $500,000 to a million dollars in assets in waiting for a license. It's unfair, the Senator said, to have this capital tied up.

Sen. Ed Johnson said the cost of 20 examiner teams (the Senator has been urging the hiring of 13 additional teams above the current seven) at a $600,000-$700,000 expense to the government, would be less than having seven examiner teams process applications for some 20 years (to put about 2,000 TV stations on the air).

Sen. Capehart at this point moved that the committee go on record requesting and urging the Senate Appropriations Committee to provide additional funds in the independent offices appropriations for fiscal year 1953 for the specific purpose of employing additional hearing-examiner teams to process television applications.

Later, in executive session, the commerce group unanimously approved the Capehart motion.

Other data revealed by Comr. Hyde:

Investments in receivers and servicing of sets since 1948 total $6 billion. Average cost of a TV station, according to figures taken from the 109 stations now operating, is $480,000.

The most expensive procedure in both time and energy as well as dollars to the Commission is its necessity of explaining each and every delay in expediting the TV problem.

FCC estimates it will take another two years before it can place another TV station in St. Louis (a one station city). Forty cities are in a comparable situation.

He said it was his own opinion that if the FCC budget remains cut without additional funds for hiring more examiner-hearing teams, the Commission should ask Congress for a supplemental appropriation. But, of course, FCC would prefer the funds be given now in the 1953 budget before Congress, he added.

The House last March voted $6,108,460 to operate FCC in fiscal 1953, $1,966,540 less than the requested $8,075,000 sought in President Truman's budget [B•T, March 24].

Idaho Senate Republicans Henry C. Dworshak and Herman Welker informed the commerce group of their endorsement of Comr. Hyde's appointment.

AUTRY TO APPEAL

Film Rights Ruling

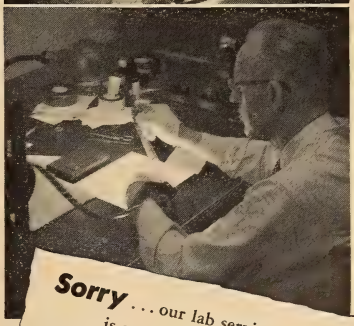
COWBOY singing star Gene Autry said he plans to appeal a decision by Federal Judge Ben Harrison last Tuesday giving Republic Pictures and its subsidiary, Hollywood Television Service Inc., the right to release more than 50 old Gene Autry western films to television.

Judge Harrison's decision was diametrically opposed to a ruling made last October in favor of cowboy star Roy Rogers by Federal Judge Peirson M. Hall in a similar suit brought against Republic and subsidiary.

Judge Harrison held that Republic's "unrestricted ownership rights" of films include "rights to license their exhibition on home television receivers." He said spot advertising is common practice in most conventional movie theatres and therefore Mr. Autry could not hope to control advertising.

NOW! SARRA'S OWN NEW FILM PROCESSING LABORATORY

BRINGS YOU



Vide-O-riginal TV COMMERCIALS

We are pleased to announce the completing link in the SARRA chain of quality control . . . our own modern new film laboratory, designed, staffed and equipped to deliver the ultimate in TV selling messages -

the VIDE-O-RIGINAL

***VIDE-O-RIGINAL . . . WHAT IT* IS**

It's Sarra's name for a quality-controlled motion picture print, produced in a laboratory designed especially for the making of TV prints. Each and every print is custom-made and whether it is 1-minute or 8-seconds, it receives individual attention in quantities of one or hundreds.

***VIDE-O-RIGINAL . . . WHAT IT* MEANS**

It means that all of Sarra's creative photography, all of Sarra's visual selling ability, reaches the television screen with maximum fidelity. VIDE-O-RIGINAL prints combine Sarra standards with station requirements.

***VIDE-O-RIGINAL . . . WHAT IT* DOES**

It provides complete quality protection from storyboard to home reception . . . it insures your investment of time, talent and money in your TV presentation.

On your next television film commercial get a SARRA VIDE-O-RIGINAL . . . get top quality from start to finish!

Sorry . . . our lab service is available for SARRA productions only.

NCAA Backfire?

(Continued from page 60)

comparable television and non-television cities. Half of the sample of a true cross-section of people should be in television cities with comparable television set penetration and with home colleges of comparable standing in the athletic world and unrestricted telecasting going on in this half of the sample. The other half of the sample should be in communities where there is no television available and, of course, of a true cross-section of people there. Such studies should run over a period of at least three years, and then possibly conclusions might be drawn about the effect of television on college football game attendance."

Mr. Allerton observed, "There has been no opportunity given to demonstrate conclusively that television, in the long run, favorably or adversely affects college football game attendance. The Jordan reports would indicate that, in the long run, attendance would be helped."

He added this comment, "The comparisons made in the NCAA report are between non-television areas and television areas where an attempted blackout of local games was in existence." This, he said, supports the charge that nothing in the report definitely shows that TV has hurt attendance at college football games.

Novelty of TV Theory

Lt. Jordan said NCAA figures actually support "the novelty theory of TV's effect. As length of ownership increases, attendance recovers from the initial TV hurt, and television begins to help build new fans. That may be why college football attendance has not dropped more as a result of a 15% decline in male students."

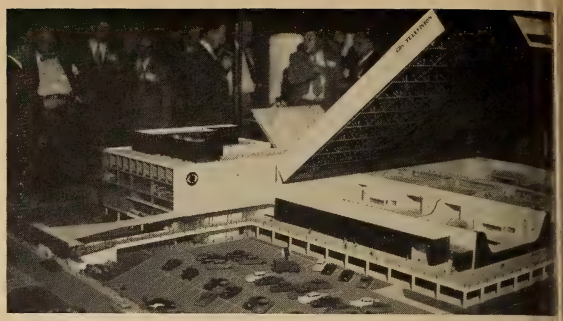
In citing data showing that 45% of men and 66% of women have never attended a college football game, Lt. Jordan said, "College football, as well as other sports, have a great opportunity for increased attendance if they can arouse interest in that vast segment of the population. Any curtailment of the publicity afforded by newspapers, radio or television will tend to prevent that group from becoming interested.

"The city of Pittsburgh should prove an object lesson to sports promoters. There is less televising of athletic events in Pittsburgh than in any other city with big league sports. The NCAA report shows the result. Attendance among the younger age group of TV owners (under 40) is significantly lower than among non-owners. This condition is not true in Boston where sports events have been more frequently televised. Also, there is an indication that attendance is increasing with the length of TV ownership in Boston, while it is decreasing in Pittsburgh. These figures suggest that the continuation of a TV ban may backfire."

Colleges should study that section of the report dealing with the public's attitude toward the NCAA plan, Lt. Jordan said, referring to the admission that "the majority of those who held opinions about it were unfavorable."

He added that the NCAA report shows "by far the largest attendance decline last year occurred in the Mountain District, one of the two districts with practically no TV. In six of the seven NCAA districts where comparisons are possible, the colleges with no TV competition fared worse than those with TV competition, in 1951 attendance compared with 1950."

Panitt Opinion



Critical comment on the NCAA report was given by Merrill Panitt, *Philadelphia Inquirer* sports commentator, who caught the revelation that attendance "dropped less in areas where football games were televised than it did where there was no televised football."

Mr. Panitt referred to NCAA in these terms, "You remember the NCAA, don't you? That's the group of sweethearts who decided they were bigger than both of us—the television industry and the viewers —and then proceeded to dictate exactly what college football games could be televised, where they should be televised and when the nation's largest cities should suffer Saturday afternoon football blackouts." He observed that the survey was conducted by "the National Opinion Research Center of the U. of Chicago, an institution that luckily gave up football before NCAA got its claws into the game."

TV Applications

(Continued from page 61)

San Francisco. Applicant is licensee of KXA Seattle. Principals include President **Wesley I. Dumm** (20%), president of KSFO San Francisco and majority stockholder of KPIX (TV) San Francisco, and owner of investment business in Pasadena, Calif.; First Vice President **Robert B. ELECTRONICALLY operated model of the 15-acre CBS Television City under construction in Hollywood is being exhibited by CBS in New York. Miniature TV city above measures 15 x 14 feet and weighs approximately two tons.

* * *

Now It Winks

CBS-TV network added another improvement last week —this time on its own trademark. The network's signature—a dial eye—had been shown on a Telop slide since it was first introduced nine months ago, but as of 10:59 a.m. EDT Friday, the eye began to move. Set-owners will notice, as the first of three variations to be produced on film, the eye now opens and closes. Revamping the trademark, like its original design, was supervised by William Golden, creative director of CBS-TV advertising and sales.

GREAT BRITAIN TV

No Commercials Now

GREAT BRITAIN White Paper last Thursday announced commercials will not be carried on the country's TV for at least another three or four years. The Conservative government was said to favor sponsorship of TV programs when the country passes over the rough spots of its arms and export drives.

The forecast for this road to recovery period was given as "at least three or four years" from now. The nation's only TV channel and the three radio networks in Great Britain are operated by the British Broadcasting Corp., which is government owned and operated. No advertising is carried on broadcast media there.

HOLCOMB NAMED

To New KNXT (TV) Post

GRANT HOLCOMB, newscaster and commentator with KNXT (TV), CBS-TV O&O station in Hollywood, has been appointed to newly-created post of director of news and special events for KNXT and CBS Television Network in Hollywood, Wilbur S. Edwards, KNXT general manager, and Sig Mickelson, CBS-TV director of news and public affairs, announced last week.

In his new post, he will supervise local and network news and special events originating in Hollywood.

CBS-TV CITY

Two-Ton Replica on Display

TWO-TON replica of the CBS-TV Television City, flown from the West Coast to demonstrate how the $7-million studio building now under construction in Hollywood will operate, was shown in New York last week.

The 14 by 15 foot model, said to be one of the largest scale and precision-built architectural miniatures constructed, will be exhibited publicly in a national tour beginning this month, J. L. Van Volkenburg, CBS-TV president, said.

Equipped with electric controls which will raise and lower roof sections, provide both day and night lighting conditions, demonstrate rotary stage equipment, and, detailedly, spin a miniature recording on a miniature turntable, the model was constructed by Dale Clark & Assoc., Los Angeles.

Special features of the scaled construction are a two-way mirrored floor to show space arrangement under a main studio and a sliding drawer panel which, pulled out, indicates workshop areas as they will be built in the building's lower level.

The actual building is being erected on a 15-acre site at Beverly Blvd. and Fairfax Ave., Hollywood.

Scheduled to be completed about Oct. 1, the structure was designed exclusively for TV production needs and contains four studios with 12,100 square feet of space each, arranged with their subsidiary units to allow for completely separate flows of three main program elements: performers, production equipment and audiences.

The building is organized so that additional and similar units can be added. Final plans call for 20 studios plus a 13-story administration unit.

Three Join WPIX (TV)

MALCOLM O'MARA, TV station consultant; William H. Rich, Muzak Corp., and Philip Cohen, WJZ New York, have been added to sales unit of WPIX (TV) New York's merchandising staff "in preparation for a concerted drive for fall business," station spokesmen have announced.

the CABLE'S a-comin'

DuMONT WAGES
Are Hiked; Strike Off

STRIKE threatened against the DuMont Television Network's home station, WABD (TV) New York, and expected to have involved the DuMont-owned outlets WTTG (TV) Washington and WDTV (TV) Pittsburgh, was avoided last week when the network agreed to a cost-of-living increase and an adjustment in rates to those current in New York.

Technical employes who had voted to strike a week earlier were members of Local 794, Television Broadcasting Studio Employes Union, a unit of the International Alliance of Theatrical and Stage Employes (AFL). Their strike was to have been paralleled in Washington and Pittsburgh by fellow unions there, where the disrupted negotiations have been resumed by the network.

GATHINGS QUIZ
Coverage Right Asked

WMAL-AM-TV Washington last week requested permission to air the "morals" investigation by the House if the probe does materialize.

Kenneth H. Berkeley, vice president-general manager of the Washington *Evening Star* stations, pointed out that the hurdle of House Speaker Sam Rayburn's (D-Tex.) ban on broadcast media would have to be cleared.

'Morals' Probe Course Unset

(Continued from page 27)

with similar resolutions in the House, noted that the pictures on television are made by the adults and "are not made by the children or the young folks themselves . . . then [the adults] expect the young folks to have a high respect for the morals of our country . . ." He added:

We do not want to be in a position of seeming to censor everything that comes along. On the other hand, I think it is a pretty good idea that the Congress . . . sort of keep a hand in on this thing and give it a little policing once in a while . . .

In addition to this frank admission of "policing," his colleague, Rep. Gathings, declared that one of the objectives of the investigation would be to determine whether increases in crime are incited by radio-TV programs.

Rep. William M. Colmar (D-Miss.), warned that those who put programs on the air should be diligent that the "impressionable youth of the country" do not "get the wrong concept or philosophy of life."

Veteran debater Clare Hoffman, Michigan Republican, asked about the meaning of the resolution's language referring to "or otherwise offensive matter."

"Just how far are we to usurp the province, the duties of fathers and mothers?" he asked the House. Noting a letter from a constituent protesting against a beer ad, the congressman said:

He wants the Congress to act as censor . . . Why does not Dad just turn off the objectionable program. . . . Congress should not be required to enter the home and, assuming the duties of parents, tell the children what they can and cannot see or hear. Should we attempt to censor all of these things, we could get into a terrible fix. . . .

Rep. A. L. Miller (R-Neb.) asserted:

The industry, movie and television ought to set up and enforce a high standard. Congress ought not to have that task.

. . . it is impossible to legislate morals, and it is difficult to say what we should or should not teach. The committee can render a service to the public by a wise and cautious approach. I am sure the industry will assist in every way. . . . I hope no censorship or iron hand of authority will be forced on the growing industry of television. Cooperation is the need.

The responsibility of entertaining the public through television belongs to the industry. They should police the shows and assure the public that lewd, obscene, indecent, and vulgar shows or words will not be used on the programs. A penalty should be established for violation.

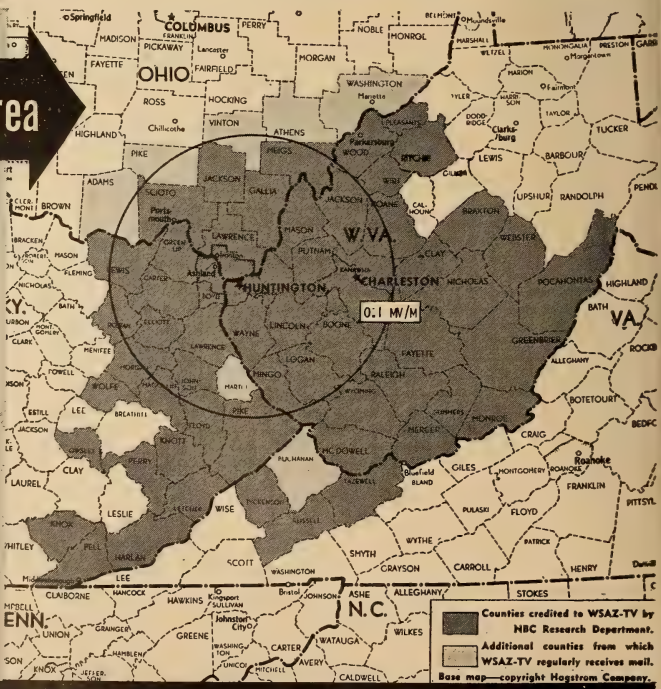
Mr. Fellows in his statement also warned that the Gathings move "could establish a dangerous precedent in this nation. . . . For there could emerge from the 'investigation' proposed in the . . . resolution 'legislative action to eliminate offensive and undesirable radio and television programs."

But, he asserted, "the proposal does not indicate the criteria for determining what might be considered 'undesirable' or 'offensive.'" Calling the House action a "fundamental disregard of our traditional American freedom of speech concept," Mr. Fellows said that when Congress enacted communications law it "specifically withheld from the governmental regulatory body the power of censorship over the programs broadcast by the licensees.

"The best thing I can see coming out of this so-called investigation is the opportunity it will give broadcasters to discuss with Congress some of the things that industry itself is doing."

Industry Doing Something

He said the industry already has been receiving comments from public and private groups about TV programming and "the industry is doing something about the situation."



An amendment to the resolution on comic books and pocket-sized books offered by Rep. Rees would have included "other publications." However, this amendment was beaten down in the House as it was feared it would include investigations of newspapers.

Rep. Joseph P. O'Hara (R-Minn.), a member of the commerce committee, said later, "I have some doubt as to just what the committee will do. The resolution is as wide open as the poles."

'I Love Lucy' Still Tops Ratings

(Report 216)

AMERICAN Research Bureau national rating for April show *I Love Lucy*, starring Lucille Ball and Desi Arnaz, in first place both in number of homes reached and rating-wise.

The program had a rating of 63.2 and tests show that it was viewed in 10,600,000 homes, reportedly the greatest number of homes for any regularly scheduled program in television history. Figures for the week April 1-7:

Rank	Program	Homes %
1	I Love Lucy (CBS)	63.2
2	Talent Scouts (CBS)	57.4
3	You Bet Your Life (NBC)	50.6
4	Red Skelton (NBC)	50.0
5	Show of Shows (NBC)	46.4
6	Godfrey & Friends (CBS)	45.1
7	My Friend Irma (CBS)	43.2
8	Comedy Hour (Abbott & Costello) (NBC)	42.8
9	Star Theatre (NBC)	39.9
10	Fireside Theatre (NBC)	39.5

Rank	Program	Homes (000's)
1	I Love Lucy (CBS)	10,600
2	You Bet Your Life (NBC)	8,260
3	Red Skelton (NBC)	8,040
4	Show of Shows (NBC)	7,910
5	Godfrey & Friends (CBS)	7,230
6	Comedy Hour (Abbott & Costello) (NBC)	6,960
7	Star Theatre (NBC)	6,710
8	Fireside Theatre (NBC)	6,470
9	Talent Scouts (CBS)	6,410
10	Television Playhouse (NBC)	6,130

Camera Improvements Announced by Telenews

IMPROVEMENTS in the Wall camera system, to minimize the time consumed by the synchronization process, were announced last week by Telenews Productions, New York, whose cameramen redesigned their equipment in conjunction with Douglas Electronic Labs.

The redesigned cameras provide perfect synchronization of sound and picture, it was said, so that the negative can be put directly on the air—and reversed electronically—to save the laboratory time usually spent to coordinate the sound track and the picture frames. Other improvements include testing equipment that is built into the amplifier, optional use of the sound with or without noise reduction, and cutting the weight of the combined equipment from 40 to 18 pounds.

* * *

Set Owners Approve Servicing Work

MOST TV set owners approve the quality of work performed by their TV service technician, according to a nationwide survey of 5,000 families by Elmo Roper for RCA Victor and RCA Service Co.

E. C. Cahill, president of RCA Service Co., said results showed 86% of all television owners who had experience with TV service termed the work as "really good" (68%) or "fairly good" (18%), while only 7% expressed dissatisfaction and 7% did not reply.

Mr. Cahill said he believes the Roper survey is the first poll made on a nationwide basis. He said results also showed two out of three owners considered servicemen's charges as "entirely reasonable," while only one out of ten felt charges were "too high."

Fully 88% of owners reported their serviceman as "pleasant and courteous" and another 6% considered his manner "satisfactory" while 6% did not reply, he said.

Three out of four persons thought service work on their TV sets had been done in a reasonable time. Only one out of five felt he had to wait too long, he said.

An investment of more than $200 million is represented in the television service industry, Mr. Cahill reported, including elaborate testing equipment and trucks and tools.

* * *

Set Sales in Canada Lower Than in '51

SALES of TV receivers in the first three months of 1952 totaled 13,851 units valued at $6,925,240, as compared to 14,052 units valued at $7,696,855 in the first three months of last year, according to the Radio-Television Mfrs. Assn. of Canada. Total of Canadian TV set sales to end of March 1952 was 92,289 sets valued at $44,439,265. Inventories at March 31 were 14,284 sets.

RECRUITING

Film Spots Planned In Air Cadet Drive

FILMED spots to encourage Air Force cadet enlistment loom important in the extended media allocations plan being molded for military recruiting, it was revealed last week.

A series of one-minute and 20-second announcements will be distributed to the nation's 108 TV stations by June 1 with the request that they incorporate them in their programming as a public service.

This was the latest development in the new advertising program being planned by Grant Adv. for the Defense Dept.'s Military Personnel Procurement Service, handling Air Force and Army recruitment. An estimated $200,000 is to extend the recent interim campaign, with a portion earmarked again for radio spots and other select media [B•T, May 5].

The film spots will promote Air Cadet enlistments primarily, it was understood. Similar films during the recently-concluded interim drive stressed pilot training and aircraft observation. A series of three prints was prepared at an estimated $7,000, with virtually all for TV production. There was no immediate indication of cost for the new series.

It was revealed that the Air Force will spend $20,125 out of an $80,000 ad budget for radio spots. The supplemental campaign got underway May 11 and will run through June 29. Hope was expressed that more funds will be made available.

The new media program just launched is smaller than the original campaign because of the less substantial fund allocation. Of the $200,000 now available—compared to $550,000 spent in the first drive—it was estimated authoritatively that radio will derive perhaps $25,000-$35,000 at the outset for both Air Force and Army recruiting. Radio's share in the last campaign was approximately $95,000.

Spot Schedule

The radio spot schedule calls for spots over independent outlets of the Keystone Broadcasting System and 13 50-kw area stations. In each case, the announcements will support printed advertisements in Sunday supplements.

A Grant executive told BROADCASTING • TELECASTING that without radio's support with spots, the campaign could not be successful. "We need radio's impact to provide the clincher in these areas—to get our target audience to respond to what it has read," he explained, referring particularly to college students as prospective aviation cadets. Field recruiting officials attest to radio's effectiveness here, he added.

The Army made recruiting of women one of its most ambitious activities during the last interim campaign, allotting $65,000 for a series of 36 pin-pointed spots—25 for WACS and 11 for nurses. Neither Pentagon personnel authorities nor Grant Adv. could report actual results on any specific enlistment drive.

Meanwhile, a Senate Appropriations subcommittee under Joseph O'Mahoney (D-Wyo.) has begun hearings on the Defense Dept.'s overall 1953 budget. It was believed recruiting authorities would be called to testify later this month.

Of prime importance is the $1,050,000 requested for radio, TV and other media, which the House indirectly slashed in wielding the axe on maintenance-operation funds containing $12.5 million for overall recruitment [B•T, April 14].

While hearings will center on the '53 budget, discussion almost certainly will arise on the $2.1 million still attached in the 1952 Military Appropriations Act. Basis for this belief is the report that some Appropriation Committee members of Congress would be willing to thaw the freeze if part of the monies are deducted from the '53 budget [CLOSED CIRCUIT, May 5]. This possibility, it was understood, originally was posed by House members earlier this year.

STANDARD OIL

Switches to Local TV

STANDARD OIL Co. of Indiana will drop *The Wayne King Show*, which it has sponsored on a 10-station NBC-TV hookup for three years, because of costs, and will substitute its schedule with a series of local telecasts in its distribution area.

Wesley I. Nunn, advertising manager of the midwest company, said the firm has been "handicapped" in getting maximum benefit from the weekly show because costs for 10 stations in eight states "are nearly as great as they would be if a nationwide network were used."

Standard uses local radio heavily in its 18-state distribution area, and plans to follow a similar buying format in the use of TV, Mr. Nunn said. The company will first experiment in major networks, such as Chicago, Milwaukee and St. Paul, and then broaden coverage.

Contract cancellation with NBC is effective June 26. Agency is McCann-Erickson, Chicago.

ABC TV Center

ADDITIONAL 13,000 square feet of building is now under construction at ABC Television Center in Hollywood with completion scheduled for September. Executive bungalow, housing TV sales, program and production staffs, acquires added wing. Master control building will be extended to accommodate engineering and film department, and other plans call for scene storage dock plus shop for remote truck and other vehicles.

'WASP' SCOOP

Claimed by WPIX (TV)

ESSO Standard Oil Co. and WPIX (TV) New York have claimed a newsbeat in the telecasting of pictures of the crippled carrier *Wasp* after its high-seas collision with the destroyer *Hobson*.

The pictures were made 850 miles at sea from a plane carrying WPIX's newsreel cameraman Frank Hurley and Esso reporter Kevin Kennedy, and were shown the same day (May 2) in a six-minute 8:30 p.m. showing via WPIX. Esso, whose affiliate, Atlas Supply Co., provided the plane, later made the film segment available to other stations carrying the *Esso Reporter* TV show: WBAL-TV Baltimore, WBZ-TV Boston, WTOP-TV Washington, WTVR (TV) Richmond and WDSU-TV New Orleans.

Meanwhile, NBC-TV's early morning *Today* program showed the *Wasp's* arrival in New York harbor last Tuesday morning. NBC newsman Merrill Mueller described the scene and also interviewed several of the survivors of the *Hobson* when they were taken ashore.

PHILCO SALES

Over $84 Million Reported

PHILCO Corp. sales for the first quarter of 1952 totaled $84,239,000, William Balderston, president, announced last week.

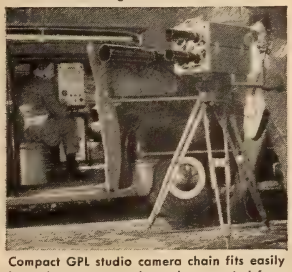
This figure was larger than for any similar period in the corporation's history except that of a year ago, when customers were anticipating serious shortages of appliances and TV receivers, Mr. Balderston explained.

Earnings after taxes for the first three months of 1952 were $2,341,000 or 64 cents per common share after preferred dividends, he revealed.

In the same period last year, Mr. Balderston continued, sales were $113,524,000 and net income, which has been restated to give effect to the retroactive increase in federal income taxes, was $3,521,000 or 97 cents per share of common stock.

Mr. Balderston reported on the work that Philco has been doing in transistors. In outlining transistor advantages, he said that transistors' major contribution "will be to extend the applications of electronic equipment to new fields and to greatly extend the present frontiers of communication."

DuMont Sales Spurt



HERBERT E. TAYLOR, manager of Allen B. DuMont Labs. Television Transmitter Div., last week reported a "sharp upswing" in manufacturing and sales. He said deliveries for the first four months of 1952 averaged over 300% more than for the same period in 1951. Transmitter sales were 180% greater.

GPL Equipment goes Cross-Country

Included in cross-country demonstration unit is the GPL Utility Projector, with "3-2" intermittent which permits use with I.O. camera for film telecasting from remotes.

Compact GPL studio camera chain fits easily in station wagon, and may be operated from there, drawing power by cable from studio and returning signal to transmitter.

...to Drive its Story Home!

Stations all over the country will soon be able to see GPL TV equipment in operation right in their own studios. They can compare it with their present equipment, try it for compactness, smooth efficiency, flexibility, operational simplicity, and overall performance quality. Maintenance-minded engineers will examine its swing-up, swing-out panels. Camera and camera control men will note its many new operating features—pushbutton turret control, remoting of focus, turret and iris—all engineered for faster, smoother control.

Be sure *your* station is on the schedule of the GPL Mobile Unit Tour. *See* why network users have said: "Best picture on the air today!" Compare "the industry's leading line—in quality, in design."

Write, wire or phone today, and we'll work your station into our itinerary for earliest possible dates.

DENVER HOME SHOW

On KFEL Closed Circuit

ENTERTAINMENT aspects of the sixth annual Metropolitan Denver Home Show, May 11-18 at the U. of Denver, were telecast via KFEL Denver closed circuit on 28 exhibitors' TV receivers.

KFEL reports it the most ambitious closed circuit video production in Denver to date. The telecasts enabled thousands of home show visitors to view the entire stage performance on the exhibitors' receivers.

WORLD VIDEO ENDS

CBS-TV Gets Last Show

A STOCKHOLDERS vote April 25 brought about discontinuation May 2 of operations by World Video Inc., pioneer television package firm organized in December 1947 and which had been a "school" for such executives and talent as Henry White, Dick Gordon, Wendy Barrie and Faye Emerson.

Independent's demise, although it had been operating in the black, was brought about when its last show on the air, *Celebrity Time*, was taken over for the sponsor, B. F. Goodrich Co., and its agency, BBDO, by CBS Television. Network was understood to have made "certain concessions" in taking over production and to have offered plans for lifting the program's rating to meet the competition of Red Skelton, opposing on NBC-TV.

TV COVERAGE

RTMA Predicts Expansion

TELEVISION station coverage will be extended this year in 25 TV areas, with stimulation of receiver sales, according to the Sales Managers Committee of Radio-Television Mfrs. Assn. The committee has completed a study of immediate effects of the FCC thawing of TV station construction.

First TV areas to benefit, the committee reports, will be cities in which 30 channel shifts of existing TV stations have been ordered by the FCC. "This will result from expected increases in transmitting power which will be available to these stations at the same time they change channels," according to the committee.

Data on station power increases were received by the committee from W. L. Stickel of Allen B. DuMont Labs. Mr. Stickel told the committee TV markets in the 25 areas may be expected to be extended several miles by reason of power increases that vary according to channels involved.

Cites Priority

Committee chairman is R. J. Sherwood, of Hallicrafters Co. The committee reminded that FCC has stated it will give priority to processing of applications for channel shifts ordered in its recent allocations report and to requested power increases, beginning July 1. It added that hearings are not likely to be necessary in most instances.

Cities in which TV channel transfers have been ordered, with stations and channels involved, follow:

NEW FTL DEVELOPMENT

Is Antenna-Amplifier Unit

HIGH-GAIN antenna and high-power amplifier unit, designed to meet the new FCC specification of 316 kw maximum effective radiated power for VHF Channels 7-13, was announced last week by Federal Telecommunication Labs., Nutley, N. J., research associate of the International Telephone and Telegraph Corp.

Of light weight and simple base structure, the antenna-amplifier combination can be installed with relative ease on either new or existing towers and requires only one transmission line, company said. The equipment can be driven from any existing 5 kw TV transmitter without modification to the driver, and its input impedance is said to be sufficiently resistive so that physical location is not a critical matter.

TV PROBLEMS

Faught Cites in 'Look'

"THE future of television hangs in the balance," according to Dr. Millard C. Faught, New York public policy adviser identified as a television economic consultant, in the May 6 issue of *Look* magazine.

Lifting of the TV station freeze, Dr. Faught wrote, will be "just a headline of hope until a long list of TV problems are solved." What it boils down to, he observed, is that "we are trying to build television's future on a single source of revenue —the advertiser's dollar."

Dr. Faught said he was "immediately assailed or ignored" by the broadcasting industry in 1949 when he predicted that a network of 1,000 TV outlets, programming only 70 hours a week, would require the "appalling" sum of $1,740,352,500 in advertising. Advertisers would have to sell more than $80 billion in goods via TV to justify such a TV outlay. "Now we are talking about building twice as many stations as my 1,000 and programming them twice as many hours a week."

Look magazine itself guesses that 1,000 stations programming 70 hours weekly now require an annual budget of $3,500 million.

Predicting that many areas will continue without TV stations—even though the freeze has ended—because they will not be able to support local service on advertising alone, Dr. Faught, a consultant to Zenith, developer of Phonevision, suggested that a pay-as-you-see plan is the solution.

Truman Gets Tour Film

BARNEY BALABAN, president, Paramount Pictures Corp., last week presented President Truman with a 50-minute, 35mm film recording of the President's personally conducted tour of the White House May 3. The film will become a part of Mr. Truman's personal film library.

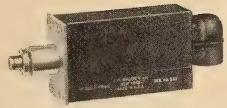
Mr. J. A. Maurer
J. A. Maurer, Inc.
37-01 31st Street
Long Island City 1, New York

Dear Mr. Maurer:

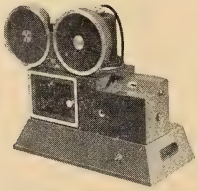
I am enclosing with this letter a picture taken in Oak Creek Canyon in Arizona during the filming of my new picture, "Viewfinding, U.S.A.", thinking you might like to use it.

You might be interested to know that until my purchase of a Maurer Camera I never had the beautiful results I am now obtaining through the use of this fine camera. I have shot some ten thousand feet of Kodachrome film and every foot is good. It has operated under extreme conditions in sand storms, extreme heat and some cold weather and has functioned perfectly on every set up.



This certainly speaks well for the Maurer Camera and I for one would never be without it.

Kindest personal regards.



N. D. Reiss

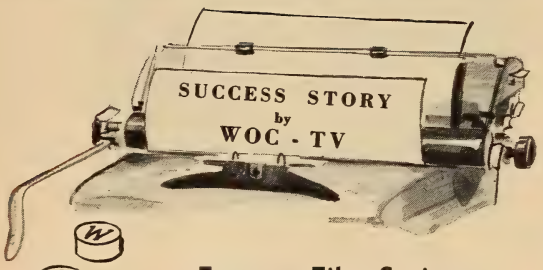
CITRUS BUDGET

TV To Get Large Share

ADVERTISING budget assigning $514,928 to radio and television has been approved by the Florida Citrus Commission of Lakeland. The figures were unchanged from the tentative budget proposed in early March by J. Walter Thompson Co., New York [B•T, March 17]. Of the total, $125,000 is earmarked for radio; $389,928 for TV.



The lion's share of the overall commission's advertising budget, $2,300,000, for the year beginning July 1, goes to the J. Walter Thompson Co. The agency holds a reserve fund for citrus advertising which is allocated as special needs arise. The agency's most recent expenditure, in addition to the regular radio-TV budget, was $14,200 spent on the NBC-TV show *Today*.

Present from the New York office of the J. Walter Thompson Co. at the advertising committee and full commission meetings were Don Francisco, vice president, and David O. Corey. Manager of the Lakeland office is J. H. Forshew. Ralph Henry is advertising manager of the Florida Citrus Commission.

Cuts of $15,000 and $28,000 were made in advertising budgets for consumer publicity advertising and medical advertising, handled by Dudley, Anderson & Yutzy, N. Y., and Noyes & Sproul Agency, N. Y., respectively. Presentations on their work during the past year were made by George Anderson and Kay Titus of Dudley Anderson & Yutzy, and by Dorothy Noyes of Noyes & Sproul Agency.

Under the budget just adopted, Dudley, Anderson & Yutzy will receive $40,000 and the latter agency, $75,000. These appropriations may be reconsidered at the June meeting.

NEW hour-long children's Sunday audience-participation show has been introduced on KTTV (TV) Hollywood. Show, *Mr. Whistle*, features Nick Nelson, radio's Uncle Whoa Bill, and is packaged by Television Assoc. Productions, Los Angeles.

Feature Film Series

SKYROCKETS

LAGGING AUTOMOBILE SALES

Around Jan. 1, auto sales lagged. To whip this lag, Bill Piggott, head of Rock Island Nash agency bearing his name, got Nash dealers in area to sponsor late Saturday night film series on WOC-TV. Program titled "Airflyte Theater" debuted Jan. 19—fifteen dealers participating.

By end of January, Piggott had sold 15 new cars. Appearing on Feb. 16 program, he displayed chart showing only 3 new cars left at his agency. Told viewers to hurry if they wanted one of these. With sale of these 3 cars by 11 o'clock next morning, *Piggott had moved 31 new Nashes 3 demonstrators*. . . . ALL WITHIN MONTH OF FIRST TELECAST.

"Airflyte Theatre" is now in its second 13-week cycle and other Nash dealers sponsoring series report sales successes similar to Piggott's. Proof that WOC-TV *Sells* . . . for further proof get facts from your nearest F & P man . . . or us, *direct*.

PUPILS ON TV

WMAR-TV Undertakes Series

TV VIEWERS in Baltimore are watching their children at schoolroom activities after the inauguration May 8 of *Your Child in School* on WMAR-TV there.

The Thursday morning half-hour program will continue through June 5, having begun with televising of a group of six-year-olds studying plant life in the first grade at Glendale school, Harundale. Unrehearsed and unstaged, it picks up the classroom techniques used by teachers and the responses of children as they learn.

The TV version was adapted from a feature of the same name which has run in the *Evening Sun*, published by the A. S. Abell Co., licensee of WMAR-TV, since September 1948 and which in 1949 brought the newspaper the annual award of the Education Writers Assn. for the articles by Robert S. Moyer, former *Evening Sun* reporter. The TV program last Thursday featured a mock political convention at Baltimore Polytechnic Institute. Other programs set are a school "beauty unit," home economics and physical education activities.

Aimed at showing the day-to-day learning processes of children from kindergarten through high school, the newspaper feature has reported the names and activities of nearly 7,700 pupils in more than 200 classrooms.

CANADIAN HOCKEY

Imperial Oil to Telecast

FIRST commercial television account known to go on Canadian stations at Toronto and Montreal, will be Imperial Oil Ltd., Toronto, with its Saturday evening hockey broadcasts all winter. Imperial Oil uses Trans-Canada network radio for its weekly hockey broadcasts. It will telecast its games at Toronto and Montreal as well for about one hour, from 9:30 to 10:30 p.m., when games usually end. Radio hockey broadcast is from 9 p.m. to end.

While no definite contract has been signed yet, Imperial Oil and its agency, MacLaren Adv., Toronto, are emphatic that hockey will be telecast this coming winter on a commercial basis, if CBC-TV Toronto and CBC-TV Montreal get on the air as planned by early September.

NCAA Meet Postponed

NEWS conference was called for Thursday by the National Collegiate Athletic Assn. early last week, purportedly to explain the television committee's 1952 plan for football telecasts [B•T, May 12]. Conference was later postponed to an undetermined date, however, with director Asa S. Bushnell attributing the move to "technical difficulties."

CBC-TV RATES

Set for Toronto, Montreal

RATES have been announced by Canadian Broadcasting Corp. for its first television stations at Toronto and Montreal, effective September 1, 1952. Rates include station time, production staff and technical facilities for rehearsal and production of program, and rehearsal of commercials to a limited time.

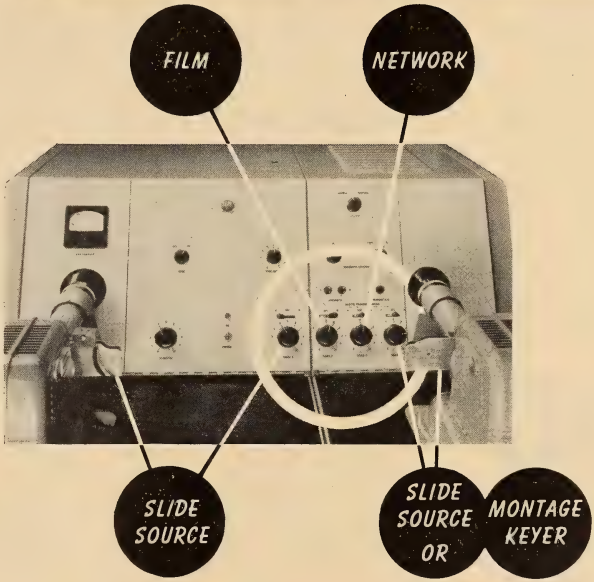
Rates start with one hour at $1,600 at CBC-TV Toronto, and $500 at CBC-TV Montreal, with 4 hours rehearsal time included.

Until a microwave relay system is in operation between Toronto and Montreal, expected early in 1953, CBC will provide kinescope recordings without charge for sponsors using a live show on both stations originating at either Toronto or Montreal.

For microwave relay of American originating programs from Buffalo to Toronto, which service now is almost ready, CBC charges start at $150 for one hour, $100 for 30 minutes and $75 for 15 minutes.

Rates at Toronto are $1,280 for 45 minutes, 3 hours rehearsal; $960 for half-hour, 3 hours rehearsal; $800 for 20 minutes, 2 hours rehearsal; $640 for 15 minutes, 2 hours rehearsal; $560 for 10 minutes and $400 for 5 minutes, with one hour rehearsal in both cases. Flashes are $240 for 20 seconds, $120 for 8 seconds, with no rehearsal time given. Rehearsals for more than time given is at rate of $50 for each half-hour or fraction thereof.

At Montreal, same rehearsal times apply and rates are $400 for 45 minutes, $300 for 30 minutes, $250 for 20 minutes, $200 for 15 minutes, $175 for 10 minutes, $125 for 5 minutes, $75 for 20 seconds and $37.50 for eight-second flashes.



Difference in rates between Toronto and Montreal are due to number of TV receivers. In the Toronto area there are about 50,000 sets now in use, tuning to WBEN-TV Buffalo. Montreal has less than 100 sets at present, but expects big sales there this summer and fall.

'Milwaukee Newsreel'

WTMJ-TV Milwaukee's *Milwaukee Newsreel*, sponsored by Milwaukee Gas Light Co., has been declared first award winner among video shows sponsored by a public utility firm throughout the nation. Award to the quarter-hour Wednesday-evening program was made at the annual meeting of the Public Utility Adv. Assn. in Minneapolis. Program content is handled by the WTMJ-TV news staff, headed by Jack Kreuger, news editor. Art Olszyk supervises assignments and editing, and writes the continuity. Filming is by Cliff Sager Productions, Milwaukee. Narrator is Bob Kelly and director is George Marr, both of WTMJ-TV. Ken Hegard, of the Cramer-Krasselt Agency is account executive.

TV PROGRAM CONTROL AT ITS VERY BEST WITH

FEDERAL'S POLY-EFEX SCANNER FTL-93A

The varied transition techniques and special effects required for up-to-date programming can be accomplished with the utmost operating ease by the FTL-93A. The key to its many applications is its four channel video switcher for the two self-contained slide sources plus any two external signal sources—film, network, studio, or remotes. It permits montages, superimpositions, wipes, lap dissolves, 3 speed automatic or manual fades of all four signals to be done skillfully and effectively at one convenient operating position.

Call your Graybar distributor and have him explain how the Poly-Efex Scanner can serve your programming facilities.

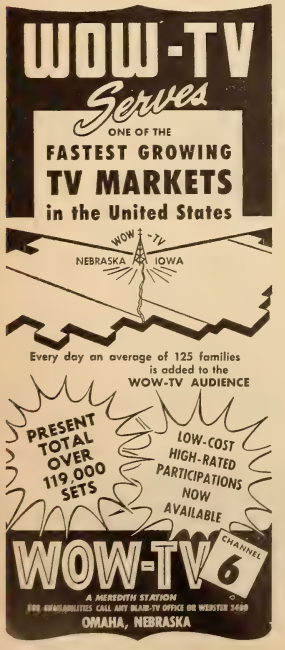
ATOMIC TELECAST

KTLA Covers Second Blast

ATOMIC test May 1 at Yucca Flat, Nev., was covered exclusively by KTLA (TV) Hollywood, the station has reported. Blast was picked up with a 40-inch lens from atop Mt. Charleston, 9,000-ft. peak 40 miles from the detonation site.



Operation was under supervision of Klaus Landsberg, KTLA vice president-general manager, who employed specially calculated filters to reduce glare. In addition to filters and special lens, KTLA used 40-inch Zoomar and other telescopic lenses, and a special relay system which Mr. Landsberg had set up for the April 22 atomic telecast [B•T, April 28].

Mr. Landsberg (l) and Lt. Thomas Young discuss last minute details of atomic test coverage.

SEG Pact Approved

AFL Screen Extras Guild members have approved a new six-year collective bargaining contract covering TV films as well as movies. Made with the Assn. of Motion Picture Producers, the pact increases general extra rate from $15.56 to $18.50 per day and dress extra from $22.23 to $25 [B•T, April 14]. Running to Jan. 2, 1958, both SEG and producers have the right to reopen the contract at the beginning of 1954 and 1956 if the cost-of-living index rises 5% or more above Oct. 15, 1951. SEG has the right to reopen the contract for negotiations on wage rates only.

$1 MILLION SUIT

Film Companies Cited

SUIT for $1 million against Pathe Industries, United Artists, Eagle-Lion Studios and others has been filed in Los Angeles Federal Court.

The filing was made by Ellen Levinson, assignee of Vinson Pictures Corp., who charged violation of a distribution agreement.

Involved are two films, "Sharmock Hill" and "An Old Fashioned Girl," produced by Equity Films in which the Vinson firm holds a half-interest. The films were released to television through Motion Pictures for Television Inc., the suit stated.

Simultaneously filed in Superior Court was also a foreclosure suit on Equity Films' interest in those films based on two chattel mortgages held by Vinson Pictures Corp. and assigned to Miss Levinson.

Suit charges the films were "wrongfully" released for TV to Motion Pictures for Television Inc., before full theatrical distribution had been made. As a result of the allegedly premature release of the films to TV, the charge was made that the theatre value of the films was lessened.

Among other requests, the suit asks for an injunction to restrain distribution of the two films to television.

WJIM-TV MICROWAVE

AT&T to Take Over Relay

HAROLD F. GROSS, president-owner, WJIM-TV Lansing, Mich., announced last week that on June 1 the station's privately-owned microwave relay facilities will be taken over by the American Telephone & Telegraph Co.

Mr. Gross said this move was part of a comprehensive new building program designed to serve the central Michigan area better. AT&T Long Lines Dept. is completing construction of microwave links at Detroit, Milford, Dansville and Lansing, it was further explained last week.

ATLANTA ASPIRANTS

Jaycees Pay WLTV(TV) Tab

POLITICAL telecasting was subject of a new twist last week when WLTV (TV) Atlanta and the city's Junior Chamber of Commerce combined forces on a commercial basis to present a series of four forum-type programs, *Meet the Candidates*, to the area's TV audience. Thirty-two candidates who figured in Fulton County primary elections on May 14 were brought before the TV camera on four successive evenings.

Unique feature of the series was that time consumed by the telecasts was purchased at straight card rates by the Junior Chamber of Commerce. The programs, according to William T. Lane, WLTV general manager, attracted a first-rate audience and proved to be profitable as well for the station. Funds for the time purchased were contributed by prominent civic minded Atlantans.

WBKB(TV) DRIVE

Hits $250,000 Palsy Goal

WBKB (TV) Chicago passed its $250,000 cerebral palsy telethon goal May 10-11, after 21½ hours of telecasting, the last 13 hours also broadcast by WCFL, the Chicago Federation of Labor station.

M.C. Irv Kupcinet, Chicago *Sun-Times* columnist and local radio and video personality, appeared with a varied panel of celebrities to answer telephone calls for cash donations, backed by more than 400 volunteer telephone operators working with 66 telephone lines.

The telethon took place in the Garrick Theatre, large audience studio used by the station and recently converted from a motion picture house by Balaban and Katz. Broadcast stars on hand included Burr Tillstrom and Fran Allison of *Kukla, Fran and Ollie;* Marty Hogan, Johnny Desmond and Don McNeill of *Breakfast Club.* Art Harre, WCFL general manager, also appeared as a guest telephone-answerer.

CHICAGO MOVIE HOUSES

Get Tax Aid for TV Inroads

MOVIE HOUSES in Chicago's Cook County will get tax relief for damages suffered as a result of television. This was reported last week by Frank Keenan of the Board of Tax Appeals, who said 100 of 400 county motion picture theatres have closed since television became popular.

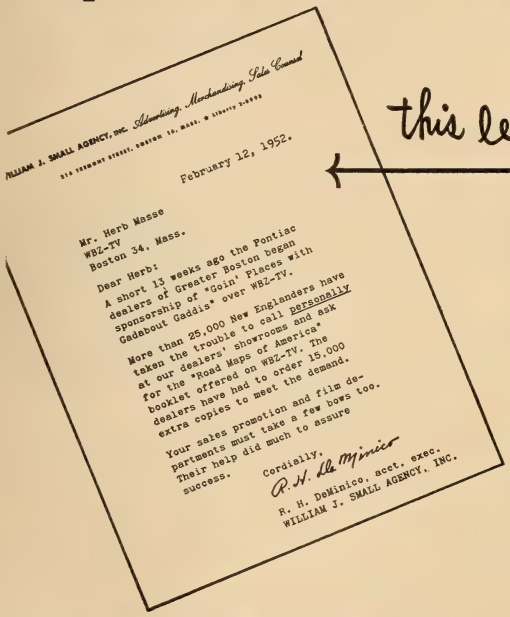
He said 110 other theatres have applied for tax reductions on theatre structures. Relief will be proportionate to damage, and theatres operating only the main floor of a building may get a 20% lower valuation on the structure, he said.

KNXT (TV) POSTS

Linger Heads Sales Dept.

DEAN LINGER, for past 16 months advertising and sales promotion manager at ABC Central Division, Chicago, has been appointed manager of the enlarged sales promotion and publicity department at KNXT (TV) Hollywood, CBS owned-and-operated station, effective today (Monday).

Mr. Linger



Simultaneously, it was revealed by Wilbur Edwards, general manager, that Wayne Kearl, promotion manager at KSL Salt Lake City, joins KNXT (TV) as assistant sales promotion manager in charge of trade promotion. Ethel Gilchrist, KNXT promotion copywriter for the past year, has been elevated to assistant sales promotion manager in charge of audience promotion.

In his new capacity, Mr. Linger will direct a seven man department which will include publicity as well as sales, audience and trade promotion. Mr. Linger joined ABC's Chicago press department following World War II, and became assistant promotion director for the network in that city. In February 1949 he joined WXYZ Detroit as sales promotion manager, but returned to ABC a year later to assume the post he recently resigned.

Mr. Kearl during past seven years has been associated with both KSL and KSL-TV in various capacities. Miss Gilchrist came to KNXT from NBC-TV where she organized the first audience promotion campaign for its affiliated stations as a sales and consumer promotion writer.

WBZ-TV program brings 25,000 viewers into sponsor's salesrooms

WILLIAM J. SMALL AGENCY, INC. Advertising Merchandising Sales Counsel

February 12, 1952.

Mr. Herb Masse
WBZ-TV
Boston 34, Mass.

Dear Herb:

A short 13 weeks ago the Pontiac dealers of Greater Boston began sponsorship of 'Goin' Places with Gadabout Gaddis' over WBZ-TV.

More than 25,000 New Englanders have taken the trouble to call personally at our dealers' showrooms and ask for the 'Road Maps of America' booklet offered on WBZ-TV. The dealers have had to order 15,000 extra copies to meet the demand.

Your sales promotion and film departments must take a few bows too. Their help did much to assure success.

Cordially,

R. H. DeMinico

R. H. DeMinico, acct. exec.

film report

Production . . .

Hoffberg Productions Inc., N. Y., has signed agreement with **Video Interfilm Corp.** of Berlin, Germany, to produce series of 13 half-hour ballet and operetta films plus 26 15-minute symphonic and ballet films in Western Germany. Each feature will carry an English commentary. The Bavarian Symphony & Opera Co. and Bavarian State Ballet will be featured.

* * *

Adolphe Wenland Productions, a newly-formed subsidiary of **Adolphe Wenland & Assoc.** (Hollywood radio-TV give-aways), has completed its first half-hour film in TV series tentatively titled *Around the World For a Song*. The films, produced at Cinematografica Cuanhtemoc, Mexico City, star **Andre Toffel**, French actor-singer, and feature European musical talent. **Henri Lube** is producer, **Hal Smith**, director, and **Fabian Andre**, musical director-composer. **Burt Wenland** represents his father on series.

* * *

Revue Productions, Hollywood subsidiary of **MCA** (talent agency), planning on 26 more half-hour TV films in *The Adventures of Kit Carson* series starring **Bill Williams**. Shooting is scheduled for July with **Sloan Nibley**, Western motion picture producer-writer, in the supervisory capacity.

A new TV series, featuring motion picture personalities, will be filmed by company with **Jennings Lang**, of MCA, heading this project.

* * *

Production has started on five new half-hour films by **Screen Gems Inc.**, Hollywood, for **duPont's** NBC-TV *Cavalcade of America* series. Scheduled are *Thomas Jefferson* by **Brown Holmes** for May 16 shooting; *Samuel Morse* by **Richard Blake** for May 23; *Nathaniel Hawthorne* by **David Dortort** for June 6; *Jefferson Davis* by **Warner Law** for June 20, and *John Honeymoon* by Mr. Dortort for June 27. **Jules Bricken**, assisted by **Eddie Saeta**, is producer-director.

* * *

New series of 13 15-minute films for television featuring sewing expert **Lucille Rivers** will be produced beginning in early June by **George F. Foley Inc.**, New York. Offered for early fall release, the series will be syndicated for sale to stations.

* * *

Al Buffington, Hollywood TV program packager-producer, is starting a 13 quarter-hour TV film series at General Service Studios, titled *Moments of Inspiration*. Narrating the films, dealing with inspiration as related to important people of history, is **Roy Maypole**, m.c. - producer - announcer, KTTV (TV) Hollywood.

* * *

Don McNamara, executive vice-president, Dudley Television Corp., Beverly Hills, and **Frank Ryhlick**, radio-TV director Ross, Gardner & White Adv., Los Angeles, are packagers-producers of a new quarter-hour KHJ-TV Hollywood program, *Hollywood Feature Story*. The show, spotlighting film clips from current first run motion pictures, is sponsored by **Columbia Utilities Inc.**, Los Angeles (Hotpoint kitchen appliances).

* * *

Travelogue library of **Burton Holmes**, recently acquired by **Sol Lesser**, is to be edited into 26 half-hour TV film series and released under title *It's a Small World*.

* * *

Elaine Starr, of **Elaine Starr Productions**, N. Y., has signed with **Leslie Raush**, producer, for production of new drama-documentary series of TV films titled *Hand and Seal*. Presented under name **Raush-Starr Production**, the first drama of series will be called *Let It Be Done*. Filming will begin May 26.

* * *

MCA TV announces start of a new series, *Secret Agent*, being filmed in Hollywood by Revue Productions.

* * *

Van Praag Productions, New York, film producer and distributor has announced formation of a new foreign language film production unit, specializing in film commercials, notably in Spanish. **William Van Praag**, firm's executive producer, said the move was prompted by "rapid expansion of TV outlets in the Latin American area, particularly in Mexico and Cuba." He noted that 10 Spanish-language television stations already are in operation and nine under construction or broadcasting test patterns, in addition to 24 TV construction permits issued in Mexico. The new Van Praag division will dub sound tracks and titles on existing film commercials and distribute new films in English and Spanish simultaneously.

* * *

Stage Society, Hollywood, formerly The Arthur Kennedy Little Theatre Group, will develop talent to be utilized by **National Repertory Theatre Inc.**, recently formed for production of TV films being financed and distributed by **Interstate Television Corp.**

* * *

Bing Crosby Enterprises, Culver City, has signed **Bobby Driscoll**, film actor, for the starring role in *The Best Years*, second half-hour film in writer **Louis Bromfield's** TV series.

The firm's *Corney Johnson*, half-hour TV film series, will star **Richard Rober**, stage-film actor, with **Bernard Gyrard** and **Richard Dorso** co-producing.

* * *

Penant Productions Inc., Hollywood, signs **Talent Assoc.** (casting agency) headed by **Fred Messenger** and **Jack Murtin**, to cast 13 half-hour *Date With Destiny* TV film series.

* * *

Sales . . .

Stegmaier Brewing Co., Wilkes-Barre, Pa., has started *Televideo Theatre*, series filmed by **Screen Televideo Productions**, Beverly Hills, and originally titled *Electric Theatre*, on WGAL-TV Lancaster, Pa., and WNBF-TV Binghamton, N. Y. The contract is for 13 weeks through McManus, John & Adams, New York.

* * *

Screen Gems Inc., N. Y., last week announced the sale of its *TV Disc Jockey Toons* to **Radio Tupi** (PREF-3 TV) Sao Paulo, Brazil—said to be the first Latin American television station to air the package. RCA's International Div. has acquired exclusive rights to *TV Toons* series for Sao Paulo, and telecasts of the feature will begin shortly, Screen Gems spokesman said.

* * *

Availabilities . . .

Hygo Television Films Inc., N. Y., has acquired 100 features and 85 short films for television which are available for immediate use, the firm announced last week.

* * *

Film People . . .

Edward Sedgwick, motion picture producer-writer-director, has been signed by **Desilu Productions**, Hollywood, as production supervisor on CBS-TV *I Love Lucy* series for **Philip Morris & Co.** Directing films of May 30 and June 6 is **William Asher**, TV film director, replacing **Marc Daniels** who has recently resigned to develop TV film properties of his own.

* * *

Wally Fox has been set to direct the first cycle of 13 pictures of the *Ramar of the Jungle* series for **Arrow Productions**, starring **Jon Hall**. Production starts May 26th.

DTN NAMES TWO

Jacobs, Clark Join Sales

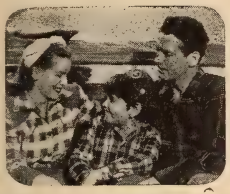
HERBERT H. JACOBS has been appointed sales manager for the DuMont TV Network's Film Dept. and Wilmer S. Clark has been named California representative for the department, Manager Donald A. Stewart announced last Monday.

Mr. Jacobs resigned as vice president and general manager of Sutton Television to join DuMont. He previously had filled comparable posts with Abbey Television and Atlas Television. He also was general manager for several motion picture theatre chains during the previous 15 years, and has directed advertising and public relations for hotel and retail store chains.

Mr. Clark has been associated with broadcasting since 1934, when he joined the sales staff of WOOD Grand Rapid. He subsequently was with Howard H. Wilson Co., station representative firm, as eastern office manager, and with WHDH Boston as sales director. Most recently, he has been sales manager of WJEF Grand Rapids.

UTP INCREASES SALES

Four More Reported



SALES in four more markets have been reported by United Television Programs, New York film distributor with ABC's WJZ-TV New York listed as having contracted for *Hollywood Off Beat*, series in which actor Melvyn Douglas plays a private detective. Same program was also sold to WTTV (TV) Bloomington, Ind.

Other contracts recently completed by UTP sales representatives according to Aaron Beckwith, sales director, were for *Double Play With Durocher and Day*, which was purchased by the Aluminum Window and Awning Co. through Allmayer-Fox agency for WDAF-TV Kansas City.

Movie Quick Quiz, 15-minute quiz package prepared for five programs weekly, was placed on WDTV (TV) Pittsburgh, starting June 19. Braun Baking Co. will sponsor. Ketchum, McLeod & Grove is agency.

AS PROOF that "radio is *still* a wonderful advertising medium" WSOK Nashville, Tenn., has distributed reproductions of a letter from a satisfied customer to members of the broadcast industry. The cosmetic firm, White's Specific Toilet Co., reluctant at first to even try radio advertising, wrote a congratulatory letter to WSOK stating that in March, the first month the company was on the air, sales in the Nashville area jumped 65% and month of April showed a 600% gain over the same period last year.

programs promotion premiums

JOINT PROMOTION

JOINT promotion has been agreed on by WIP Philadelphia and *Baseball* magazine. In May issue, publication is carrying feature story describing activities of Phillies team. WIP's sports director, Jim Leaming, will highlight the article on his *Sports Shots* program, which in turn will be plugged by *Baseball* with two-color posters of Mr. Leaming on display at news stands.

LITERAL SLOGAN

TO 11-year-old Bobby Benhard of Milltown, N. J., the meaning of the slogan "Wherever You Go There's Radio" is both literal and far-reaching. When Bobby had his appendix removed recently, WCTC New Brunswick in cooperation with the hospital made on-the-scene minitape recordings of every step of the boy's treatment from the day he was admitted, through the actual operation, to the removal of stitches six days later. Project titled *The Story of an Operation* was engineered by hospital's public relations director for broadcast on Hospital Day.

WTVJ (TV) ENTERTAINS

PRODUCERS, directors and technicians joined with staff artists at WTVJ (TV) Miami, Fla., to present a variety show at Veteran's Administration Hospital in Coral Gables May 11. Ted Clark was emcee of a program of dancing, comedy acts, singing and pantomime. Production was under direction of Harry Berry. Cast included Ash Dawes, promotion manager; Hugo Malaga, studio technician; Ray Gabor and Shannon Wallace, producers; Wilson Griffith and Bob Alshouse, directors; Jack Cobb, announcer, and Dod Farrell, Elaine Krassner, Gale Fisher and Al Reiser.

WKRC-TV AUCTION

DEBT of gratitude was paid May 11 to the Salvation Army by WKRC-TV Cincinnati, when *Swap Shop* program was used to auction off items such as Arthur Godfrey's tea cup and Ken Murray's cigar. Salvation Army, during recent flood, diverted its own efforts to help the station in its campaign to aid South Sioux City, Neb. Profit from the auction was turned over to the Salvation Army.

BOOKLET PROMOTION

NEW binder type promotion booklet has been distributed by CKWX Vancouver on the Vancouver and British Columbia market. Complete with a number of maps of the province and the Greater Vancouver area, booklet gives facts and figures and shows markets served by the station as well as services which CKWX offers advertisers.

WAVE POLITICAL NEWS

WAVE Louisville is going all-out in political coverage this year, a station news release reports. WAVE and its network, NBC, have broadcast all state primaries to date plus the Kentucky Republican Presidential delegates nominations and various political educational features. WAVE plans to broadcast other state primaries, the state Democratic delegates nominations, both national party conventions and the election in November.

HIGH SCHOOL REMOTE

ED PEARSON, WPJB Providence, R. I. personality, taped all but news segments of his 'teen-age talent show, *Open House*, at a local high school. For nearly a month before the show was taped, students had been voting on disc favorites. Mr. Pearson, Harmon Hyde, program director and Bob Morgan, engineer, moved equipment into the high school where nearly 300 pupils put their talents on tape.

POOLSIDE BROADCASTS

AIRING of WFBR Baltimore's *Melody Ballroom* will take place from Meadowbrook, the city's largest privately-owned pool June 2-Aug. 29. The disc jockey show features Ralph Phillips and Bill LeFevre. John E. Surrick, WFBR vice president-general manager, said that the idea has brought new business to the station during the usually dull months.

BASEBALL QUIZ

YOUTHFUL members of baseball teams in the WTCN-TV Minneapolis-St. Paul area are taking part in the quiz-type *Baseball Clinic* TV show by the station Saturday mornings, with prizes awarded to youngsters who answer questions correctly.

REAL ESTATE DRIVE

KDYL Salt Lake City is airing an aggressive campaign on behalf of the Capson Realty Co., Salt Lake City. Through a new quarter-hour quiz show, *Dial-A-Home*, the station is helping sell real estate. Capson ads in newspaper classified space cross-promote the radio show and give the answer to the broadcast quiz question.

WSM-TV RESULTS

MAILING piece from WSM-TV Nashville tells how the C. B. Ragland Co. of Nashville, for its Colonial Foods, put on a spot campaign, concentrating on one of its many canned products at a time. Julian P. Ragland, firm vice president, wrote, "We are very pleased to tell you that since starting these spots, our sales comparisons have been extremely favorable, with the product sales showing immediate gains from 10% to 150%."

BBC DRAMAS

PLAYS adapted for radio highlight the May offerings of WFUV-FM New York, Fordham U. station, in collaboration with the British Broadcasting Corp. Among the special dramas selected for FM presentation are William Shakespeare's "Measure for Measure," Moliere's "Tartuffe" and Stanley Weyman's "Under the Red Robe." The Weyman play, an outright BBC production, will run six consecutive Mondays, 10-30-11 a.m., starting May 26.

BOWLING TOURNEY

WHEN the American Bowling Congress moved into Milwaukee for its 49th annual tournament, the A. Gettelman Brewing Co. launched a full-scale local drive to promote the sports event. Company tied in retail promotion with exclusive TV coverage of tourney on WTMJ-TV every other Thursday throughout 84 days competition. TV program was developed around specially-built movable dollies to cover 40 alleys. Dealer tie-ins and media were used to publicize tourney. Gettelman agency is Hoffman & York Inc., Milwaukee.

Eastern Network

$30,000.00

A profitable combined operation showing consistent increases. This fulltime network facility is the only station in an attractive small eastern market.

Southwest Regional Network

$185,000.00

A well established network facility dominating a wide area from a fast growing market. Investment will show better than a twenty-five per cent return on basis of five year average profits. Liberal financing.

FM APPLICATION

Emporia, Kan.—Kansas State Teachers College of Emporia, 91.1 mc, 250 w. Estimated construction cost $1,800. Applicant is state college. Filed May 24.

ARRL TV PROGRAM

Expansion Is Voted

CONTINUANCE and expansion of the TV interference program [B•T, May 5] has been voted by the board of directors of the American Radio Relay League. At its annual meeting in Hartford, Conn. fortnight ago, Goodwin L. Dosland, an attorney from Moorhead, Minn., was elected new president of ARRL.

The ARRL board also voted to ask the FCC to permit "hams" radiotelephone privileges on 7200-7300 kc and 21.25-21-45 mc, plus an extension of radiotelephone privileges from 28.5 to 28.25 mc. The ARRL will also ask the FCC to provide 3775-3800 kc for mobile radiotelephone operation 7150-7200 kc and 51-53 mc for novice operation.

The board, which represents 35,000 U. S. radio amateurs, selected Houston, Tex., for its 1953 convention and established a special membership rate for blind amateurs.

Meanwhile, Crosley Division of Avco Manufacturing Corp. assured owners of its TV receivers that they need not worry about interference from amateur operation on the new 21-21.45 mc band. The intermediate frequencies of Crosley TV sets are 21.9 mc, an announcement explained, and thus puts its receivers "well beyond the amateur interference range under normal conditions."

SCRIPT LIBRARY FOR SALE

One man operation. Thousands of scripts including mimeograph machine. Cash, $1,000. Paul Adler, 535 Fifth Avenue, New York, New York. Murray Hill 7-1881.

NARND MEETING

Cleveland Named as Site

NATIONAL Assn. of Radio News Directors has selected Cleveland for its 1952 convention, NARND President Jim Bormann, WCCO Minneapolis, announced last week.

Mr. Bormann said also that the annual meeting had been shifted from mid-November to Dec. 1-3.

WHEE Again Is WBMS

WBMS Boston, which changed its call letters to WHEE in April 1951, has changed back again to its former call letters, Norman Furman, WBMS general manager, announced last week. FCC reported that approval for the change back to WBMS was given earlier this month.

KOB, WJZ ISSUE

ABC Again Petitions FCC

DON'T approve the transfer of KOB-AM-TV Albuquerque from T. M. Pepperday (*Albuquerque Journal*) to Time Inc. and former FCC Chairman Wayne Coy [B•T, April 28, March 3] without clearing up the status of KOB on 770 kc, ABC petitioned the FCC last week. ABC's WJZ New York is the Class I station on that wavelength.

The network asked the Commission, when and if it approved the $600,000 sale, to simultaneously order 50 kw KOB back to its authorized 1030 kc.

KOB has been operating since 1941 on 770 kc under special service authorization. It originally was granted a CP on 1180 kc in 1940, but that frequency was deleted from U. S. assignments by the first NARBA. The FCC then changed KOB to 1030 kc, but this was opposed by WBZ Boston, a Class I station on that frequency. The Commission next granted KOB an SSA on 770 kc and the Albuquerque station has been operating under extensions of that temporary authority ever since 1941.

ABC has protested that assignment over the decade, appealing a further extension to the U. S. Court of Appeals last year. The court remanded the case back to the FCC with instructions to come to a decision on the matter [B•T, July 23, 1951].

ABC asked the Commission to (1) dismiss KOB applications for CP and license on 770 kc, (2) make approval of the transfer of KOB properties conditional on clarification of the AM station's assignment, (3) carry out the instructions of the U. S. Court of Appeals, and (4) rescind station's SSA to operate on 770 kc.

Arthur E. Rydberg

ARTHUR E. RYDBERG, 49, veteran WHO Des Moines transmitter engineer, died of a heart attack while on duty May 10. He had served on the transmitter crew since 1934. Surviving are his wife, Violet, and a son, Garry, 14.

PROGRAM CLINICS

BMI Ends Radio, Opens TV

LAST of 42 BMI radio program clinics were completed last week [B•T, May 12] with meetings in Maine, Alabama, New Brunswick and Ontario, while plans got under way for BMI television clinics in New York today and tomorrow (Monday and Tuesday), in Chicago May 22-23 and in Los Angeles May 26-27. (See story, page 66).

Attendance at the 42 clinics was well above the 3,000 mark and broadcasters seemed well satisfied with results.

Fuller reports on three clinics, held in Boston, Gainesville, Fla., and Seattle, were received last week:

BOSTON, May 9

The Boston BMI clinic [B•T, May 12] claimed the largest attendance of any regional BMI clinic ever held in the United States, with 140 broadcasters attending from five states under auspices of the Radio Executives Club of New England.

Frederic R. Gamble, president of the American Assn. of Advertising Agencies, told the big group that he expected a rise in advertising volume to $9 million, or 50% more than at present, to maintain the present $300 billion economy in peacetime.

He said more and better selling will be needed "to find customers

Boston clinic sees get-together of (l to r) BMI Vice President Roy Harlow, AAAA President Gamble and REC President Edmund Shea.

* * *

for the enormously increased output of our U. S. plants once our defense tooling-up is completed."

Mr. Gamble described the advertising structure as having three parts: (1) The commission system of agency compensation, (2) recognition of agencies (3) the 2% cash discount.

Dismissing the first as a great incentive system, but "no problem," he said of agency recognition:

Is it a bona fide agency, independently owned? Is it free from control by any advertiser, so that it is unprejudiced and unrestricted in its service to all clients? Is it free from control by any medium owner . . . for unbiased advice to advertisers in the selection of media?

Does the agency keep all the commission you allow and devote (it) to the service and development of advertising as you require? That is, not rebate any of the commission to any client. . . .

Does the agency have adequate experience and ability to service advertisers . . . the know-how to make advertising succeed? . . .

Is the agency financially sound? This means the agency should have financial integrity, collect promptly from its clients, pay your station on time and have enough capital on hand to meet emergencies. . . .

On the third part of the structure, Mr. Gamble advised broadcasters to follow the lead of "most other media" in providing "agencies and themselves" with "the customary 2% cash discount" for payment of bills on time. He said that other media do not pay the 2% discount "out of their own revenue. They make allowance for it in setting their rates so as to receive the net return they wish."

GAINESVILLE, Fla., May 8

Representatives of 18 Florida radio stations and faculty members from four Florida universities heard the state's second BMI program clinic, sponsored by the Florida Assn. of Broadcasters, with FAB President S. O. Ward, manager of WLAK Lakeland, presiding, and Garland Powell, director of WRUF Gainesville, as chairman of the arrangements committee.

Fritz Sorenson, program director, WKRS Waukegan, Ill., told how his station is "Making Local News Pay Off," and Frank McIntyre, production manager, KLIX Twin Falls, Ida., said management's main problem is keeping a high staff morale.

Ray Clancy, general manager of WMFJ Daytona Beach, urged "more imaginative merchandising" in building programs. "Radio is show business and must use showmanship," he said.

Three factors important in adjusting the current rate card, according to Robert R. Tincher, vice president and general manager of WNAX Yankton, S. D., are (1) audience flow, (2) audience turnover and (3) ratio between sets-in-use and ratings.

Hale Bondurant, also a Columbia, S. C., clinic speaker, told listeners that radio alone delivers all three markets (metropolitan, rural non-farm and rural) to the advertiser. All of these markets, he said, can be served at the same time, but the station should build its character and individuality.

Profs. Tom C. Balton and John Paul Jones, U. of Florida, also spoke.

SEATTLE, May 6

The Seattle BMI program clinic [B•T, May 12], co-sponsored by the Washington State Assn. of Broadcasters, was attended by 80 radio and television executives with Leo H. Beckley, president of KBRC Mt. Vernon and incoming president of WSAB, opening the sessions.

William Holm, general manager of WLPO LaSalle, Ill., who also spoke at the San Francisco and Vancouver clinics, described his 250 w station's commercially successful news programs in a market saturated with 40 AM stations. Harry McTigue, president of WINN Louisville, also a speaker at the San Francisco and Vancouver clinics, emphasized block programming of music.

Robert Wesson, program manager of KHQ Spokane, told the group that "intelligent planning by the program department must include selling salesmen on the idea that they are marketing programs, not merely time."

New ABC Signatures

ABC radio and TV today (Monday) inaugurate new audio and video identifying signatures. The familiar "This is ABC, the American Broadcasting Company," was to be heard the last time yesterday and from 8 a.m. EDT today listeners will hear: "This is ABC—Radio Network." Similarly, at the conclusion of ABC-TV's opening network telecast at 6:45 p.m., the new visual signature will show a head-on shot of a camera lens with iris closed, then opening gradually to reveal the letters "ABC" centered on the lens opening. Audio identification following all ABC-TV programs will be: "This is ABC —Television Network."

Network Cancelled Time

(Continued from page 25)

lem for CBS-TV. When Pillsbury Mills takes over the last quarter hour of the Godfrey show on television (10:45-11 a.m.), the program will be followed by the regular *Bride and Groom* show, which is sponsored by the rival General Mills, thus causing a conflict of products on succeeding shows. Problem is yet to be resolved.

The Gulf Oil purchase is for five quarter-hours a week (10-10:15 p.m.) of *John Daly and the News* on 225 ABC network stations, effective June 16 (see story page 14) Young & Rubicam, is agency.

The Wrigley-CBS Radio contract placed through Arthur Meyerhoff Agency, Chicago, calls for continuation of Wrigley's current two half-hours a week through the summer with replacement shows, plus the equivalent of four other half-hours a week with various starting and termination dates.

Summer replacements for the advertiser's regular shows will be *Lineup* from June 3-Aug. 5 in the Tuesday 9-9:30 p.m. EDT spot now occupied by *Life With Luigi*, and *Broadway Is My Beat* from July 5-26 in the Saturday 8-8:30 p.m. period replacing *Gene Autry Show*.

Other shows to be sponsored by Wrigley are the following, each scheduled in the 9-9:30 p.m. EDT segment (some pre-emptions by coverage of the political conventions in July are expected):

Meet Millie, Sundays, July 6-Aug. 10; *Romance*, Mondays, July 14-Aug. 25; *Johnny Dollar*, Wednesdays, July 2-Aug. 20; *Mr. Chameleon*, Thursdays, July 3, Aug. 21.

CBS Wage Increase

WEEKLY 15% wage increase for employes has been approved by the Wage Stabilization Board in CBS Hollywood contract with Office Employes International Union. WSB, however, rejected proposal for a three week paid vacation for employes with five years of service. OEIU plans to appeal latter decision. Further arbitration covered in contract starts May 20.

Liberty Suspends

(Continued from page 25)

ealized the expense of such an peration.

Stations frequently claimed they ad trouble getting instructions nd decisions from the Dallas headuarters. They felt the network as built around the president, ith officers at the vice presidential evel unable to make decisions. Acording to one version, LBS was all generals and no privates."

Lacking official instructions after he network suspended, affiliates ere wondering about details of heir business relations with LBS.

B. R. McLendon and Mr. Cullen ave been generally referred to as he financial backers of the network. The elder McLendon has xtensive theatrical interests in he Southwest. Mr. Cullen is a naionally known Texan with oil inerests.

Network originating points have een Dallas headquarters, New ork and Washington. LBS had announced recently that its key outlet was being moved to KLBS Houston, formerly KLEE [B•T, May 5]. Transfer of LBS headquarters was being effected though operations were still being directed out of Dallas.

The LBS sales staff in New York was curtailed last March, when rumors about its future were active. At that time, Mr. McLendon strongly denied that the network was having serious troubles.

Failure of Falstaff to renew its baseball sponsorship was felt by some affiliates to have started the 1952 crisis. A fortnight ago, it was understood Sears, Roebuck & Co. was not renewing its Liberty contract for Coldspot freezers, effective May 16. Other national advertisers are said to have voiced concern about signing sponsorship contracts during pendency of network litigation.

WOL Washington, owned by Peoples Broadcasting Corp. (also owner of WRFD Worthington, Ohio), provided news, commentary, capital events and program service to the network.

Earlier last week, WCFL Chicago and LBS severed relations as WCFL took over rights to White Sox baseball games. Liberty had bought Sox games for the network earlier in the season, with WCFL as Chicago outlet. The network is understood to have been given a rebate on the purchase price by the White Sox, which then is believed to have obtained about $100,000 from WCFL for the rest of the season.

WOPA Settlement Reported

WOPA Oak Park, Ill., originally an LBS affiliate, was reported last week to have reached an out-of-court settlement with Liberty after it charged breach of contract. This, it was understood, restored affiliation to WOPA.

Liberty's suspension found the network holding costly rights to broadcast the two major political conventions from Chicago this summer. Peoples Broadcasting Corp. was considering a proposal to take up the facilities.

In a statement quoted Friday by Associated Press, the elder McLendon said LBS was not in financial difficulty, adding, "We are not contemplating bankruptcy proceedings and reports that we may file in bankruptcy court in Dallas are untrue."

Herbert E. Evans, general manager of Peoples, said Friday his organization is considering offering, through WOL, news and other services to stations in mid-Atlantic states on a cooperative basis.

Interested stations will meet soon to see what can be worked out, he said, "probably on a non-profit basis with stations sharing expenses and earnings of such a project. The only information we have today is that Liberty has suspended operations. Whether or not this suspension is permanent is still to be learned." He said the LBS suspension will not materially affect Peoples operations.

ENJOYING Florida sun after semi-annual management meeting are these Storer Broadcasting Co. executives: (first row, l to r) Gayle Grubb, vice president-managing director, WJBK-AM-TV Detroit, and Glenn Jackson, managing director, WAGA-AM-TV Atlanta; middle row, A. Garrin Ferrise, managing director, WMMN Fairmont, W. Va.; George B. Storer Jr., vice president-managing director, KEYL San Antonio; J. Robert Kerns, vice president-managing director, WSAI Cincinnati; Allen Haid, vice president-managing director, WSPD-AM-TV Toledo, and Miller Babcock, managing director, WGBS Miami; third row, William Rine, regional vice president, central district, and managing director, WWVA Wheeling, W. Va.; Tom Harker, vice president-national sales director; George B. Storer, company president; Lee B. Wailes, executive vice president, and Stanton P. Kettler, vice president, southern district.

POLITICAL FUNDS

House Votes for Inquiry

HOUSE approved by voice vote last Monday a resolution to set up a special committee to look into campaign expenditures of House candidates [B•T, March 24]. It was sponsored by House Majority Leader John W. McCormack (D-Mass.).

In addition to investigating methods of contributions, expenses, money raised or subscribed by candidates, individuals, groups and corporations, the resolution (H Res 558) provides for study into "use of advertising space, radio and television time . . . moving picture film" and other services made available to the House candidate in his campaign.

WALKER LETTER

Acknowledges Ad

EXCERPTS from FCC Chairman Paul A. Walker's speech at the NARTB convention were printed and praised in an advertisement placed by WTWA Thomson, Ga., owned by Edgar H. Kobak, in the *McDuffie Progress*, of Thomson, published by Mr. Kobak.

Last week, after the complimentary ad had been brought to his attention, Chairman Walker wrote to Mr. Kobak:

"Now that this generous helping of rich, purple prose from my Chicago exhortation has been forever embalmed in the pages of the *McDuffie Progress* for posterity and beyond, I really have nothing more to live for. . . .

"This issue also gives me some inkling as to the irresistible attraction the city of Thomson has for you. The cafe society, the night clubs and the teeming crowds of New York apparently pale into insignificance beside the Saturday night barn dances, the rodeos and the strawberry shortcake festivals of the Camellia City of the South."

JACK BERCH, star of ABC radio *Jack Berch Show*, tees off Western Child Safety Week at meeting of Hollywood Ad Club today (May 19), with talk on "Value of Advertising Child Safety."

REBROADCAST RULE HAILED BY BROWN

GORDON P. BROWN, owner of WSAY Rochester, N. Y., and long-time gadfly of networks, jubilantly hailed FCC's interpretation of rebroadcasting provisions of Communications Act at Washington luncheon news conference he hosted Friday. Mr. Brown's attitude was that Commission's opinion (see story on page 24) eliminated control of networks over rebroadcasting of programs, aided bargaining position of affiliates vis-a-vis networks.

If sponsor approves rebroadcast of his program, Mr. Brown explained, then station which originally broadcast it should have no hesitancy in approving rebroadcasts. Mr. Brown alluded to Commission's order which requires station which declines rebroadcast permission to justify its refusal in writing to FCC.

Commission also, Mr. Brown believed, invited Congress to pass Sheppard bills (HR 10 and 73) which would legislate control of programs out of networks into hands of sponsors or package owners.

Rebroadcasting means more income for independents and affiliates, Mr. Brown contended. He distributed booklet to show that topnotch network shows got higher rating on rebroadcasts than they did on original airings (e.g., Jack Benny on CBS at 4 p.m. on Pacific Coast had rating of 15.7, rebroadcast by same station at 9:30 p.m. brought him rating of 20.7). Basis of Mr. Brown's belief seems to be that rebroadcasts attract new audience to show.

Mr. Brown, who claimed to have spent $40,000 of his own money in fighting networks and to be responsible for FCC's duopoly rule, forcing sale of Blue Network by NBC, and other Chain Broadcasting regulations, also announced formation of American Assn. of Affiliated & Independent Radio & Television Broadcasters (AAAIRTB).

WSSV APPLICATION

TOTAL new television station applications filed last week raised to three Friday when WSSV Petersburg, Va., filed for Channel 8, with 27.8 kw ERP (see early story page 61). Principal WSSV stockholder is Louis H. Peterson, owner of WNOR Norfolk, Va., and Peterson Adv. Agency, Petersburg. Cost of new TV outlet estimated at $248,283. Application estimated first year's operation would be in red—with $200,000 operating cost and $175,000 expected revenue.

Amended application, requesting UHF Channel 59, was filed by WFAM Lafayette, Ind. Cost for 20 kw ERP station was given as $158,000. Sole owner O. E. Richardson.

Thirty-year-old KGU Honolulu, Hawaii, owned by *Honolulu Advertiser*, announced it plans to apply for Channel 4 with 37.2 kw ERP. Antenna will be atop AM tower, on top of Advertiser Bldg.

SAG ISSUES THREAT

SCREEN ACTORS GUILD will "assert its legal rights" and cancel existing working arrangement with members of Alliance of Television Film Producers unless agreement on new collective bargaining contract is reached by June 24 to comply with 60-day notice regulation. Original SAG-ATFP contract expired last December but was extended on temporary basis during negotiations.

CO-OPS ON CONVENTION

LOCAL AND REGIONAL advertisers will be able to sponsor on network co-op basis Democratic and Republican national conventions direct from Chicago over MBS in July, William H. Fineshriber, Mutual executive vice president, announced Friday.

Decision was made after Mutual's 550 stations reported that they had been swamped with local and regional requests to share convention time, Mr. Fineshriber said.

PAULEY FILES PETITION IN PRO FOOTBALL CASE

EDWIN W. PAULEY, 27½% partner in Los Angeles Rams pro football team, petitioned U. S. District Court, Eastern District of Pennsylvania, Friday to protect his personal rights in pending U. S. anti-trust action against National Football League and member clubs. U. S. suit charges conspiracy in controlling radio-television rights to games.

Mr. Pauley, major stockholder in San Francisco TV applicant, Television California, told court he opposed club's adherence to league's policy, adding he had no control of club affairs under agreement giving Daniel F. Reeves, 30% partner, full operating powers. Last January, Rams were only club voting against continuance of league rule binding all members to follow league policies. Mr. Pauley said he has consistently opposed this rule.

TALL TOWER PROBLEMS ASSIGNED TO SUB-GROUPS

ORGANIZATION of industry-government committee working on tall TV tower problem [B•T, May 12] into subcommittees to explore facets of situation—including one to determine extent, if any, of dangers to air navigation—was decided Friday at second meeting of "ad hoc" committee.

To study whether problem exists, and if so to what magnitude, was put up to committee comprising Robert E. L. Kennedy, Assn. of Federal Communications Consulting Engineers; Neal McNaughten, NARTB; John Evans, FCC and D. D. Thomas, CAA. Preliminary study by Mr. Kennedy indicated that of 1,249 TV channel assignments in continental U. S., 170 are to cities with populations over 50,000; 549 in 10,000 to 50,000 class; 530 to cities in under 10,000 class.

Other subcommittees were set up to make detailed study of FCC's recommended criteria, to investigate corollary matters—such as feasibility of using common sites for all TV antennas in one city, etc. CAA and FCC also constituted a special group to review regulations for making and lighting of towers.

CBS-TV BUYS PROPERTY

CBS-TV has purchased property of Sheffield Farms located at 56th st. and 10th ave., N. Y., with nine acres of floor space which will be converted in fall into largest TV plant on East Coast, officials say. It will house 10 studios and will be large enough for helicopters to land on roof with last-minute news film.

PEOPLE...

HAROLD FRAZEE, president, Wiley, Frazee & Davenport, to Scheideler, Beck & Werner Inc., N. Y., as executive head of agency's new drug and cosmetic division.

NANCY KEARNS, Paul H. Raymer Co., N. Y., station representatives, to Hicks & Griest Inc., same city, as assistant to radio and television director, Peter Krug.

JAMES E. DUFFY has been named manager of advertising and promotion dept. of ABC's Central Division, Chicago, effective last Friday. Mr. Duffy has been with ABC since 1949.

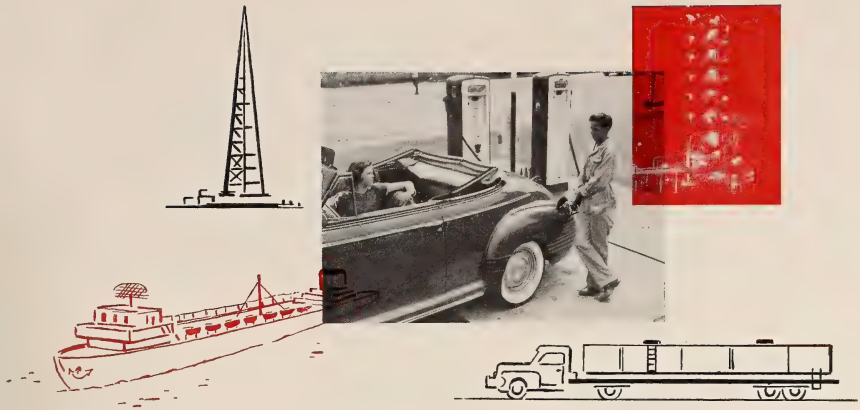
WENDELL HOLMES, D. P. Brother, Detroit, to Kenyon & Eckhardt, that city, as copychief.

RICHARD L. PELZMAN, formerly head of his own firm in Washington, named eastern films syndication manager of Ted Baldwin Inc., N. Y., promotion and public relations firm.

STOCKHOLDER DIFFERENCES RESOLVED SAYS SNADER

LOUIS F. SNADER, president of Snader Telescriptions Corp., Los Angeles, declared firm is not in financial difficulties or for sale, calling reports to that effect "unfounded and untrue" following policy meeting last week. Differences with principal stockholders have been resolved, he said.

Mr. Snader asserted all phases of business are in soundest possible financial condition. Some 42 remaining telescriptions in second library series yet to be filed, he said, with contracts for additional production to be concluded in time for next board meeting July 2.



In reorganization, E. Jonny Graff, executive vice president in charge of sales, takes over operations of Snader Telescriptions Sales Inc., STC subsidiary. He replaces Reub Kaufman, president, who is leaving organization.

GE TRANSMITTER

UHF transmitter rated for 1,000 kw radiated power was announced by General Electric Co. in speech by Lewis F. Page, broadcast specialist, before Southwestern Institute of IRE in Houston Saturday. Transmitter has rated power of 60 kw and combines with GE helical high gain antenna to radiate up to megawatt in power. Heart of new transmitter, fourth in GE's UHF line, is Klystron tube. No price has yet been announced for new 60 kw transmitter. GE sells 100 w UHF transmitter for $37,000, 1 kw for $65,000, 12 kw for $140,000. These compare to VHF transmitters as follows: 5 kw, $65,000; 35 kw, $145,000; 50 kw, $205,000. Prices for GE's helical antenna were reduced last week—three-bay antenna, from $13,500 to $9,000; four-bay, from $18,000 to $12,000; five-bay, from $22,500 to $15,000.

NEW UHF TUBES

AVAILABILITY of two newly developed UHF tubes announced Friday by tube department, RCA Victor. New tubes are forced-air-cooled "1 kw" power tetrode for UHF TV transmitters and miniature oscillator triode for station selectors in UHF home receivers. Forced-air-cooling principle of power tetrode, designed to operate at high frequencies with high efficiency, allows for simplification in transmitter design, it was said, as well as "substantial" operating economies. Oscillator triode was described as incorporating numerous design features to minimize frequency drift, lead resistance, and other limiting factors which affect stability of conventional UHF tubes.

Esso DOES A COMPLETE JOB . . .

SO DO HAVENS AND MARTIN, Inc. STATIONS . . .

WMBG
WCOD
WTVR

From oil well to refinery to gas station to motorist, and all the numerous steps in between—Esso truly knows its business well. Its skilled geologists probe beneath the surface for oil; its skilled advertising men use the air (WTVR and TV) with standout effectiveness.

In the rich Virginia markets around Richmond, Havens & Martin, Inc. Stations also do a full and fruitful job. Pioneers in TV, AM, and FM, these first stations of Virginia comprised the first complete broadcasting institution in the South. They know their business well, as any Blair man can quickly prove.

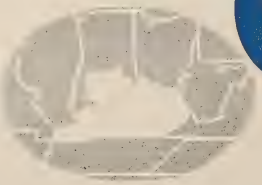
Go where there's GROWTH...

GO WHAS!

A NEW 'RURAL' MARKET... INDUSTRIAL KENTUCKY!

Industry — once limited to urban areas — now spreads healthily throughout Kentucky. Louisville's phenomenal industrial growth is reflected west, south and east as plant after plant strengthens Kentucky's growing list of important manufacturers. Investments of more than $1,000,000,000 for expansion and new plants have been announced for Kentucky — outside the metropolitan Louisville area.



GO WHAS!

No other station, or group of stations in this market can match the audience delivered by WHAS . . . *seven days a week; morning, afternoon and night!*

As in Farm and News programs, WHAS-produced Sports shows have greater listenership than programs presented at the same time by all other Kentuckiana stations combined. WHAS Sports shows have an average share of audience 150% greater than that of the next highest rated station. *(Benson and Benson)*

CLOSED CIRCUIT

TV ASPIRANTS who are holding up their applications on theory that it's advantageous not to show their hand until July 1 filing date are deluding themselves, according to informed Commission sources. It's custom of FCC to allow applications to "mature" for at least 30 days, irrespective of possibility that application might be granted without hearing under channel-by-channel procedure. Hence, authorities recommend immediate filing so that there can be ample public notice of pendency. If you doubt this, ask your nearest Commissioner.

STILL CLOSELY guarded secret is status of Bob Hope-Lehmann Bros. negotiations purportedly looking toward acquisition of radio-TV properties. Newest report is that amount involved is in neighborhood of $15 million. It's known that one prominent western broadcaster has been contacted in regard to management participation in project.

TALK PERSISTS that NBC would still like to acquire KMPC Los Angeles from Richards family as its key outlet. Barrier appears to be agreement on price in neighborhood of $1 million (as against in excess of $2 million asked few years ago). Possibility that sequel to such transaction would be sale by NBC of KOA Denver also is broached, with name of Eddie Lasker, independent motion picture producer on RKO lot and son of A. D. Lasker, of Lord & Thomas fame, mentioned as avidly interested. KOA also mentioned as possible key station for Hope-Lehmann Bros. if NBC acquires KMPC and must sell one of its O&O properties.

KEEN DESIRE of NBC-TV to obtain more Kellogg Co. business indicated by trip last week of Niles Trammell, NBC board chairman, to Battle Creek, Mich., Kellogg headquarters. Mr. Trammell reportedly was hoping to sell 7-7:15 p.m. Monday-Friday to Kellogg for *Space Cadet* now on ABC-TV. If sale comes about, NBC-TV will move *Kukla, Fran & Ollie,* now in that period, to new evening time.

ABSENCE LAST week from FCC regular meetings of Comr. Robert F. Jones may have been factor in failure of FCC to reconsider its new inflammatory rebroadcast rule which makes it mandatory for stations denying rebroadcast privileges to notify FCC within ten days of refusal under penalty of being cited for failure to serve public interests [B•T, May 19]. Action on original rule was taken without presence of Lawyer-Commissioners Rosel H. Hyde or Jones, both of whom are believed to have strong feeling about propriety and legality of Commission's interpretation.

TROUBLE can be expected from another quarter, too, on provocative rebroadcast rule. FCC action violates procedure whereby all new government forms must have approval of U. S. Bureau of Budget. For years there has been in existence Committee on Radio Broadcasting of Advisory Council on Federal Reports, which functions with Budget Bureau

(Continued on page 6)

J. GLEN TAYLOR LEE ENTERPRISES V. P.

CONFIRMING previously published reports [CLOSED CIRCUIT, May 19], announcement was made Friday of election of J. Glen Taylor as vice president of Thomas S. Lee Enterprises. He will serve as general executive in coordination of company's radio and television operations, formal announcement said.

Meanwhile, despite widely current reports, no other changes in Thomas S. Lee-Mutual-WOR organization have been effected. Expected that consolidation of certain activities on customary network-key station basis will be effected under direction of President Thomas F. O'Neill during next few weeks.

Thomas S. Lee Enterprises Inc., shortly expected to become General Teleradio Inc., is subsidiary of General Tire & Rubber Co., and parent corporation of WOR and WOR-TV, Yankee and Don Lee networks and holds majority (approximately 58%) of Mutual, heretofore cooperative network.

Mr. Taylor, prior to his present appointment, was for 12 years executive of General Tire. His last assignment was as director of government operations in Washington. His offices will be located at Mutual headquarters, 1440 Broadway.

RADIO TIME CHARGES MILLION LESS THAN TV

GROSS RADIO network time charges in April 1952 were nearly $2 million below network radio billings for April 1951 and more than $1 million under gross television network time charges for April 1952, according to Publishers Information Bureau. Here's breakdown:

NETWORK RADIO

	April 1952	April 1951	Jan.-April 1952	Jan.-April 1951
ABC	$ 3,244,146	$ 2,980,183	$13,079,310	$11,673,661
CBS	4,943,400	6,487,717	20,047,381	26,213,046
MBS	1,677,748	1,539,801	6,803,956	6,157,399
NBC	4,078,593	4,897,882	16,614,038	19,921,091
Total:	$13,943,887	$15,905,583	$56,544,685	$63,975,197

NETWORK TELEVISION

ABC	$ 1,686,583	$1,432,319	$ 7,920,563	$ 5,555,359
CBS	5,641,831	2,906,891	21,462,640	11,102,297
DuMont	738,926	574,025	2,963,381	1,873,442

AUBREY SELLS MBS SHOW

JIM AUBREY, board chairman of Aubrey, Finlay, Marley & Hodgson Agency, Chicago, sold alternate weeks of *True Detective* mysteries on Mutual (Sundays, 4:30-5 p.m. CST) to Motorola, which is not one of his accounts. His client, Williamson Candy (for Oh Henry). sponsors show bi-weekly after dropping half of schedule. Although Motorola business placed through Ruthrauff & Ryan, Aubrey's agency will get commission on estimated $150,000 order on complete MBS lineup of 550 stations.

NBC WHITE HOUSE CHANGE

NBC has assigned Ray Scherer, of its Washington news staff, to serve as White House correspondent in absence of Frank Bourgholtzer. After vacation, Mr. Bourgholtzer will be assigned to cover Gen. Eisenhower starting with his arrival in U. S. June 2.

BUSINESS BRIEFLY

TODAY SPONSORS ● Bauer & Black Div. of Kendall Co., Chicago (surgical dressings), through Leo Burnett Co., same city, to sponsor 7:15 a.m. Tuesday and 7:20 a.m. Thursday segments of NBC-TV's *Today*, effective June 17. Standard Brands Inc., New York (Chase & Sanborn Coffee), through Compton Adv., same city, undertook 8:20 a.m. Tuesday and 8:45 a.m. Thursday sections as of May 13.

BLOCK DRUG SPOT ● Block Drug Co. (Polident), buying radio spot campaign in 20 major markets starting June 1 for 26 weeks. In addition, Block Drug for its Amm-i-dent Chlorophyl Toothpaste looking for half-hour TV show for this summer. Agency, Cecil & Presbrey, N. Y.

FRISCH FOR UNION OIL ● Union Oil Co. of California will sponsor new series of sports commentaries by Frankie Frisch, former baseball star, on ABC Radio, 5:55-6 p.m. EDT, Monday-Friday, beginning today (Monday). Agency, Foote, Cone & Belding, Los Angeles.

$104,000 TV CONTRACT ● B. C. Remedy Co., Durham, N. C., through N. W. Ayer & Son, Philadelphia, signs $104,000 contract for 52-week spot campaign on WABD (TV) New York starting today (Monday).

MILES MOVE ● Miles California Co., Los Angeles (Alka-Seltzer), moves *Alka-Seltzer Newspaper of the Air* from KNBH (TV) to KHJ-TV Hollywood, two nightly quarter-hours, Mon.-Fri. starting July 1. 52 weeks TV contract involved $130,000. Firm continues twice-daily newscasts on 45 Don Lee West Coast radio stations. Agency, Geoffrey Wade Adv., Hollywood.

BEST FOODS GETS DISCOUNT ● Best Foods Inc., New York, through Benton & Bowles, same city, first taker of 45% discount—offered on minimum of 12 daytime announcements per week—as part of new WCBS-TV New York rate card [B•T, May 19]. Two or three daily spots, Monday through Saturday, to start for Best Foods June 9.

PEQUOT ON MBS ● One of first adver-

P&G SIGNS RED SKELTON; NEW TV TIME SLATED

NBC emerged from season-long battle with CBS for Red Skelton with one-year radio-TV contract starting in fall. Procter & Gamble Co. has bought 7-7:30 p.m. Sundays on NBC-TV, moving from present 10-10:30 p.m. spot which it will retain for another program.

Radio and TV shows to be produced by Russel M. Seeds Co. Participating in negotiations were Freeman Keyes, Seeds president; Bo Roos, comedian's manager, and John West, NBC Western Division vice president. Comedian reportedly held out for complete filming of TV program. New TV series starts Sept. 27. Radio program not yet sold.

at deadline

LIBERTY COAST HOOKUP TO EXPAND EASTWARD

NEW Liberty Radio Network on West Coast will begin operation June 2 with six hours of programming and daily afternoon baseball recreation, Gordon McLendon, LBS president said Friday (early story page 26). Feeder station, he said, expected to be KMPC Los Angeles.

Hookup will be expanded to 16 hours and national affiliations in October, he said. Three McLendon-owned stations in Texas expected to join as network expands eastward.

Mr. McLendon said he will mail 6,000 letters this week to stations and "loyal fans" asking them to petition Congress for Justice Dept. action in Liberty's conspiracy case against major league clubs. He received wire Friday from Rep. Patrick Hillings (R-Calif.), member of House Judiciary subcommittee, asking for outline of charges that Justice Dept. has been delinquent in prosecuting "baseball conspiracy".

CLARIFY TV HEARINGS

CONFUSION concerning effective date of FCC's order of April 14, which removed from hearing those TV applications in hearing when TV freeze was imposed, was clarified by Commission Friday in statement explaining effective date is June 2, same as effective date of Sixth Report lifting TV freeze [B•T, April 14]. FCC dismissed as not necessary petitions of WFOX WISN and WEMP Milwaukee which asked modification of order to clarify date. Similar petition was filed earlier in week by Edwin Pauley's Television California, San Francisco applicant.

WHITE QUARTER HOUR

WALTER WHITE, executive director of National Assn. for Advancement of Colored People, has signed with WLIB New York for weekly quarter hour show, sponsored in New York area by Vim Stores. Beginning June 2, 8 p.m. on WLIB, show will feature interviews with national and international leaders. It is syndicated for distribution in other cities with large Negro populations.

KTRE, KDAL FILE

NEW TV BID filed Friday at FCC by KTRE Lufkin, Tex., seeking VHF Channel 9 with 11.3 kw radiated visual power and estimated construction cost of $223,160. Amended application filed by KDAL Duluth, Minn., for VHF Channel 3 with 25 kw visual power. Estimated cost, $291,500.

KALA SITKA REVOKED

REVOCATION of license of KALA Sitka, Alaska, was ordered by FCC Friday on grounds station stopped broadcasting Dec. 2, 1950, without authorization. Licensed to Baranof Enterprises Inc., KALA is assigned 250 w on 1400 kc. If request for hearing is filed by June 30, revocation will be suspended pending outcome of proceeding.

HAMILBURG IN TV

BRIG. GEN. Ira Hamilburg, Massachusetts racing commissioner, spearheading organization and financing of new Hollywood TV production company to be headed by Leo Reisman, orchestra leader. Irvin Gwirtz, music consultant, to be associated with operation.

In this Issue—

The seething controversy over rate-cutting enters still another phase. Straws in the wind, as the all-radio Affiliates Committee huddled in New York, point to a situation similar to the spring of 1951 when CBS Radio announced a rate reduction and others followed suit. *Page 23.*

In Chicago, John H. Platt, of Kraft Foods, cautioned broadcast executives at a luncheon that TV's star dust is settling kind of low and it was time for the industry to do something about it. Special concern to him, is a purported trend toward network control of programs and talent. *Page 23.*

A House subcommittee is on the verge of a "morals" probe of both radio and television programs. The group starts planning its next move soon. *Page 29.*

Other threats to radio-TV rear on Capitol Hill. Chairman Pat McCarran of the Senate Judiciary Committee introduces a resolution to put a stopper on radio-TV coverage of Senate committee meetings. But industry spokesmen ask to be heard. *Page 27.*

Broadcasters with TV in mind find FCC's list of priority cities in television application processing of immediate interest. *(Page 79).* For browsing there is the feature, "Antenna Location," by Malcolm I. Ruddock, New York attorney instrumental in the Empire State Bldg. joint antenna project. *(Page 82).* For practical study there is a roundup of BMI TV clinics in New York and Chicago. *(Page 80).*

In the so-called new community, radio is the friendly neighbor. A new approach to radio's wide penetration is noted by Westinghouse Radio Stations' W. B. McGill. *Page 24.*

Retail store traffic is finding an effective conveyor via radio. It's the theme of Advertising Research Bureau Inc.'s studies reported by B•T. *Page 26.*

Stations which are ex-Liberty Broadcasting System affiliates are exploring regional groupings, now that Liberty has suspended operations. *Page 26.*

Rights to radio-TV pour green stuff where the majors need it the most, in the till. A House subcommittee reports on the big leagues. *Page 25.*

Four broadcasters are holding honors following the annual presentation of the Sloan Awards. *Page 29.*

In the political broadcast arena, NARTB announces it supports the Horan bill and none other. *Page 27.*

Twelve Senators wade into the problem of a forthcoming glut in FCC processing of TV applications. They come up with a proposal for more examiner teams. *Page 88.*

Upcoming

May 26-27: BMI TV Clinic, Hollywood.
May 27-29: National Sales Executives, Hotel Fairmont, San Francisco.
June 2: BAB Sales Clinic, Portland, Me.

Closed Circuit

(Continued from page 5)

and FCC. Present chairman is Ben Strouse, WWDC Washington, who succeeded Wayne Coy when latter assumed chairmanship of FCC.

WITH JULY 1 date approaching when colored margarine can be sold in state of New York, margarine companies are battling it out for availabilities in radio and TV spot campaigns, starting late June and running through month of July. Best Foods' Nucoa margarine through Benton & Bowles, Standard Brands' Blue Bonnet margarine through Ted Bates & Co., and Jelke Good Luck margarine through Hewitt, Ogilvy, Benson & Mather are among contenders for availabilities.

TIP-OFF that McCarran resolution to bar radio-TV and recordings in Senate may not get very far in Rules Committee: Resolution (S Res 106) by Sen. Alexander Wiley (R-Wis.) has been on shelf for nearly year despite efforts by Sen. Margaret Chase Smith (R-Me.) to shake it loose [B•T, Feb. 25]. Wiley resolution calls for study of entire radio-TV coverage problem in Congressional committee hearings. Rules committee also reports crowded docket. No chance for McCarran measure unless there's "unusual" interest or demand, it's said (story, page 27).

PITTSBURGH IS up in arms over bleak TV outlook following hard-slugging speech last Tuesday of Comr. Robert F. Jones before combined session of Radio and Television Club and Advertising Club (see story page 79). After Comr. Jones had commented that, according to FCC majority's present processing plan, it would be at least five years before Pittsburgh got its second TV station, all three newspapers took up campaign with result that Mayor David L. Lawrence made dates in Washington this week to see such personages as House Speaker Sam Rayburn and FCC Comr. Frieda B. Hennock.

FURTHER INDICATION of prairie fire propensities of TV allocations in isolated areas seen in developments at Madison, Wisconsin. Citizens committee has informed opposing mixed allocation wherein one VHF and three UHF assignments are made. Request that VHF commercial assignment be dropped so that entire market can have UHF exclusively has been rejected by FCC. Campaign is to get all commercial UHF in market so listeners won't be harassed with necessity for converters or dual type sets.

DESPITE optimistic reports that House will consider and approve revised McFarland Bill (S 658), there's evidence that FCC staff members are continuing to "sabotage" measure in House. House leadership, however, is determined to have bill approved and sent to conference with Senate. House version of measure departs radically in several respects from Senate bill, designed to update FCC operations and afford greater degree of protection of licensees against overt actions.

CHANCES for passage of Senate's anti-air hazard bill (S 3129) slim. Measure introduced early in May passed half-way mark in second session of 82d Congress; and there's little support for it. Also, aside from its overtones on tall TV towers, bill contains many controversial sections, particularly wide powers which would be delegated to Commerce Secretary.

All It Took was a Slingshot...

. . . For David to topple the mighty Philistine warrior-giant Goliath. History, never easy on giants, has a way of repeating itself.

All it took independent KOWH to conquer the big Omaha market was programming—the kind that gets invited into Omaha homes. Hooper has chronicled the extent of the victory. The chart below shows the Omaha-Council Bluffs share-of-audience for 8 A.M.-6 P.M., Monday through Saturday, October, 1951, through March, 1952.

- *Largest total audience* of any Omaha station, 8 A. M. to 6 P. M., Monday through Saturday! (Hooper, Oct., 1952, thru March, 1952.)
- *Largest share of audience,* in any individual time period, of any independent station in all America! (Oct., 1951, thru Febr., 1952.)

of Beaverton. Tremendous growth has brought Beaverton to the fore as a leading community in the KGW service area.

THE People's Choice* IN PORTLAND OREGON

You cannot adequately cover the nation's northwest corner without KGWonderful! Listener loyalty you cannot duplicate anywhere available for your product in the ever-growing Oregon-Southwest Washington area. Examine the picture captions for proof why KGW has been "The People's Choice" in the Portland area for more than 30 years! The pioneer station at that highly desirable six-two-oh on the dial, the KGW Radio Theater. Act now to reap the reward of the best procurable radio advertising available in the booming Northwest!

MAYOR A. H. Rossi, 46 years a Beaverton resident, says, "It's the pioneer station in our area and delivers the best in radio to its vast audience. We all vote for our favorite, KGW."

PRINCIPAL

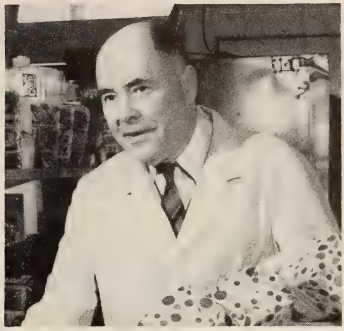
I. R. Metzler of Beaverton Union high school says, "We all know the high educational service KGW delivers to us. It is our favorite and the best in the Northwest."

Celebrating Our 31st Year of Leadership and Community Service

KGW

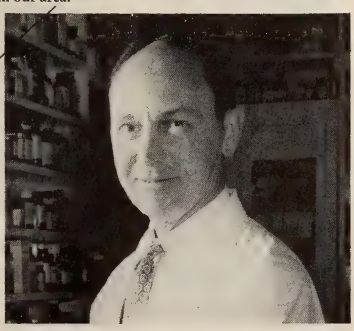
NBC AFFILIATE

PORTLAND, OREGON



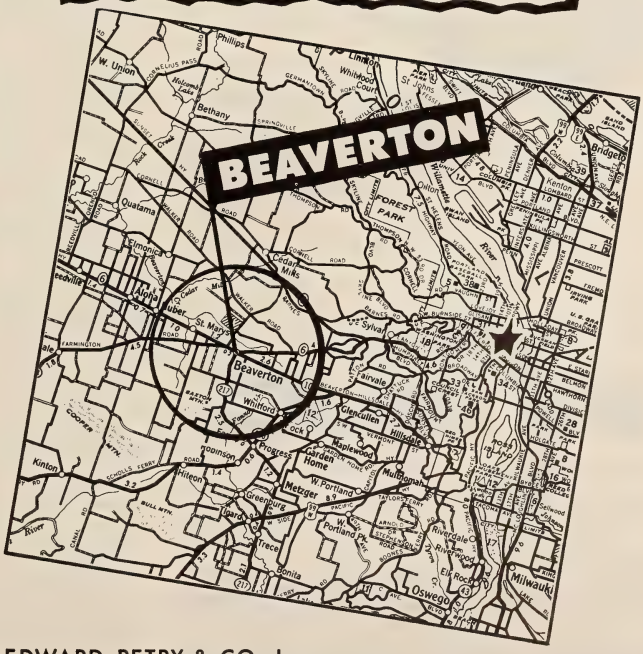
BEAVERTON'S VOICE TELLS THE CHOICE: KGW!

BANKER Jay Gibson, president of Beaverton's First Security Bank, relates, "'KGW is a solid investment in the future. For our money it's the top station in the Northwest."



HOUSEWIFE Mrs. P. E. Pintarich, and her son Dick, who shop in Beaverton, states, "KGW is the finest station for all-around entertainment and features. The Housewife's helper for shopping tips is KGW."

GROCER H. C. Miller of Miller's Food Market, reports, "KGW advertised national and local brand products are definite favorites with shoppers here. Results count and KGW certainly delivers results."



STUDENTS Vanda Benson and Jo Allene Krueger of Beaverton Union high school declare, "KGW is truly our favorite. Clear concise programming and a direct approach to the communities it serves make it tops in our area."

DRUGGIST Roy Mourer, Dean's Rexall Drugs, reports, "Of course KGW is the favorite in the Portland area. It knows the people and the people know KGW."

Beaverton One of Portland's fastest growing neighbors, serving a retail trade area of more than 60,000 persons. KGW's the one in Beaverton!

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., Inc.

Here is one of the greatest "plus" factors ever offered through advertising—the tremendous factor of automobile radio.

In metropolitan Memphis alone, there are more than 70,000 automobile radios. And, of course, this does not include the many additional thousands owned and used by families throughout the entire mid-south listening area.

You pay nothing additional for this "plus" audience. It's something to think about, isn't it?

Mr. Gilman

DONALD W. KRAUSE, former advertising and public relations manager of Chicago National Bank, to Edwin Bird Wilson, N. Y., as account executive.

on all accounts

RADIO is responsible for a lot of its own troubles, and one reason is "it has gotten big time and lost the common touch." The radio specialist who charges this is Will B. Presba, president of Presba, Fellers & Presba agency in Chicago. Radio, he firmly believes, is the master medium in getting audience response when it is used properly, but it is not used effectively often enough.

One proper usage, he reports, has been proved to him "time and time again"—sponsorship of radio personalities who know people and how to reach them, who use simplicity and who can arouse listener loyalty. Dollar for dollar, this kind of programming becomes a client's best radio buy, says Mr. Presba, who has been "partial" to broadcast personalities for a long time.

Mr. PRESBA

In association with his father and Ed Fellers, he used "Smiling Ed" McConnell exclusively for Mantle Lamp Co. (Aladdin lamps) on radio for 14 years. Despite his conviction about the success of personal pitches, each new evidence of listener response astonished him. "Smiling Ed" brought in 90,000 offers of trade-ins on new lamps after a one-time mention. Another time, after the agency agreed to forget about "Smiling Ed's" salary for a week and instead pay him 25 cents for each letter about "Why I want to buy an Aladdin lamp," Presba, Fellers & Presba paid out $18,000. *That* kind of salary set up died on the spot.

For 16 years the agency has bought a lot of spot and participations, using well-liked, friendly local personalities. Its management organized local barn dances for clients on WHO Des Moines, WLW Cincinnati and WSM Nashville, and Aladdin lamps was the first commercial sponsor of the WLS *National Barn Dance* in Chicago. Flex-O-Glass, another account, has used the *National Barn Dance* consistently since 1935.

Bill Presba attributes his fondness for and knowledge of radio to two of the industry's pioneers, Ed Fellers and Lloyd Thomas. From the former, he learned it pays off to use spot with hand-picked stations as a direct contact policy fosters understanding of the character of the station, its personnel and its audience. "And all of this benefits the client," he says.

He learned other radio fundamentals, starting with the transmitter, from Mr. Thomas at WROK Rockford, Ill. Bill Presba started there as a salesman in 1934 after being trained as a lawyer. Son of a long-time manufacturing and ad-

THE EVENING STAR STATION IN WASHINGTON, D. C.

IT Happened ONE NIGHT!

• There's an old saying that *everything* happens at night . . . especially in New Orleans! We'll qualify that somewhat, and say that *anything* can happen at night . . . especially on WDSU-TV.

• Take, for instance, the Sunday night that a local department store featured $1.29 children's pajamas in a one minute commercial. Nothing unusual, you say? Well, we beg to differ—because something certainly *did* happen *that* night!

• Next morning, the store was flooded with calls . . . and by evening the pajamas were completely sold out. Within three days—1200 of these pajamas had been purchased by economy-wise TV viewers.

• Remember . . . lots does happen at night (and in daytime, too) on WDSU-TV. So don't lose sleep—we can solve your sales problem *anytime* in the "Billion Dollar New Orleans Market"!

• Write, Wire or Phone BLAIR-TV!

Quiet Please

EDITOR:

. . . I recognize the necessity for advertising to maintain and develop free listening, but it does seem that the advertising could be less afflicted with advertising announcers who adopt the manner and style of circus-barkers, with their untrue and raucous "hurry, hurry, hurry" spiels. . . .

I recognize the desirability, perhaps the necessity, of "cut-backs," "breaks," "fade-outs" and the like in radio programs; but the alleged and pretended music used to effect these tricks-of-the-trade is scarcely recognizable as music. . . .

Here's hoping that BROADCASTING • TELECASTING can see its way clear to make suggestions to the radio industry for improving its production and services. . . .

Harry S. Barger
Washington, D. C.

The Lee Side

EDITOR:

I am concerned by certain inaccuracies in the announcement on page 61 of BROADCASTING • TELECASTING May 19 of the filing by Lee Broadcasting Inc. (not Lee Broadcasting Co.) of an application for a television station.

This item states applicant is licensee for WTAD-AM-FM Quincy, Ill., 60% owned by Lee Radio Inc. which in turn is licensee of KGLO-AM-FM Mason City, Iowa. With the exception of the correct corporate name, the above is accurate.

Then it is stated "Lee Radio Inc. is owned by Lee Newspapers which publishes" . . . and then are listed the nine newspaper properties which comprise what is known as the *Lee Group of Newspapers*. Actually there is no such thing as Lee Newspapers—that is, no corporate identity. Each of the nine publications is owned by a separate independent corporation. Certainly there are a number of common officers and considerable common stockholding between the various independent companies.

So far as Lee Radio Inc. itself is concerned, it is capitalized at $300,000, 3,000 shares of par value $100 stock. Of this stock 329 shares are owned by men or women, mostly employes, who own no stock in any Lee Group newspaper, while 1,341 shares are owned by stockholders who own stock in only one Lee Group newspaper, with the single exception of 50 shares of stock owned by our largest single stockholder in a second Lee Group paper—this particular paper being the *Kewanee Star-Courier* which has no relationship with any radio enterprise.

Besides myself there is only one other man who holds a position either as an executive officer or member of the board of the two radio companies who has any connection whatsoever with any newspaper in the Lee newspaper group.

To put it briefly, the only significant connection between Lee Radio Inc. and Lee Broadcasting Inc. on the one hand and the *Lee Group of Newspapers* on the other, is my mutual interest in both radio and newspaper properties—but to emphasize the independent character of the association, may I add that there is one newspaper in the Lee group in which I am not a stockholder, member of the board of directors or an officer.

In addition, I should point out that my stockholdings in the various properties in the Lee newspaper group with which I am connected are very minor. The percentage of the total stock held by me in the various properties ranges from 8% in the Journal Printing Co., Muscatine, Iowa, down to 0.533% of the La Crosse Tribune Co. of La Crosse, Wis.

Apology

EDITOR:

In the April 28 issue of BROADCASTING • TELECASTING, Bill Loader, promotion manager of WHAS-TV Louisville, writes that the American Civil Liberties Union erroneously identified WHAS-TV as one of the stations carrying a kinescope of a January 1950 *Toast of the Town* program. The identification was made in our complaint to the FCC charging radio-TV blacklisting.

Mr. Loader is correct. . . . The fact, as Mr. Loader points out, is that WHAS-TV did not go on the air until March 27, 1950. . . .

The error was not deliberate, and we have informed the FCC of the correct identification. . . .

LISTENERS . . . GET THE "Brass Ring"

HERE at KLRA we think we have come up with a different type disc jockey show—"Merry-Go-Round". Bob Hicks, who emcees the show, has built a great listening audience with a couple of little "gimmicks" that pay off for advertisers.

BOB HICKS

Bob has a mystery tune, or a mystery singer, or poses a question about some popular star of radio. His listeners have to call him with the answer. First correct one wins merchandise prizes. When "Merry-Go-Round" hits the air, the phones start buzzing. 18 to 24 calls daily (all that can be handled), usually bring the answer. And for out-of-town listeners there is a weekly question to be answered by mail. 200 to 250 pieces of mail weekly to this one program is not unusual.

Such interest really pays off for advertisers. For success stories about "Merry-Go-Round", and for availabilities, call any O. L. Taylor office, or write us direct.

KLRA
LITTLE ROCK

From Frontier to INDUSTRIAL EMPIRE

OKLAHOMA'S NO. 1 MARKET, WITH TREMENDOUS WATER, POWER, FUEL AND MINERAL RESOURCES, CREATES A NEW INDUSTRIAL EMPIRE.

Another run* is being made in Oklahoma—the run of industry into the booming Tulsa Market Area in northeastern Oklahoma. New industrial plants—making paper liners, glass products, shipping containers, garments, and tires—have been established recently in the rich concentrated Tulsa Market 30 county area. And more are on the way to take advantage of the abundance of industrial water, fuel, power and natural resources of the area. This area, comprising only about a third of the state's land area, already has nearly half of the manufacturing establishments of the state; over 50 percent of the factory workers; and nearly 60 percent of the annual wages paid to factory workers in Oklahoma. It also has 48 percent of the state's bank deposits and over 43 percent of retail sales. Tulsa, the hub of this market area, is the Oil Capital of the World, having more oil producing, refining and marketing companies maintaining home offices there than does any other city in the world. This insures a consistent high level of income. Tulsa is the center of a rich agricultural region of diversified interests.

*The famous land run into Oklahoma was staged in 1889.

ONLY KVOO BLANKETS THIS RICH MARKET, PLUS BONUS COUNTIES IN MISSOURI, ARKANSAS, AND KANSAS.

KVOO has served this No. 1 Market in Oklahoma for 26 years—longer than has any other radio station, and enjoys a dominant position in every segment of the broadcast day throughout the area. Each of the 30 counties in the Tulsa Market Area is within the KVOO 50 to 100% BMB daytime area and 29 of the counties are in the 50 to 100% nighttime BMB area. In addition, there are plus bonus counties in Missouri, Arkansas and Kansas, and in the other sections of Oklahoma in the 50 to 100% KVOO—BMB area.

KVOO's Farm Department programs are a "buy-word" in the Tulsa Market Area. You'll be interested in the department's 24-page Tenth Anniversary Brochure. Write for your free copy.

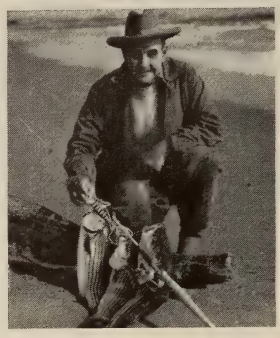
feature of the week

FISHING and hunting shows on TV give promise of a lucrative market in sports programming, judging from the responses to a 15-minute fishing show film, *Goin' Places With Gadabout Gaddis*, initiated on WBZ-TV Boston last fall.



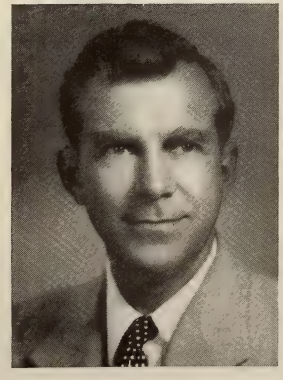
The film, made by Beacon Television Features and sponsored for 26 weeks by the Pontiac Dealers of Greater Boston, whipped up the enthusiasm of the 29 dealers in a few weeks after they found themselves swamped with personal calls for road maps offered free on a commercial.

Within 13 weeks, more than 25,000 Gadabout Gaddis fans had called at Pontiac showrooms for the maps, which had been gathering dust until then.

Fishing, considered a "participant" sport instead of a spectator sport, may be exploited on TV as a spectator sport, according to Leonard Sanderson, president, and Barbara Keane, treasurer, of Beacon Television Features.

The syndicated film feature, aired Thursday at 6:45 p.m., received a February Pulse rating of 9.5, Mr. Sanderson said, with an enthusiastic mail response. A mail survey indicated averages of 2.04 male viewers per set, 1.41 women and 1.61 children, for an average of 5.06 viewers per TV home, at a cost of $1.67 per thousand viewers, he said.

Breslau Bros., a furniture and household appliance chain, contracted for the series for 13 weeks over WRGB (TV) Schenectady, N. Y., with the Dodge dealers of that area sponsoring an additional 13 weeks after the first series ran out in March and a flood of letters and signed petitions requested the show's continuance. Evinrude Motors in Milwaukee has signed for the series on WTMJ-TV Milwaukee and the Old Stone Bank has contracted for it on WJAR-TV Providence, R. I.



Gadabout Gaddis, star of the TV syndicated film fishing series, shows catch in scene from one of his adventures.

JAMES H. COBB

THE fine art of keeping not only abreast but often ahead of developments which affect the future of Delta Air Lines enhances the reputation of James H. Cobb Jr., Delta's director of public relations and advertising, for ingenuity and alertness.

Running down hearsay that Atlanta was to get a new television station, WLTV (TV), Mr. Cobb contacted the man he also heard was to be assistant general manager, and before the station knew what its call letters were to be, Mr. Cobb was waving a reservation calling for 9 p.m. TV spots every day in the week for the air line.

Or take the time radio first met the Cobb influence, when Delta booked a chain break announcement immediately preceding a national news roundup program. Since the 15-minute program at that time had no sponsor and unable to afford sponsorship himself, Mr. Cobb persuaded the same network newscaster to record the spots

SECOND RATE CUT CRISIS

Affiliates Gird for Network Fight

By EDWIN H. JAMES

THE ALL-RADIO Affiliates Committee met last week under circumstances that were every bit as unpromising as those prevailing 13 months ago when the committee was created in a desperate effort to shore up network rates against the threat of cave-in.

Last week the committeemen must have felt they were back where they came in. Emerging from a two-day session in New York, they had the look of men who had seen the restraining timbers giving way a second time and the first trickle of muck oozing through them. "It is," said one, "only a matter of time."

There was more than passing comparison between the situation last week and the situation of April 1951, when the committee was formed at a mass meeting of network affiliates in Chicago.

Last year, CBS Radio had announced a rate cut and other networks were expected to (and did) follow suit.

Last week, though no one—not even key affiliates—had been advised of radio network intentions, there were indications that again CBS Radio was about to take a plunge. If that were to happen, the others would unquestionably meet the competition.

Little Recourse

What can the Affiliates Committee do to prevent another collapse of network rates? The answer: Very little. If the committee had any chance of holding off the reductions of a year ago, it has a much weaker chance now. The reason is that in the interval CBS Radio has managed to rewrite a large majority of its affiliation contracts.

Except for perhaps a dozen key affiliates, CBS Radio stations now have contracts that allow the network to change rates at will without consultation with the stations. It is doubtful that these dozen could throw up a roadblock big enough to stop a rate cut if the network decided it was time to make one. Let CBS Radio cut its rates, and the other networks would probably have little trouble bringing their affiliates to accept reductions to match. To hold out would mean presenting CBS Radio with all the business it could cram on its air.

However gloomy the network radio future looked, the Affiliates Committee seemed assured as to the destiny of radio in general. For most members, local and spot business was at least holding its own and in many cases increasing. Both the Affiliates Committee and the AM committee of the NARTB which met the next day in New York made ambitious plans for important research projects which had the common aim of improving radio's position among all media.

● At the Affiliates Committee meeting, a major topic of discussion was the proposed study of existing audience measurement services to be undertaken by the Advertising Research Foundation if it can get the necessary funds.

This study, wanted by a majority of the agency subscribers on ARF, would attempt a thorough evaluation of existing rating services to find their weaknesses and define their limitations. Its purpose would be to correct the now widespread misuse of ratings and further to match one service against another in an effort to show what each can and cannot do.

Whether this ARF study can be undertaken will be decided this week. Edgar Kobak, president of the ARF, will present the proposal to the Finance Committee of Broadcast Advertising Bureau, of which he is chairman, today (Monday). Mr. Kobak explained the plan last week to the Affiliates Committee, of which he also is a member.

He said last week that the cost of the special "research into research" would be "around $25,000." He hoped that BAB would put up the money.

● Meeting Thursday in New York, the AM Committee of NARTB adopted a resolution calling for one of the most fundamental research jobs in recent radio history.

Allerton Heads Study

Under this plan, Richard Allerton, NARTB director of research, will conduct a painstaking study into a large sample of radio station operations. His aim is to find out what makes some stations successful and others not.

Out of Mr. Allerton's work, it is hoped, will come the first definitive guide to good radio station management. He will examine all phases of radio operation, including rates. In the latter connection, he said preliminary studies indicate that radio is priced too low in most markets.

Another by-product of this study, it is expected, will be such complete financial information on station costs as to dissipate the belief widely held in some advertising quarters that unlike other media radio is cheap to run.

In this regard, the remark made a year ago by a top advertising executive of a major advertiser (who was also a member of the Assn. of National Advertisers' Radio-Television Committee) was recalled. He said he could understand how rate increases could be justified by newspapers and magazines because their costs had risen. But as for radio, he said, "Why, the air is free."

Following its two-day meeting, the Affiliates Committee last Thursday issued a carefully-worded statement which said, in a restrained way, what the members had been saying during the meetings.

"Affiliates of each network," said the statement, "expressed grave

(Continued on page 34)

PLATT RAPS TV

Hits 'Name' Mania, Smuttiness

JOHN Q. PUBLIC and Uncle Sam are getting impatient with the television industry, and TV's time to get its house in order is running out. This was one of the charges made against the industry by John H. Platt, vice president in charge of advertising and public relations for Kraft Foods, Chicago, when he spoke Wednesday at a joint luncheon meeting of the Chicago Television Council and Radio Management Club.

Mr. Platt, who outlined his company's successful use of the *Kraft Television Theatre* on NBC for five years, said television has "had several more years of grace than it might reasonably expect," and that it has also "about used up its luck."

He called for higher standards of programming, a halt to the business of programming and talent being in the hands of a few by default, and for clear thinking by men in control of program content. Reminding his audience "no man is an island unto himself," Mr. Platt said that every poor show "slips a little shine off the successful ones."

After using television through the period when it was "glamorous," Mr. Platt said the star dust has been removed and he recognizes it as "just another advertising medium, but a powerful one to be sure."

Too many shows, in his opinion, are "burlesque spectacles for the tavern trade," Crudity and a lack of showmanship would decline, he said, if agency and client representatives would watch television and see what they would choose for their own families' viewing. If this happened, there would be "a lot less competition to book big names, especially comedians who have to drop their trousers and tell smutty stories to get an audience."

Mr. Platt was especially concerned with the trend of program and talent control to the networks and away from independent packagers and advertising agencies, which together form the only block which can "provide a spur to competition, a break to runaway prices and a stimulant to entertainment."

Television has "a god-like ability to let people see something that is happening thousands of miles away," and yet the two leading networks participate in "a sorry spectacle of attempting to control as many big names as possible," few of whom have devoted audiences. This talent war, Mr. Platt said, "is ineffective and ill-conceived, and we want no part of it."

Networks "are competing to a ridiculous degree, and this imperils the entire future of television. We are perfectly willing to pay our own bills, but we don't want to be charged for dead weight in the $40 million per year talent business."

The industry has "failed to recognize television for what it is . . .

(Continued on page 38)

RADIO'S CLAIM

McGill Cites Role In New Community

W. B. McGILL, who prepares the business paper advertising of Westinghouse Radio Stations Inc., is ready to back up his claims for radio's potency as an advertising medium.

As director of the WRS advertising and promotion, he explained in a May 20 letter to Lawrence Roehsler, research director of the newspaper representative firm, Moloney, Regan & Schmitt, why an advertisement in the current Westinghouse series contained this statement:

"In many new communities, radio is the only medium that reaches anything like a real majority of the homes."

The statement inspired this observation by Mr. Roehsler, "I have not been aware of any situations of this kind and will very much appreciate you giving me a list of these communities, together with any figures you might have regarding penetration of various advertising media."

Mr. McGill accepted the challenge.

"We at Westinghouse Radio Stations appreciate your interest in our business-paper advertising and your specific inquiry re a statement carried in one of the series, now current, on the subject of community relations," he replied. "In any brand-new community, it takes time to build up distribution of newspapers and magazines. On the other hand, 96% of all new homes become radio homes as soon as the occupants move in."

Radio Figure Stable

Radio ownership stays practically standard at over 90%, he continued, observing that in Philadelphia the most widely distributed newspaper reaches only two-thirds of the families in the "city zone." That was termed an over-all average, and more than likely below the two-thirds figure in brand-new communities.

"I'm sure you readily grasp the broad aspects of the implied theme," Mr. McGill wrote, listing them as follows: "The persuasiveness of the human voice; the accessibility of around 96%, a significant majority, of the homes; and when a new housing development springs up and occupants move in, sometimes, as in my own case when I moved to Washington (and I think this prompted the statement you quote) how the new apartment building with accommodations for 200 families was full before they got the cement floor laid and the carpet down in the lobby . . . and each family brought along its radios (plural is correct) and plugged them in along with the toaster, clock, stand lamps, etc. It is later on that they get around to selecting and obtaining other additional sources of news and entertainment on a regular basis.

"However, radio is already there—in 96%, a majority of the homes—and when people leave their homes to go somewhere by automobile, a majority of them take their radio along, figuratively, by having a set installed in their car.

"A few months ago, in Philadelphia, we hired a research concern to station checkers on the Delaware River Bridge over a weekend. They counted the cars and 69% plus were fitted with car-radio antennas. Happy people! They whistle while they work . . . they listen while they drive.

"Although auto listening may not run a great percent of total listening, nevertheless it helps to provide those over-all ARB figures on time spent with major media which come out: Radio, 108 minutes; TV, 43 minutes; newspapers, 34 minutes; magazines, 18. Let's see—43 plus 34 plus 18 equals 95, and I guess 108 is a majority there, too.

"'Majority' can mean many things; for instance, if one wants to reach a majority of the 48 states with one 'local' medium he could do it with radio."

After citing a number of examples of radio's pulling power, Mr. McGill concluded: "We're proud to have, in radio, a medium that can turn in such instantaneously effective and human worthwhile results. . . . I will close with a more than casual nod to the nation's advertisers who, through their round-the-clock use of radio, make such things possible."

Canada Audience Report

A NEW share-of-audience report is being released quarterly by Elliott-Haynes Ltd., Toronto, showing over-all audience indices for each station by time intervals in five major Canadian markets, Montreal-English, Montreal-French, Toronto, Winnipeg and Vancouver. First survey, released in mid-May, covers the first three months of 1952.

". . . Let's think it over, fellows. After all the majors are being sued for $12,000,000."

TONI AD MANAGER

To Take Agency Post

DON NATHANSON, advertising manager and director of public relations for the Toni Co., Chicago, will soon join Weiss & Geller, Chicago agency, as an account executive.

Mr. Nathanson has been with Toni five years and has been associated with it since Toni was founded by Niesen and Irving Harris. He will take with him the Prom Home Permanent account, which spends $2 million yearly in advertising.

Prom, a home permanent wave, has been handled by Foote, Cone & Belding, Chicago, which supervises the bulk of the Toni business, although Tatham-Laird in the same city handles some product advertising.

One reason given for the transfer from FC&B is the intense competition between the two home waves. Toni is the No. 1 best seller, while Prom is reportedly competing with Procter & Gamble's Lilt for second place. Both radio and TV will probably be used for Prom at Weiss & Geller, whose major broadcast account now is Wine Corp. of America (Mogen David).

Toni is owned by the Gillette Safety Razor Co. One company representative said there may be no replacement for Mr. Nathanson as the firm has a brand plan in which each product has its own advertising manager. Mr. Nathanson was co-founder and partner in the D. S. Manson agency, Minneapolis, where he also published "Radio Showmanship."

Rand Agency Named

IDEAL Film Corp., N. Y. (roll film), names Rand Advertising agency to direct its national campaign, effective immediately. Radio and TV will be used with final budget and placement scheduled to be announced later.

DORRANCE & CO.

Promotion Firm Founded

ESTABLISHMENT of Dorrance & Co., new promotion firm, was announced last week by Dick Dorrance, who simultaneously resigned from MBS as director of public relations and press information.

Mr. Dorrance

The new organization, 32 E. 39th St., New York 16, will specialize in promotion planning and writing, with emphasis on services to the radio, TV and ad agency fields.

It begins business with six clients, largest of which is the Socony-Vacuum Oil Co., said Mr. Dorrance.

Mr. Dorrance has been active in all phases of promotion work for the past 15 years. In 1946, he was co-founder of O'Brien & Dorrance, which served clients in promotion projects for nearly five years. In early 1951, Mr. Dorrance left and spent two months in Europe before joining MBS that May.

Prior to the beginning of O'Brien & Dorrance in 1946, he had been director of promotion for the eight CBS-owned stations, and for the CBS Radio Spot Sales.

During World War II, Mr. Dorrance served with the Radio Bureau of the Office of War Information. He wrote newsletters of the Broadcasters' Victory Council.

From 1940 to 1942, he was promotion director and later general manager of FM Broadcasters Inc., Before that, he worked in press-special events at WOR New York.

Included in the services which Dorrance & Co. will offer are sales and audience promotion campaigns, direct mail, trade paper advertisements, newsletters, sales letters, presentations and film scripts.

MAJORS' RADIO, TV GATE

Told on Hill

ONLY four teams of the major leagues' 16 failed to net more money from radio-television rights than from the highly remunerative ballpark concessions in 1950.

This remarkable fact appears in a voluminous report on baseball released by the House Monopoly Subcommittee last week.

In the four teams which did not gain more money from radio-TV than from concessions, the differences between the two money-makers were slight.

Some baseball quarters had been claiming that broadcasting and telecasting of games eats into attendance. Herewith are figures for 1950, showing income from attendance at games both home and away, exhibition, radio-TV and concessions for every team in each league:

As the charts show, the Philadelphia Athletics, which have not been in the front-running in the American League for years, received an income of $184,575 from radio-TV alone. This amount is about three times the money it received from ballpark concessions and two-thirds the amount it got from attendance at away games, and more than half the income it earned from attendance in its own ballpark.

Combining both income from radio-TV rights and concessions, the major leagues totaled a substantial income that compares favorably with the total revenue from attendance.

Nats' Broadcast Fees Typical

The Washington Senators in the American League, for example, with $127,848 in radio-TV rights and $103,219 from concessions earned more than half the income from attendance in its own ballpark. Its radio-TV and concessions brought it roughly 40% of its revenue in 1950.

Were radio-TV income taken away from all the clubs in both leagues in 1950, the result would have pared profits considerably and in cases where losses were suffered by clubs, the minus column would have been greater.

Here is a comparison of figures presented:

American League: The Boston Red Sox that year lost more than $100,000, its revenue from radio-TV alone was twice that figure; Chicago White Sox made more than $65,000, its radio-TV revenue was three times the amount; Cleveland Indians made more than $450,000, its radio-TV rights netted half the amount; the Detroit Tigers were $112,638 to the good, radio-TV revenue topped that total by more than $70,000; the New York Yankees, the leagues' money-maker netted $497,000, radio-TV rights for 1950 were $416,250; the Athletics lost a whopping $315,920, radio-TV was more than $180,000; St. Louis Browns netted $42,957, its radio-TV revenue was about twice that amount, and the Senators squeaked by with $5,177 (but $38,000 in dividends) while radio-TV revenue was $127,848.

INCOME AMERICAN LEAGUE, 1950

* * *

National League: The Boston Braves lost more than $300,000, radio-TV rights were $214,740; the Brooklyn Dodgers were in the loss column by $8,587 (but paid $99,750 in dividends), its radio-TV revenue stood at $339,809; Chicago Cubs lost $133,124, radio-TV revenue was $189,718; the Cincinnati Reds paid $14,270 in dividends but lost $64,873, radio-TV rights were $156,355; the New York Giants' loss was over $264,000 but dividends were $23,502, radio-TV rights managed them $252,306; the Philadelphia Phillies in the profit column by $309,579, radio-TV rights hit $191,303; Pittsburgh Pirates profited $138,220, radio-TV revenue was $181,884, and the St. Louis Cardinals netting $263,202, radio-TV brought in $182,365.

All figures of net income or loss shown above is after taxes. The radio-TV figures are revenue before taxes. Nevertheless, the comparisons point up the extent to which radio-TV are buttressing revenue columns of every major league club.

As the House subcommittee put it in its report:

Revenue coming directly from paid admissions to exhibition and championship games comprised 74.1% of major-league income in 1950. Concession purchases by these fans accounted for another 9.2%. And radio and television receipts, which largely depend on a club's popularity with the fans, brought another 10.5% of the gross operating income. The remaining 6.2% was derived from park rentals, park advertising, and other miscellaneous sources.

TV Money Limited

IN THE 1950-51 baseball seasons, many clubs were restricting the number of their telecasts. Despite this effort attendance still slumped in 1951, according to a BROADCASTING • TELECASTING story last year [B•T, July 16, 1951].

Here is a run-down of clubs:

Senators, who telecast regularly in 1950, limited TV to 21 home games in 1951; Boston Braves limited their TV to 45 in 1951; Boston Red Sox telecast all home games; Chicago White Sox were telecasting all home day games but not night games during both seasons. Neither the Pirates, the Browns nor the Cardinals were telecasting regularly. The Tigers' policy has been to telecast on selected weekdays only. The Athletics telecast regularly. Cincinnati Reds did not have full TV coverage. The Indians, Giants, Yankees, and Cubs had full TV.

Thus, it can be pointed out that for the purposes of comparing figures in the congressional report, major league teams were getting *limited* revenue from TV rights.

STORER STOCK

Registration Asked at SEC

STORER BROADCASTING Co., which became the new corporate name of Fort Industry Co. on May 2 [B•T, May 12], has filed a statement with the Securities Exchange Commission seeking registration of 215,000 shares of its $1 par common stock, of which all but 15,000 shares are outstanding.

George B. Storer, president, told BROADCASTING • TELECASTING last week that no underwriter's agreement had been signed and that there has been no decision as to when or whether the stock would be placed on the market.

Mr. Storer

He pointed out that the SEC filing was essential preparatory to issuance of the stock and that "accelerated consideration," which might run 20 to 30 days, had been requested. Assuming the plan is found in order, Mr. Storer asserted a decision then can be made as to how Storer Broadcasting Co. will proceed.

Two underwriters—Reynolds & Co. and Oscar E. Dooly & Co.—would purchase the stock from three stockholders, with 170,000 shares designated for resale to the public.

Selling stockholders are Mr. Storer, owning 656,500 shares (59%); J. Harold Ryan, Toledo, director-vice president-treasurer, 120,500 shares (10.87%) and his wife, Frances S. Ryan, 152,500 shares (13.75%). They are selling 75,600, 47,200 and 47,200 shares respectively to the underwriters.

In addition they are selling another 10,000 shares (4,400, 2,800 and 2,800 shares respectively) to certain employes. Mr. and Mrs. Ryan also have reserved another 20,000 shares which are covered by options granted by two of the selling stockholders to the two underwriting firms, with terms of the sale to be decided later.

Finally, 15,000 shares have been reserved for issuance to a group of key company officers upon the exercise of options.

With sale of their portions, the three above stockholders will then own common stock as follows: Mr. Storer, 576,500 shares; Mr. Ryan, 70,500 shares; Mrs. Ryan, 102,500 shares. Mr. Storer retains approximately 52% stock control, through direct ownership, plus family trust stock which he established and votes during his lifetime amounting to an additional 137,500 shares.

When the firm was reorganized earlier this month, the former Class A common stock, no par value, was changed to $1 par and 1,700,000 shares of new common stock were authorized and each outstanding share of Class A common was changed into five shares of the new common. The former Class B common was eliminated. The 5% cumulative preferred $100 par stock was changed to 5% cumulative preferred, $30 par, with each share changed into 3½ shares of the new preferred.

If all shares are sold as proposed, according to the registration statement, the Storer family (including his brother-in-law and sister, Mr. and Mrs. Ryan, and two trusts set up by Mr. Storer) will own 79.1% of outstanding common stock.

Book value of stock (1,106,000 shares plus 3,000 in treasury) as of May 2, 1952 was $3,472,937, or $3.14 per share, it was stated. The company refinanced loans this

ARBI STUDIES

Sweeney, Barnes Debate Media

ADVERTISING Research Bureau Inc. studies of radio and newspaper effectiveness in inducing retail store traffic were defended by Kevin Sweeney, vice president of Broadcast Advertising Bureau, and attacked by Howard S. Barnes, director of the Bureau of Advertising of the American Newspaper Publishers Assn., last Thursday.

The representatives of the rival media squared off at a luncheon meeting of the American Marketing Assn. in New York.

Mr. Sweeney said that "there is no common tongue except one in which we can converse about the respective effectiveness of these media. The common tongue is sales results. The ARBI reports attempt to use this common denominator—what happens at the cash register to measure media and media's use."

Background Given

He then went on to explain the method of ARBI and its history.

"On the basis of the 50 ARBI studies BAB published," he said, "representing 45 different stores in 25 different cities—and more than 7,000 completed interviews—BAB (not ARBI)—arrived at some tentative conclusions about retailers advertising. These are:

(1) When an item is advertised by a retailer, he is liable to do four times the business he would normally do on that item.

(2) Newspapers do an effective job for retailers—but it seems only part of the job. There is a market that reads and buys.

(3) There is also a market that listens and buys—a market that is as large or larger than the market reached by the newspaper—a market that responds best to advertising they listen to.

(4) There appears to be a relatively small duplication between these two markets.

(5) The picture of merchandise created in the human mind by words is as good a picture—if not a better one—than that created by a printed picture.

(6) No amount of type or advertising will sell lousy merchandise or badly priced merchandise.

Mr. Sweeney said BAB is interested in furthering more research that gets to the kernel of the matter . . . how much sales for how many advertising dollars.

Mr. Barnes told the group that "the main issue . . . is *not* research; the main issue is not the relative effectiveness of radio and newspapers. The basic issue is *advertising*."

Mr. Barnes suggested five points that researchers might ask about the ARBI tests:

(1) Secure from ARBI a representative group of the *original* reports for detailed study; (2) Ascertain whether the 70% to 95% of the people who showed interest in the featured merchandise who were actually interviewed were typical of the *entire* group; (3) Why was it important to ask a person *when* he saw or heard the advertising; (4) Why was the layman asked: "In your opinion, do you think the store gets better results from newspaper advertising or from radio advertising?" (5) Why not submit a group of the original reports to the Advertising Research Foundation and let impartial organization pass on the soundness of the method and the validity of the results?

He did not concede that in the 50 tests published by BAB "radio seems to have sold more of the featured merchandise in a majority of cases."

"But to me," Mr. Barnes explained, "that is not the most important point. The important point is that these tests seem to have had little influence on the subsequent use of newspapers by the participating retailers.

"I don't believe the ARBI studies prove a thing," he stated. "The retailer's basic concern is not the number of people who inquire about a featured item because of radio, or newspapers . . . his basic concern is *total* traffic and total sales. And total profits."

WBS APPOINTS

All-Canada Radio Firm

WORLD Broadcasting System has appointed All-Canada Radio Facilities Ltd., as programming and distribution associates for WBS Sales and Program Services in Canada, effective June 1.

In addition to owning and operating several stations, All-Canada Radio represents "many" Canadian stations, spokesmen said, and is described as the largest single supplier of radio program material in Canada. Firm has represented Frederic W. Ziv Features in Canada for several years. Negotiations were made by Robert W. Friedheim, WBS general manager, and Stuart McKay, All-Canada assistant general manager.

SOUTHERN CALIFORNIA Broadcasters Assn.'s new officers, elected May 8 at Hollywood meeting, are (l to r): Austin E. Joscelyn, director of operations, CBS Hollywood, SCBA board member and outgoing president; Robert O. Reynolds, vice president-general manager, KMPC Hollywood, SCBA board member; Thelma Kirchner, general manager, KGFJ Hollywood, SCBA secretary-treasurer; Robert J. McAndrews, commercial manager, KBIG Avalon, SCBA board member; and Calvin J. Smith, president-general manager, KFAC Los Angeles, SCBA president.

LBS SUCCESSORS

Several Regionals Planned

SEVERAL moves toward formation of regional networks developed last week on the heels of Liberty Broadcasting System's suspension [B•T, May 19].

● Liberty's principals—Barton R. McLendon, co-chairman of the LBS board, and his son Gordon, LBS president—announced last week they were setting up West Coast and Texas-based regional hookups. They hinted, too, at the possibility of starting another nationwide operation eventually.

● Peoples Broadcasting Corp., operating WOL Washington and WRFD Worthington, Ohio, announced Thursday that a group of mid-Atlantic and Southeastern stations interested in formation of a cooperative regional network would meet in Washington June 5-6.

● Tom Carr, former Liberty station relations vice president in the Southeast, was contacting about a hundred stations in that area with the idea of setting up a regional hookup. This project involved possible Washington program origination at WOL, which had supplied a large volume of programming to LBS.

The projected West Coast operation of Liberty's principals was outlined Wednesday at a closed meeting held in Hollywood Roosevelt Hotel, with 50 representatives of 26 West Coast stations attending.

New name of the western organization will be Liberty Radio Network. It will be incorporated in California, with offices at 6253 Hollywood Blvd., former LBS West Coast headquarters. Gordon McLendon told the group he would move his headquarters from Dallas to Los Angeles.

Benton Paschall, former LBS West Coast vice president, will be executive vice president of LRN. He told the group that Liberty's Pacific Coast hookup is slated for operation by early June. Forty stations in California, Washington and Oregon have definitely committed themselves as affiliates, he said, although contracts have not yet been signed.

LBS had 52 affiliates in the three West Coast states and Arizona, Mr. Paschall explained, predicting all will be part of the new system. The elder McLendon attended the Hollywood session.

Full schedule of mid-afternoon public domain recreations of baseball games would be included in the daily schedule, along with newscasts and commentaries. Monthly cost of a baseball network using Class A lines, plus salaries, would be around $30,000, according to the Liberty officials.

Operation of a Texas-Louisiana hookup with KLBS Houston or KLIF Dallas as key station was in the works last week, with possibility service would start in 30 days. KELP El Paso would be linked with the group since it, like KLBS and KLIF, is owned by the McLendons. Also proposed as affiliates are KNOE Monroe, La., and WNOE New Orleans, owned by Gordon McLendon's father-in-law, James A. Noe.

In announcing that Peoples Broadcasting Corp. would meet with mid-Atlantic and Southeastern stations June 5-6 to discuss formation of a regional, Herbert E. Evans, Peoples general manager said:

"We found in our preliminary discussions there are scores of stations Liberty was serving that want news and special events directly from Washington, the news capital of the world. Peoples is moving forward on this idea and will make every attempt to put it into practice."

Response of stations contacted last week was "most encouraging," Mr. Evans added. Many of the stations are former LBS affiliates but he said the June 5-6 meeting in the WOL studios is in no sense restricted to such affiliates. Type of program service desired, costs and financial arrangements will be considered, he said, explaining the new service is designed "to give them what they want."

WOL and WRFD are carrying a series of broadcasts from Europe by Joseph C. Harsch, commentator who has just received the DuPont award [B•T, May 12]. Covering Gen. Eisenhower in Europe, Mr. Harsch is sending his programs to WOL via British Broadcasting Corp. shortwave facilities.

McCARRAN RESOLUTION

Hearing Asked

RADIO-TV industry, beset by a congressional program probe and a House ban, was threatened with a new setback when a resolution was introduced last week designed to close Senate hearing rooms to news microphones and cameras.

The industry immediately demanded to be heard on the resolution authored by Sen. Pat A. McCarran (D-Nev.).

A ban on the media at House committee hearings was invoked late in February by Speaker Sam Rayburn (D-Tex.) [B•T, March 3].

While the industry protested the Rayburn ban, it was unable to testify officially since the Speaker "interpreted" the rules of the House. But in the Senate, the McCarran Resolution (S Res 319) is legislation and presumably a hearing will be held.

Executive sessions — commonly referred to as "closed door" hearings or meetings—have never been open to the public nor to news media. However, all open hearings permit the public and newsmen.

Sen. McCarran's measure, referred to the Senate Rules and Administration Committee, would bar radio, TV, electrical transcription for airing, and even still photographs, from Senate committee public hearings.

Would Add New Rule

It would add a new rule to the standing rules of the Senate. It provides that "no standing, special or select committee (or any subcommittee thereof) shall require or permit:

"(a) any photograph to be taken in any room during the conduct therein of any hearing before such committee;

"(b) any photograph of any person present to testify before such committee to be taken in such room at any other time without the consent of such persons;

"(c) any witness testifying before such committee to communicate his testimony, or a picture of him testifying, to any other place through the transmission by wire or radio of any writing, sign, signal, picture or sound;

"(d) any recording of the testimony given by any such witness to be made by mechanical or electrical means except by persons duly designated by such committee to prepare for its use as true and correct record of the hearing in which such testimony is given; or

"(e) any part of any recording of such testimony prepared by mechanical or electrical means to be used in any program transmitted by any radio or television station."

Sen. McCarran told the Senate his resolution was aimed at putting into effect an American Bar Assn. recommendation of February on the broadcasting and telecasting of legislative and judicial proceedings.

He said he was studying the matter of barring radio and TV from judicial proceedings through legislation.

All that the resolution would need to become effective immediately is passage by the Senate.

Sen. Estes Kefauver (D-Tenn.), whose presidential nomination aspirations can be traced to his TV appearance as a crime buster, opposed the measure. "There should be the widest possible dissemination of committee hearings by radio, TV, newsreels and photos so long as it does not discommode the witnesses or interfere with orderly procedure."

Sen. Fred A. Seaton (R-Neb.), owner of KHAS Hastings and KMAN Manhattan, Neb., and KGGF Coffeyville, Kan., thought the proposal was "going too far."

Oregon's Sen. Wayne L. Morse (R) believed it "would have the effect of leading us further down the road toward star chamber proceedings in Senate investigations."

Sen. McCarran was asked by newsmen if his decision to introduce the measure was influenced by showing of a still picture of the Senator on Drew Pearson's TV news show the day before. He said no but said he saw the picture which depicted him in an angry mood.

The Senator said the measure only followed through on his position of barring the media from his committee hearings.

NARTB petitioned the Senate Rules group for a full hearing on the resolution. President Harold E. Fellows said in a letter to Chairman Carl Hayden (D-Ariz.):

The radio and television industry is unalterably opposed to the McCarran resolution, believing it to be a clear invasion of the rights of public media. We believe its adoption as a standing rule of the Senate would deprive the public—and the Senate as well—of a great service essential to maintaining our democratic processes.

Mr. Fellows asked "a full public hearing on the issues at stake and for the opportunity to appear in such a proceeding, to the end that the position of the industry in opposition to this resolution may be made clear to your body."

Jim Bormann, WCCO Minneapolis, president, National Assn. of Radio News Directors, said Cassius Keller, NBC Washington, chairman, NARND government liaison committee, and Theodore Koop, CBS Washington, a member of the association's board of directors, would be available to testify.

Mr. Bormann said the resolution "would have the effect of excluding the use of modern instruments of reporting. . . ."

In a letter to Sen. McCarran, Mr. Bormann noted the microphone and the camera "reproduce the event itself" and do not "provide simply a 'version' of what happens." They

(Continued on page 36)

LIBEL LIABILITY

NARTB Backs Horan Approach

NARTB in a policy statement this week places itself firmly in support of the Horan Bill that would give the broadcaster freedom from liability in the courts for candidates' statements made on the airwaves.

The NARTB position was defined as supporters of two separate approaches to the difficult problem worked feverishly on Capitol Hill [B•T, May 19, 12].

The organization's heightening interest was stimulated further by an avalanche of correspondence both at NARTB headquarters and on Capitol Hill. Mail in the Washington offices of NARTB has hit over the 500 mark, more than was received from broadcasters when the Benton Bill was offered to "review" radio and TV programs, it was reported.

Chief problem is how to keep the broadcaster out of trouble, which FCC's interpretation of Sec. 315 of the Communications Act does not permit him to avoid.

FCC interpretation, according to NARTB, "completely denies this determinative right to the broadcaster since it forbids censorship of any material proposed by a candidate for public office whether or not such material is libelous, and further sets forth the warning that the refusal by the licensee to broadcast any speeches by candidates for an election might result in a finding that the station did not operate in the public interest, convenience and necessity, and could bring about a license revocation or non-renewal."

Two courses to correct the situation, according to NARTB, would be either of the following formulas:

(1) Secure full right of censorship over political material, as is the case regarding all other program material, and assume full legal responsibility for all decisions made under that right (the status of the press);

(2) Lacking clear right of censorship over political material, secure freedom from liability (in local, state and federal courts) for statements made by candidates who use broadcasting facilities under Sec. 315.

NARTB noted that the O'Hara Bill is directed toward the first formula while the Horan legislation adheres to the second approach.

NARTB found discrepancies and confusion in the O'Hara Bill which its author is currently ironing out. NARTB noted that "Mr. [Joseph P.] O'Hara said that he was of the opinion that the members of the Congress would be reluctant to give up some protection in the law against censorship of their program content by the broadcasters," NARTB said. "The FCC by previous utterances and declarations would seem to support this reservation as well," it continued.

Therefore, NARTB said, the question comes down to "practical relief for the broadcasters in this present election year."

Fundamental thesis of the Horan Bill, according to NARTB, is:

Broadcasters are now told by the FCC that they have no power to delete defamatory material from candidates' presentations, therefore it is unfair to continue to hold the broadcasters liable in the courts.

Because of broadcaster response to the Horan Bill, "Congress is now fully conscious of the present impossible situation in which the industry finds itself with respect to political broadcasting," NARTB noted.

The association said it was aware of the constitutional question—whether Congress can deprive the states of the power to adjudicate libel action—but the Horan Bill, in its opinion, would give evidence of congressional intent that the government now fills the field of communications to such an extent as to bar the states completely.

Meanwhile it was learned that Rep. O'Hara (R-Minn.) is preparing to introduce a new bill.

The measure will revise his HR 7782 which was offered in the House a few weeks ago as a "country lawyer" approach to the problem of political broadcast liability.

Rep. O'Hara told BROADCASTING • TELECASTING he expects to offer his new bill as an amendment to the McFarland Bill (S 658), a procedure he had promised for the original [B•T, May 19].

According to the Congressman, the new language contemplated in the bill will strengthen the broadcaster's position. The legislation would attempt to give the broadcaster the discretion and authority in deleting libelous material from a candidate's talk.

Changes in the measure will affect what the broadcaster can censor. Language is to be made more specific. Rather than "place no obligation" on the broadcaster to broadcast certain material, the new measure will state that the broadcaster would have the power to censor "defamatory or obscene material" which would not subject him to any civil or criminal action in any local, state or federal court.

Additionally, a section of the original bill that would have prohibited the broadcaster from exercising power of "political or partisan censorship" is to be eliminated. But it will be made clear that apart from the censorship powers as defined above, the broadcaster shall not be able to censor other parts of a candidate's speech.

UPT MERGER

FCC Hears Levey Testimony

TESTIMONY purporting to show that high-pressure tactics were used by Paramount Pictures in its dealings with at least one motion picture theatre operator, and that efforts were made by Paramount Television Productions and General Precision Equipment to thwart the development of Scophony Corp. of America, highlighted last week's hearing before FCC on the proposed merger of United Paramount Theatres and ABC.

Also revealed were the plans of Skiatron Corp. (successor to SCA) to market a home TV receiver which will throw a "very bright" 3 x 4 ft. picture on a screen or wall. It will not use a cathode ray tube and will "work well" when color is again transmitted.

Arthur Levey, president of Skiatron, told about these and other developments on which his company is now working. He also told about the difficulties in which his former company (SCA) found itself [B•T, May 19].

Determine Patent Values

Mr. Levey testified that in May 1944 SCA found itself in a "very precarious" financial position. The SCA board of directors requested accounting firm of Barrow, Wade & Guthrie to examine the situation and to make a recommendation, he said. The purpose was to have the books of the company reflect the correct valuation of the SCA assets—which were mainly various electronic patents and the Skiatron dark-trace TV tube. It was felt that for tax purposes the value of the patents had to be determined.

Mr. Levey said a copy of the proposed patent valuations and the worth of SCA's equipment was sent to Paul Raibourn, president of Television Productions Inc. (wholly-owned Paramount subsidiary) and Earle C. Hines, president of General Precision Equipment. TPI and GPE controlled all of SCA's Class B stock, and Messrs. Raibourn and Hines were both SCA directors (at least one Class B director had to be present at SCA board meetings to make a quorum).

But after receiving the information, Mr. Levey asserted, neither Mr. Raibourn nor Mr. Hines commented on it.

Mr. Levey testified that in June 1944 he made a note to himself that said, "Regret Hines and Raibourn deliberately being uncooperative—must be up to something."

Shortly later, Barrow, Wade & Guthrie had completed their studies of SCA, Mr. Levey said. In a memorandum to SCA, attached to their recommendations, the auditors said the report had been prepared without the benefit of the views of Messrs. Raibourn or Lee Morey (SCA counsel). The accountants reported these men did not wish to discuss the subject with them, the witness said.

(Earlier in the hearing, Mr. Raibourn testified that Mr. Levey tried to keep the financial details of SCA a secret.)

Still later, Mr. Levey testified, James Lawrence Fly, former FCC Chairman, was retained as counsel for the SCA Class A stockholders in an effort to prevent the Class B directors from forcing SCA to accept a loan from them.

What SCA wanted to do, Mr. Levey said, was to make money for itself through its own patents and developments. But because of TPI and GPE's "squatters rights" to the patents—through control of the Class B stock—and because SCA couldn't borrow money until it first asked the Class B stockholders for the loan—Mr. Levey said he was afraid the two companies would keep forcing loans on SCA and finally declare the firm bankrupt.

In May 1945, the Justice Dept. advised SCA that it was interested in the company and wanted all official documents, patents, minutes of board meetings, correspondence and resolutions, Mr. Levey told FCC.

On July 5, 1945, he said Mr. Hines resigned as a member of the board of directors and three weeks later, on July 23, Mr. Raibourn resigned.

Results of Hines' Resignation

This action, Mr. Levey testified, prevented the company from functioning properly. There could not be a board of directors' meeting without at least one Class B director present, he said.

On Dec. 18, 1945, anti-trust action was instituted and by January 1949 the case was settled, Mr. Levey said.

The settlement contained these provisions, the witness stated, among others:

(1) TPI and GPE would waive their exclusivity of licenses so that non-exclusive licenses could be granted to anyone.

(2) TPI and GPE were to return and cancel their notes for loans to the company for $15,000.

Earlier, in July 1949, Scophony Ltd. (the English parent company) had divested itself of any interest in the American firm, he said.

The Skiatron Corp. was organized in 1948, he said, and following the conclusion of the anti-trust case, it took over the business and patents of SCA in 1949.

Before testifying on the financial position of SCA and the history of the anti-trust action, Mr. Levey disclosed that SCA had received several offers from various companies which wanted to be licensed to use some of the SCA patents.

The offers were rejected by the Class B directors, however, Mr. Levey asserted.

Deal Possibility Cited

One of the possible deals would have been with Allen B. DuMont Labs. It would have been a cross-licensing agreement between the two firms, Mr. Levey said. The witness contended Mr. Raibourn stated he did not think such an agreement ought to be concluded.

Previous to this time, Mr. Levey said he had talked with Dr. Allen B. DuMont several times. But after Mr. Raibourn's opinion in the matter was voiced, Mr. Levey said he was never again able to get in touch with Dr. DuMont.

Mr. Levey testified that also in 1944 Bell & Howell, through its vice president in charge of engineering, Lewis A. McNabb, approached SCA and offered to improve and manufacture the Scophony supersonic projector. Bell & Howell was prepared to spend $200,000 to design and tool up, Mr. Levey said.

The witness said that at the SCA board meeting following this offer, Messrs. Raibourn and Hines held the proposition was not acceptable and devised a counter-proposal. They allegedly said Mr. Levey should advise Mr. McNabb that they would be willing to come to terms if Bell & Howell would agree to provide SCA with all the benefits of Bell & Howell's improvements—without SCA having to pay the usual royalties. This was unacceptable to Bell & Howell, Mr. Levey said.

Later Bell & Howell wanted to borrow a receiver, but Messrs. Raibourn and Hines refused to allow the receiver to be loaned out, the witness charged.

Other offers came from General Electric and the Navy. Mr. Levey held the GE offer was not accepted by SCA because of Mr. Raibourn's "obstructionist tactics."

Arrangements were eventually completed with the Navy and it paid SCA $25,000 for certain patent rights, Mr. Levey said.

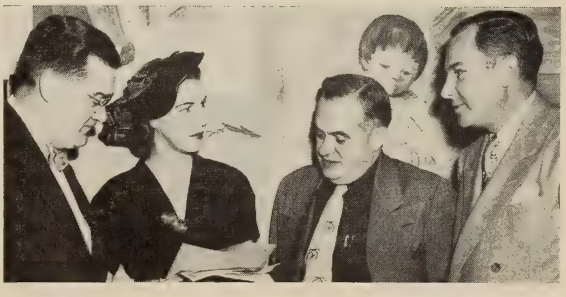
Mr. Levey concluded his testimony with a summary of the progress Skiatron has made since the 1949 "reorganization."

He said the company is working on an ultra-sonic TV receiver that will require no moving parts, using a so-called diffraction grating.

Other developments of Skiatron include experimentation with theatre TV and a test in New York of Skiatron's system of subscription TV, similar to Zenith's Phonevision tests in Chicago.

Mr. Levey will return for cross-examination in two or three weeks.

Following Mr. Levey on the stand was Charles Walders another public witness subpoenaed by the FCC. Mr. Walders is a Miami theatre owner.



He testified that he was forced to make a profit-sharing arrangement with Paramount Pictures in 1937 in order to get Paramount motion pictures for his theatre.

At first, he said, Paramount got 50% of his theatre's profits, but in 1942 this was raised to 66⅔% of the profits. In 1947 the "agreement'" was terminated, he said.

Mr. Walders testified Paramount leased his Trivoli Theatre, but broke its lease. The theatre was left in "deplorable" condition, he charged.

He also testified on typical licensing agreements with Paramount.

Following Mr. Walders last Friday was to have been Arthur F. Sass, Chicago theatre operator. Following Mr. Sass will be theatre operators Donald B. Leverett and Ralph Goldberg [B•T, May 19, 12].

AMONG leading participants at the Radio and Television Institute at the Henry W. Grady School of Journalism were (l to r) Ford Bond, announcer-producer; Martha Rountree, TV producer and personality; Charter Heslp, radio-TV director, information office, Atomic Energy Commission, and Lee B. Wailes, executive vice president, Storer Broadcasting Co. Institute was sponsored by Georgia Assn. of Broadcasters and U. of Georgia [B•T, May 12].

Hollywood Touch

LISTENERS chuckled when a bulletin was aired by WGVA Geneva, N. Y., in the middle of a network program May 14. Station interrupted a quiz show to report a robbery of the First National Bank of Ovid, N. Y. Bulletin was aired just as two contestants on the show were about to bid for a bonanza. A second bulletin was aired later. The program? ABC's *Break the Bank*, of course. Police are still searching for the gunmen who did just that.

SLOAN AWARDS WINNERS AT PRESENTATION CEREMONIES LAST TUESDAY

Mr. Watters Dr. Burks Mr. Wagstaff Mr. Moye (l) and Mr. Sloan Mr. Hardin Mrs. Bullitt Mr. Lamb

* * *

SLOAN AWARDS

Four Broadcasters Win

FOUR leaders in safety education and broadcasting, adjudged as having made major contributions to promoting highway safety during 1951, were among the seven recipients of the Alfred P. Sloan Highway Safety Awards, presented during ceremonies held in New York's Waldorf-Astoria Hotel Tuesday night.

Fourth annual presentation of the mounted bronze plaques, designed by the late Hans Schuler, were presented by Alfred P. Sloan Jr., founder and president of the foundation which gives the awards annually to radio and television stations, networks and advertisers who work to make highways safe.

Broadcasting winners were:

Vena S. Hardin, president of WBUD Trenton, N. J., which was named winner of the local sustaining classification for a campaign launched July 5, 1951 and continuing through Labor Day. A staff member gave virtually all his time to the project, speaking before civic groups, arranging air interviews and drawing up a descriptive letter, requested from other stations and automobile clubs which sought to adopt similar campaigns.

Mrs. Bullitt Is Winner

Mrs. A. Scott Bullitt, president of KING Seattle, winner among regional stations carrying sustaining programs. KING's winning *Traffic Jamboree* program is an hour-long safety reminder to motorists on their way home from work, enforced by special announcements recorded in hospital rooms, police courts and traffic scenes. The station broadcasts a total of 606 hours devoted to safety during the year.

M. C. Watters, general manager WCPO-TV Cincinnati and vice president of Scripps-Howard Radio Inc. Station was winner in TV sustaining category for contributing 373 special safety programs, 14,370 spot announcements and 604 regular program mentions to automotive safety campaigns.

Harry D. Lamb, director of WTDS-FM Toledo, which is operated by the public schools there. WTDS-FM won the non-commercial award for incorporating safety in an entertaining way on programs designed for both primary and higher level schools and for providing handbooks for teachers heading the classes.

Other winners were:

Harold J. Moye, president of Granite Chevrolet Co., Quincy, Mass., which sponsored *Safety is Everybody's Business* on WJDA Quincy.

Dr. H. G. Burks Jr., executive vice president of Esso Standard Oil Co., New York. His company was national and regional commercial winner for giving over to the subject of safety one of every seven commercials on the 52 stations carrying *The Esso Reporter* newscast during 1951.

James B. Wagstaff, vice president in charge of sales for the DeSoto Division, Chrysler Corp., Detroit, winners of the TV network commercial award. National Safety Council slogans were featured by the company on 49 of 52 *You Bet Your Life* telecasts during the year.

The awards program was to be telecast on NBC-TV Sunday afternoon as part of the Sloan Foundation's *American Inventory* series. The program will also include a musical variety show, "Safety in Numbers," written expressly for first presentation at the Sloan awards dinner.

* * *

WFDF CELEBRATES

30 Years on Air Waves

WFDF Flint, Mich., yesterday (Sunday) was to observe its 30th anniversary with a special dramatic program and a history of the station's development, including messages from Gov. G. Mennen Williams, General Manager Ivan L. Wiles of the Buick Div. of General Motors, Mayor Paul Lovegrove of Flint and others, according to Lester W. Lindow, WFDF general manager.

Other Sunday events were to include *The Blues Chasers*, daily variety program, featuring Billy Geyer, a veteran of almost 30 years at WFDF, and Chief Announcer Bud Haggart. WFDF licensee is the Trebit Corp. Ten of the 42 employes have 15 years' service and four have 20 years. It was one of the first stations to broadcast election returns, local news and sports events, including the Dempsey-Firpo fight in 1923. WFDF was recipient last Tuesday of a public service programming award from the Freedom Foundation of Valley Forge, Pa., for 1951.

GATHINGS STUDY

House Group Named On 'Morals' Probe

CAPITOL HILL's lull on the pending radio and television program probe dissolved last week with announcement that a subcommittee has been formed [B•T, May 5 et seq.].

Subcommittee members are all drawn from the House Interstate & Foreign Commerce Committee. They are Reps. Oren Harris (D-Ark.), who will serve as chairman; Democratic Reps. Arthur G. Klein (N. Y.), F. Ertel Carlyle (N. C.) and Homer Thornberry (Tex.); Republican Reps. Joseph P. O'Hara (Minn.), J. Edgar Chenoweth (Col.) and Harmar D. Denny Jr. (Pa.).

Up to the week's end, reported aims of the subcommittee were pegged as speculation by commerce committee spokesmen. Until a meeting of the group is held, it is doubtful whether any sure line of action will be set.

Announcement of the subcommittee's formation was made by the commerce committee's Chairman Robert Crosser (D-Ohio). Rep. Harris, designated as head of the subcommittee, would not divulge any plans, other than to point out that the group had been named.

Rep. Crosser said the subcommittee would discuss the resolution, sponsored by Rep. E. C. Gathings (D-Ark.), at an "early date." It was noted that the subcommittee would use commerce staff facilities rather than hire outside men. This was underscored, it was learned, to discourage a flood of applicants to be "investigators."

As the House group moved closer toward the study and inquiry to determine "the extent to which radio and television programs . . . contain immoral or otherwise offensive matter or place improper emphasis upon crime, violence, and corruption," opposition held sway in non-industry circles.

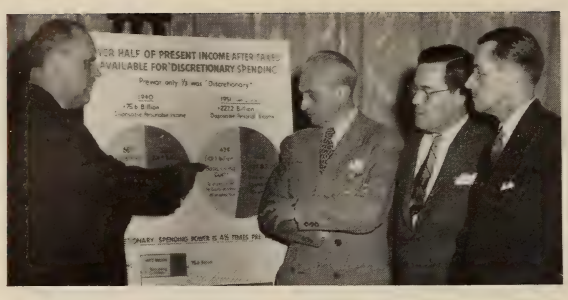
Jack Gould, *New York Times* radio-TV columnist, said:

Whatever the sins of the broadcasters—and there are some that are inexcusable—they are of scant consequence in comparison to the spectre of a group of politicians arrogating unto themselves the authority to decide what should or should not be put on the air. . . . For the House to explore the business and legal aspects of radio and TV is one thing but to judge broadcasting's moral conduct is censorship pure and simple. Even if many viewers may think Rep. Gathings is right in regard to crime shows, they must still recognize the wholly unwise principle of government attempting its own solution. Today the House is interested in crime shows; tomorrow it may be interested in ideas.

The Nation magazine concluded after a discussion of the resolution, "These latest investigations are certain to be used further to restrict freedom of thought and expression rather than to improve the undoubtedly low moral standard of our mass-entertainment media."

In a CBS Radio broadcast last Monday, news commentator Edward R. Murrow, noted of the investigation, "When Congress attempts to legislate on matters of taste, improper emphasis, what is offensive and undesirable, then it is only another short step to increasing controls over what the individual may say, and how he may act."

McCARTHY CLAIMS



Commies in Radio-Press

SEN. JOSEPH R. McCARTHY (R-Wis.) said in a May 18 radio interview that he believes "we have a vast number of Communists in press and radio." The Senator was interviewed by Paul Martin, moderator of the Gannett News Service's Washington-originated *Your Capital Memo.*

Sen. McCarthy brought up the radio and press while answering questions about names he has been called. He said it was "nothing new or unusual" about the number of "dirty" names as a result of his campaign to "expose" Communists in government.

"Whenever anyone injures Communists as distinguished from Communism," the Senator said, "he promptly receives attention from all the left-wing bleeding hearts of press and radio."

He said "Louie Budenz, who was the editor of the *Daily Worker*, who is in a position to know, said that as editor of the *Daily Worker* he had 400 Communists in press and radio throughout the country. He has given the names of those 400 Communists to the Justice Dept."

PHILADELPHIA American Assn. of Advertising Agencies chapter meeting there May 19 saw these area AAAA officials getting demonstration from Arno Johnson (l), vice president and research director of J. Walter Thompson Co. Others (l to r): Wesley Ecoff, Ecoff & James Inc. Adv., chairman of Philadelphia chapter; Al Morgan, Richard A. Foley Adv., chairman of Atlanta Council; Earl A. Buckley, Buckley Organization Adv., Atlantic Council gov.

CAPEHART PLAN

Senate Group Vote To Keep Formula

PROMPT Senate action was promised by administration leaders last week on legislation which would retain the controversial Capehart cost allowance formula and authority for reinstatement of Regulation W credit curbs until March 1953.

An amended bill to extend the current Defense Production Act beyond June 30 moved closer to reality as the Senate Banking & Currency Committee voted to report its recommendations to the floor early this week.

Sen. Ernest W. McFarland (D-Ariz.), majority leader, said he hopes for quick passage of the proposed bill, providing for an eight-month extension of wages and prices. Others predicted, however, that a flood of amendments would be offered during floor debate, tentatively set for this week.

Meanwhile, retention of standby authority for the Federal Reserve Board to crack down on credit controls if the occasion demands was urged by FRB Chairman William McChesney Martin Jr. in the wake of the Senate committee's action. The board suspended curbs on installment purchases of radio-TV sets, household appliances, furniture and automobiles earlier this month [B•T, May 12]. (Also see story, page 110.)

Retention of the allowance formula, permitting manufacturers and processors to compute additional costs for advertising, selling, administration and research and add them to ceiling prices, would give them further opportunity to apply for these benefits on the basis of costs accrued before July 26, 1951. The cutoff date would remain the same.

The Senate Banking Committee's decision to retain the cost allowance formula fathered by Sen. Homer E. Capehart (R-Ind.) was made by "almost unanimous" voice vote, according to spokesmen. Regulation W was retained in absence of specific committee action.

Thus, Sen. Capehart emerged victorious with his cost allowance provision, but was defeated in his previous proposal for abolition of credit curb authority.

A capsule summary of other actions taken by the Senate Banking Committee:

- Voted to extend wage-price controls for nine months—until next March 1—as proposed by Sen. Capehart.
- Retained exemption from price control of rates charged by radio-TV broadcasting and other media.
- Voted 7-3 to overhaul the Wage Stabilization Board, with substitution of an all-public panel to function in an advisory capacity, sans any authority to recommend wage dispute settlements. Members would be subject to Senate confirmation.
- Voted to extend authority for allocation of critical materials by the Defense Production Administration and National Production Authority for one year—until June 30, 1953.
- Voted to require OPS to raise ceiling prices to levels prescribed by state minimum price laws.

The House Banking Committee still is holding hearings on the Defense Production Act. But Chairman Brent Spence (D-Ky.) told President Truman he is confident Congress would extend controls for another year to June 30, 1953.

As proposed by Sen. Paul Douglas (D-Ill.) and approved by the Senate Banking Committee, the Capehart amendment would be clarified to apply solely to manufacturers and processors.

WGNY PURCHASE

Bingham to Head New Firm

SALE of WGNY Newburgh, N. Y., Wednesday for $75,000 to a group of the station's employes was announced last week by Edward A. Chappell, vice president of Speidel Newspapers Inc. and treasurer of WGNY Broadcasting Co. Inc., licensee of WGNY.

George W. Bingham, general manager of WGNY under the former licensees, will be president of the new licensee firm, to be known as the Orange County Broadcasting Corp. The transaction is subject to FCC approval.

Mr. Bingham said some of the officials and stockholders in the purchasing group also are members of the Duchess County Broadcasting Corp., which bought WKIP Poughkeepsie, N. Y. earlier this year [B•T, March 3] from the Poughkeepsie Newspapers Inc. Radio Div., which also had been an affiliate of Speidel Newspapers. He did not disclose distribution of stock in the new firm.

New officers, all stockholders, besides Mr. Bingham, are: vice president, Joseph W. Rake, who was WGNY commercial manager; secretary-treasurer, Mabel Shroyer Meurer, who was WGNY office manager; chief engineer, Marvin S. Seimes, who held the same position both at WGNY and WKIP under the former ownership; program director, John J. Kuhn; member of sales department, Campbell Thompson. Messrs. Bingham, Seimes and Mr. Kuhn and Mabel Shroyer Meurer also are president, vice president for engineering, vice president for programs and secretary-treasurer, respectively, of the WKIP licensee firm.

Mr. Bingham said an application will be made immediately to the FCC for approval of assignment of license and sale of physical assets of the WGNY property.

WGNY first went on the air in 1953. It operates on 1220 kc daytime. Main offices are at 161 Broadway, Newburgh, with the transmitter on the Coshecton Turnpike. Speidel Newspapers recently sold KDON Santa Cruz, Calif., and KWRN Reno, Nev.

RCA VICTOR CLASS

78 End Training Course

SEVENTY-EIGHT broadcasters last Friday concluded an intensive series of classes and laboratory demonstrations at the RCA Victor plant in Camden, N. J. It was the second largest class attendance registered since the training programs were begun by RCA in 1948.

Nearly 700 engineers from the United States and several foreign countries have received training in basic theory, design, operation and maintenance of TV broadcast equipment in this series.

1892 John D. Ewing 1952

JOHN DUNBRACK EWING, 60, widely known radio station owner and newspaper publisher, died May 17 following a heart attack suffered in his private plane while flying to Shreveport, La.

Mr. Ewing was en route from his summer home at Pass Christian, Miss. The plane landed at Ruston, Miss., and his body was removed 60 miles westward to Shreveport.

Mr. Ewing

Nationally known in the radio industry, Mr. Ewing was president of the International Broadcasting Corp., owner - operator of KWKH Shreveport and KTHS Hot Springs, Ark., soon to be moved to Little Rock [B•T, Dec. 31, 1951].

In addition, he was editor-publisher of the *Shreveport Times* and president of the Monroe (La.) News-Star-World Publishing Co., which publishes the Monroe *News-Star* and *Morning World*.

Born in New Orleans, Mr. Ewing grew up in a newspaper family. He received a Bachelor of Science degree in 1913 from Virginia Military Institute, where he captained the basketball team.

During World War I, he served as an infantry captain and received the Croix de Guerre with Star and the Purple Heart.

He was president of the Southern Newspaper Publishers Assn. in 1938-39 and in 1939 was chairman of the association's board of directors. He also was a director of the Kansas City Southern and the Louisiana & Arkansas Railroads; a past department commander of the American Legion and chairman of the board of the American Legion Monthly.

Among clubs to which Mr. Ewing belonged were the Boston of New Orleans, Shreveport Golf and Country Club and the Augusta (Ga.) Masters.

In 1929, he testified against the late Gov. Huey Long at an impeachment inquiry brought in the Louisiana State House. Mr. Ewing was a confidant of President Franklin D. Roosevelt and was a caller at the White House during the late Chief Executive's tenure in office.

Survivors include a son, John D. Ewing Jr., a student at Louisiana Polytechnic Institute at Ruston, and a daughter, Mrs. Helen May Clay, a director of KTHS, and wife of Henry B. Clay, KWKH general manager.

Funeral services were conducted at St. Mark's Episcopal Church in Shreveport. Burial was in that city's Forest Park Cemetery.

Pittsburgh Premiere

TEN radio stations in Pittsburgh's Allegheny County area have accepted invitations from Republic Pictures to cover the "global" premiere of its new picture, "I Dream of Jeanie." Two other stations were invited. Each station will have separate booths for commentators in the Fulton Theatre lobby, with interviews of civic leaders to be taped and played back the following day. Plan of WDTV (TV) Pittsburgh to telecast stage proceedings was rejected by theatre manager John Walsh, according to Republic Pictures, when he learned deal was to include local sponsor announcements.

MBS-IGA PLAN

Grocery Market Test

SECOND grocery marketing test plan, to be held June 23 to July 5, was announced in New York Thursday for MBS by Hal Coulter, director of advertising and promotion.

Some 350 stations may participate in the campaign through announcements for local and national advertisers, special morning quarter-hour programs—still to be contracted—and through 150 network announcements keyed to the merchandising test.

Based on a previous five-month plan which started last June, the plan is being undertaken in cooperation with the Independent Grocers Alliance through its super markets and cooperating wholesalers in 31 states and is keyed to the slogan, "Look, Mom—It's a Picnic." First week of the exploitation will use the phrase in a figurative sense for tie-in sales, and second week will stress literal interpretation to build sales of picnic foods.

The IGA organization is supplying all its major markets with some 11,000 window posters, stack cards and shelf takers, all starting with "Your Mutual station says. . . ." Independent stores in non-IGA markets also are being invited by MBS outlets to join the promotion, to bring total participation to some 5,000 stores. The campaign will be reinforced by makers of MBS-advertised grocery store products, such as S. C. Johnson & Son, Craft Foods, and P. Lorillard Co., with announcements on their programs.

First Test Results

Results of the first test indicated that an extensive campaign is impractical, unimaginative, and, for the network, too costly, Mr. Coulter said. It is impossible to maintain high-interest among grocery store operators throughout a full year, he explained, indicating that the more practical alternative is for an advertising medium to adapt itself to marketing patterns as they exist rather than to create its own.

"There is also an ethical difference between simply 'giving away time' and using radio's own facilities to promote one of radio's own promotions," he emphasized, adding that MBS stations, because of their home town locations, lend themselves particularly well to such point-of-sale marketing schemes.

Philip Leshem

PHILIP LESHEM, 29, radio and television timebuyer at Grey Adv., New York, died May 16 in Florida, while on leave of absence. Mr. Leshem had been with the agency for three and a half years and prior to that was with Compton Adv. in similar capacity. Surviving is his wife, Toby.

Tearsheets for Radio . . . . . *By Gene F. Seehafer*

DICK D. is a newspaper advertising salesman. Each day you can see him making service calls with his small leather briefcase, which includes newspaper advertising tearsheets.

This tangible evidence of newspaper advertising also has its counterpart in radio advertising. A copy of the radio commercial in the hands of the retail advertiser is just as much a tearsheet as the proof sheet of the newspaper advertisement.

The alert radio station can go a step further. Instead of just delivering or mailing a copy of the commercial to the retail advertiser, why not send the original copy? A carbon copy will suffice for the announcer's use.

When several copies are needed by the retail advertiser for various departments, again the carbon copy comes into play as the copywriter types the commercial. Five to seven legible copies can be produced this way, at negligible cost when compared to hectographing or mimeographing, although the latter may have to be employed in special instances where many copies of a commercial are needed.

Radio commercials may be distributed to department heads and posted where employes can read them. Even better, special radio station bulletin boards (with station call letters and "As Advertised On" showing clearly) can be erected at strategic points within the advertiser's store and current radio advertising messages posted for benefit of sales staff and customers alike. Since most people have never seen a radio commercial, the novelty value

draws attention.

To merchandise with radio "tearsheets," the retail advertiser must plan his radio advertising well in advance. Items to be radio-advertised should be selected at least one week ahead of time so necessary writing and delivery of commercials to the store can be done in time for full and complete merchandising coordination.

The radio "tearsheet" gimmick may be the wedge the salesman needs to pry the retail advertiser from his perennial habit of selecting items at the last minute.

Before distributing commercials as tearsheets, the radio station will do well to check the appearance of its copy paper. Since commercials no longer are merely intra-station, the data printed on the head of the copy sheet should be considered a special radio station advertising opportunity, reflecting a touch of the glamorous and the modern.

Thus, the need for call letters in large letters, the station frequency, and the network affiliation showing up clearly with blanks for the usual data such as the name of the advertiser, the product being advertised, length of commercial, date and time on the air and the name of the program, if a program commercial. Contrasting colored ink is especially effective.

Tearsheets can also be employed by the TV station. Copies of TV commercials can be distributed to sales persons or posted on special TV bulletin boards, on counters next to the TV-advertised item, near elevators, escalators and at other points where consumers and sales people congregate.

GENE F. SEEHAFER, new manager of research and sales promotion at CBS Chicago [B•T, April 21], formerly was assistant professor of advertising at the U. of Minnesota. He holds degrees from Wisconsin and Northwestern, is co-author of *Successful Radio & Television Advertising* with Jack W. Laemmar. Latter wrote "Inviting Action in Radio Copy" [B•T, March 31]. Mr. Seehafer operated a radio station counseling service, including a radio advertising "*Ideal Exchange*," and was a member of the Minneapolis Chamber of Commerce Speakers Bureau and Minneapolis Advertising Club. He is a member of Alpha Delta Sigma, national advertising fraternity. The author also has worked for several midwestern radio stations and the Wisconsin Network. He spent his 1950 university leave with the market analysis department of General Mills Inc. and as executive secretary of the Wisconsin Rapids Chamber of Commerce.

SMITH QUITS ABC

No Plans Announced

EDWARD G. SMITH last week resigned as director of ABC's Radio Network at the Central Div. Mr. Smith, who announced no plans, joined ABC Chicago in January 1950 as program sales manager for radio and television. In July of last year, when network radio and TV operations were split, Mr. Smith was designated Central Div. Network director.

Before joining ABC he was associated with General Mills 12 years as director of radio, television and film production. Before that, he worked at WGN Chicago as a director and was general manager of WOOD Grand Rapids, Mich. During his last three years with General Mills, he spent most of his time on television for *Betty Crocker*.

ZONITE CLAIMS

FTC Issues 'Cease' Order

"FALSE" advertising is cited in a cease-and-desist order directed by the Federal Trade Commission against Zonite Products Corp., New York, and its advertising agency, Erwin, Wasey & Co., same city.

The order charges misrepresentations in published and broadcast continuities for Forhan's Toothpaste, and cites the agency for participating in the preparation and dissemination of the advertisements. Neither the complaint nor the order, announced last Thursday by FTC, specify the type of radio advertising.

The product, according to commission findings, "contains nothing the application of which is of therapeutic value in the prevention or cure of any disease or disorder of the teeth or gums," and "its sole value is as a cleaning agent." The respondents also were requested to cease certain other representations.

SALARY INCREASE

Granted to SAG by WSB

BASIC minimum salary increase for film actors recently negotiated by Screen Actors Guild with major movie producers was approved May 14 by the Wage Stabilization Board. Day player minimum will rise from $55 to $70 weekly. Freelance actors will receive $250 weekly, an increase of $75. Wage boosts are retroactive to Jan. 1.

Fringe benefits such as travel time charges and wardrobe and makeup tests pay require separate action by WSB. SAG's new contract with the Society of Independent Motion Picture Producers Assn. is also pending WSB approval.

MEDIA STUDY

KOA Cites Radio Edge

IN Colorado and Wyoming, where no television exists, radio ownership has reached 99% of all homes, and 80% of all homes own two or more sets in working order.

These and other facts were turned up in a new diary study made for NBC's KOA Denver by Research Services Inc., Denver. The study, the second in two years, was released last Thursday in New York.

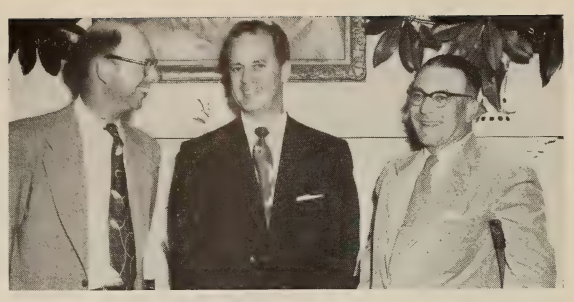
In Colorado and Wyoming, radio gets more attention by far than other media. Radio listening averages 2 hours, 26 minutes per person per day; newspaper reading gets 36 minutes per day, and magazine reading 25 minutes per day.

Total time spent listening to the radio per day in those two states has increased by 17%, from 202,500,000 minutes per day in 1950, when the first KOA diary study was made, to 235,936,000 minutes in 1952. This vast increase is due to increases in individual listening and to population growth.

In the same period, newspaper reading has declined by .6%.

A new NBC Radio Spot Sales presentation based on the study points out that KOA reaches more people at lower cost than any combination of newspapers in the area or any combination of other radio stations.

milestones . . .



► FRANK W. MILLER Sr., president of Headley-Reed Co., station representation firm, was honored on his 40th anniversary in the representation field May 2 at a surprise party by executives and staffs of Headley-Reed and of Kelly Smith Co., newspaper representatives. The group included James E. Mullins, general manager of Kelly Smith, and Frank W. Miller Jr., secretary and treasurer of the radio and TV station representative organization.

* * *

► GLENN D. GILLETT, veteran radio-TV engineering consultant, Washington, D. C., is celebrating his 30th year in radio. He began his career with AT&T, helping put WBAY New York, the city's first radio station, on the air. He developed the contour method of representing field strength distribution from broadcasting stations, the method used today. Mr. Gillett did work for the Navy and Air Force during World War II and served as an electronic consultant for ECA.

* * *

► IN celebration of CBS-WHAS Anniversary Week, WHAS Louisville May 15 aired a broadcast marking 20 years' affiliation with CBS Radio. Titled *These Twenty Years*, program related close association between network and station and WHAS broadcast originations.

G. RICHARD SHAFTO (c), general manager of WIS Columbia, S. C., celebrating 20 years with the station, his birthday and his 25th wedding anniversary, is congratulated by Joseph P. Davenport (l), transmitting plant supervisor, and Leo Downs, sales representative, both WIS veterans of more than 20 years.

UNION TALENT

AAAA Units Weight Merger Proposal

POSSIBILITY of merging the five branches of Associated Actors and Artistes of America by July 1, after which Television Authority may merge with American Federation of Radio Artists, seemed somewhat shaken last week after most unions held what one spokesman described as "day and night sessions" on the first draft of a merger proposal. It was submitted by labor relations experts from two universities.

Discussed by East Coast unions Monday and Tuesday at New York's Hotel Astor, the 42-page proposal was considered an outline, with further amplification and rearrangement to result from AAAA members' reactions to it. The plan was to be discussed in Chicago Thursday and on the West Coast today (Monday), after which it was to be rearranged and resubmitted.

Unions affected by the merger—Actors Equity and Chorus Equity Assns., American Guild of Musical Artists, American Guild of Variety Artists, AFRA and TVA—were thus withholding comments until the final proposal is drafted. Since union heads still would have to resolve their stands before submitting it to membership referendum, a procedure that normally consumes a month's time, it seemed unlikely last week that the merger could be completed by July 1. As a spokesman for one group said, "Any possibility of the unilateral deadline set by the TVA is probably out of the window . . . it's impractical to expect that it be kept."

Reactions Varied

TVA, invited to merge with AFRA, passed a resolution at its December convention asserting it would form an all-broadcasting organization if total merger is not completely and finally approved by all branches by July 1. Constitution has been prepared for the new AFRA organization and approved by both organizations, but requires approval of the AAAA board and two weeks notice to all branches. Document has not yet been submitted for approval.

Reactions to the blueprint ranged from "very good chance for merger now" to a dubious, "you just can't predict; sometimes when these things seem most certain, they still fall through." All AAAA branches seemed busy last week, however, studying the first document to see what it contains that they want and what it lacks.

Blueprint calls for a national union of all entertainers, divided geographically into eastern, central and western divisions, and governed by a 200-member national executive board. The national board would meet at least every two years, and its geographic sections would be required to meet at least four times per year. The national body would be headed by president, five vice presidents, a treasurer and a recording secretary, all elected from board membership.

Goals of Merger

Two goals of the final merger would be to establish a strong central organization while preserving representation for the varied interests of the varied membership and to provide greater centralization than is usual in labor organizations. It was understood that one problem, at least, would be to assure such specialists as opera choruses adequate representation throughout the many channels from base to top of the proposed organization.

Another problem was understood to loom in merger of assets, totalled at $1,270,000 for all five branches, of which a reported 56% belongs to Actors Equity. Plan suggests that half of each treasury be allotted to the new organization, with the remainder to be placed in trust for one year, at which time the new locals will receive old locals' funds in proportion to the number of old locals' members contained in the new unit. A bright note, money-wise, was the prediction that total merger would pare a substantial amount from the $1 million spent by all branches for operating expenses annually.

Members of the national board would be nominated by talent categories: 44%, actors; 31%, dancers; 20%, singers; 7%, announcers; 5%, specialty acts; and 3%, concert-opera performers. Of the total 200 members, 90 would be from the eastern division, 40 from the midwest and 70 from the West Coast. The national group would be required to contain at least 10 members from each entertainment field, and one representative for every 100 members in each local.

Initiation fee was put at $50 for members earning less than $3,000 per annum, with dues to be $20—payable in advance—plus 1% of income between $2,000 and $30,000 annually.

TITLE BOUT

Rights to NBC-Gillette

TELEVISION and radio rights to the heavyweight championship bout between Jersey Joe Walcott and Ezzard Charles in Philadelphia June 5 were sold to NBC and Gillette Co., according to a Wednesday announcement.

Price of the contract—with announcement delayed several days to settle each fighter's take—was reported as $175,000, although neither NBC nor Gillette's New York agency, Maxon Inc., would confirm or deny the amount. The bout was to be carried throughout the nation except for a blackout area for 75 miles around Philadelphia.

Exclusive television coverage of the Sugar Ray Robinson-Joey Maxim fight for the light-heavyweight championship will be carried by Theatre Network Television, according to an announcement made Tuesday by Nathan L. Halpern, TNT president, and James D. Norris, International Boxing Club president.

A network of 40-50 theatres will carry the match June 23 from New York's Yankee Stadium, and TNT spokesmen indicated that additional theatres may be added, "if the telephone companies clear facilities." It was not known last week whether coverage would extend as far as the West Coast.

ACLU REQUEST

Refused by FCC

REINSTATEMENT of the 1941 FCC "Mayflower Decision" forbidding stations to editorialize, requested by the American Civil Liberties Union last March [B•T, March 10], was turned down last week by the Commission.

In a letter to Patrick Murphy Malin, ACLU executive director, FCC took note of its 1949 ruling which set aside the Mayflower edict and wrote in part:

> . . . **The Commission's Report (Editorializing by Broadcast Licensees) was adopted after a full hearing at which testimony was received . . . which . . . thoroughly canvassed the difficult question involved.**

ACLU's petition contended attempts by stations to editorialize has proven confusing and unworkable.

YOU CAN KNOW *Everything* ABOUT YOUR AUDIENCE IN IOWA!

Probably the first axiom in advertising is that to do an optimum job, you must know exactly to *whom* you are talking, at what *time,* under what *circumstances.*

Many advertisers have told us that the only precise data they have on most newspapers and magazines is "rates and circulation"—and that this doesn't provide the information needed for smart selling. For fourteen years, the annual Iowa Radio Audience Survey has presented a complete, accurate and detailed picture of the radio audience in Iowa. Using these Surveys, you know exactly *who* is listening to the radio at any time of day or night—men, women, children—urban, small town and farm—their economic and educational status—their preferences for various types of program materials—and dozens of other facts to help you plan your strategy.

The 1951 Iowa Radio Audience Survey is now available. It is the result of personal interviews with 9,180 families—all scientifically selected from Iowa cities, towns, villages and farms to present a true picture of the radio audience in Iowa. It is a *must* for anyone who wants to get the ultimate value from his advertising dollars, in Iowa. Write direct for your copy, or ask Free & Peters.

NARTB MEMBER-STAFF group paid informal call on FCC Commissioner Rosel H. Hyde last Monday during meeting of special committee on transcription rules. L to r: Comr. Hyde; Michael R. Hanna, WHCU Ithaca, committee chairman; William Fay, WHAM Rochester; Walter Compton, WTTG (TV) Washington; Thad Brown, NARTB TV director; Ralph W. Hardy, NARTB government relations director.

Rate Cut Crisis

(Continued from page 23)

concern over the current competitive network sales and rate situation, which is at such variance with the great resurgence of radio in terms of audience and the buying of business at both local and national spot levels."

The statement added that "no joint action is contemplated, but individual committee members indicated they would consult with their respective networks."

The avoidance of "joint action" was deliberate. As a committee, there are few actions this group can take without running afoul of the anti-trust laws. This has been a perpetual handicap suffered by the Affiliates Committee. As usual at its sessions, Edgar Barton, a New York attorney, attended last week's meetings to counsel on actions that might violate anti-trust.

Though there was no official explanation of what the individual members intended to take up when consulting with their respective networks, it was learned that in the case of those members who are CBS Radio affiliates and who have not yet signed the new contracts ceding total power to the network to adjust rates they would continue to reject the contract revisions.

Hold Rate Line

In the case of members affiliated with other networks, they would resist any similar efforts toward contract revision that might be made in future by their networks.

In all cases, the affiliates intended to urge the networks to hold the line on rates. Though opinion varied somewhat as to details, in general the affiliates were agreed that if nighttime rates were lowered, daytime rates ought to be raised.

One member of the committee pointed out to BROADCASTING • TELECASTING that many stations operated on profit margins that were not large enough to withstand substantial decreases in income from their networks.

If a decrease in network rates were imposed on top of the continuing decrease in network business volume, he would not be surprised to see some network stations turn independent, he said.

None of the Affiliates Committee members has received any direct notification from any network as to possible rate changes, it was said. But they said they had it on good authority that the "threat of change is imminent."

During its meeting, the Affiliates Committee also heard discussions of current research activities from A. C. Nielsen, president of A. C. Nielsen Co.; Kenneth H. Baker, president of Standard Audit & Measurement Service, and C. E. Hooper, president of C. E. Hooper Inc.

Mr. Kobak described to the committee the ambitious research evaluation project which the Advertising Research Foundation has voted to undertake, providing the financing can be found.

He pointed out that ARF would stand the overhead expense for supervising the study but that roughly $25,000 would be needed to carry out the work. As will be the case with most ARF-supervised understakings, the medium involved will have to stand the cost, if the work is to be done.

As president of ARF, he will urge the sponsorship of the project upon BAB, which Mr. Kobak described as the logical sources of funds. As chairman of BAB, he will be in a position to cast one vote in favor of the proposal he will make as president of ARF. Whether other members of the BAB Finance Committee will vote the same way could not be learned last week.

The type of job contemplated is not unlike that recommended a year ago by the special test survey committee which was originally formed at the urging of Stanley Breyer, of KJBS San Francisco. That committee estimated the job would cost $140,000.

Mr. Kobak said last week, however, since some of the overhead would be absorbed by ARF and because ways had been found to cut down drastically on the expense without impairing the quality of the study, the sum needed from BAB would be only about $25,000.

The research project which Mr. Allerton will undertake for NARTB was called for in the following resolution adopted at the NARTB's AM Committee meeting:

"Resolved that the NARTB survey the economics of AM radio to determine and ultimately publish the basic facts on American radio from an operational and financial viewpoint, including but not limited to the changing relationship of income to the cost of operation."

The resolution placed virtually no limitations on the scope of the study.

Mr. Allerton said he would personally conduct a pilot study in an as yet unannounced market. After completing that and deciding what kind of conclusions can be reached, he will start the main task. He said he would have to hire one research expert to assist him when the project gets under way.

MORENCY STAYS

As Affiliates' Chairman

PAUL W. (Fritz) MORENCY, WTIC Hartford, last week agreed to retain the chairmanship of the All-Radio Affiliates Committee until the next meeting of the full membership at the NARTB convention next year. Last April, at the expiration of his first year of service, he agreed to reappointment with the stipulation he could withdraw within a few months.

At last week's meeting of the 13-man committee Kenyon Brown, president of KWFT Wichita Falls, Texas, and Robert D. Swezey, vice president of WDSU-AM-TV New Orleans, were elected vice chairmen.

Leonard Kapner, president of WCAE Pittsburgh, resigned from the committee because of the pressure of business. Leslie C. Johnson, vice president and general manager, WHBF-AM-FM-TV Rock Island, Ill., was elected to replace Mr. Kapner.

KATE SMITH and Ted Collins were presented gold key awards during NBC-TV *Kate Smith Hour* fortnight ago by Gilbert W. Chapman, Yale & Towne Mfg. Co. president, for singer's "unselfish support of humanitarianism and patriotic causes" and announcer's "cracker barrel" discussion of important events.

RECORD RULE

FCC Asked to Revise

FORMAL request by NARTB for rewriting of regulations governing recorded radio and TV programs is to be made at the FCC in the near future.

Present rules, requiring cumbersome announcements to identify electrical transcriptions, tape, kinescope and similar delayed broadcasts, are considered obsolete in view of the progress in recording techniques and the advance in program procedure.

The project developed at the NARTB board meeting last February when Michael R. Hanna, WHCU Ithaca, N. Y., proposed that FCC's rules were in need of revision. The board approved the idea [B•T, Feb. 18].

Details of NARTB's position were discussed last Monday by a special committee headed by Mr. Hanna. Meeting at NARTB headquarters, the committee included William Fay, WHAM Rochester, and Walter Compton, WTTG (TV) Washington. Committee members paid an informal call on FCC Commissioner Rosel Hyde.

STATIONLESS TOWN

FCC Favors in Okla. Case

A SMALL town without a broadcast station should get its own outlet before another larger town gets a second station. That is the basis for FCC's initial decision last week which would grant J. D. Allen 1250 kc with 500 w daytime for Anadarko, Okla., while denying the competitive bid of Lawton-Ft. Sill Broadcasting Co. for 1250 kc with 1 kw daytime and 500 w night at Lawton, Okla. Comrs. E. M. Webster, Robert F. Jones and Robert Bartley did not participate in the initial ruling.

Mr. Allen has an insurance and real estate business in Chickasha, Okla., but he plans to sell his interests there and move to Anadarko if the initial decision is made final.

Lawton-Ft. Sill Broadcasting is owned by Byrne Ross and family. Mr. Ross is licensee of KLPR Oklahoma City.

RADIO FARM TEAM

Sent Abroad by MSA

MUTUAL Security Agency has selected four radio farm directors for a six-week tour of European and Middle Eastern countries to teach local farm editors how agricultural information is spread in the United States.

In a schedule calling for departure from Washington last Thursday, they were: Sam Schneider, KVOO Tulsa, president of the National Assn. of Radio Farm Directors; Larry Haeg, WCCO Minneapolis, past NARFD president; C. W. Jackson, KCMO Kansas City, and Claude Mahoney, WTOP Washington.

'SUPER-SALESMAN' PAUL BARTELL
ACCLAIMED BY 'SEE' MAGAZINE

New York, May 1 -- Station WFOX's popular disc jockey, Paul Bartell, was named one of America's top disc jockeys, in an article in the current issue of SEE Magazine, just released.

By reason of his "outstanding personality, plus the astuteness of his showmanship," Mr. Bartell has reached the top in a field of more than 4,000 disc jockeys in the United States, the article declared. His talent and enthusiasm have inspired a high degree of loyalty among his listeners, and have made Mr. Bartell "a moulder of public opinion, and a super-salesman" in the city of Milwaukee.

"The disc jockey caters to advertisers unable to meet the prohibitive production costs -- and hence selling price -- of network programs." At the same time, the best platter-spinners are a potent selling force. "The same people hear the same messages day after day, and hence are apt to be influenced by what they hear."

Disc jockeys are most influential in the recording and music publishing fields. "Removal of disc jockey patronage" the magazine states, "spells finis for a tune." Local spinners, by reason of their influence and popularity, are often recruited to aid charity drives, make stage appearances, and conduct newspaper columns.

"Selecting the country's outstanding disc jockeys, from among 4,000 men and women, is a difficult job," the SEE article concludes. Paul Bartell's selection was based on his influence, sponsorship, and audience acceptance.

creative thinking and clear expression of ideas

McCarran Resolution

(Continued from page 27)

open the way to "a new era of honest and realistic reporting," he said, asserting "the resolution which you sponsor . . . suggests you may believe it is not possible to conduct an orderly hearing and permit sound and picture coverage at the same time."

Extensive comment was contained in CBS Radio news commentator Edward R. Murrow's commentary last Monday.

Mr. Murrow said the combination of President Truman's security order, the Gathings resolution, the House ban and the contemplated Senate ban, "represent both a threat of censorship and a denial of the right of television and of radio to employ the tools of their trade, the microphone and the camera, to disseminate information."

He also said, in part:

So far as the opinion of the lawyers of the American Bar Assn. is concerned, I would suggest that their opinion on this subject carries, or should carry precisely as much weight as a group of doctors, plumbers, or steelworkers. In the absence of any specific law, their credentials on the matter of news and information are as good but no better than those of any other organized group in the community.

Remember, this ban against cameras and microphones in House Committee hearings, and the proposed one against Senate hearings, applies to open, public meetings. I don't care whether it's McCarthy attacking, Owen Lattimore defending, Acheson explaining foreign policy, Lovett defending a Defense appropriation—I would rather hear the relevant excerpts of their testimony in their own voices, than to read it or hear it after it has filtered through the minds of reporters and editors, whether in newspapers or on radio. (No politician or witness has yet claimed that his own voice misquoted him.)

Whenever the government of the day, or the opposition, desire to advocate or urge legislation or action upon the country, they request and receive radio and television time, (although there is nothing in the law requiring the networks to provide that time). But when broadcasters desire to show Congressional committees in action, the freeze is on, so far as the House is concerned, and the McCarran Bill will do the same thing for public hearings by Senate committees. If the McCarran Bill is passed, and is not fought through to the Supreme Court, the radio and television companies will be negligent—derelict in their duty, both to themselves and those who depend upon them for information. . . .

It is, I believe, in the national interest, necessary for us to turn over a substantial amount of what we earn to the government. But it is not necessary, and it is not safe, to turn over to the government, increased control over what we may read, see and hear. What is required is more information, more widely spread, regarding what our government is doing; and that is the thing that is in danger.

'Forum' Praised

THEODORE GRANIK's *American Forum of the Air*, radio's veteran forum program now also on television, was commended on its silver jubilee in the Senate last week by Sens. Herbert Lehman (D-N. Y.) and William Benton (D-Conn.).

WINS New York reports largest movie spot campaign to date with signing of Whitestone Bridge drive-in theatre, Bronx, and Sunrise drive-in, Valley Stream, N. Y. for participation Mon., Wed. and Fri. in *The Martin Starr Show*. Contract runs 18 weeks.

REBROADCAST RULE

Networks Non-Committal

RADIO networks were not taking a stand last week on the FCC policy change in its rebroadcast rule, but were hoping individual stations would make their opinions known with sufficient strength in Washington to effect a further clarification in the ruling [B•T, May 19].

A spokesman for one network voiced a common attitude when he said he felt the onus of complaint lay with the stations themselves. He noted as one regrettable part of the ruling that "the emphasis is all in the wrong direction." Although he underlined that he was not seeking to add obligations to anybody, it seemed more logical, he suggested, that the station refused rebroadcast rights should explain just why it should be granted those rights, rather than to force the originating station to account for its every refusal.

Legal experts at most networks were keeping in touch with their station relations departments to find how affiliates' reactions add up.

LINK RADIO CORP.

Files for Bankruptcy

LINK Radio Corp., New York equipment manufacturers, filed a petition for bankruptcy in New York courts Monday, listing debts of $2,701,999.45 and assets of $2,773,942.39.

Included in assets were $763,000 due on open accounts, $400,000 in unliquidated claims and $1,410,000 stock in trade. Filed under Chapter XI of the bankruptcy laws, the petition seeks to pay secured creditors the $624,170 they claim, secured by holdings evaluated at $430,366, and to repay unsecured creditors 25% annually during the next four years.

CLEAN-UP DRIVE

Laundry Assn. Uses Radio

LAUNDRIES in Canton, Ohio, spurred by Robert C. Fehlman of WHBC-AM-FM there, are using radio to fight their "biggest competitor—the home washer in the basement." Forming the Professional Laundries of Canton, they sponsor an across-the-board news feature, according to John H. Smith Jr., NARTB FM director.

Commercials bid for more shirt, blanket, flat-work, rug and dry-cleaning business from the housewife. They emphasize that clothes never touch metal in their machines, shirt collars and cuffs do not wear out because of laundering, and electric blankets can be laundered.

The "quit-fighting-each-other" policy is working out successfully. WHBC sends bulletins to laundries and data to help drivers in making calls. Bundle stuffers and bill inserts are used.

Birds of a Feather

That WREC reaches the highest type listener, economically and educationally, *IN MASS*, is evident from a casual examination of the programming of WREC, and the Hooper Rating —which averages the highest in Memphis.

A further examination of the names of advertisers on WREC shows both in spot and, of course, network, sponsors of the highest calibre, firms of stability, reputation and prestige.

The old saying that "Birds of a Feather Flock Together" is quite evidently true with WREC and its advertisers. Listeners know it. Jobbers know it, and so do retailers.

Your message on WREC carries prestige from the start.

WREC

MEMPHIS NO. 1 STATION

REPRESENTED BY THE KATZ AGENCY

AFFILIATED WITH CBS, 600 KC, 5000 WATTS

Storer Stock

(Continued from page 25)

month, totaling $1,540,184, with loans now amounting to a total of $3 million, according to the statement. The company has paid cash dividends on its common stock in each of the 20 years since 1932, it was added, and cash as well as stock dividends are contemplated in the future. Election of Thomas F. Staley, senior partner of Reynolds & Co., to serve on the SBC board is contemplated. He would replace John B. Poole, SBC counsel, who would resign his directorship, the statement indicates.

SBC is described as the largest independent standard radio broadcasting as well as largest TV system under single ownership in the United States.

Storer properties consist of WJBK-AM-FM-TV Detroit; WSPD-AM-FM-TV Toledo; WAGA-AM-FM-TV Atlanta; KEYL (TV) San Antonio; WWVA-AM-FM Wheeling, W. Va.; WGBS-AM-FM Miami; WSAI-AM-FM Cincinnati, and WMMN Fairmont, W. Va., along with subsidiary corporations. TV applications are on file for Miami, Wheeling, Minneapolis and Cincinnati.

The SEC statement apportions the 15,000 shares to be offered key officers (at $10.625 a share subject to Salary Stabilization Board regulations) as follows: Lee B. Wailes, executive vice president and director, 2,000 shares; Stanton P. Ketteler, district vice president and director, 1,500; William E. Rine, vice president and director, 1,500; Allen L. Haid, vice president, 1,000; J. Robert Kerns, vice president, 1,000; Gayle V. Grubb, vice president, 1,000; George B. Storer Jr., vice president of KEYL (TV) San Antonio and an SBC director, 1,000; Glen W. (Tom) Harker, vice president, 1,000; Harry A. Steensen, assistant treasurer and comptroller, 1,000; Miller H. Babcock, manager WGBS, 500; Glenn C. Jackson, manager WAGA, 500; Leon C. McAskill, publisher, *Florida Sun*, 500; A. Garen Ferrise, manager WMMN, 500; Paul J. Miller, assistant manager, WWVA, 500; Bertha C. Prestler, assistant secretary, 500; Glenn C. Boundy, chief engineer, 500; John E. McCoy, staff attorney, 500.

Revenue Breakdown

The SEC statement shows that national spot accounted for 41% of gross broadcast revenue in 1951 and local accounted for 41%, leaving 18% for network. TV revenues came from these sources: Spot, 40%; local, 38%; network, 22%.

Gross earnings (operating revenues) have risen steadily from $1,345,530 in 1942 to $6,657,114 in 1950 and $9,560,086 in 1951. First-quarter earnings were $2,665,741 in 1952, compared to $2,130,119 for the same period a year ago. Net profits in recent years have ranged from $539,620 in 1949 to $1,391,935 in 1951 and $376,570 in the first quarter of 1952.

Gross revenues from standard broadcasting have continued upward during the period of TV's arrival and expansion, amounting to $3,748,337 in 1947; $3,872,495 in 1948; $4,172,037 in 1949; $4,632,963 in 1950 and $4,743,596 in 1951.

TV gross revenues started with $31,539 in 1948 and rose to $557,011 in 1949; $2,024,151 in 1950 and $4,816,490 in 1951.

The SEC statement lists aggregate 1951 remuneration of Mr. Storer, president and director, at $75,025; Mr. Ryan, $40,024; Mr. Wailes, $42,669; Richard E. Jones, who resigned last January as northern district vice president, $46,403.

Bonus and incentive compensation arrangements were described, the latter amounting to $109,526 last year. A profit-sharing trust plan was adoped last March for employes of at least three years' service, with 15% of net profits before taxes over $2 million contributed to the fund. Under such a formula, 173 employes would have received $208,329 in 1951, or equal to 15% of the gross payroll.

Holdings of preferred stock were listed as follows: Mr. Storer, 29,598 shares (59.197%); Detroit Trust Co., trustee, % George B. Storer, 4,508⅔ shares (9.02%) and 1,690⅔ shares (3.381%); Mr. Ryan, 5,432 shares (10.87%); Frances S. Ryan, 6,875½ shares (13.75%). All directors and officers now hold 36,530⅔ shares of preferred (73.06%).

SBC is owner of 42.58% of stock in Standard Tube Co.

LOS ANGELES County Fair will be covered by KTTV (TV) Hollywood Sept. 12-28 with three daily telecasts plus emanation of many of station's programs from fair grounds. Host will be Roy Maypole, KTTV special events reporter.

MANAGERS of Oklahoma Network stations met May 9 in Oklahoma City to forge a unified merchandising plan for advertisers. Participants included (back row, l to r) Brown Morris, secretary-treasurer, Oklahoma Network, station manager, KADA Ada and KWSH Tri-City, Okla.; Bill Hoover, network president, vice president-general manager, KADA and KWSH; Roy Judge, KWSH commercial and business manager; Pat Murphy, KWSH station manager; John Reisen, station manager, KVSO Ardmore; (front row) Guy Farnsworth, station manager, KCRC Enid; Allan Page, network vice president and station manager, KSWO Lawton; Lloyd George Venard, president, the O. L. Taylor Co.; Wally Weber, station manager, KBIX Muskogee, and Jim Watson, station manager, KTMC McAlester.

CAPAC SUIT HALTED

Pends Ottawa Ruling

ACTION started in the courts of Ontario and Quebec by 10 stations in each province against the Composers, Authors & Publishers Assn. of Canada (CAPAC) because of proposed copyright fees, has been stopped. The halt pends new action taken by both CAPAC and Canadian Assn. of Broadcasters in the Exchequer Court of Canada at Ottawa to determine the legality of the Canadian Copyright Appeal Board's ruling allowing CAPAC to examine the books of broadcasting stations to determine gross revenue on which to base fees [B•T, April 21, 7].

This stay in action in the Supreme Courts of Ontario and Quebec was taken suddenly on May 15 following action of CAPAC in calling CKMO Vancouver, before the courts of British Columbia for using CAPAC music.

The entire court action in Ontario and Quebec was instigated on the Canadian Copyright Appeal Board's ruling allowing CAPAC officials access to the books of independent broadcasting stations to determine gross revenue on which fees of 1¾% were based for 1952. Meanwhile, it is understood an arrangement has been made whereby Canadian independent stations will pay CAPAC on 1951 fee formula and hold in reserve necessary money in case the courts uphold Copyright Appeal Board ruling.

Platt Raps TV

(Continued from page 23)

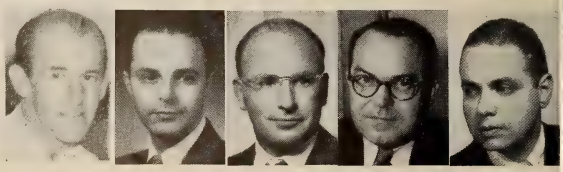
one calling for an entirely new form. They've tried to graft TV onto sports, radio, newspapers and movies, and TV has become the dumping ground for all the ancient films gathering dust in Hollywood."

Too many business people, he said, think of the public "as being a slightly moronic group," forgetting the thousands of people who don't live in New York and Hollywood.

"We must quit underrating the public attitudes, intelligence and good taste, and realize the people are screaming to high heaven about low-grade entertainment, too much trash and too many sponsors." Public acceptance creates an audience for the sales message, and a lack of acceptance "leaves the TV set sulking in the corner."

Commercials, as well as entertainment, must reflect showmanship and good taste, Mr. Platt said. Citing spots used on the *Kraft Theatre*, he said his company avoids "fireworks and high pressure, cute little cartoons and pretty announcers with a cleft in the chin and a twinkle in the eye." They stress believeability, sincerity, conviction, a desire to serve and a helpful, instructive demonstration, he said.

Television, after experiments in New York, as far back as 1947 enabled the company "to make a complete and positive judgment as to the pull of the medium," Mr. Platt said.



ADMEN'S COMPETITION

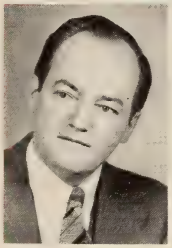
60 Entries Are Judged

JUDGING of more than 60 radio and TV spot announcement and program entries in the 20th annual competition conducted by the National Advertising Agency Network was completed last Tuesday in Washington, D. C. Winners will be announced June 19 at its annual convention at Skytop, Pa.

Judges included: Joseph Brechner, general manager, WGAY Silver Spring, Md., and the following of Washington — John S. Hayes, president, WTOP-AM-FM-TV; Gene Juster, WRC-AM-FM-TV; Charles L. Kelly, program director, WMAL-AM-FM-TV; Robert K. Richards, director of public affairs, NARTB; Win Levi, assistant advertising manager, BROADCASTING • TELECASTING. Judging was at Henry J. Kaufman & Assoc. office, under William F. Sigmund.

* * *

Mr. Richards Mr. Kelly Mr. Brechner Mr. Juster Mr. Hayes



Niles Trammell, NBC Chairman of the Board, extends *double* congratulations to Earl C. Reineke, Founder-President and General Manager of WDAY for the station's 30th Anniversary, and for its record of top Hooperatings through the years. The following pages prove that the congratulations are really in order!

"YESSIR, THIS IS WDAY'S 30TH ANNIVERSARY!"

"LISTEN TO THESE HERE WORDS FROM WASHINGTON!"

Dear Mr. Reineke:

WDAY represents the true spirit of the community it serves. WDAY was a pioneer station in radio. It has grown with the community. It has served the people. This station represents the finest principles of freedom of thought and freedom of expression. I wish to commend WDAY, its officials and its staff, for the splendid programs directed towards serving the great agricultural economy of the Dakotas, Minnesota, and Canada. Farmers and farm families have had a richer life and a more wholesome experience because of the educational and entertainment features of WDAY. The news reports, the programs relating to public affairs coming from the microphones of WDAY have brought enlightenment and education to the people.

May I express my personal thanks for the many courtesies that have been extended me by WDAY. Here is a radio station that exemplifies good citizenship in a community of good citizens.

Sincerely,
HUBERT H. HUMPHREY
U. S. Senate

Dear Earl:

About thirty years ago, I first listened to WDAY. I have many fond memories of pleasant hours in those early days of radio. It was quite apparent WDAY would become a leader among broadcasting stations.

You deserve the thanks of farmers, laborers, businessmen, and all segments of the public, for your outstanding contribution. When other means of communication are out of commission because of storms, your broadcasts to worried and anxious families have brought comfort and relief. Your news and sports coverage has always been of the highest quality.

At the present time, you are on the threshold, of further extending your activities through the medium of television.

Your past has been full of accomplishment. The future of both radio and television holds bright promise. Radio station WDAY is filling a vital need of the public in this modern world.

Sincerely yours,
MILTON R. YOUNG
U. S. Senate

Dear Mr. Reineke:

I am very happy to congratulate you the staff of WDAY on its thirtieth anniversary.

WDAY has been of invaluable assistance to every segment of society. Your fine programs, your sponsorship of progressive ideas and your adherence to the highest principles of public service have helped consumers, farmers, labor, business and industry and the general public in the territory you serve so well.

I am sure WDAY will continue to grow and to prosper, reflecting the ever forward progress of the great Northern Upper Midwest country of which you are so vital a part.

Sincerely yours,
HAROLD C. HAGEN
House of Representatives

Dear Mr. Reineke:

Thirty years of service by any institution serving the public, as WDAY has done, is deserving of recognition.

Always you and your associates have kept uppermost in the list of your objectives, in news coverage, in entertainment features, in public information, and in advertising, the interests of your listening public. You have served a great area of North Dakota and Minnesota exceedingly well and your public service has entitled you to the success you have earned.

Sincerely yours,
EDWARD J. THYE
U. S. Senate

Dear Mr. Reineke:

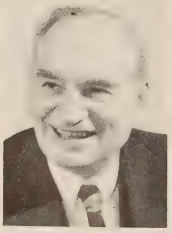
It is indeed a pleasure to extend congratulations to you on the 30th Anniversary of Radio Station WDAY. It was the first station we listened to regularly with our battery-powered early receiving set on the farm down near Litchville. You have enjoyed many years of faithful and alert service to the radio needs of the farmers, the housewives and the businessmen of your coverage area.

Since coming to Washington, I have been very appreciative of the WDAY Washington Reports, and the keen interest that you have taken in getting and transmitting to the people the political thinking of all of the members of Congress from the community which your station serves.

You can be proud of the accomplishments of WDAY. I am happy to extend my congratulations to you and to the entire staff.

Sincerely,
FRED G. AANDAHL
House of Representatives

Dear Mr. Reineke:



Please permit me to be among the many who are congratulating you and the splendid public service radio station you founded.

WDAY has many friends and listeners in South Dakota. We are all intimately acquainted with the many different ways your splendid station provides us with news, market reports, weather forecasts, and other programs which increase our information and help to entertain our lives.

Indicative of the way in which you keep abreast of the times is the "WDAY Tour" which you are now sponsoring and which I recently had the pleasure of meeting here in Washington. I congratulate you also on the fact that you are one of the first stations in the Northwest to be actively moving forward in the installation of TV facilities . . .

Cordially yours,
KARL E. MUNDT
U. S. Senate

Dear Mr. Reineke:

It scarcely seems like 30 years since I first heard WDAY at my farm home near Casselton. WDAY was the first station I ever heard.

I want to congratulate you on this 30th anniversary and commend you as one of the foremost pioneers in the broadcasting industry. The fair way you have handled news, political and otherwise, is a credit to the industry. The public service you daily render to farmers and city dwellers alike is far beyond the call of duty.

We are happy to learn your pioneering organization plans to extend its services into the television field. I am certain you will go forward with great strides in this great new added service to the people in your area.

Sincerely,
WILLIAM LANGER
U. S. Senate

NOW LISTEN TO THESE WORDS FROM LOCAL ADVERTISERS!

Dear Mr. Reineke:

CONGRATULATIONS TO WDAY ON YOUR 30TH ANNIVERSARY.

In the years past, our father found it a pleasure as well as profitable to use your service. At all times the friendly consideration and advice have been

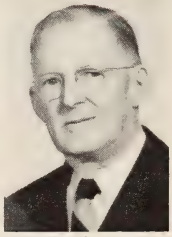
ARTHUR WIMMER

ANDREW WIMMER

welcome and gratefully received. Our aim is to follow in Dad's footsteps. With him, we hope to continue as your friends and wish WDAY all the best in the years to follow.

WIMMER'S JEWELRY

Dear Earl:



J. G. NEIMA

Three generations of Neimas have found WDAY to be the Number 1 outlet, radiowise, for the selling of our merchandise through the years. Since the very early days of your tremendous effort to create and mold WDAY, we have continued our established policy of never deviating from keeping our name before the public through concentrated advertising on your station. This plan is not available for alteration in any way.

Your foresight, initiative and planning has created a monument to our concept of democracy . . . freedom! Your unbiased and impartial handling and managing of WDAY is a feather in the hat of democracy!

ROYAL JEWELERS

Dear Mr. Reineke:

G. M. BLACK

I think that I was one of WDAY's first advertisers and I know that our store has been, possibly, the most continuous advertiser since you started broadcasting.

I remember very well, right after you started, that somehow or other I was asked to put over an announcement regarding our store, and I remember going up to a couple of little rooms across the street from where our Black Building is at the present time, and sitting behind some velvet curtains and giving a talk, as I remember, about our store. I cannot remember the details, but I do remember being up there.

Later on we put on a serial, and I doubt whether there were very many serials put on for the length of time that this one was. The serial was written by Miss Carol Trace who had charge of our advertising for many years, and Mrs. Williams and Mr. Art McNair were the characters, Nancy and Phil and their home life, and it made a tremendous hit with people in the early years and we had it for something like twelve years, six times each week.

We wish to give a personal salute to Mr. Earl Reineke on the way he pioneered and developed WDAY into the tremendous thing it is today, serving the entire Northwest.

THE STORE WITHOUT A NAME

Dear Mr. Reineke:

H. A. THOMPSON

It is with a sense of deep pleasure that we extend to you our contratulations for your thirty years of service to this area, when on May 22, 1952, you mark your Pearl Anniversary.

We feel even a closer kinship than this with you because in just a few short months we also will be celebrating our thirtieth anniversary. Many years ago we decided that one of the most effective ways to reach a large group of people with our message was by radio and at that time we entered into what has proved to be a very enjoyable and profitable relationship with your station. We began sponsoring the "Meet Your Neighbor" program and we have kept that program these many years. We believe the fact that we are one of your oldest advertisers and that we have continued with the same program since the beginning describes better than words the success of our institutional program over WDAY. As an aside, I believe Gate City Building and Loan Association is, in a sense, a pioneer too, as I believe that we were one of the very first associations in the country to start radio advertising of this type and continuing with it for so many years.

GATE CITY BUILDING AND LOAN ASSOCIATION

Dear Earl:

As one of WDAY's oldest advertisers, we feel that we are in a position to comment on our years with you.

As you know, Earl, our father began advertising with WDAY in the early days of WDAY's growth

MALCOLM M. SIEGEL

JEROME B. SIEGEL

and expansion. We, his sons, are continuing his policy of getting the most for our advertising dollar by running a full and consistent schedule on your station—and will continue to do so.

Your thorough appreciation of our problems as an advertiser has made our advertising years with you pleasant and profitable.

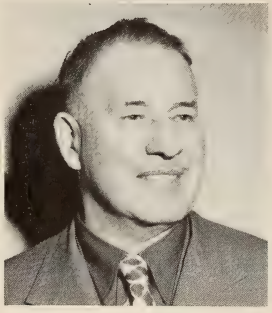
GOVERNOR YOUNGDAHL SALUTES WDAY ON SILENT GUEST DRIVE

TOPS IN SERVICE, TOO!

No radio station in the U. S. devotes itself more whole-heartedly to Public Service than does WDAY. Our Public Service activities are far too numerous to describe in detail, here—but each of the "headlines" below carries with it a story which would warm your heart, and which would at least partially explain the high esteem in which the entire Red River Valley holds us. If you are interested in getting the *details*, drop us a line!

NOW LISTEN TO THESE WORDS FROM LONG-TIME LISTENERS!

WDAY's first regular listener, James H. Dunlevy of Fargo, is still an avid WDAY fan.



Dunlevy, former superintendent of the light and water plant at Hillsboro, N. D., picked up WDAY's first broadcast on a homemade radio set at Hillsboro, May 22, 1922. The broadcast was beamed from a 50-watt transmitter located in the Cass County courthouse cupola in Fargo, under the direction of E. C. Reineke, WDAY's president and co-founder.

Reineke met Dunlevy personally in Hillsboro in April, 1922. Reineke, Lawrence Hamm and Kenneth Hance of Fargo were experimenting with radio and were about to transmit their first broadcast. Dunlevy had experimented with wireless for years and was taking an interest in the development of radio. Reineke asked Dunlevy to listen at noon on May 22 for the transmission and the Hillsboro man picked up the broadcast about 2:00 p.m. The first broadcast of WDAY was musical, according to Dunlevy; a phonograph recording of one of the popular songhits of the day, "Three O'Clock in the Morning."

"From then on," recounts Dunlevy, "I picked up WDAY quite well. I built a super-hetrodyne receiver about ten feet long and rigged a loudspeaker outside my house. Folks gathered for a block in either direction to listen to the programs. Mr. Reineke broadcast programs just for me and sometimes I put the loudspeaker in public places such as the church or theatre and they would be jammed with folks listening to the radio."

Asked what he now thinks of radio, as WDAY's first regular listener, Dunlevy replied:

"The progress in just 30 years is amazing both technically and in programs. It's been a wonderful thirty years for progress and I guess we're just getting started."

JAMES H. DUNLEVY

Dear Mr. Reineke:
It is with genuine pleasure that I congratulate you and WDAY on your 30th anniversary. We purchased a Crosley radio in 1923, and we owned a crystal set with ear phones prior to that, so I am sure we celebrated your first anniversary if not your birth.

You have been a real member of our family through these thirty years, bringing to us valuable information on markets and weather, providing us with splendid entertainment as well.

At the present time there are six radios in our home and at least one is in constant use. We are now looking forward to your inauguration of Television and expect to be one of your first viewers.

ROY JOHNSON
WANDAROY FARM, Casselton, N. Dak.

Gentlemen:
I heard WDAY when they started to broadcast. I lived in Sykeston, N. D., and had the first and only receiving set in town. It was homemade with a three dial affair and ear phones. I heard WDAY say they would send to the person listening who lived the fartherest away a set of head phones. I lived 13 miles west of the farthest town to report at that time. In a few days I got the headphones. I have been a steady listener since then.

W. M. COVELL
Carrington, N. D.

Gentlemen:
I started listening to your station when I was pretty young. Back in the fall of 1921 I got my first radio, a homemade, one tube set with ear phones. Of the earliest WDAY programs I remember a sort of chit-chat program by Earl Reineke and another fellow called "The Bug." In all this time, WDAY is still my favorite station.

GEORGE RICE
Mayville, N. D.

Gentlemen:
For over twenty years I have been a faithful listener to WDAY.

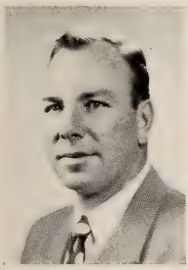
It has been fun and very interesting to see it grow —and progress—and right now I think it's one of the best radio stations in the whole world.

We depend on WDAY for market and weather reports, storm and school announcements, people snowbound, and where they are, and of course, the latest news.

We can turn to WDAY at any time for clean entertainment. The whole staff is so friendly and they all make one feel like "coming home" when we visit the station.

May God bless you all.

MRS. O. C. ANDERSON
Barnesville, Minnesota



"WE DONE RAISED UP A FINE SET OF DEPARTMENT HEADS!"

WDAY is a home-town phenomenon. Far from being a flimsy, souped-up organization of outside mercenaries who are even now on their way to their next jobs, every department head has been with WDAY for ten years or more. Actually, the average is 16 years!

This proves a lot of things. First that they love their jobs and the community they live in. Second, vice-versa. Third, that there's hardly any "unusual" problem you can throw at them—whatever it is, they can do it again quicker and better than they've done it before.

Also—in all their years, they've certainly discovered what it takes to build and hold an audience in the Red River Valley. Read the following page and see for yourself!

"NO OTHER STATION IN THE WORLD CAN EQUAL THESE RECORDS!"

HOOPER

In 1950 . . . . . WDAY was the *top* Hooperated radio station in the entire country!

In 1951 . . . . . WDAY was the *top* Hooperated radio station on NBC!

And in 1952 . . . FOR THE THIRD YEAR IN A ROW, WDAY is the *top Hooperated radio station on NBC*!*

(January-February Report—latest available as we go to press.)*

RURAL PREFERENCES

An independent survey made by students at North Dakota Agricultural College among 3,969 farm families in a 22-county area around Fargo proved this:

WDAY WAS A 17-TO-1 FAVORITE OVER THE *NEXT* STATION!

WAS A 3½-TO-1 FAVORITE *OVER ALL OTHER STATIONS COMBINED!*

MAIL PULL

In 1951, WDAY was swamped with 145,659 letters and postcards from its listeners!

This is the equivalent of a letter or card from over 70% of the 211,550 families who listen regularly to WDAY!

This is an average of slightly over 399 letters per day—including Sundays and Holidays!

AAAA COUNCILS

New Officers Named

NEW officers and governors of the six sectional councils of the American Assn. of Advertising Agencies were announced by the AAAA in New York last week. They are:

New York Council

Chairman, Marion Harper Jr., McCann-Erickson; vice chairman, Edwin Cox, Kenyon & Eckhardt; secretary-treasurer, H. Victor Grohmann, Needham & Grohmann. Other governors: Arnold Deutsch, Deutsch & Shea; Henry Legler, Warwick & Legler; Edward Noakes, Cecil & Presbrey; Jack D. Tarcher, J. D. Tarcher & Co.

New England Council

Chairman, J. Paul Hoag, Hoag & Provandie, Boston; vice chairman, Harold I. Reingold, Reingold Co., Boston; secretary-treasurer, W. L. Shepardson, James Thomas Chirurg Co., Boston. Other governors: Sture H. Nelson, William B. Remington Inc., Springfield; George C. Wiswell, Chambers & Wiswell, Boston.

Atlantic Council

Chairman, A. E. Morgan, Richard A. Foley Adv., Philadelphia; vice chairman, Robert Daiger, VanSant, Dugdale & Co., Baltimore; secretary-treasurer, George B. Barnard, Aitkin-Kynett Co., Philadelphia. Other governors: Earle A. Buckley, Buckley Organization, Philadelphia; Dan W. Lindsey Jr., Lindsey & Co., Richmond; M. Belmont Ver Standig, M. Belmont Ver Standig, Washington.

Michigan Council

Chairman, Elliott E. Potter, Young & Rubicam; vice chairman, George Richardson, J. Walter Thompson Co.; secretary-treasurer, Blount Slade, Brooke, Smith, French & Dorrance. Other governors: Albert D. Conkey, Wolfe-Jickling-Conkey; J. S. Howell, D. P. Brother & Co. All are of Detroit.

Central Council

Chairman, John M. Willem, Leo Burnett Co., Chicago; vice chairman, Harold H. Webber, Foote, Cone & Belding, Chicago; secretary-treasurer, Arthur F. Marquette, Sherman & Marquette, Chicago. Other governors: S. L. Abrams, Ohio Adv. (ex-officio representing Cleveland chapter); Bruce B. Brewer, Bruce B. Brewer & Co., Kansas City; Wilson W. Crook, Crook Adv., Dallas (ex-officio representing southwest chapter); A. H. Fensholt, Fensholt Co., Chicago; Hal R. Keeling, Keeling & Co., Indianapolis; E. J. Kromnacker, Arthur R. Mogge Inc., St. Louis (ex-officio representing St. Louis chapter); J. K. Laird Jr., Tatham-Laird, Chicago; A. R. McGinnis, Klau-Van Pietersom-Dunlap Assoc., Milwaukee; George C. Reeves, J. Walter Thompson Co., Chicago; Carl A. Salstrand, Ball & Davidson, Denver (ex-officio representing Rocky Mountain chapter); Harry P. Vieth, BBDO (ex-officio representing Pittsburgh chapter); Hugo Wagenseil, Hugo Wagenseil & Assoc. (ex-officio representing Dayton chapter); Harold C. Walker, Harold C. Walker Adv., Minneapolis (ex-officio representing Twin City chapter).

Pacific Council

Chairman, Carl K. Tester, Philip J. Meany Co., Los Angeles; vice chairman, Charles R. Devine, Devine & Brassard, Spokane; secretary-treasurer, Gene Duckwall, Foote, Cone & Belding, Los Angeles. Other governors: Trevor Evans, Pacific National Adv., Seattle; Merle W. Manly, Botsford, Constantine & Gardner, Portland; A. W. Neally, BBDO, Los Angeles; Ross Ryder, Ryder & Ingram Ltd., Oakland; George Weber, MacWilkins, Cole & Weber, Seattle.

Pacific Council elections were held last October; other elections were completed recently.

WTMJ-AM-TV Milwaukee was host May 1 to civic leaders at a luncheon marking its 30th anniversary of radio service. Guests included (l to r) J. D. Ferguson, president and editor, The Journal Co., WTMJ licensee; L. W. Herzog, assistant general manager of radio; Gov. Walter J. Kohler Jr., of Wisconsin; R. G. Winnie, stations manager; Walter J. Damm, vice president and general manager of radio, The Journal Co.; Irwin Maier, vice president and publisher, The Journal Co.; Mayor Frank P. Zeidler, of Milwaukee; Lawrence J. Timmerman, chairman, Milwaukee County Board of Supervisors, and D. B. Abert, business manager, *The Milwaukee Journal*.

WMTR WITNESS

Judge Rules Must Testify

LEGAL problem of a radio newsman's being called into court to testify about an event he covered was raised in Newark recently when Merrill Morris, news editor of WMTR Morristown, was sought as a principal witness in a trial of union leaders charged with violence.

Mr. Morris, taking two minitapes for later broadcast, was one of the few eye-witnesses to a riot April 7, said to have been caused when outside workers entered the strike-bound plant of the Whippany Paper Board Co. near Morristown.

After being sworn in as a witness May 7, Mr. Morris asked Judge Alfred F. Stein to excuse him from testifying on the grounds that it "might in the future jeopardize my position as a reporter." Mr. Morris said he felt "it would be easy in disputes of this sort to deny access to the press if the participants felt the testimony of the newsmen might be used against participating parties in court."

The judge ruled that the testimony should be given. Mr. Morris has also been ordered to appear before the Morris County Grand Jury this week for further testimony in the same case.

IN exclusive West Coast broadcasts, KHJ-FM Hollywood started *Major League Baseball Game of the Day* on live basis, daily, from May 16 through end of September. MBS sportscasters Dizzy Dean, Al Helfer and Gene Kirby call plays at 10:30, 11:30 a.m. or 12:30 p.m. (PDT), depending upon game's time zone.

NEWS SOURCES

Senate Staff Weighs Issue

CAN a newsman keep confidential his source of news, even though he may be asked by a congressional committee to divulge that source?

Most newsmen would say, "Yes, he can." However, the staff of the Senate Subcommittee on Privileges and Elections, after study of the question and preparation of a lengthy brief, holds, "No, he can not."

The brief was presented to the Senate May 16 by Sen. Guy Gillette (D-Iowa). It cites juridical opinion and concludes:

It is clear that a congressional committee possesses the power to compel a newspaperman to divulge the identity of an informant from whom he has received information relating to matters pending before the committee. The fact that the information was given to the newspaperman in confidence has no legal relevance. The refusal of the newspaperman to divulge the identity of his informant to the committee constitutes contempt under 2 U. S. C. 192. Whether the newspaperman should or should not be cited for contempt is, of course, a matter of discretion, exercisable in the first instance by the committee, and ultimately by the Senate.

The subcommittee staff's opinion and citations can be found in the May 16 *Congressional Record* in the proceedings of the Senate for that date.

L. A. Adv. Workshop

SECOND annual Advertising Workshop series will be presented July 14-25 by the Adv. Assn. of the West, Los Angeles Adv. Women, Adv. Club of L. A. and the Hollywood Ad Club in cooperation with L. A. Board of Education. Designed for teachers in grammar and high schools, course consists of lectures and field trips, Mon. through Fri., 9-12 noon, at Fairfax High School. A similar course will be conducted at the U. of Redlands, Redlands, Calif., with two groups making the same field trips.

HEALTH FOOD ADS

Termed False by FTC

INITIAL findings which charge that two individuals used radio, television and other media to disseminate false advertisements were handed down by a government trial examiner May 18.

The charges involve William G. Barnard Jr. and William G. Barnard Sr., trading as the Natural Foods Institute of Olmstead Falls, Ohio. The findings become the decision of the Federal Trade Commission within 30 days of May 18 unless appealed or docketed for review.

The two respondents, who capitalized on TV's appeal to demonstrate their products in key video markets, had previously filed a consent answer, admitting material allegations and waiving any hearings.

Examiner James A. Purcell challenged certain advertising claims relating to the therapeutic properties of food and drug preparations sold by the respondents. FTC issued its original complaint last March, citing over a dozen products.

The ad claims appeared in radio and TV broadcasts and in other media, including newspapers, magazines, circulars and catalogs. The bulk of the complaint was directed, however, at TV transcripts entitled "Home Miracles of 1950." The Barnards personally appeared on the programs, giving demonstrations "transmitted from various cities . . . throughout the United States."

In its reply, the respondents admitted all material allegations of fact to be true; waived "any and all hearings" as to the facts alleged in the complaint, and the findings and conclusions set forth; and consented to issuance of the decision. However, they reserved the right to file objections, to content of the forthcoming cease-and-desist order.

The TV broadcasts consisted of demonstrations on the use of Vita-Mix, a juice extractor, and lectures on the value of various juices thus to be extracted.

Other products for which ad claims were challenged are Chic tablets, Garlic capsules, Papain tablets, Macu Brand Papaya, Soy Milk Powder, Peppermint Tea, Alfalfa Tea, Dr. Gaymont's Yogourt Culture, Red Beet Juice, Dehydrated Powdered vegetables, Brown Rice, Celery Juice, NFI Vibrator and Oster Stim-U-Lax Junior.

Mr. Purcell also cited as "misleading and deceptive" use of the word "Institute" in the trade name, and questioned representations that certain merchandise can be obtained "free or as a gift or gratuity." These also appeared in TV broadcasts and other media. The commission has become increasingly critical of the use of the word "free" (see separate story).

NBC radio *Kay Mulvey's Hollywood Family Album*, weekly quarter-hour program, emphasizes human side of Hollywood with Miss Mulvey taping unrehearsed interviews in different stars' homes.

A little Economics goes a long way

Our business is selling Radio, not talking economics, but . . . a little economics helps to get the best results from the Canadian market.

Canada is among the six most productive nations in the world. She produces more than 80% of the world's nickel, great quantities of other ores—including uranium—as well as oil, pulp and paper, and asbestos.

A go-ahead nation of 14 million people—larger in area than the U.S. by 25%—Canada is the United States' *best customer abroad.* And Canada pays CASH!

Your problem is how to reach this fast-growing, lucrative market.

Radio is the answer . . . for radio is in 94% of all Canadian homes.

Canada's population is spread over a huge semi-urban and rural area. Only 38% of the population lives in cities of over 30,000. So Radio—which goes *everywhere*—is the most economical, practical medium. With its 112 independent stations strategically located from coast to coast, Radio reaches every worthwhile market in Canada.

It's Canada's most popular entertainer and most effective salesman, for "In Canada you sell 'em when you tell 'em!"

A message from the 103 member stations of the Canadian Association of Broadcasters whose voices are invited into over 3 million homes every day.

CANADIAN ASSOCIATION OF BROADCASTERS

108 Sparks St., Ottawa.

37 Bloor St. West, Toronto.

RADIO-TV CIVIC COVERAGE

NARND Surveys Station News Practices

LEGISLATIVE event most frequently broadcast by radio and television stations is a city council meeting, with proceedings put on tape and edited.

This was reported last week in a survey conducted among 23 stations in 14 states by the National Assn. of Radio News Directors. Long interested in legislative proceedings and their availability to broadcast newsmen, NARND asked members to report on their access to local, county and state government.

Sixteen newsmen said their stations carry delayed broadcasts of city council sessions, while two reported live originations and one said he handled it both ways. Ten stations broadcast delayed shows with city council committee meetings or hearings and with state legislative committee meetings or hearings, while only one station in each group reported carrying live broadcasts.

State legislative sessions are reported live by two stations, with tape by six, while five newsmen air municipal court events on a delayed basis. Five also use taped broadcasts of county court proceedings, with only one news editor saying he carried them live.

Twelve newsmen broadcast other public functions after they are recorded, while five broadcast them on a live basis. These include state public utilities commission hearings, Senate Crime Committee (live), political and industrial conventions (live), preliminary immigration hearings, gubernatorial inauguration (live) and administrative statements and proclamations.

Stations represented in the survey including 18 AM-only, 4 AM-TV and one TV-only, were from the following states—Virginia, 2; Texas, 1; Iowa, 2; Florida, 1; Maryland, 1; Ohio, 2; Missouri, 1; Colorado, 2; West Virginia, 1; Minnesota, 2; North Carolina, 1; Indiana, 4; Kansas, 1, and Wisconsin, 1.

A station newsman from Indiana said, "We have been refused twice to take a tape recorder into circuit court," but radio men could cover sessions by taking notes. In Iowa, a man said, the supreme court several years ago made a recommendation which "has had the force of a formal ruling," banning live broadcast of any court hearing. As one aspect of its ruling, the state supreme court left the broad inference that radio was to be considered, in its actual broadcasts on the spot, as a medium of entertainment and so not suitable in a courtroom."

Feature of Week

(Continued from page 18)

noting the trend, distributed 40 by 60-inch posters featuring the show to hundreds of sporting goods stores and Pontiac showrooms, and bought 110 line ads twice weekly for six weeks in all Boston newspapers. They held a sports night dinner, inviting sports writers, dealers and outdoor enthusiasts and gave away fishing equipment. Giant postcards were mailed to sportsmen and fishermen in the state.

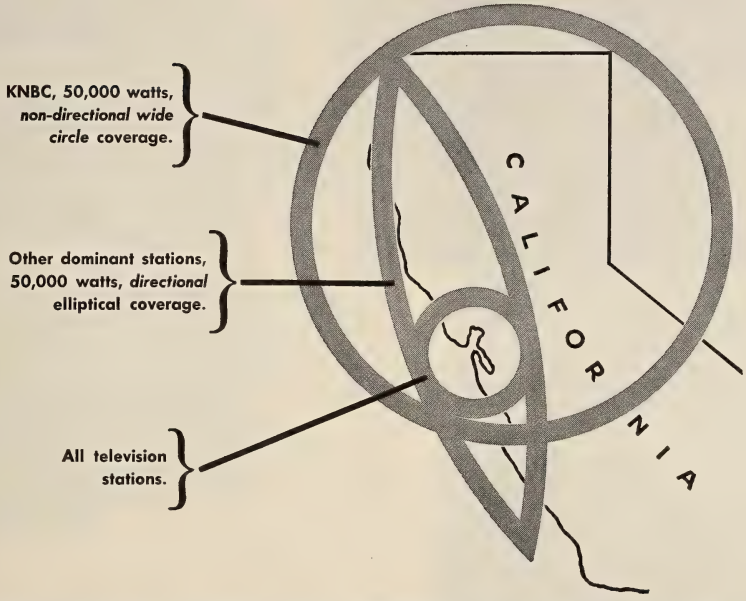
Star of the show, R. Vernon Gaddis, who was with WRGB before the war, talking the fisherman's language and using a background of fishing exploits, takes his fans on film adventures from Maine to Florida, highlighting pointers on different kinds of fishing and how-to-do-it tips.

Mr. Sanderson points to U. S. Dept. of Commerce statistics showing fishing and hunting enthusiasts spent more than $5 billion in 1950 on their favorite sports, with the combined gate of all baseball, basketball, football, boxing and hockey only $400 million.

He said letters and petitions signed by men, women and children requesting continuance of such programs sometimes border on reverence and stress the video family appeal of the sport, many calling it "our own show on TV."

NEWSPRINT HIKE

May Jar Ad Budgets



CRITICISM erupted in Congress and government price stabilization circles last week when two Canadian firms announced a raise in newsprint prices $10 per ton June 15, for a total of $126 per ton. Sen. Blair Moody (D-Mich.) called it "outrageous" and Sen. Herbert R. O'Conor (D-Md.) said his Senate Judiciary Subcommittee on Monopoly will check "possible anti-trust infringement."

Price Stabilizer Ellis Arnall and others say the boost will affect local and county U. S. newspapers seriously. Some see curtailed printed advertising, with possible repercussions on U. S. media budgets. About 80% of U. S. newsprint comes from Canada.

TCA Talks Available

RADIO and television interviews will be made available by Walter G. Stoneman of the Dept. of State's Technical Cooperation Administration (Point 4), together with foreign observers, during TCA's presentations in the next few weeks focusing attention on the growth of the western United States. His itinerary will be: May 27-28, Spokane Hotel, Spokane, Wash.; May 29-June 1, Cascadian Hotel, Wenatchee, Wash.; June 1-7, Chinook Hotel, Yakima, Wash.; June 7-9, Pasco, Wash.; June 9, Gorge Hotel, Hood River, Ore.; June 10-11, New Heathman Hotel, Portland, Ore., and June 15-22, Cosmopolitan Hotel, Denver, Col.

Picture of broadcast coverage in Northern California

In Northern California, KNBC reaches more people ...more often...than any other radio OR TV station

Fix Northern California's coverage picture in your mind:

Television, a small 60-mile radius, with only about ⅓ of the families in the area owning sets.

Radio, two 50,000 watts *directional* stations, with coverage over a limited elliptical area, and —

— KNBC, 50,000 watts *non-directional,* giving a *wide circle* of coverage that includes not only the San Francisco-Oakland Metropolitan Market, but all the thriving PLUS-Markets of Northern California.

RECENT RADIO AUDIENCE RATINGS:—

	Total Rated Time Periods
Station A	*13.8*
Station B	*18.9*
KNBC	23.4

Wide circle coverage plus program popularity make —

KNBC San Francisco

THE ONE ON THE RIGHT is Chuck Worcester, WMT's Farm Service Director. The young corn-burner performing before the mike is one of a brood of cheep artists who crow over Chuck's good husbandry. Chuck owns and operates a farm as a WMT service project. It's the point of origin for many informative WMT broadcasts about conservation and crop production. Chicks and Iowa farmers like corn—the 1951 crop was worth $778,437,000.

ALL EQUIPMENT USED ON CHUCK'S FARM—supplies, fertilizers, gasoline, oil, etc.—is made or distributed by WMT advertisers. Farm broadcast time represents over 9% of WMT's total weekly program schedule—3½ hours of farm information, 1½ of weather and market data, 8 of music and features.

YOU ALMOST HEAR THINGS GROW in Iowa. Of all the Grade A land in the U.S., 25% is in Iowa. One of Chuck's projects is a test of 12 different fertilizer applications to check production.

CEDAR RAPIDS is our home address — worth remembering when you want to reach 338,480 families who listen each week to WMT's farm (and CBS) programming. Or see our reps, The Katz Agency.

AGENCY FORMED

As Lennen & Newell

IN a surprise move last week, Philip P. Lennen, co-founder of Lennen & Mitchell, and N. H. Newell, executive vice president of Geyer, Newell & Ganger, announced the formation of a new agency to be known as Lennen & Newell Inc., New York.

Mr. Newell resigned from GN&G effective June 2 and will become president of the new firm. Ray Vir Den, president of Lennen & Mitchell, had tendered his resignation some time ago and it has now become effective. Mr. Vir Den has had a number of offers and is expected to announce his plans in the near future. Mr. Lennen will become chairman of the new company's board of directors. He has been chairman of L&M since the death of Mr. Mitchell in 1932. In addition, he will devote his efforts toward the creative work of the agency.

Mr. Newell stated that the present Lennen & Mitchell personnel will serve as a nucleus for the new and larger agency, but that all department facilities and personnel will be augmented and increased to meet requirements of a large scale expansion program.

The move by Mr. Newell leaves only one of the three original partners of Geyer, Newell & Ganger, B. B. Geyer, chairman of the board and president. Mr. Geyer has not yet revealed what changes in GN&G's name or corporation will take place now that Mr. Newell has resigned. Robert M. Ganger had resigned last year to join P. Lorillard & Co. and is now president of that firm. The cigarette company is one of Lennen & Mitchell's largest clients. Mr. Ganger and Mr. Newell are long time friends.

Both Lennen & Mitchell and Geyer, Newell & Ganger have been practically equal in billing, with L&M's about $19 million and GN&G with about $20 million.

It was understood that Mr. Newell will probably bring along a few of the GN&G accounts. Among those might be Embassy cigarettes (made by P. Lorillard & Co.), and possibly Continental Oil Co. Other accounts the agency handles are Nash-Kelvinator Corp., Zippo Mfg. Co., and United Aircraft Corp.

Lennen & Mitchell, aside from P. Lorillard & Co. account, handles Tide Water Oil Co., Calvert Distillers, Carstairs, Colgate-Palmolive-Peet for Lustre Creme, and Schlitz Brewing Corp.

Ad Men Win Prizes

TWO advertising industry members among winners of the *Dr. Christian* script contest were Richard Cook, of Foster & Kleiser Outdoor Adv. Co., San Francisco, who shared a $500 award with a co-author, and Norman J. Traynor, copy writer for Brooke, Smith, French & Dorrance, Detroit, who won a $350 prize.

GORDON GRAY (l), president of Piedmont Publishing Co., licensee of WSJS Winston-Salem, N. C., receives a 15-year service button from Harold Essex, vice president and chairman of Piedmont's management board and WSJS general manager.

KGNC OBSERVES

30th Year on Air

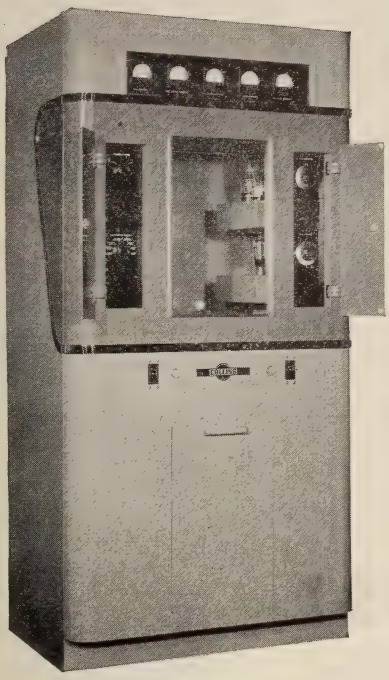
KGNC Amarillo, Tex., is celebrating its 30th anniversary with the *Amarillo Daily News*, affiliated newspaper, carrying a history of the station's three decades.

Now operating with 10 kw on 710 kc, the station started as a homemade bread-board outfit in the bicycle shop of J. Lawrence Martin, a ham hobbyist. With the call letters WDAG, the station was licensed May 16, 1922, as Amarillo's first outlet. A short time later another station, KGRS, was started. The two were merged as KGNC June 5, 1935, under ownership of Globe News Publishing Co., with O. L. (Ted) Taylor managing the operation.

In observing its anniversary, KGNC recalled the first concert broadcast May 19, 1922, three days after the license was granted. The *Amarillo Daily News* announced that "before the station had been broadcasting 10 minutes, four parties telephoned that they were receiving the numbers being sent."

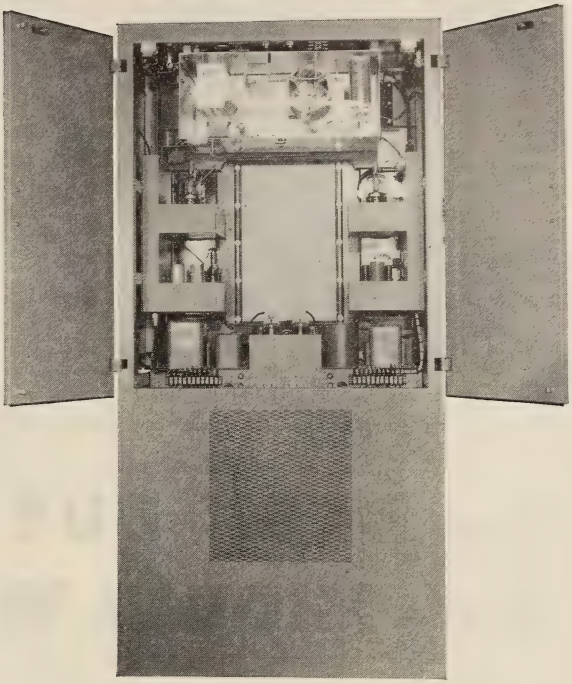
Among its achievements, KGNC recalls a broadcast from a bombing plane in 1930, described by military officials as the most successful two-way experiment that had been conducted.

Tom Kritser, KGNC general manager, assumed his post in 1950, succeeding Aubrey Jackson.



HOMER RAY SHIFTS

Joins Weldon & Carr



HOMER RAY, formerly a partner with George E. Gautney in the consulting engineering firm, Gautney & Ray, Washington, D. C., has joined the firm of Weldon & Carr, same city, it was announced last week.

Mr. Gautney, whose firm is located in the Warner Bldg., said that his organization will continue under the name, George E. Gautney, consulting engineer. Weldon & Carr is located at 1605 Connecticut Ave. N.W., Washington.

You'll have both...quality and economy

Note that all tubes are visible through the front window, and all controls and meters are located on the front. The sleek new 300J leaves nothing to be desired in convenience of operation.

Back view with doors open and rear plate removed from output network shield. Note easy accessibility of tubes, components, and terminals. The power supply is easy to reach by removing the lower plate containing the air intake screen.

THE Collins 300J 250 watt AM transmitter presents you with the latest and longest step in advanced design. The smart styling of its full size, two-tone grey cabinet reflects the up-to-the-minute engineering within.

Great simplification has been achieved in the circuits associated with the modulator and power amplifier stages, through use of the recently developed high gain, long lived 4-125A tetrodes. Employment of these efficient tubes also permits the use of low drain receiver-type tubes in the driver stages. Only 16 tubes, of but 7 types, are employed in the entire transmitter!

Your chief engineer will be delighted with this new transmitter. Ease of operation and servicing has been brought to a new high, and Collins standards of excellence in components and workmanship insure reliability throughout a long life.

The 300J is now available *in limited quantities*. Write or wire your nearest Collins office today.

SCAAA MEET

Merchandise Tie-Ins Help Radio Ads, Agencies Hear

BUSINESS firms frequently fail to get full value from advertising because they don't provide merchandising and promotion support to score an effective point-of-purchase reminder to customers already pre-sold through radio.

Leon W. Forsyth, merchandising manager of KNX-Columbia Pacific Network, Hollywood, made this point to agency executives and their clients at the Southern California Advertising Agencies Assn. meeting last Monday at a panel discussion on "How Best to Merchandise Radio Advertised Products."

Other panel members included Larry Buskett, KLAC Hollywood sales manager; Tom Frandsen, KMPC Hollywood sales manager, and Arnold Benum, Riverside manager, KITO San Bernardino.

Many advertisers neglect "sales insurance" to back up advertising, Mr. Forsyth said. He said this merchandising and promotion support generally costs less than 2½% of the advertiser's radio budget.

He also charged advertisers with not fully acquainting their sales forces with advertising support offered, citing Leslie Salt Co. as an example of successful radio merchandising. Since taking over Saturday sponsorship of *Meet the Missus* varieties on 18 CBS Pacific and Mountain stations in September 1951, the firm has backed its on-the-air selling force with dealers meetings, sales kits, letters to dealers and salesmen from program m.c. Harry Koplan, point of sale material including 20 by 13-inch display pieces, cross plugs in other advertising media and premium tie-ins.

He said Leslie Salt gains high sponsor identification with the radio audience through "Miss Leslie," program hostess and also the voice on the program's singing commercials. Studio displays and product samples are also used.

Pay-off is a report from the sponsor that sales are "up very substantially" over the previous year, Mr. Forsyth said.

Mr. Buskett took his cue from KLAC Big Five program format, playing transcriptions from the station's five name disc m.c.s to illustrate tie-ins of merchandising material and radio commercials.

Showing a facsimile of KLAC's *Platter Pulse* panel displayed at Wallichs Music City, he said two of the ten top tunes of the day as revealed by store sales are introduced daily by each m.c. during individual programs. KLAC benefits by the score board merchandising and Music City enhances effectiveness of its commercial time, he said.

Thrifty Drug Stores merchandises its $75,000 KLAC budget with disc m.c. photos in store windows throughout Southern California and each week the firm names a "special" after one of the Big Five disc m.c.s. All the m.c.s plug the "special" during that week, he said.

Mr. Frandsen urged advertisers to let sales forces in on advertising plans.

He reminded agency executives and clients that the lowest priced, most persuasive advertising medium is radio, but that in the last analysis the point of sales tells the success or failure of any campaign.

Mr. Benum said KITO: (1) informs all local dealers by letter or personal calls of an upcoming campaign; (2) urges dealers to stock and display merchandise and tie-in at point of purchase; (3) prepares signs for display at point of sale, at studio street level, on trucks and at other available points; (4) uses promotion spot announcements and newspaper ads to plug both program and product.

Your **BASIC BUY**
in the **MIDDLE WEST**

WGN reaches 260,100 more homes per week in the daytime—302,750 more homes in the nighttime than the second station.*

Your advertising dollar buys more on WGN—**more coverage, more homes reached.**

REMEMBER...radio sells more to more people for less—and in the Middle West your basic buy is WGN.

WRIGLEY BUYS
36 CBS Radio Segments

WILLIAM WRIGLEY Jr. Co., Chicago has purchased a large block of CBS Radio Network summer shows for the third consecutive year. This year's schedule of 36 half-hours involving six different shows begins June 3 and continues through Aug. 25. Estimated cost is $300,000, and business was placed through the Arthur Meyerhoff agency, also Chicago.

Plans last week called for only Spearmint gum to be advertised. Shows involved in the package sale are: *The Line-Up* (June 3, 10, 17, 24; July 1, 15, 29; Aug. 5); *Meet Millie* with Audrey Totter (July 6, 13, 20, 27; Aug. 3, 10); *Romance* (July 14, 28, Aug. 4, 11, 18, 25); *Yours Truly, Johnny Dollar* with Edmond O'Brien (July 2, 16, 30, Aug. 6, 13, 20); *Mr. Chameleon* (July 3, 17, 31, Aug. 7, 14, 21); *Broadway's My Beat* (July 5, 12, 19, 26).

upcoming

May 26-27: BMI television clinic, Hollywood, Calif.

May 27-29: National Sales Executives Inc., 17th annual convention, Hotel Fairmont, San Francisco.

June 2: BAB Sales Clinic, Portland, Me.

June 4: BAB Sales Clinic, Boston.

June 5: BAB Sales Clinic, Providence.

June 6: BAB Sales Clinic, Hartford.

June 6: NARTB TV Code Review Board, NARTB hdqrs., Washington.

June 8-11: Adv. Federation of America 48th Annual Convention and Exhibit, Waldorf-Astoria Hotel, New York.

June 9-10: NARTB TV Board, The Homestead, Hot Springs, Va.

Top coverage . . . *to cook up Western sales for you!*

Yes, it's a recipe for top coverage that's always successful:

INGREDIENTS { ***Combination of NBC stations in the Far West*** / ***Outstanding NBC programs over these stations***

Mix these two potent ingredients, and you get the No. 1 audience—top coverage of *your* prospects — whatever you're selling!

83.5% of all radio homes in Washington, Oregon and California listen regularly to NBC Pacific Coast Network.

No other network delivers such sales impact!

Radio homes in this fast-growing, fast-buying area have increased 53% in the past decade. More people now listen to radio in the Far West than ever before.

Choice network time is available on NBC Pacific Coast Network, the No. 1 network in the Far West. Consult your nearest NBC Sales Office for details.

"Our Country's Strength is Created . . ."

REESE H. TAYLOR
President, Union Oil Company of California

"Our country's strength is created by the responsibility and solidarity of individual citizens in a self-chosen government and economy. It can—and must—be perpetuated against all who seek to undermine it. The men and women who invest regularly in United States Defense Bonds are contributing to our national integrity and to the traditions of personal independence so characteristic of a free people."

Every pay day, 6,500,000 employed men and women . . . "are contributing to our national integrity and to the tradition of personal independence . . ." by the systematic purchase of United States Defense Bonds.

How important is this contribution to national economy and personal security? Let's look at a few figures.

- the cumulative purchases of 6,500,000 Payroll Savers add up to $130,000,000 per month.
- the number of individual E Bonds sold in 1951 totaled 68,069,000 pieces—8% more than in 1950.
- purchases of $25 and $50 E Bonds—the denominations popular with Payroll Savers—were greater than the sales of $500 and $1,000 E Bonds.
- monthly redemptions of unmatured E Bonds during each of 9 months (April to December, 1951) were less than 1% of the amounts outstanding.
- the *cash value* of Series E Bonds held by individuals on December 31, 1951, amounted to $34,727,000,000—$4.8 billions more than the cash value of Series E's outstanding in August, 1945.

That Americans have built personal security and a reservoir of purchasing power exceeding $34.7 billions is due in no small measure to the patriotism and foresight of men like Mr. Taylor and other leaders of industry who have made the Payroll Savings Plan available to their employees.

For help with your Payroll Savings Plan, phone, wire or write to Savings Bond Division, U. S. Treasury Department, Suite 700, Washington Building, Washington, D. C.

NLRB ACTIONS

Cover Five Stations

FIVE stations figured last week in actions taken by the National Labor Relations Board involving a final decision, a recommended order based on intermediate findings and oral argument.

The stations are KWKH Shreveport, La. (International Broadcasting Corp.), KHMO Hannibal, Mo. (Courier Post Publishing Co.), WGH Newport News, Va. (Hampton Roads Broadcasting Corp.), WNOR (Norfolk Broadcasting Corp.) and WTAR (Norfolk Radio Corp.), both Norfolk, Va.

Preliminary report of a trial examiner charging KWKH with certain unfair labor practices was affirmed and made final decision of the board last Tuesday. Similar findings were leveled against KHMO in an intermediate report. The three Virginia stations were involved in a hearing Thursday on a question relating to composition of bargaining units.

In the Shreveport case, KWKH had contended the union, International Brotherhood of Electrical Workers (AFL), did not have a majority representation among its five announcers and two control room operators. IBEW claimed such a majority.

The station then requested an NLRB hearing, held in Washington, D. C., April 8. KWKH claimed it was deprived of due process of law on two counts: (1) It did not have adequate opportunity to file an answer attacking definitiveness of the complaint, and (2) it was handicapped in preparing defense by NLRB denial of a request for 10- or 15-day continuation of case.

Concedes Doubt Possible

While the board affirmed the examiner's findings that the station discharged two announcers, Paul Crawford and Vendex Marshall, without just cause, and ordered KWKH to bargain with IBEW, it acknowledged there was room for speculation that the employer had doubted the union's majority in good faith.

The board said it took the action, "even though a majority [Chairman Paul M. Herzog, and members Abe Murdock and Ivar Peterson] does not find that the respondent's refusal to recognize the union . . . violated . . . the act . . ." The board added: "It was [his] duty to refrain from disturbing the *status quo* by coercive conduct pending the resolution of the representation question . . ."

In charging the union lost its majority through the employer's action, the board cited a ruling by the Court of Appeals for the Fifth Circuit on a non-broadcast case.

In the KHMO case, Examiner Stephen Bean charged that the station discriminatorily discharged an announcer, Robert Hewitt, "thereby discouraging membership" in Local 1272 of IBEW (AFL). He recommended the employe be reinstated. Mr. Bean absolved KHMO of other alleged unfair labor practices cited in the union's complaint.

Oral arguments were requested by American Federation of Radio Artists (AFL) to contest composition of units designated by NLRB at WGH and WNOR. Board had ordered elections at WNOR among announcers, announcer - engineers and continuity employes, and at WGH among announcing and programming personnel [B•T, April 14]. No action had been taken previously in the WTAR case on the same issue.

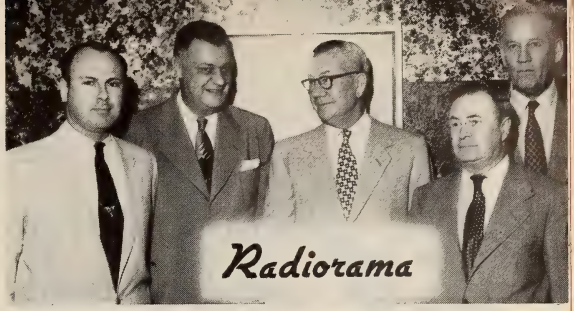
AFRA seeks a unit limited to announcers and announcer - engineers—those who actually appear before the microphone—and would exclude continuity, traffic, production, sales and promotion personnel where each are involved at the particular station.

In directing elections, the board in two of the three cases based its unit designations on the "small size of the (stations) . . . and integrated nature of . . . broadcasting operations."

McFARLAND BILL

Debate Schedule Indefinite

DATE for House debate on the McFarland bill (S 658) still is a question mark. House leadership has been aiming at Tuesday or Wednesday of this week as the days when they would consider calling up the bill [B•T, May 12].



However, there have been no assurances just when the bill will reach the floor. Some sources predict the week of June 11 because of the Memorial Day holidays interrupting House business.

The McFarland bill would touch up the Communications Act which has been operative since 1934. It would streamline a good many of FCC's functions. The House version contains some controversial sections in comparison to the Senate-passed bill.

The McFarland measure also faces possible amendments from the House floor, one of these on political broadcasts (see separate story), another on charging fees for AM-TV station licenses. Latter proposal hinges on action by Rep. Alvin E. O'Konski (R-Wis.). It is also expected that there may be some questioning on the floor regarding the House Interstate and Foreign Commerce Committee's added section on anti-newspaper discrimination.

Herman Kasser

HERMAN KASSER, 72, manager of the Seaboard Adv. Co., Philadelphia, died May 17. He was a member of the Panonia Beneficial Assn. and Brith Achim Beneficial Assn. Surviving are his wife, two sons and two daughters.

From where I sit
by Joe Marsh

How Nervy Can a "Tenant" Get?

"Harry the Hermit" dropped in to see Judge Cunningham the other day and immediately started complaining about that dilapidated house he lives in over near Greenwood Lake.

"Who's my landlord?" Harry wanted to know. "Whoever you pay rent to," says the Judge. "Don't pay any rent," says Harry. "Moved into that house about twelve years ago and nobody ever came to collect."

"Well," says the Judge, looking mystified, "what do *you* have to complain about?" "Plenty," replies Harry. "The rain's been pouring in my living room and if someone doesn't fix that roof, I'm moving out!"

Now Harry was only having a little joke, but from where I sit I've seen people act just about as nervy as this sometimes—seriously. *Like those who enjoy all the rights Americans have worked for, and yet would take away some of those freedoms from others—for example, our right to enjoy a friendly glass of beer occasionally. I say these "leaks of intolerance" have no place in the "home of liberty."*

Joe Marsh

IBEW CONTRACTS

Set at 12 L. A. Outlets

NEW contracts negotiated by IBEW Local 45 give engineers and technicians of 12 Los Angeles area independent AM and FM stations weekly wage increases varying from 5 to 9%, effective May 1.

Besides KRKD KLAC KFVD KGFJ KFWB KFAC KFMV (FM) Los Angeles, stations include KGER KFOX Long Beach and KWKW KALI KXLA Pasadena.

Along with other improved working conditions, a 20% mileage increase for engineers on outside assignments also was negotiated. Stations further agreed to encourage use of Local 45's "hiring pool" in employing new technicians.

Affecting advertising agencies and included for first time is a new clause written into contracts which specifies that all remote pickups not made by station employes will be controlled by the union similar to AFM's "casual" setup for musicians.

IBEW last week filed an NLRB petition of certification as collective bargaining representative for six engineers and technicians of KGIL San Fernando, currently represented by NABET (CIO).

LIQUOR ADS

Rank Fourth, WSWA Hears

LIQUOR is now the fourth most heavily advertised product in the nation with distillers spending $100 million a year in advertising, Dan Goldstein, director of advertising and merchandising for Schenley Distributors Inc., told the ninth annual convention of the Wine and Spirits Wholesalers of America last Monday in Los Angeles.

Mr. Goldstein said pre-selling of name brands by distillers through national and local advertising is vital to profitable retail operation in "today's high cost of doing business." David Bunim, vice president of Schenley Industries Inc., told delegates Tuesday that the beverage field faces return to a "buyers' market" of "confiscatory liquor taxes."

KBS 'BONANZA'

'Small Towns Are Rich Vein'

KEYSTONE Broadcasting System, network of 504 small-town stations, last week claimed there is a "bonanza" awaiting advertisers in communities outside major market areas.

KBS pointed out that the 1948 Census of Business reports that more than a third of the nation's business is transacted outside major metropolitan areas.

As for TV's effect on KBS listening, officials explained that 411 KBS stations are in counties "wholly outside the claimed coverage of TV stations. In fact," officials added, "the swiftest and steepest rise in KBS billings coincided with the emergence of television as a major medium."

WLS 'No Worry' Tour

ALMOST 300 Midwesterners have made reservations—with $50 deposits—for the WLS Chicago "no-worry" tour to Alaska in August. Response was tabulated within two weeks after six announcements on the station's popular *Dinnerbell Time*. Originally scheduled as a one-trip promotion for 200 persons, it has been expanded with addition of another all-expense tour, with costs of $500 to $600.

NARBA ACTION

Urged by Sen. Case

SENATE has been urged to take up consideration of the North American Regional Broadcast Agreement that pends before the Senate Foreign Relations Committee.

The call came from Sen. Francis Case (R-S. D.) on the Senate floor May 15 when FCC Vice Chairman Rosel H. Hyde was confirmed for another term on the Commission [B•T, May 19]. Sen. Case was acting minority leader.

Noting Comr. Hyde's activity toward negotiating NARBA, Sen. Case asked Senate Majority Leader Ernest W. McFarland (D-Ariz.) whether confirmation of Comr. Hyde would have any effect on the agreement. Sen. McFarland said the agreement now was the responsibility of the Senate and not connected with confirmation.

Sen. Case called attention to "the importance of having some action on the agreement. . . . I believe a proper tribute to his [Comr. Hyde's] work would be to bring up for consideration by the Senate the agreement Mr. Hyde worked so hard to negotiate."

NBC HONORS KDYL

Upon Station's 30th Year

KDYL Salt Lake City was saluted in a half-hour NBC program, *Salt Lake City—1320*, upon the station's 30th anniversary and its completion of 20 years as an affiliate of NBC. KDYL operates on 1320 kc with 5 kw power.

After the network salute, the station followed with *A Cavalcade of Progress*, recapturing the sounds and excitement of the past 30 years through recordings of memorable events in KDYL's broadcasting history.

Francis H. Marling

FUNERAL services were held May 21 in Glencoe, a Chicago suburb, for Francis H. Marling, 59, advertising manager of the Pure Oil Co. Mr. Marling, who worked at Pure Oil more than 20 years, died May 18 in his Glencoe home. He was a graduate of Princeton U. Surviving are his wife, Nancy, and four daughters.

How to write a million orders!

Remember when they introduced "the pen that could write under water?"

It was more than just a stunt. For when the ball-point pen first appeared in the stores, its acceptance was so sudden—the demand for the new pens so tremendous — that its manufacturer faced a serious problem.

He had to deliver more than a million pens—to every part of the country—in a matter of days!

What did he do? He turned to the world's fastest shipping method. He delivered his pens via Air Express!

Air Express helped create a million-dollar business almost overnight!

For expanding markets, creating good will, there's no substitute for the speed of Air Express. You can profit from its regular use, because:

IT'S FASTEST — Air Express gets *top priority* of all commercial shipping services—gives the fastest, most complete door-to-door pickup and delivery service in all cities and principal towns at *no extra cost.*

IT'S DEPENDABLE — Air Express provides one-carrier responsibility all the way and gets a *receipt upon delivery.*

IT'S PROFITABLE—Air Express service costs less than you think, gives you many profit-making opportunities.

Call your local agent of Air Express Division, Railway Express Agency.

AIR EXPRESS

GETS THERE FIRST

Strictly Business

(Continued from page 18)

for Delta, the similar voice making it appear the airline was sponsoring the program.

From the late Henry Ford, whom Mr. Cobb met as a cub reporter, he borrowed this philosophy: "Learn as much as you can about everything you can; it will all be useful some day." A sign on Mr. Cobb's desk indicates another outlook upon life: "Why make it difficult . . . with a little more effort you can make it impossible."

When James Heys Cobb Jr. joined Delta as director of publicity in 1941, the pieces of a seeming patchwork of interests began to interlock.

Young Jimmy Cobb began his career taking art lessons, but soon turned to writing as editor of his school papers. His first business venture came at ten in a direct mail program to automobile owners whose cars needed repainting. His job was to copy down license numbers of cars needing paint jobs, for which he got a dollar for each repaint customer.

Gaining proficiency in photography, he joined the staff of a Savannah, Ga., newspaper as combination reporter-photographer upon graduation in 1933 from the U. of Georgia. He stayed three years, did a stint with the AP in Miami and returned to Savannah to become executive secretary to the mayor, who had requested Delta to seek a route to the city.

The application was approved and when Delta made its pre-inaugural flight through Savannah, Mr. Cobb went along to represent the mayor, who disliked flying. Here he met C. E. Woolman, president and general manager of Delta, and other Delta officials who were so impressed with Mr. Cobb's work in securing newspaper and radio publicity concerning the flight that they invited him to take charge of a new Delta department—publicity.

A short interval as an ensign in Navy intelligence prevented immediate acceptance of the Delta offer, but when Mr. Cobb received a physical discharge from the Navy, he joined the air line in August, 1941, as director of publicity and later of advertising.

His largest campaign was the introduction of Delta's DC-6 fleet in 1948, calling for a gigantic promotional and advertising campaign lasting several weeks. All types of media were used, including a special publicity flight from the West Coast for newspaper and radio men, and complimentary flights over each DC-6 city for local businessmen, radio and press people.

Mr. Cobb's main interest outside Delta is his old ranch-style year-around home on Niskey Lake, 20 minutes driving time from Delta's headquarters at the Municipal Airport in Atlanta. After living on the seacoast the whole Cobb family is "web-footed" anyway, he says, and here gets a chance to swim and fish. Here, also, Mr. Cobb can follow his other hobbies of carpentry and design.

Married to the former Neota Barber of Savannah, Mr. Cobb is father of James H. III, 11, and William Allen, 6. He is a member of Delta Tau Delta social fraternity, Sigma Delta Chi journalism fraternity and the Public Relations Society of America.

Letter from a man who believes in what he sells

Roger W. Clipp, General Manager, WFIL tells why, how and where he advertises

It's always nice to hear from someone who believes in what he sells—and backs it up with the long green. The letter we received recently from Roger W. Clipp, General Manager of WFIL, Philadelphia, is a sample of what we mean.

He believes in advertising, radio and his station, WFIL.

So he *advertises* to sell advertising and radio and WFIL.

The letter below, with but 204 words gives you his views on why, how and where a Radio station should be promoted to those who buy advertising. Here is what he says:

"We are most enthusiastic about the reception accorded our trade advertising series in Printers' Ink.

"When we began our current schedule of double spread advertisements almost a year ago, we were anxious to produce a campaign utilizing real *selling* facts about our market, about radio and about WFIL. We have a profound belief in the role of radio as advertising's most economical mass circulation medium and specifically in WFIL's effective coverage of the nation's third market. That belief translated into black and white is our trade campaign.

"Naturally, we want our story to reach those who are in a position to take action in buying advertising time—not only those advertisers with a going interest in radio, but, beyond them, other advertisers and their agencies who someday will be interested in selling by radio in WFIL-adelphia. Printers' Ink gives us that coverage.

Bob Kenyon

"Through Printers' Ink we're reaching not only today's advertisers but tomorrow's time buyers as well. We know that WFIL will sell, but we realize that first we have to sell WFIL. We believe that a good sound sales story on the station and its market will accomplish that objective.

"Printers' Ink is getting our message across where we want it understood."

Suggestion: if you've got messages for advertisers and agencies, consistent advertising in Printers' Ink is a good way to deliver them. Our mass circulation of 23,309 paid subscribers gives you maximum coverage of the advertising, management, sales and agencies executives who buy a large part of today's radio time.

When may we give you more details?

ROBERT E. KENYON, JR.
Advertising Director

KOB ANSWERS

Petition on 770 kc Status

"SUMMARY return" of KOB Albuquerque, N. M., from its present 770 kc assignment (special service authorization) to 1030 kc, as proposed in an FCC petition filed by ABC [B•T, May 19], was opposed last week by the Albuquerque station. ABC had contended FCC should not approve transfer of KOB-AM-TV from T. M. Pepperday to Time Inc. and former FCC Chairman Wayne Coy without clearing up KOB's status on 770 kc.

KOB's reply to ABC, filed by Ralph L. Walker, of Pierson & Ball, contended the appropriate relief is for FCC to deny the ABC petition, act on the transfer application, and then proceed to a decision on the channel and frequency matter.

It was contended by KOB that summary transfer to its 1130 kc assignment could not be legally taken by FCC without consent of WBZ Boston, occupying the unduplicated channel.

Eisenhower Coverage

MBS has completed plans for three-day coverage of Gen. Eisenhower's return to his home in Abilene, Kan. [B•T, May 12]. Highlight of the Abilene ceremonies, to be broadcast June 3-5, will be the general's speech June 4.

NBC SHIFTS

Staff Changes Announced

HAROLD W. SHEPARD, heretofore supervisor of sales promotion for NBC radio, has been appointed manager of sales development, advertising and promotion for NBC spot sales, in a series of network personnel shifts announced last week.

H. Norman Neubert, spot sales promotion manager since July, will resume his former duties as merchandising manager of network owned stations.

William A. J. Lauten, trade news editor for the press department, has been promoted to serve as radio manager.

Mr. Shepard joined NBC in March 1950 as a radio sales promotion writer and was named supervisor of network radio sales promotion in June 1951.

Mr. Neubert entered the network as merchandising manager of owned and operated stations also in March 1950 after having been associated with R. H. Macy & Co. public relations manager and divisional advertising manager.

Mr. Lauten will report directly to Frank Young, department director, in his new assignment. He joined NBC in January 1949. Ernest Otto, staff writer, will serve as an assistant to Mr. Lauten as well as to Allen H. Kalmus, TV manager.

SECURITY RULE

Set for Senate Inquiry

ORGANIZATION of a Senate investigation into President Truman's controversial security order was begun last week [B•T, May 19].

Sen. Blair Moody (D-Mich.), who introduced the resolution authorizing the inquiry, was named chairman of an investigating subcommittee appointed a fortnight ago. Sens. John L. McClellan (D-Ark.) and Richard M. Nixon (R-Calif.) were named last week to fill out the subcommittee which also includes Sens. A. S. Mike Monroney (D-Okla.) and Andrew F. Schoeppel (R-Kan.).

An advisory council of five to seven Washington newsmen, of radio-TV, the press or periodicals, also will be appointed to assist the subcommittee in its inquiry.

MATERIALS

Four Metals De-Controlled

FURTHER easing of controls on scarce materials, most of them used in radio-TV equipment production and construction, was indicated by the government last week.

The National Production Authority freed four metals—bismuth, cadmium, lead and antimony—from controls and eased restrictions on a fifth, zinc. Increased supplies of cobalt, nickel, copper and aluminum also were in prospect.

A MONTHLY REPORT TO EDITORS

Highlighting Significant Facts about Bituminous Coal

CEMENT INDUSTRY FINDS NEW USE FOR COAL BY-PRODUCT.

New uses for coal by-products seem endless. Recently, engineers discovered that when coal flyash is added to Portland cement the concrete's strength is greatly increased. Coal serves the cement industry in another way, too—as the basic fuel used to generate the intense heat that fuses limestone and clay into cement. And for this purpose the cement industry now uses more than 8 million tons of coal a year. The industry has expanded to the extent that its coal consumption is almost double what it was prior to World War II.

ENGINEER PREDICTS COAL PRODUCTION RATE WILL INCREASE FIVEFOLD.

In a speech recently made at Massachusetts Institute of Technology, a prominent engineering executive painted this possible picture of the coal industry of the future: Coal will be mined by ingenious machines and transported by pipeline to plants where it will be continuously processed into tars and coal char. Production rates will be five times higher than those common today to meet the increased demands of coal's regular customers as well as the tremendous requirements of the synthetic fuels industry. One striking thing about this prediction is that almost every facility the engineer described is either already being actually used by the coal industry or is operating experimentally.

BIG GAIN IS MADE IN EFFICIENCY OF COAL UTILIZATION.

Year by year, American industry has been putting coal to work more efficiently. The electric utilities, for example, have increased their efficiency of coal utilization more than six times since the beginning of the century. Last year the utilities burned about 102 million tons of bituminous coal to do a job that would have required 630 million tons at the 1899 level of efficiency. Even in the span of a single year, 1950 to 1951, utilization efficiency increased 4.2%, saving the utilities more than four million tons of coal.

PULP AND PAPER MILLS NOW USE LOTS OF COAL.

A recent engineering survey shows that the pulp and paper industry—which has had phenomenal growth, especially in the South—is becoming a major consumer of coal. Upwards of 15 million tons of coal is utilized annually. This is a remarkable tonnage in view of the fact that pulp and paper mills are big users of their own by-product fuels: black liquor and bark. Of the fuels purchased by this industry, the survey revealed, coal accounts for about 56%; oil and natural gas, 22% each.

If you have any questions about coal or the coal industry, your inquiry to us will receive prompt reply.

TV *Cum Laude*

EVEN Comr. Hennock and the day-dreaming educators whose cause she has been advancing to who-knows-what eventual political advantage ought to realize by now that no more than a handful of the 242 TV channels reserved for educators will be occupied by them.

Operation of full-scale television stations simply costs too much for schools.

We suggest, however, that there is a way for education to make good use of TV. Being practical, this proposal may not appeal immediately to day-dreamers, but it could get a lot of schools into television, whereas the FCC's absurd plan can't.

If a school wants to use TV for teaching students, it can do it better by a closed circuit system on the campus than by the infinitely more expensive method of broadcasting. Closed circuit systems might well be within the means of many educational institutions. Nearly all campuses now have their "gaspipe" radio stations.

Well, how about programming to the off-campus TV audience? There's an answer to that too. Although we would be silly to represent this as a wholesale commitment, we venture that most commercial telecasters would agree to running a line or a micro-wave relay into the studios of schools that had closed circuit TV. They also would agree to broadcast a reasonable amount of educational programming originating at schools, providing, of course, the programming was good. Already there have been several arrangements between schools and commercial broadcasters and both sides seem happy with them.

We think this plan makes sense. It would cost everybody less money and result in getting more education into TV than ever will be possible under the FCC's system. It also would enable the FCC to take those 242 channels off ice.

McCarran at Bat

HOWEVER mischievous his purpose, Sen. Pat McCarran may have performed a useful service for radio, television and the U. S. public in introducing a resolution to exclude broadcasting from Senate hearings.

First, the introduction of such unremittingly restrictive legislation may stir broadcasters from the deplorable apathy with which they have received Speaker Rayburn's ban against radio and TV in the House. The petition of the NARTB filed at midweek suggests that in this case, unlike that in the House, broadcasters may take a strong position. Surely the prospect of being legislated out of the Senate ought to arouse any news medium.

Second, Sen. McCarran's action may have opened the way for a hearing at which a thorough discussion of radio's and television's places in the news gathering family could be had. The more discussion of this subject the better. If a hearing is held and all sides given adequate time, we cannot help but feel much confusion would be cleared up.

It's not surprising that Sen. Estes Kefauver, whose televised crime committee hearings first brought him into the national picture, has come out strongly against the proposed ban.

In our view, the confusion exists principally because those opposed to broadcasting refuse to recognize that the thing worrying them is not broadcasting at all but rather the frank, unedited exposure of congressional committee conduct. It would be well to get this straight, and there would seem to be no better way than through a hearing on the McCarran Resolution.

With his usual logic, Edward R. Murrow summed up the situation on the "freedom front" last Monday over CBS. He cited (1) President Truman's executive order of last September which makes every government department and agency its own censor; (2) Speaker Rayburn's ban; (3) the voice vote, with only 31 House members present, which authorized an inquiry into radio and TV programming (Gathings Resolution), and, finally (4) the McCarran Resolution.

"In combination," said Mr. Murrow, "they represent both a threat to censorship and a denial of the right of television and of radio to employ the tools of their trade—the mike and camera—to disseminate information."

It should be evident that these actions are not mere coincidences. They constitute a trend. It isn't enough for a scattering of professional newsmen in broadcasting to protest. This calls for the vigorous participation of management. To do otherwise would be gross negligence.

These thrusts must be resisted. We see in the Gathings Resolution sinister implications that could further restrict freedom of expression and thought. The McCarran Resolution embodies a menace which must be counter-attacked by management. Else it will be a confession that management does not believe radio and TV really are news media.

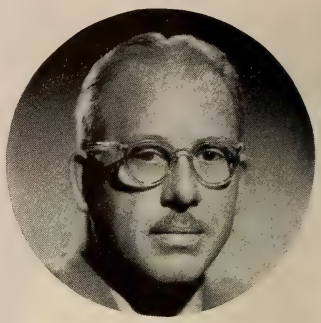
Football Bossism

THE collegiate football industry, hell-bent to prevent the taxpayers from having what they want, has just won another "victory." It has snuffed out the Atlantic Refining Co.'s sponsorship of football broadcasts of a score of eastern colleges, terminating 16 years of pleasant and profitable association in radio.

It was a force play. NCAA has served notice that it will repeat the 1951 monopoly-blackout tactics this year.

Since it isn't an eleemosynary institution, Atlantic Refining had no alternative. It is turning from Saturday radio to Sunday television; from college to professional games. Thus blocked from telecasting college games, Atlantic did the obvious and dropped college football altogether because it no longer is able "to back up its radio coverage with television coverage, gaining audience in the newer medium to balance audience losses in radio."

NCAA already is under Dept. of Justice scrutiny because of last year's blackouts. It has more than cursory knowledge of the government's conspiracy suit against the National Professional Football League for a much milder form of "monopoly."



And to compound its arrogance, NCAA has loosed an unscientific and notably inaccurate survey which obviously distorts the effect of its TV-blackout on football gate receipts.

This latest "victory" was preceded last year by another coup, wherein some of the leading colleges lost Atlantic Refining sponsorship because of NCAA's effort to sweep back the electronic tide. These colleges had benefited by receiving substantial fees for broadcast rights, with which to build new stadia and libraries. They profited by stimulation of interest in their teams.

Atlantic was the bellwether in breaking through the resistance of some of the old-line colleges on broadcasts of sporting events. It was the first, also, to back college football telecasts, with ten years in the video field.

Inevitably, we think, there will come the retribution. NCAA would be well advised to study up on anti-trust litigation.

our respects to:

KENNETH KENNARD HACKATHORN

"I DIDN'T know a kilowatt from a doughnut," says Kenneth Hackathorn, general manager, WHK Cleveland, in recalling his first days in radio.

Fortunately for Mr. Hackathorn, his initial job in radio required salesmanship experience, not technical knowledge, and he was a veteran salesman.

Mr. Hackathorn had come up through the ranks in the classified ad department of the *Cleveland Plain Dealer*, owner of WHK and the old WCLE Cleveland.

In January 1938, the newspaper asked Mr. Hackathorn to accept the position of sales manager for both stations. He adapted himself quickly and the stations grew. In July 1944, he was named vice president and general manager of WHK.

This meant much to Mr. Hackathorn, not only because it crowned a successful business career but also because Cleveland is his native city.

Mr. Hackathorn was born in that Ohio city June 7, 1900. He was christened Kenneth Kennard Hackathorn, a name that was to become synonymous with Cleveland radio.

His early schooling was in Lakewood, Ohio. While in high school there, he was building an athletic career until a knee injury forced him from scholastic competition. He earned a B. A. degree at Cornell U., class of 1923.

Although he had learned the theory of business administration at Cornell, Mr. Hackathorn's business experience dated back to boyhood.

At age 10, he worked with a farmer selling produce door-to-door from a horse and wagon. During school vacations, he sailed on the Great Lakes, and served in a checkerboard of other miscellaneous jobs.

After college, his first step up the ladder was in the auditing department of the White Sewing Machine Co. Soon thereafter, with a partner, he opened up a store handling White Sewing Machines and other appliances.

In 1925, Mr. Hackathorn joined the classified ad department of the *Plain Dealer*. As his know-how gained momentum, he was promoted successively to assistant classified manager in 1935, and classified manager in 1936. Then in 1938 he switched to radio.

With the aid of a good sales department and an efficient secretary, Mr. Hackathorn managed to survive his first few months in the seemingly confusing radio world. After that,

MILITARY FUNDS

Radio-TV Activity May Be Curtailed

RADIO-TV activity in the Pentagon faces a drastic curtailment if Congress sustains threatened cuts in funds for the military's public information operations.

Defense Dept. authorities are concerned over action already taken by the House and now under study by a Senate Appropriations subcommittee headed by Chairman Joseph C. O'Mahoney (D-Wyo.).

If the upper chamber sustains the House recommendations, the department's Office of Public Information faces a 75% slash in funds and personnel, with adverse effects certain to be reflected in the production of its informational or "prestige" radio-TV network programs.

Pentagon authorities are prepared to request permission of Sen. O'Mahoney to testify against the cut in expenditures—from $1,250,000 sought in the budget to the $312,000 which would be allowed by the House.

Military personnel procurement officials face the same problem in recruiting before the subcommittee, in respect to fiscal '52 and '53 monies. Congressional criticism has been leveled at paid advertising campaigns and public information specialists.

Symbolic of these economy moves was the revelation last week that the Air Force is dropping its *Air Force Hour* on MBS after four consecutive years of broadcasts. While AF authorities claim the show is going off for the summer and may be resumed this fall, they concede that reduction in OPI personnel was a major factor. The program bowed out May 11.

On the Defense Dept. OPI front, Charles Dillon, chief of the Radio-TV Branch, told BROADCASTING • TELECASTING that the 75% slash, if authorized by Congress, "would have the effect of cutting OPI operations to virtually nothing." He said every effort would be made, however, to retain the programs because of their informational value in the current cold war. Military authorities and networks are desirous of keeping the broadcasts, too, as public service features, he added.

Mr. Dillon's branch did lose one program last week, though for another reason—the suspension of the Liberty network. There is a possibility that excerpts of *Defense Report*, a 15-minute documentary, may be incorporated into the *Armed Forces Review* on MBS.

These and other Defense Dept. OPI shows—*Time for Defense* on ABC and *Pentagon-Washington* on DuMont TV Network—could face serious personnel and production difficulties in the event funds are depleted on Capitol Hill.

This predicament at the Defense Dept. level has been taking shape since early this year when it was revealed that the Pentagon shows were being reappraised in terms of their dollars-and-cents value [B•T, Feb. 11]. Since then, congressional attacks on the number of OPI specialists have mounted.

The Air Force has hinted that curtailment was possible in its radio-TV programs last March, though this feeling stemmed directly from a directive of Air Force Secretary Thomas Finletter. It called for a 65% cut in personnel by May 1 [B•T, March 31].

Another Air Force program, *Serenade in Blue*, could be affected over the long run, although the service reportedly has a sufficient backlog of transcribed broadcasts to span the summer months.

The recruiting dilemma is reflected in pending fiscal '53 funds, sharply pared by the House, for radio, TV and other media advertising and fiscal '52 expenditures ($2.1 million) still frozen by Congressional mandate. Total of $1,050,000 for advertising is under legislative scrutiny for the coming year [B•T, May 19, April 14].

ANTUNER DISPUTE

Settled Out of Court

DISPUTE between Thomas S. Lee Enterprises, owner of WOR-AM-TV New York, and Antuner Co., Stamford, Conn., and its agency, Cavanaugh-Shore & Co., New York, was settled out of court fortnight ago.

Lee Enterprises had filed suit in Superior Court of New York to collect $8,638.02 allegedly due from the agency and Antuner for time charges and money allegedly refunded by stations to Antuner customers [B•T, April 28]. Cavanaugh-Shore also was sued for $4,105.90 allegedly due for commercial announcements. Mid-week comparison of agency-station records and payments indicated the total debt was $6,084.21, payment of which closed the issue.

TRUMAN STAFF

Fritchey To Be Named

APPOINTMENT of Clayton B. Fritchey, public information director for the Dept. of Defense, as special assistant to President Truman was expected to be announced momentarily, according to published reports last week.

Mr. Fritchey was to announce his resignation from the Defense Dept. information post which he has held since November 1950. He is expected to serve in a special information or news capacity on the White House staff.

Report of the appointment tied into earlier speculation that Mr. Fritchey, a former newspaperman, would be named to the Democratic National Committee as public relations consultant [CLOSED CIRCUIT, April 14].

*Pulse (February, 1952)

CROSLEY BROADCASTING CORPORATION

Our Respects to

(Continued from page 64)

he stood very solidly on his own.

WHK at that time did not have a merchandising department. Within a year, he had an aggressive merchandise department operating, and had instituted other sound business methods.

Looking ahead, Mr. Hackathorn comments, "The future of the station is best expressed by a recent opening of new and larger office and studio facilities which, I believe, expresses the utmost faith in the future of radio.

"Obviously," he adds, "our new location took into consideration the possibility and hope of securing a television license. WHK has withstood the first onslaughts of television and our local business is showing good improvement over 1950 and 1951."

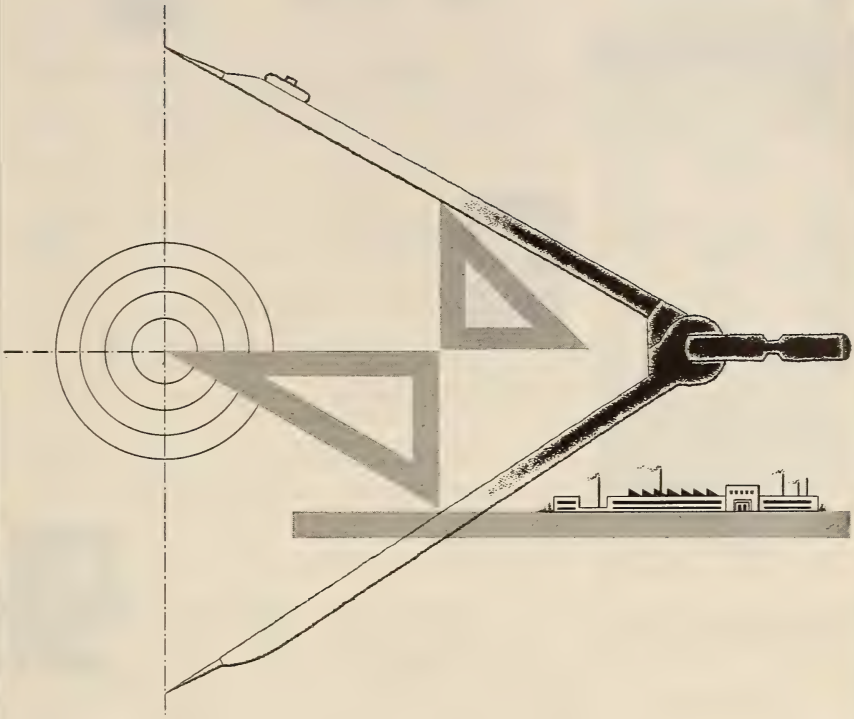
Since entering the radio field, Mr. Hackathorn has consistently felt that radio offered the strongest means of mass appeal and could be used by anyone as an advertising medium to move merchandise and sell services.

He looks upon the senior broadcast medium as "a greater force in building the community, the home and the nation. Radio has become an integral part of our national economy and has helped to mold a way of life that can only be found in a country such as ours.

"WHK, like other stations throughout the country, will continue to play a leading part in the educational, cultural and economic life of every community."

A glance at Mr. Hackathorn's outside activities will convince anyone that he is doing his active best to make the station more a part of the community.

Mr. Hackathorn is active in the Cleveland Chamber of Commerce program committee and the Cleveland Advertising Club. He is director and secretary of the Hermit Club, past president of the Cleveland Executives' Club, a member of the Heights Rotary Club of Greater Cleveland, director of the Junior Achievement and is past president of the Cornell Club of Cleveland.



His staunchest supporter and confidante is the former Bernice Helen Albaugh, whom he married Nov. 22, 1924.

When a few leisure hours appear unexpectedly in his crowded day, Mr. Hackathorn finds relaxation in golf and in playing cards.

His future plans look toward solidifying WHK's position as one of the top stations in the northeastern Ohio market. He hopes that he eventually will be instrumental in building a TV station to a leading position in the same market.

AFA Old Timers

ADVERTISING Federation of America will hold a dinner for men and women who have been in advertising 25 years or more during its 48th annual convention at New York's Waldorf-Astoria, June 8-11.

GOOD COMMUNITY RELATIONS

start when a new plant is still

in the blueprint stage. *Radio* can help!

Never before has American industry expanded at such a pace! And every time a new plant arises, new problems in community relations arise with it.

To solve these problems, many growing companies use radio.. effectively, economically and regularly. Radio programs prepare a community for the arrival of a new industrial neighbor. Radio programs *explain* a new plant's policies and purposes. Radio programs *attract* employees.. both from areas close to the plant and from outlying territories that other media simply don't reach.

If you're locating a new plant, don't overlook the help that radio offers. And if you're building in any one of these six industrial centers.. Boston, Springfield, Philadelphia, Pittsburgh, Fort Wayne, or Portland, Oregon.. get in touch with the Westinghouse station that serves your area. There you'll find wide experience in using radio to help industry make friends with its neighbors.

EUGENE BANNVART

Adman Dies in New York

EUGENE J. K. BANNVART, 57, vice president of Cecil & Presbrey Inc., New York, died May 18 in New York Hospital after a brief illness.

Mr. Bannvart entered advertising as advertising manager of McCormick & Co., Baltimore. Following a term as manager of Cecil & Presbrey's Baltimore office, Mr. Bannvart went to Russia. He returned to this country in 1936 and was made a vice president of Blackett, Sample & Hummert Adv. in Chicago. He became a vice president of the Biow Co. in New York in 1943. Rejoining Cecil & Presbrey in 1949, he was appointed vice president. He leaves his wife, Mrs. Helen K. Bannvart.

Astin Named for NBS

DR. ALLEN V. ASTIN, widely known in electronics, was nominated Tuesday by President Truman to be director of the National Bureau of Standards. He has been acting director since resignation last October of Dr. E. U. Condon, who became research director for Corning Glass Corp. Dr. Astin joined the bureau in 1932. He worked in radio telemetering and was a key figure in development of the proximity radar fuse which detonates a missile at a desired distance from an object.

Angling for New Markets?

If you're fishing for new markets, past result stories point to KFYR as a likely spot. The station with the nation's largest area coverage, KFYR doesn't depend on "fish stories"—offers the national advertiser hard-hitting facts which bear out KFYR's coverage and selling claims in this rich, rural market.

KFYR

BISMARCK, N. DAK.

Rep. by John Blair

GUILD WRITES
Network News Sponsors

LETTERS were being mailed to some 70 sponsors of NBC, CBS and ABC radio newscasts by the Radio Writers Guild to explain the reasons for its strike, pending against the three networks to establish commercial fees for staff newswriters, Ira Marion, Eastern regional vice president, said last week.

Similar messages were sent the previous week to sponsors of national presidential convention coverage this summer, he added. The strike is approved by RWG membership as well as the council of its parent, Authors League of America.

Baseball on KEX-FM

BROADCASTS of Pacific Coast League Portland Beavers baseball games have been inaugurated by KEX-FM Portland, Westinghouse station, as service to FM listeners. Station also has granted rebroadcast rights to some 10 AM Northwest outlets comprising a baseball network on sponsored basis. KEX-FM coverage is sustaining. KEX-FM is duplicating KEX from 3 p.m. to game time, at 8:30 p.m. PDT.

RACING INQUIRY

WLAP, KLAC-TV Petition FCC

TWO stations—WLAP Lexington, Ky., and KLAC-TV Los Angeles—last week asked the FCC to reconsider its Feb. 25 action designating them for hearing because of programs carrying information on horse races [B•T, March 3].

The Commission set 16 station licenses for hearing in February to bring the entire question of racing news to a head. Its action followed study of questionnaires in which stations described the extent to which they carry racing news. The FCC took the position that some track programs giving odds, scratches, track conditions, prices paid, etc., tend to promote gambling.

WLAP told the FCC it had discontinued a program called *Sports Parlay* in 1950 after more than a decade. The program was a 1-5 p. m. Saturday feature during the summer racing months. Last March 12 it discontinued *Sports Review*, a daily 15-minute broadcast at 5:30 p. m.

The station pointed out it has never broadcast horse racing information during substantial segments of afternoon broadcast time "on a regular basis, so as to cause program imbalance inconsistent with operation in the public interest and has never broadcast information pertaining to horse racing, or any other sporting event, in a manner making it particularly susceptible of use as an aid to illegal gambling."

Program content of *Sports Parlay*, it was added, contained information of all sports, interspersed with popular music and "purposely deleted some information regarding races broadcast on *Sports Parlay* which might conceivably have been helpful to bookmaking operations."

WLAP said it desires to continue broadcasting the daily feature race during the Keeneland Race Course meetings, ten days each in spring and fall. The track is non-profit and owned by those interested in breeding, training and racing, it was stated, and conducted on highest ethical standards. It also would broadcast news coverage of important races such as the Kentucky Derby.

Petition asking removal from the hearing docket and grant of license renewal, filed by Paul A. O'Bryan, of Dow, Lohnes & Albertson, Washington, said sponsors were of a normal type.

KLAC-TV told the FCC it had discontinued all regular daily telecasts of horse racing information last Feb. 28. During the entire time it carried racing information on a regular basis, the station states, it telecast only the mutuels paid and the results of the races, not including entries, scratches, probable jockeys, winning jockeys, jockey changes, weights, weather, time, pre-race odds and similar details.

KLAC-TV's Present Schedule

When the FCC set KLAC-TV for hearing, according to the station, it was telecasting results only three times each weekday, generally a half-hour to two hours after the races were run. It is not currently telecasting racing data "except for incidental references in news and sports news programs to feature races such as the Kentucky Derby."

The racing information was carried during a general variety program covering several hours, KLAC-TV told the FCC, with normal and usually acceptable sponsors. Public interest in the sport is high in Southern California, with attendance surpassing all other spectator sports combined, according to KLAC-TV, which adds that it has built up a large sports following. Racing information did not exceed nine to 25 minutes on weekdays, Monday through Friday.

KLAC-TV pointed to the WANN Annapolis, Md., and WJZ-TV New York renewals as precedents for its petition to be removed from the hearing docket. John P. Hearne, Hollywood attorney, filed the petition, with Krieger & Jorgensen also listed as counsel.

ONE ANNOUNCEMENT -- BETTENDORF AND DAVENPORT IN IOWA

ROCK ISLAND MOLINE AND EAST MOLINE IN ILLINOIS

TWO OUT-OF-TOWN CUSTOMERS

$2,450 in Sales

Davenport's Burkeholder Custom Kitchens has had schedule of advertising on WOC for 2½ years. Store owner J. K. Burkeholder knows this schedule builds sales volume. Has many specific instances proving this fact.

For example, in January '52, a Clinton, Iowa, man driving near Davenport on his way to Burlington, heard a Burkeholder announcement. Stopped in Davenport store; told them to get in touch with his wife about remodelling their kitchen.

Within week, Burkeholder had a $1,350 order from this Clinton family. *But more*, Clinton man's brother contacted Burkeholder; purchased a $1,100 custom-built steel kitchen. Result of one WOC announcement—$2,450 in sales. Said the Clinton man: "Credit WOC with this sale, for until I heard the announcement, I didn't know about the Burkeholder firm."

Proof that when you want sales volume in the Quint-Cities—nation's 71st retail market—*you want WOC*. Contact us direct, or your nearest F & P man.

HOUSTON'S LEADING INDEPENDENT

RADIO and TV Naval Reserve public relations officers on one-day cruise aboard training carrier, *USS Cabot*, during sixth volunteer public relations seminar by Navy Office of Information, in Pensacola-Key West area April 13-26, represented stations in four states and Hawaii. They are (l to r): Lt. Cmdr. John E. Reilly, WMEX Boston; Lt. Cole J. Keyes, WGN-TV Chicago; Lt. William J. Willis Jr. and Lt Cmdr. Walter R. Bishop, public relations manager, both WRVA Richmond; Lt. Cmdr. C. J. Woodhouse, commercial manager, WDNC Durham, N.C.; Lt. Cmdr. John Tansey, WRVA, and Lt. E. F. Donnell, general manager, KGMB Honolulu.

VOA BUDGET FIGHT

To Resume This Week

RESTORATION of fund cuts in the Voice of America and other U. S. international information activities to the full budget request of $133 million will be sought by the State Dept. on Capitol Hill this week.

While no date had been set, it was understood that a Senate Appropriations subcommittee probably would hold hearings on the 1953 budget sometime this week. Chairman is Sen. Pat McCarran (D-Nev.).

Top officials of the International Information Administration—presumably Dr. Wilson Compton, administrator—and the State Dept.'s International Broadcasting Service—Foy Kohler, IBS chief, and George Herrick, facilities director—are expected to testify on the need for restoring monies cut by the House earlier this spring.

The lower chamber specified no actual operating figure for shortwave broadcast operations, but levied substantial cuts in the information program which would bear heavily on VOA's budget. It pared the program from $133 million to $85 million.

At stake, as State Dept. officials prepare to present their case, are expenditures for two overseas radio bases to be completed later this year and for two new transmitter-equipped ships.

The House knocked out $36.7 million for the seven station projects. A sum of $27 million voted by the House Appropriations Committee for radio broadcasting also would be cut substantially if the overall reduction is signed into law. VOA received $19.8 million in regular appropriations during the fiscal year ending June 30.

KGU 30TH BIRTHDAY

Plans for TV Soon

KGU HONOLULU celebrated its 30th birthday with an announcement by Lorrin P. Thurston, president and general manager of the Advertiser Publishing Co., licensee of the station and publisher of *The Honolulu Advertiser*, that KGU expects to install Hawaii's first television station.

Mr. Thurston said the new TV station is expected to be on the air, "if all goes well," by February 1953 in a broadcast observing the station's birthday. *The Advertiser's* May 11 issue carried a panorama of KGU's 30 years of service during which such greats as President Roosevelt, Amelia Earhart and Guglielmo Marconi have spoken into its microphone.

WEAS PROTESTS

Newspaper Log Omissions

NEW FUEL was added to the Atlanta newspaper-radio dispute last week as WEAS Decatur, Ga., reported it has protested to FCC the failure of the Atlanta *Journal* and *Constitution* to carry the program logs of seven of ten radio stations serving the area, including WEAS.

The E. D. Rivers Jr. station charges the action of the newspapers, which prior to their merger under Atlanta Newspapers Inc. had carried free listings of all radio and TV stations there, "directly results from" Mr. Rivers' protest of Atlanta Newspapers' sale of WSB-TV Atlanta (Channel 8, WLTV(TV) to Broadcasting Inc. [B•T, Aug. 27, 1951].

WEAS contends the papers now carry only the listings of WAGA (CBS), WGST (ABC), WSB (NBC), WSB-TV, WLTV (TV) and WAGA-TV, all Atlanta, while omitting the logs of WEAS and WGLS Decatur, WTJH East Point and WERD, WBGE, WQXI and WATL, all Atlanta. WEAS asserts further that the papers carry news items concerning programs on only the three radio stations whose program logs are carried.

WEAS, stating "hundreds of complaints" have been received from listeners respecting omission of the WEAS program log in the two papers, informed FCC it was unsuccessful on three occasions in efforts to have its log restored to listing. WEAS asks FCC to take "such action as is necessary to bring about a change in the policy of Atlanta Newspapers Inc."

Queried by BROADCASTING • TELECASTING, J. Leonard Reinsch, managing director of the Cox stations, and a director of Atlanta Newspapers, Inc., said:

"It is unfortunate at a time when the Commission is overworked, that there should be filed a letter containing information so careless in fact."

SWITCH to 45 rpm. system of recorded music effective June 4 has been announced at WNEW New York. Heavy spot campaign will precede conversion, according to station reports.

THE BARNES SURVEY **sells** **THE DIFFICULT CLIENT**

■ Now there is an answer for the client who asks "WHO listens?" One high priced merchandise client using the Barnes survey showed that his radio program was reaching 64% of all of his potential customers! Yet his over all rating was low.

■ YOU MAKE THE SURVEY YOURSELF. The local retailer has trust in you and in many cases has never heard of national survey organizations. We analyze your results and send you a certificate properly notarized.

■ The BARNES SURVEY kit includes complete instructions, sample letters for the mail portion of the survey, sample telephone conversations for the telephone portion, analysis sheets and recommendations for increasing audiences.

■ Recommended for discriminating clients and stations who want to improve their business.

■ Immediate shipment on receipt of check or money order. $25.00 for cities under 125,000 population. $37.50 for cities over 125,000 population.

EQUAL TIME RULE

Non-Comm. FM Reminded

NON-COMMERCIAL, educational FM stations must treat political candidates in the same manner commercial broadcast stations are required to, according to an FCC report and order a fortnight ago. The order amended the FM rules to include a new section providing that if any non-commercial, educational FM station permits a legally qualified candidate to use its facility, it must provide the same and equivalent time to all other legally qualified candidates and may not censor their scripts.

Order was originally proposed in 1950 when it was discovered that this provision had been omitted from the FCC's non-commercial, educational FM rules. Later that year, Westinghouse Radio Stations Inc. petitioned the Commission to enlarge the provision to include supporters of candidates as well as candidates themselves. This followed a ruling by the U. S. District Court stating that Sec. 315 of the Communications Act (which deals with political broadcasts) also included supporters. This view was reversed by the U. S. Court of Appeals, which held that Sec. 315 applied to candidates only and not to supporters. Since the courts decided that supporters are not covered under Sec. 315, the Commission dismissed the Westinghouse petition.

'COURIER' SHAKEDOWN CRUISE

Ship Called a Valuable VOA Weapon

SHAKEDOWN cruise of the State Dept.'s floating transmitter has proved the "vagabond" *Courier* to be the "most versatile and one of the most effective weapons thus far developed to promote the "Campaign of Truth."

This is the conviction expressed in a preliminary report of an 18-day test in the Panama Canal Zone circulated in the State Dept. last week. The ship is now at Hoboken, N. J., preparatory to start of actual operation.

"The tests . . . establish beyond any question of doubt the practicality of the project. . . . They reveal that the *Courier* is a technically perfected broadcasting vehicle for bringing to the front door of any target area, the full strength of our message," the report states.

During the 18-day trial run, three transmitters were used to broadcast programs daily for six hours continuously. Prior to reaching the Canal Zone, the Coast Guard ship visited Venezuela, Colombia and Panama City. Later it stopped in Vera Cruz, Mexico.

To avoid interference with other stations, the ship operated its mediumwave transmitter at one-third of its 150 kw power, fanning out 800 miles from the zone, with satisfactory results. Shortwave transmission with two 35 kw transmitters "was generally satisfactory throughout the entire target area," it was reported. VOA shared the 1510 kc frequency with WLAC Nashville during part of the tests.

While signals were aimed at Latin American countries, monitors reported signals in New York, London, Tangier, Munich, Spain, Scotland, Sweden and New Zealand.

Purpose of the Latin American trial was to combat Soviet propaganda and to win allies among the Carribean audience. The State Dept. reported that it has received hundreds of letters from various countries reporting on satisfactory reception of transmissions.

"In addition to providing satisfactory coverage for its mission, the transmissions of the *Courier* have provided valuable radio propagation data not previously available," the report said.

Congress has withheld consent from funds to build other seagoing transmitters, pending results of the vessel's first venture on the high seas.

RADIO-TV SESSION

To Convene at Stanford

TENTH summer session of the Stanford Radio-TV Institute will begin June 19 in cooperation with KNBC and KPIX (TV) San Francisco, according to an announcement made by Prof. Stanley T. Doner, director of the institute. Staff members from the two stations will serve as instructors in addition to regular Stanford faculty members from the speech and drama department.

Instructors from KNBC include: Lloyd E. Yoder, general manager; George Greaves, assistant general manager and program director; John H. Thompson, manager of news and public affairs, and Walter Tolleson, assistant sales manager for NBC Western Div. KPIX staff personnel who will participate are Philip G. Lasky, vice president-general manager; Richard C. D. Bell, assistant to the president, and George Mathieson, production manager.

Courses will be offered in all phases of radio and television. A TV workshop is included in the curriculum. Program from the workshop will be telecast by KPIX.

Enrollment in the institute, scheduled to run eight weeks, is limited to 75 students. Anyone who has completed two years of college work or its equivalent may apply. Classes will meet alternately in the San Francisco studios of KPIX and KNBC and on the university campus.

HISTORY of development of radio and particularly growth of WORC Worcester, Mass., will be recorded in murals being painted by Ben Blake for station's new studios.

WSYR's Local Radio Sales UP 39%

For the period ending April 30, WSYR's local radio sales were 39% ahead of 1951. The local advertisers responsible for this increase are the ones in the best position to test the effectiveness of all media. They know which advertising keeps the cash register ringing.

DON WAYNE, production manager, WHIO-TV Dayton, promoted to director of news and special events.

JOHN DENMAN, WJR Detroit newscaster, resigns to direct public relations for Rep. Charles E. Potter's (R-Mich.) campaign for U. S. Senate.

ACTOR TAX AID

Average Wage Basis Urged

REVISION of income tax laws so that talent may average earnings over a period of years will be proposed to Congress by a special Hollywood committee of attorneys and tax experts.

Headed by Jerry Geisler, president Beverly Hills Bar Assn., committee has named Gabriel Hoffenberg, movie tax expert as chairman. Other members include Lon A. Brooks, past president Beverly Hills Bar Assn.; Ann Rosenthal, counsel for William Morris Agency; Meyer M. Willner, counsel for Friars Club.

Mr. Hoffenberg pointed out that an actor may earn $30,000 one year and only $3,000 the next. Under present laws he keeps very little of that money, whereas if allowed to average income over both years, he would retain more.

Proposed revision will be placed before Congress when it reconvenes next January.

N.Y. AWRT ELECTS

MacDonald Named President

NEW officers of New York Chapter, American Women in Radio & Television, elected Monday at chapter's annual dinner meeting in New York's Hotel Warwick, include:

Duncan MacDonald, women's director of DuMont TV Network, president; Dorothy Kemble, MBS, first vice president; Barbara Welles, WOR New York commentator, second vice president; Helen Whyte, British Information Services, secretary, and Alma Graef, MBS, treasurer.

PRODUCTION GROUP

ODM Forms on Equipment

ADVISORY Committee on Production Equipment has been formed within the Office of Defense Mobilization, Dr. John R. Steelman, acting Defense Chief, announced May 16. The group was set up on recommendation of President Truman to review federal policy and make concrete suggestions for improvement to Dr. Steelman.

Heading the committee is Harold Vance, board chairman and president of Studebaker Corp. Other members include Clay Bedford, president of Chase Aircraft; Manly Fleischmann, current Defense Poduction Administrator, who resigns June 1; and Gen. K. B. Wolfe, former chief of Air Force procurement. Purpose of group is to weigh availability of production equipment to meet defense needs, and maintenance of capacity to produce mobilization and standby equipment.

WINS on Conventions

WINS New York, station of the Crosley Broadcasting Corp., will furnish direct coverage of both Republican and Democratic national conventions in Chicago this July, according to Harry C. Folts, general manager, who said Thursday the station thus becomes the only independent in New York—and one of the few in the country—to carry on-scene broadcasts. The station plans three hours of direct coverage per day, to be scheduled when convention agendas are announced.

JAMES BORMANN (c), news and public affairs director, WCCO Minneapolis, receives the Minneapolis Junior Chamber of Commerce award "for distinguished public and community service" from Jack Dodd (l), chamber president, and Jim Mickelson (r), public relations committee chairman of the civic group.

UN WEEK

Early Promotion Started

HELP of radio and television as well as of other advertising media was sought by the American Assn. for the United Nations in New York Wednesday for a promotion campaign for United Nations Week this fall.

The celebration, keyed to opening sessions of the General Assembly, will be held in late October with one day of the week designated as United Nations Day, Executive Director Clark M. Eichelberger explained. Media representatives at the Wednesday luncheon endorsed early planning.

IIA REALIGNS

Radio, Press Affected

REALIGNMENT of the structure of the government's International Information Administration, headed by Dr. Wilson Compton, was under way in the State Dept. last week. The reorganization involves sections of IIA's International Broadcasting Service, under which the Voice of America operates, and divisions of IIA relating to the various overseas media.

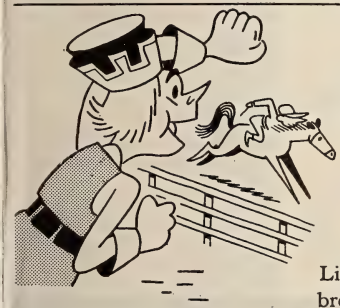
Replacement is being sought for the post of IBS chief now being held by Foy D. Kohler, who is destined for an overseas diplomatic field post sometime this summer. The plan is to bring a prominent broadcast industry official to the position, with responsibility for implementing policy on shortwave broadcasting operations.

Internal realignment calls for a split in functions now under George Herrick, IBS facilities chief. Mr. Herrick will concentrate on research, development and building. James Thompson, formerly associate chief, now heads up the Facilities Operation Division.

Inherent in the reorganization is the objective to place more emphasis on regional and local radio programming in the field.

The State Dept. also is reorganizing its media divisions under IIA. Joseph Sitrick, special assistant to Dr. Compton on press and public relations, shifts over to its International Press & Publications Service as assistant administrator to Charles Arnot, division chief. He will handle press and public relations and work with the State Dept.'s press advisory committee under Ben Hibbs, member of the U. S. Advisory Commission on Information. No successor has been chosen for Mr. Sitrick.

BINAURAL



Featured at Parts Show

THE FIRST binaural or "two-eared" transmission of music on a commercial station took place in Chicago Thursday night as WGN-AM and WGNB (FM) broadcast a 55-minute show.

In cooperation with the Jensen Mfg. Co., Magnecord Inc. and Radio Craftsmen, the stations demonstrated three - dimension sound, which gives depth to music. The stations picked up the program live through two microphones, one feeding the AM circuit and the other using the FM band simultaneously.

The audience at home, in order to get the binaural effect, needed one AM set and one FM set in opposite corners of the room. The transmission thus gave them the binaural or two-eared effect, with each ear getting an impression.

Demonstration, seen by 350 persons in the Conrad Hilton Hotel, was a feature of the annual Radio Parts Show and the Audio Fair, the former taking place Monday through Thursday and the latter Friday and Saturday.

DON DAVIS, Jaffe Agency, N. Y., transfers to Beverly Hills office as head of TV department. He succeeds **PAUL RADIN**, former vice-president in charge of radio-TV, who assumes similar duties with Ted Ashley Assoc. (talent agency-program packagers), in newly opened West Coast office. that city.

WILLIAM M. LINZ appointed sales representative for Ward Products Corp., headquartered in Chicago.

NEWELL CORWIN, general foreman of tube works, General Electric Co., Schenectady, to company's Scranton, Pa., plant in similar capacity.

PHILIP BEACH, advertising director, Hoffman Radio Corp., L. A., has resigned.

CHARLES CASTLE named sales manager of Distributor Div., Webster-Chicago Corp., Chicago.

CHARLES DWYER, service manager, succeeds Mr. Castle as assistant sales manager of division.

MAX LERNER, formerly with ABC legal staff, to Sesac Inc., N. Y., as house counsel.

THOMAS F. JOYCE, partner in Raymond Rosen & Co., elected president of that household speciality appliance firm as well as president of Philadelphia Appliance Service Corp. **L. P. CLARK**, vice president of Raymond Rosen Engineering Products Inc., elected president.

Mr. Joyce

EDWARD R. TAYLOR, Hotpoint Inc., to Motorola Inc., as assistant to **PAUL V. GALVIN**, president. He will coordinate sales and merchandising activities of radio-TV division.

RCA TUBE DEPT., Camden, N. J., announces availability of two new tubes: forced-air-cooled "I KW" power tetrode (RCA-6181) for UHF TV transmitters and miniature oscillator triode (RCA-6AF4) for station selectors in UHF home TV receivers.

MINNESOTA MINING & MFG. Co., St. Paul, announces production of 7 inch plastic reel termed No. 111-AP for professional magnetic recording which reduces or eliminates errors in program timing.

DAVEN Co., Newark, N. J., announces availability of transmission measuring set, type 10B, providing greater accuracy in measurement of transmission characteristics of audio systems and their components. Unit is direct reading instrument that eliminates intricate calculations.

GENERAL CONTROL Co., Boston, announces development of Promatic electronic timer capable of controlling timed operations between 60 milliseconds and 60 seconds.

SOUND SERVICES Inc., Hollywood, introducing new dual magnetic channel which records sound continuously for any length of time, as each machine overlaps other. Unit operates on AC or DC.

E. F. JOHNSON Co., Waseca, Minn., announces production of new line of nylon insulated tip jacks with breakdown rating of 11,000 volts. Nominal capacity to ⅛" panel is 2.0 mmf. Silver plated contracts, either phosphor bronze or beryllium copper, are supplied.

COMPUTER RESEARCH Corp., Hawthorne, Calif., announces development of new model MC, 100 kc Ferro-Resonant Flip Flop as replacement for vacuum tube in certain counting, amplifying and control applications. Unit features durability, economy of power, low heat dissipation of saturable reactor, greater production uniformity and lower input power.

RADIO CITY PRODUCTS Co., N. Y., announces manufacture of radio-TV tube tester and V. T. voltmeter Model 808, combination unit containing all features of Model 323 dynoptimum free point tube tester plus a cathode ray tube tester, reactivator, vacuum tube voltmeter and ohmmeter.

NBC Spot Sales in 11 Southern States:

BOMAR LOWRANCE & ASSOCIATES, INC.
Charlotte, N. C. & Atlanta, Ga.

In recognition of the South's growing importance as the home of leading national advertisers and their advertising agencies, NBC Spot Sales is pleased to announce the appointment of Bomar Lowrance & Associates as its southern representatives.

Now the 15 major market radio and television stations represented by NBC Spot Sales can give advertisers and agency clients down in Dixie even more effective service than they have enjoyed in the past.

Bomar Lowrance, formerly Commercial Manager of WSOC in Charlotte, and his associate, Freeman R. Jones will provide top flight, close-to-home representation for NBC Spot Sales in the states of Virginia, North and South Carolina, Tennessee, Kentucky, Georgia, Florida, Alabama, Mississippi, Louisiana, and Texas. Mr. Lowrance is located at Charlotte, N. C. and Freeman Jones heads their Atlanta office. Messrs. Lowrance and Jones will have at their fingertips the same wealth of market, station, program, rating, and availability information for which America's foremost advertisers and agencies have learned to depend upon NBC Spot Sales.

For the fastest and most dependable information . . . for the most intelligent and resourceful recommendations as to how Spot Radio and Spot TV can sell for you in the nation's major markets, call, write, or wire . . . *your NBC Spot Sales representative in the South:*

THE "FIFTH ALARM"

The early morning call was from Lebanon, Pennsylvania. And, the voice on the phone said, "It's a four alarmer . . ." That was enough for the WGAL-TV newsroom where the **"Fifth Alarm"** was sounded. Reporters were alerted for on-the-scene coverage. A camera crew took off by airplane in order to furnish the kind of news coverage which WGAL-TV viewers have come to expect. The "four alarmer" proved to be the biggest fire in the history of the City of Lebanon. At nightfall, when it was brought under control, the fire had gutted a block-long area in the center of the city. Finis was written to the story when the Mayor of Lebanon appeared before WGAL-TV's cameras to report fully on the disaster.

TV PRIORITY LIST

Sixth Report Conflict Mounts

AS CONFLICT continued to mount last week over the FCC's Sixth Report and Order lifting the 3½ year old TV freeze, the Commission made known to new station aspirants their prospective positions on the "temporary" processing lines set forth in the final allocation report [B•T, April 14, et seq.].

FCC on Thursday issued its lists of cities grouped in accordance with the priorities of the temporary processing procedure (see listings, this page). The separate city lists correspond to the application priority groupings (i.e., Group A-2—Bids for new TV stations on channels in cities 40 or more miles from existing stations; Group B-1—Bids for new outlets in cities less than 40 miles from an existing station and to which only UHF channels are assigned).

In effect, the listings mean that first attention will be given applications for cities with the greatest population and/or having the least available existing service. UHF is favored over VHF.

Other Considerations

First attention in processing, however, doesn't mean first grants, observers were quick to point out after the lists were issued. Competitive hearings, particularly for VHF channels, will plague most major markets for a long time, they reminded, also noting additional delays that will ensue as unsuccessful applicants appeal their cases in the courts.

(Hopes for additional hearing examiner teams to handle the workload were expressed on Capitol Hill last week. See story, page 88.)

Controversy over the Sixth Report took form in these developments last week:

● Comr. Robert F. Jones, who dissented sharply from the majority opinion responsible for the Sixth Report's adoption, extended his verbal dissent on two more fronts: On Tuesday, before the Pittsburgh Radio and Television Club and Ad Club, and on Thursday, in Washington, before a luncheon meeting of the Federal Communications Bar Assn.

● WHPE High Point, N. C., petitioned FCC to revise its final report to delete VHF Channel 6 from Beckley, W. Va., and assign it to High Point. WHPE contends High Point merits the same consideration of greater economic importance and population as FCC employed to remove VHF Channel 3 from Blytheville, Ark., to Memphis.

● Westinghouse Radio Stations Inc. was reported planning to file this week a petition contesting the soundness of the temporary processing procedure and challenging the UHF "priority" philosophy.

● Several other sources indicated protests of specific city allocations in the Sixth Report are in preparation, with petitions for reconsideration of the Lafayette, La., and Braddock, Pa., allocations expected this week.

Comr. Jones on Tuesday translated his dissent to the Sixth Report into the dialect of Pittsburgh, a one-station city now assigned VHF Channels 2, 11 and 13 and UHF Channels 16, 47 and 53. Channel 13 is reserved for noncommercial, educational use. WDTV (TV) there, now on Channel 3, must switch to Channel 2 under provisions of Sixth Report.

Dissenter Jones told his Pittsburgh audience, meeting at the Hotel William Penn, that with good luck their city may have a second TV outlet in about five years. He contended Pittsburgh was "sold down the river" in the final allocation. To "recoup" the loss, local civic resources will have to "marshal their combined forces," he indicated.

Explaining that in FCC's processing list of 1,272 cities Pittsburgh ranks 1,237th, Comr. Jones said every city in Pennsylvania would be processed before Pittsburgh according to the temporary processing procedure and the priority system on which the city listings are made. He predicted long delays as well because of competitive hearings and court appeals.

Comr. Jones observed that should Washington, Pa., receive a grant first, the effect would be to put Pittsburgh into 1,267th place on the list, moving it back from its present position in the Group B-4 cities (single existing station) into Group B-5 (two available services).

Charging "arbitrary action" on the part of the Commission by refusing to grant VHF Channel 4 to Pittsburgh. Comr. Jones contended no Grade A service interference would occur between Channel 4 at Pittsburgh (using 1,000 ft. antenna and 56 kw instead of 100 kw max-

(Continued on page 86)

List of City Priorities Under Temporary Processing Procedure

THE FOLLOWING appendices contain lists of the cities appearing in the table of channel assignments of FCC's Sixth Report, arranged in the order in which applications for new TV stations will be processed under the temporary processing procedure adopted in the Sixth Report as footnote 10 to Sec. 1.371 of the Commission's rules [B•T, April 14].

This preliminary list shows the name of the city, the 1950 population as reported by the Bureau of the Census, the distance to the nearest operating television station, the number of TV services available (stations less than 40 miles away) and the number of local TV outlets where appropriate.

FCC explained the distance "40 or more miles from the nearest operating television station" was considered a reasonable figure for processing purposes "and is not to be construed as an engineering determination of the normal reception range" of TV stations. The distance figures shown in the lists were scaled from suitable maps, FCC explained, except that in cases where the scaled distances fell between 38 and 42 miles the actual distance was computed on that basis of geographic coordinates in accordance with Sec. 3.611 of the rules.

The Commission said every effort has been used to make the lists accurate but interested parties detecting errors "are invited" to bring them to the attention of the Chief of the Broadcast Bureau before July 1.

As soon after July 1 "as is practicable, the Commission will republish the lists of cities and indicate thereon those cities for which applications for new television stations have been received. This list will be revised and republished periodically in order that the general public and other interested parties may be kept informed of the progress of the respective processing lines."

FCC further noted that cities in the territories and U. S. possessions, as well as cities in the U. S. in which the single channel assignment is reserved for noncommercial educational use, are not included in the lists. Separate provisions for early processing of these applications are provided in the temporary processing procedure.

Similarly, those cities are excluded wherein all channels are assigned to existing stations and there are no additional channels available for authorization.

The temporary processing procedure composes four principal application groups with several subgroups. In order, they indicate processing priority. Groups are:

Group A-1—Applications of 30 operating stations required to change channels in the Sixth Report. They will be processed promptly after June 2, effective date of Subpart E of Part 3 of rules, but grants must wait until after July 1. This group is not in city lists below.

Group A-2—Applications for new stations in cities 40 or more miles from any existing station. This is first city list below.

Group B-1—Bids for new stations in cities less than 40 miles from existing station and to which only UHF channels are assigned.

Group B-2—Bids for cities in which one or more stations are operating, all VHF channels have been authorized (except educational) and only UHF channels are available.

Group B-3—Bids for cities having no operating stations and located less than 40 miles from not more than one operating station.

Group B-4—Bids for cities with only one operating station and located 40 or more miles from any other station.

Group B-5—Bids for cities less than 40 miles from two or more operating stations.

Group C (Not in city list)—(1) Bids to modify permits granted on and after July 1. (2) Petitions for reconsideration of actions on Group A-2 and Group B applications. (3) Petitions for waiver of hearings on such applications.

Group D (Not in city list)—Applications for changes in existing facilities, licenses and requests for special temporary authority.

Group A-2 bids and Group B applications will be processed concurrently, FCC explained, with priorities within each group governing. Group C bids will be processed after July 1 in order received. No action is expected on

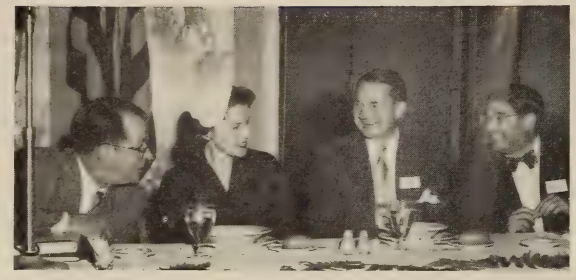
BMI TV CLINICS

Dissect All Phases of Local Operation

JUST about all phases of local television production—from building a studio to filming home news—were examined for some 146 broadcasters who attended the Broadcast Music Inc. TV clinic held in New York Monday and Tuesday.

The same general format was followed at the BMI clinic held last Thursday and Friday in Chicago, with many of the principal speakers participating in both sessions.

The two-day meeting in New York's Waldorf-Astoria Hotel, got down to local problems Monday morning when Robert D. Swezey, executive vice president of WDSU-TV New Orleans, heavily emphasized local programming in his talk, "Every Town a Show Town, U.S.A.—Yeah?"



Noting that even if talent and materials for network-quality programs were available in every community, Mr. Swezey said that the average TV outlet nevertheless does not have the facilities for "big time" production; his station, he said, has thus stressed local programming as a supplement to network and film production and has never attempted to compete with network fare.

To provide shows at the local level successfully, he advised doing "the natural thing" while keeping an eye on limiting expenses. Don't go overboard on expenses, he advised; it's soundness that counts, not elaborateness. Reminding his audience that talent wears out faster in television than in radio, he urged that production talent needed encouragement, too, to avoid staleness or laziness.

The most necessary requirement for good operation, in terms of physical facilities, is lateral space, according to Charles F. Holden, assistant national director of television for ABC, who also spoke Monday. "Get everything on one level," he advised. "In some instances, lack of space in itself can keep production budgets low: A [small] studio . . . automatically rules out the possibility of big, costly productions." He endorsed buying standard equipment and, in building a studio, choosing an outlying site where taxes will remain low.

Bennett Larsen, vice president and general manager of WPIX (TV) New York, spoke of the variant costs of film throughout the country and the different interests of people in their choice of films. He endorsed the current practice among advertisers of buying their own properties and reselling them to television.

First speaker Monday afternoon, after a luncheon presided over by BMI President Carl Haverlin, was Roger Clipp, manager of WFIL-TV Philadelphia, who spoke on newsreel operation. Through the actuality of sight and sound, television news eliminates the middleman—the reporter or professional observer—and provides immediate public information, he said. With advance knowledge of where and when news is happening, television out-performs all other means of communication in bringing news to the public, he added. For local film coverage, he suggested the services of a commercial photographer as "by all odds more practical" than maintaining a newsreel unit.

ON DAIS at BMI TV Clinic in New York are (l to r) Carl Haverlin, BMI president; Blanche Ravisse, WPIX (TV) New York; Theodore C. Streibert, WOR-AM-FM-TV New York president; Sydney M. Kaye, BMI vice chairman.

* * *

Television must wake up immediately and make lots of noise regarding promotion of programs, even if that means employing competitive media, Ted Cott, vice president of WNBT (TV) New York, said in his speech, "You May Be Seen—You've Got To Be Heard." His own station promoted its programs, he said, by telling viewers what its immediate schedule was and then reaching for non-viewers through billboards, magazines, newspapers, and park public address systems.

Speaking on low-cost music and participation shows versus film, Ralph L. Burgin, program director of WNBW (TV) Washington, said that there are many hours in the broadcast day when low-cost, high-profit programs—for community service, religious groups, or educational organizations—could be scheduled. Answers to low-cost programming uncovered in WNBW's experiments indicate, he said, that the ideal program should "be specialized in character but broad in appeal." The program should be a strip, if at all possible, he advised, suggesting that "in television as in the grocery store, they're 'cheaper by the dozen.'"

Opening speaker at Tuesday morning's session was Joel Chaseman, director of public service and publicity, WAAM (TV) Baltimore, who explained that his station has sought public service programming guidance from a permanent council of responsible citizens, to be consulted individually or collectively. "I cannot overstate the value of such a group—in prestige, in good will, in downright practical programming suggestions, as a barometer of the community, and as an access to important groups in the city," Mr. Chaseman said.

He also suggested that, in doing public service, station managers make sure everybody possible knows about it. His station has invited studio audiences, conducted studio tours, produced special shows, scheduled thousands of free announcements, and occasionally furnished slides, artwork, studio facilities and talent to outside groups.

"The first factor in low-cost programming," A. Donovan Faust, assistant general manager of WDTV (TV) Pittsburgh, said, "is that the station manager must plan his operation in light of the facilities available." Second factor is to determine the potential of prospective sponsors. The result will be that the manager knows immediately whether to sell his program in across-the-board strips, as a complete single show, as units in a segmatized show or on a participating basis.

The most important single factor, however, is a good budget, one which allows enough money to permit doing the job well, but one that is administered by all department heads and carried through to each individual program. Consistent earners among his station's low-cost programs have turned out to be women's shopping shows, kitchen programs and audience participation shows.

Philip G. Lasky, general manager of KPIX (TV) San Francisco, spoke on plant planning and remodeling and suggested that plans for building a TV station should be made "right in your own house—by television people themselves." After top management decisions

(Continued on page 84)

BIGGER AD BUDGETS FINANCE TV

Reports Magazine Advertising Bureau Analysis

WHERE'S the money coming from to finance expanded television network advertising?

According to the Magazine Advertising Bureau, part of the money comes from a diversion of funds formerly appropriated to other media, but more of it comes from enlarged advertising budgets.

The Bureau last week released an analysis of spending in various media by 183 advertiser who spent $25,000 or more each in network television during the last six months of 1951. Their spending in network television increased 194.9% in that period as compared with the last six months of 1950. But their investments in network radio were off 5.2% and in Sunday newspaper supplements off 25.2%. Their magazine expenditures rose slightly— .5%. No other media expenditures were reported in the study.

Here's the way the expenditures of these 183 advertisers broke down:

	Last 6 Mos. 1951	Last 6 Mos. 1950	Per Cent Change
Network TV	$72,265,510	$24,505,831	+194.9
Network Radio	65,748,022	69,367,391	— 5.2
Magazines	86,694,657	86,300,692	+ 0.5
Sunday Newspaper Supplements	15,019,564	20,083,096	— 25.2
Total	$239,727,753	$200,257,010	+ 19.7

Put another way—in terms of the number of TV network advertisers increasing or decreasing their spending in the other three media—the results were about the same.

Here's the way the 183 network television advertisers appropriated money to magazines, network radio and Sunday supplements in the last half of 1951 as compared with the last half of 1950:

	Total Users of Media	Increases (Per Cent)	Decreases (Per Cent)
Magazines	162	90 or 55.6	72 or 44.4
Network Radio	91	39 or 42.9	52 or 57.1
Sunday Supplements	117	47 or 40.2	70 or 59.8

The Magazine Advertising Bureau also analyzed the arrivals and departures in network television sponsorship. In January and February, 1951, there were 131 advertisers spending at least $20,000 in network TV. Of these 33 were missing from the TV network sponsor lists in January and February, 1952, but 54 others had entered network TV in the meantime, meaning a net gain of 21 TV network sponsors spending $20,000 or more in these two months of 1952, compared with this same period of 1951.

What happened to the 33 who left network television is not explained by the MAB, although presumably at least some turned to spot TV.

Downing, M.D.** (4%), 3% owner of KRHD.

PETERSBURG, Va.—Southside Virginia Bcstg. Corp., Ch. 8 (180-186 mc), ERP 27.8 kw visual; antenna height above average terrain 399 ft., above ground 457 ft. Estimated construction cost $248,283, first year operating cost $200,000, revenue $175,000. Studio location 112 W. Tabb St., Petersburg. Transmitter location four miles North of Petersburg on U. S. Hwy. #1, 37° 17′ 43″ N. Lat., 77° 24′ 46″ W. Long. Studio equipment DuMont, transmitter DuMont, antenna RCA. Legal counsel Cohn & Marks, Washington. Consulting engineer Craven, Lohnes & Culver, Washington. Applicant is licensee of WSSV Petersburg, Va. Principal stockholder is President **Louis H. Peterson** (95%), owner of WNOR Norfolk, Va., and owner of Peterson Adv. Agency (outdoor advertising), Petersburg. (**Mary Peterson,** his wife, owns remaining 5% of WSSV.)

VIDEO CHANNELS

Four Applications Filed

NUMBER of new and amended television station applications filed with the FCC since April 14 was raised to 23 last week with total of four more requests for stations tendered.

WFMJ-AM-FM Youngstown, Ohio, which had filed an amended application seeking UHF Channel 33 [B•T, May 19], filed a modification to its request. It decided to ask for UHF Channel 73, instead, and filed new engineering data with the Commission. Chief Engineer Frank A. Dieringer said the decision to change channels was made to permit the use of a proposed site on Mabel Street in Youngstown. The station will cost nearly a million dollars, will have a 1,000 ft. antenna and an ERP of 201 kw visual.

Other applications came from West Palm Beach, Fla., Atlantic City, N. J., Lawton, Okla., and Petersburg, Va.

Southern Enterprises, Montgomery, Ala., headed by Dr. J. Randolph Penton Jr., physician, plans to amend its television application to request UHF Channel 20, it was announced last week. The company says coverage will be within a 25-mile radius with 115 kw ERP. Antenna height will be 480 ft. Woodley C. Campbell, Montgomery attorney and one of nine business and professional men associated with Dr. Penton, said there are three applications for the VHF channels in Montgomery. Since there is still another UHF channel, Mr. Campbell said the group expects to get a grant within a year—unless someone else decides to file for Channel 20. Cost of the station is estimated at $326,000.

PRO GRID GAMES

Atlantic, Miller Buy TV

ATLANTIC Refining Co., Philadelphia, which cancelled its schedule of college football broadcasts because of the NCAA ban [B•T, May 19], has joined with Miller Brewing Co., Milwaukee, to buy 1952 TV coverage of three National Professional Football League team schedules.

The contract calls for DuMont network telecasts of 52 league games involving the New York Giants, Philadelphia Eagles and Pittsburgh Steelers, plus full radio coverage by the same firms.

The schedule provides for telecasts of all 12 Giants games on seven network stations and six road games by the eighth, WABD (TV) New York, which with Newark, N. J., are to be blacked out for home contests. Six road games of the Eagles are to be carried by WFIL-TV Philadelphia, WDEL-TV Wilmington, Del. and WGAL-TV Lancaster, Pa. Steelers' six-game schedule is slated for WDTV (TV) Pittsburgh and WJAC-TV Johnstown, Pa.

Stations in Binghamton, Boston, Providence, New Haven, Schenectady, Syracuse and Utica will carry the entire Giants' slate and championship games under the "blackout" policy instituted by the league last fall.

Contract was signed in Philadelphia last week by representatives of the sponsors, their agencies, the three clubs and NPFL Comr. Bert Bell. Negotiations were handled for Atlantic by N. W. Ayer & Son, Philadelphia, and for Miller by Mathisson & Assoc. Inc., Milwaukee.

WREATH of vegetables was presented by Ted Bergmann (l), DuMont Television Network sales director, to Richard E. Jones, newly-appointed manager of DTN's key station, WABD (TV) New York. Occasion was the official separation of DTN's sales departments into local and network operations, with Mr. Jones heading the local division and Mr. Bergmann continuing as network sales chief [B•T, May 12.]

GIANTS' CLAIM

TV Cut Advance Sales 40%

LIVE telecasts were a "great influence" leading to a nearly 40% drop in advance reserved seat ticket sales for its home football games from 1946 through 1950, the New York Giants professional football club charged last Wednesday. It steered away, however, from any "complete indictment of television."

This claim was recited by John V. Mara, Giants president, in an answer to the government's anti-trust suit against the National Professional Football League and its member teams. It was filed in U. S. District Court at Philadelphia just prior to the May 21 deadline for replies to the suit.

The suit, filed by the Dept. of Justice, charges NPFL's action in limiting live telecasts of its games last fall violated the Sherman Anti-Trust Act. Federal Judge Allan K. Grim set a hearing for June 16.

Despite the government's complaint that the football "blackout" violates the law, three NPFL teams — including the Giants — completed television contracts under which all 1952 home games of each club would be blacked out in local areas (see adjoining story).

In his answer Mr. Mara explained that as the number of video receivers increased in the New York area from 1946 to 1950, the sale of reserved seats declined. In the first year, he said, there were 30,000 TV sets and advance seat sales reached 91.5% of all reserved seats. Other data: 1947, 87.5%; 1948, 86%; 1949, 73%, and 1950, 52.5%. Figures for 1951 were not made available.

The answer said in part:

We recognize that these figures in themselves do not necessarily constitute any complete indictment of television as the sole factor affecting the economics of our business.

However, it has to be recognized that television was more than a straw in the wind, and was a new and powerful . . . influence on attendance.

One of the biggest decisions that prospective telecasters must make is where to hang their TV broadcasting antennas. The selection of antenna sites is difficult enough if governed only by economic and technical considerations, but in recent weeks it has become additionally complicated by another factor. Aircraft interests, fearfully envisioning forests of high towers rising all over the country, intend to have a say in where towers are put. One solution to the problem is multiple operation from a single tower, like the Empire State Building TV complex in New York. Here's a detailed explanation of the planning and installation of the five-station Empire State tower, as told by the attorney who negotiated the whole arrangement. Mr. Ruddock is a partner in the law firm of Cadwalader, Wickersham & Taft, counsel for the Empire State Bldg. He also represented the five stations in their relations with RCA, which built the equipment, and B. Eichwald & Co., the electrical contractors.

ANTENNA LOCATION

—The Big Decision Facing Telecasters

By MALCOLM I. RUDDOCK

PROBLEM number one for every television station is to have as distant a horizon as possible.

Within the past year a dramatic change in the skyline of New York City has been brought about solely as an answer to that problem. A new 222-foot-tall multiple television tower has been erected on top of the Empire State Building, the world's tallest, and by last Dec. 14 five of the major TV stations, including all the network outlets, were broadcasting from it.

Five high-power transmitters were installed in the upper floors of the building, and power lines, de-icing equipment and more than 75 separate broadcasting screens were installed on the tower.

The compelling reasons that led these five New York stations to cooperate in establishing a joint tower location should exist in any city which has been allocated five or more TV stations by the FCC. In all such cities one of the stations has been reserved for non-commercial, educational television while the other four or more are for commercial use.

Joint Locations in Use

Until last April 14 the only cities in the country which had been allocated as many as five TV stations were New York with six and Los Angeles with seven. In each of these cities, significantly enough, there has already been joint exploitation and use of the highest and best transmitter location. In New York City the multiple TV tower was erected on the top of the Empire State Building, with a maximum height of 1,445 feet above the average terrain. In Los Angeles all seven stations have located antennas adjacent to each other on Mt. Wilson with a height above the average terrain varying from 2,345 feet to 3,100 feet.

In the new station allocations announced on April 14, a total of *50 cities* in the continental United States are allocated five or more TV stations. In the great majority of these cities, there is no convenient mountain, such as Mt. Wilson in Los Angeles, on which to erect separate small antenna poles or towers on a great natural elevation. Therefore, in most of these cities each of the five or more station antennas must be held high in the air on a man-made structure. In each case it is probable that an elevation of at least 1,000 feet above the average terrain will be desired. Shall five such towers be built in every city? If, as estimated by WTMJ-TV in Milwaukee, a 1,000 foot tower will cost $292,000 without antennas and equipment, the total cost of five antennas in one moderate sized city, each duplicating this basic expense, would intolerably burden the development of the best television service. Furthermore, in most cities there probably are not as many as five satisfactory locations.

(A list of cities to which five or more TV channels have been allocated begins at the right.)

In all of these cities, as stations are authorized and built, the competitive cycle which has about run its course in New York City and Los Angeles will come into play and will force each of these stations to struggle to have as high and as central an antenna location as any competitor.

This struggle will be greatly enhanced by the fact that the FCC in its April 14 report also removed the power limitation formerly associated with antenna heights in excess of 500 feet.

Under the new rules, full power is authorized with antennas up to 1,000 feet in height in the northeastern part of the United States (where population is denser and cities closer together) and up to 2,000 feet in the rest of the country. Consequently, an added incentive is given for taller antennas.

The Commission in its report also discussed recommendations it had received to make the use of common antenna sites mandatory. By "common antenna site," of course, is meant the multiple use of a single location as has been done in New York City. After reaffirming the existing Commission rule that a license will not be granted or renewed to any TV station which monopolizes or retains the exclusive use of a markedly superior antenna location, it states:

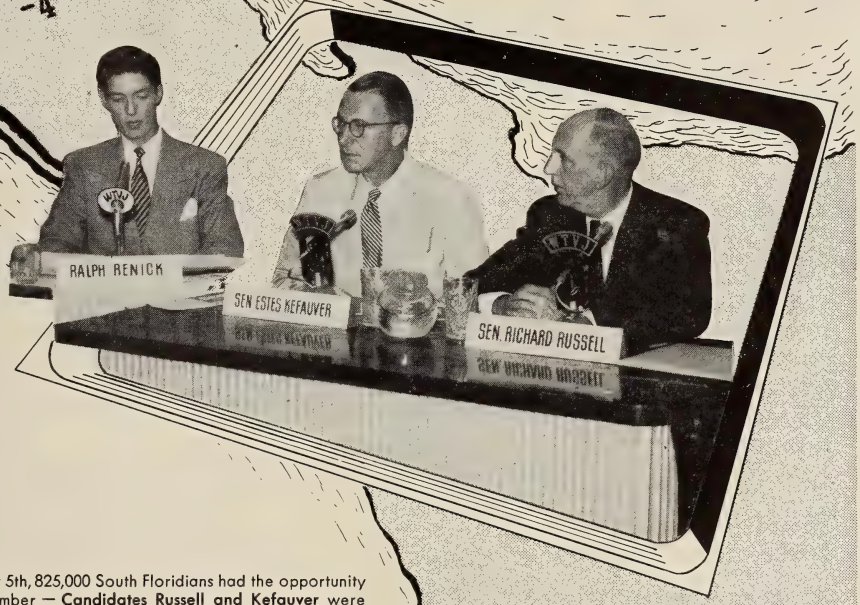
While we encourage licensees to use common antennas where possible, we believe that we should not impose such a requirement without further exploration of the problems which might arise from such a rule.

It would seem likely that in at least some other communities, telecasters will be considering multiple antenna operation. The experience of WABD (TV), WCBS-TV, WJZ-TV, WNBT (TV) and WPIX (TV) New York in this regard may be interesting to those considering similar undertakings.

The New York venture drama-

(Continued on page 101)

Following is a tabulation of 50 cities to which the FCC has allocated five or more TV channels. Existing stations and antenna heights are shown, and notations made as to the heights of taller existing buildings in cities having buildings more than 300 feet tall.



City	Present No. of TV Stations	Total allocated in April 14th Report	Heights of existing antennas above average terrain
Birmingham, Ala.	2	5	750 and 875 ft.
Note: Antennas located on Red Mt. and Red Top Mt.			
Little Rock, Ark.	None	5	None
Fresno, Calif.	None	5	None
Los Angeles	7	10	2,345 to 3,100 ft.
Note: All antennas located on Mt. Wilson			
Sacramento	None	5	None
San Diego	1	7	710 ft.
Note: Antenna located on Mt. Soledad			
San Francisco	3	10	540, 1,100, and 1,325 ft.
Note: Present antennas are located on Mt. Sutro, San Bruno Mt., and Mark Hopkins Hotel. The tallest buildings in the city are the Russ Bldg. (408 ft.) and the Shell Bldg. (380 ft.), but the hilly terrain of the city may completely negate any height advantage of a particular building in considering height above average terrain.			
Denver	None	7	None
Note: The tallest building is Daniels & Fisher Tower (330 ft.)			
Pueblo, Colo.	None	5	None
Washington, D. C.	4	6	330, 460, 515, 587 ft.

BMI TV Clinics

(Continued from page 80)

about size and location of studios—based on the station's program ambitions—the people who are working on the programs should be the ones to suggest plan requirements.

Lack of acceptance in the minds of the advertisers is the major obstacle that all broadcast media have today, Paul Adanti, vice president and general manager of WHEN (TV) Syracuse, observed. Whereas newspapers, magazines and billboards have advertiser acceptance, broadcast media are not generally regarded as "must-buy media" he said, indicating that the problem is long range and will have to be overcome gradually. Advertiser confidence will have to be built up, not only through the sponsor's own long-term experience in television, but also through the broadcaster's making certain that the vehicle and sales message used by that advertiser are the most effective possible.

Predicting that people will gain more knowledge of world events through television than ever before, A. A. Schechter, general executive of the NBC-TV network, urged his audience to "wake people up with TV." Basing his analysis of news programming on NBC-TV's two-hour *Today*, he explained that the morning program gives immediately what people in small communities, otherwise dependent on local papers only, sometimes wait hours for: first-hand world news.

Chairmen of the half-day sessions were Theodore C. Streibert, president of WOR-TV New York, Monday morning; Mr. Lasky, Monday afternoon; Mr. Swezey, Tuesday morning, and Craig Lawrence, general manager of WCBS-TV New York, substituting for Hubbell Robinson Jr., vice president of CBS-TV, Tuesday afternoon.

In the open forum following the close of the clinic, Gaines Kelley, WMFY-TV Greensboro, N. C., moved that a vote of thanks be given BMI for its sponsorship of the sessions which were arranged through the New York planning committee: Mr. Clipp, Mr. Larsen, Dick Pack of WNBT, Jerry Lyons, WABD (TV), Hal Hough of WJZ-TV, Mr. Holden and Dick Doan and Mr. Lawrence of WCBS-TV.

At Chicago Sessions

Those attending the Chicago clinic in the Palmer House were told how WTMJ-TV Milwaukee saved $96,000 last year because it wrote separate contracts for talent and production charges and for time costs. Walter Damm, vice president in charge of radio for the Journal Co. and general manager of WTMJ-AM-TV, gave this report.

All TV costs he said, citing BMI, ASCAP and film fees, are predicated on time charges, and these additional costs for such services will go up if the basic time charge includes allowance for such extras as rehearsal, talent, music fees, cameras and the like. A more honest basis is for time to be separated from any other charges in the basic rate, he said. Mr. Damm also recommended to future TV managers that they eliminate local rates, charging only spot and network. WTMJ-TV charges $800 per hour on a spot basis, $1,150 for the network.

Mr. Damm has also eliminated the discount structure used in radio saying "you don't have to do it in TV." The differential between spot and network, with higher rates for the latter, establishes the principle that the advertiser is paying for coaxial charges, he said.

Other recommendations: Stay away from downtown congested areas; split your radio and TV sales forces; operate TV on one floor; allow as much storage space as studio room; build high doors and use dollies; own your own shows and use regular staff members, and slot participations into local shows.

Also appearing at the first of the two-day session was Mr. Swezey, who again spoke on "Every Town a Showtown, USA—Yeah?" [see New York report page 80].

More than 120 station executives from the Midwest attended the Thursday and Friday meetings. The Thursday session was opened by BMI President Haverlin, who introduced the chairman of the clinic, Mr. Clipp.

Morning speakers were George Heinemann, program manager, WNBQ (TV) Chicago on, "Art, Scenic Effects and Camera Techniques," and Mr. Lasky, along with Mr. Swezey.

The afternoon schedule featured the chairman, Frank Fogarty, general manager, WOW-TV Omaha, and Mr. Damm, along with Mr. Holden and Mr. Clipp.

Friday agenda included Jules Herbuveaux, director of TV operations, NBC Chicago, as chairman of the morning session, and Mr. Lasky for the afternoon. Speakers were Bruce Wallace, manager, public service broadcasts, WTMJ-AM-TV, "Public Service Programming"; Walter Preston, WBKB (TV) Chicago, "Programming for TV as a Sales Medium"; Jay Faraghan, WGN-TV Chicago, "Film Buying—Film Costs and Problems of Film Operations"; Mr. Lund, and Walt Emerson, ABC Chicago attorney, "Music Clearance and Copyrights."

A clinic opens today (Monday) in Los Angeles.

Poppy Drive Films

TELEVISION Screen Productions, New York, has completed two film spots—20 seconds and 30 seconds—for the American Legion Auxiliary poppy campaign. Films have been sent to all TV stations for showing during the campaign which begins shortly and runs until Labor Day.

'Sooner' Walker

FCC Chairman Paul A. Walker's reference at the NARTB convention in Chicago April 2 [B•T, April 7] to the then-impending TV allocation freeze lift as similar to the Oklahoma Cherokee Strip land rush in 1889 has brought him honorary membership in the Oklahoma Broadcasters Assn. OBA President Allan Page, in a letter last week to Comr. Walker, said in part: "Your remarks . . . were first-hand evidence that you are one of our best boosters for the great state of Oklahoma. . . . The board feels that your loyalty to Oklahoma entitles you to an honorary membership in our association (for which) you are charged with . . . continuing . . . the policy of promoting the traditions and opportunity of the State of Oklahoma."

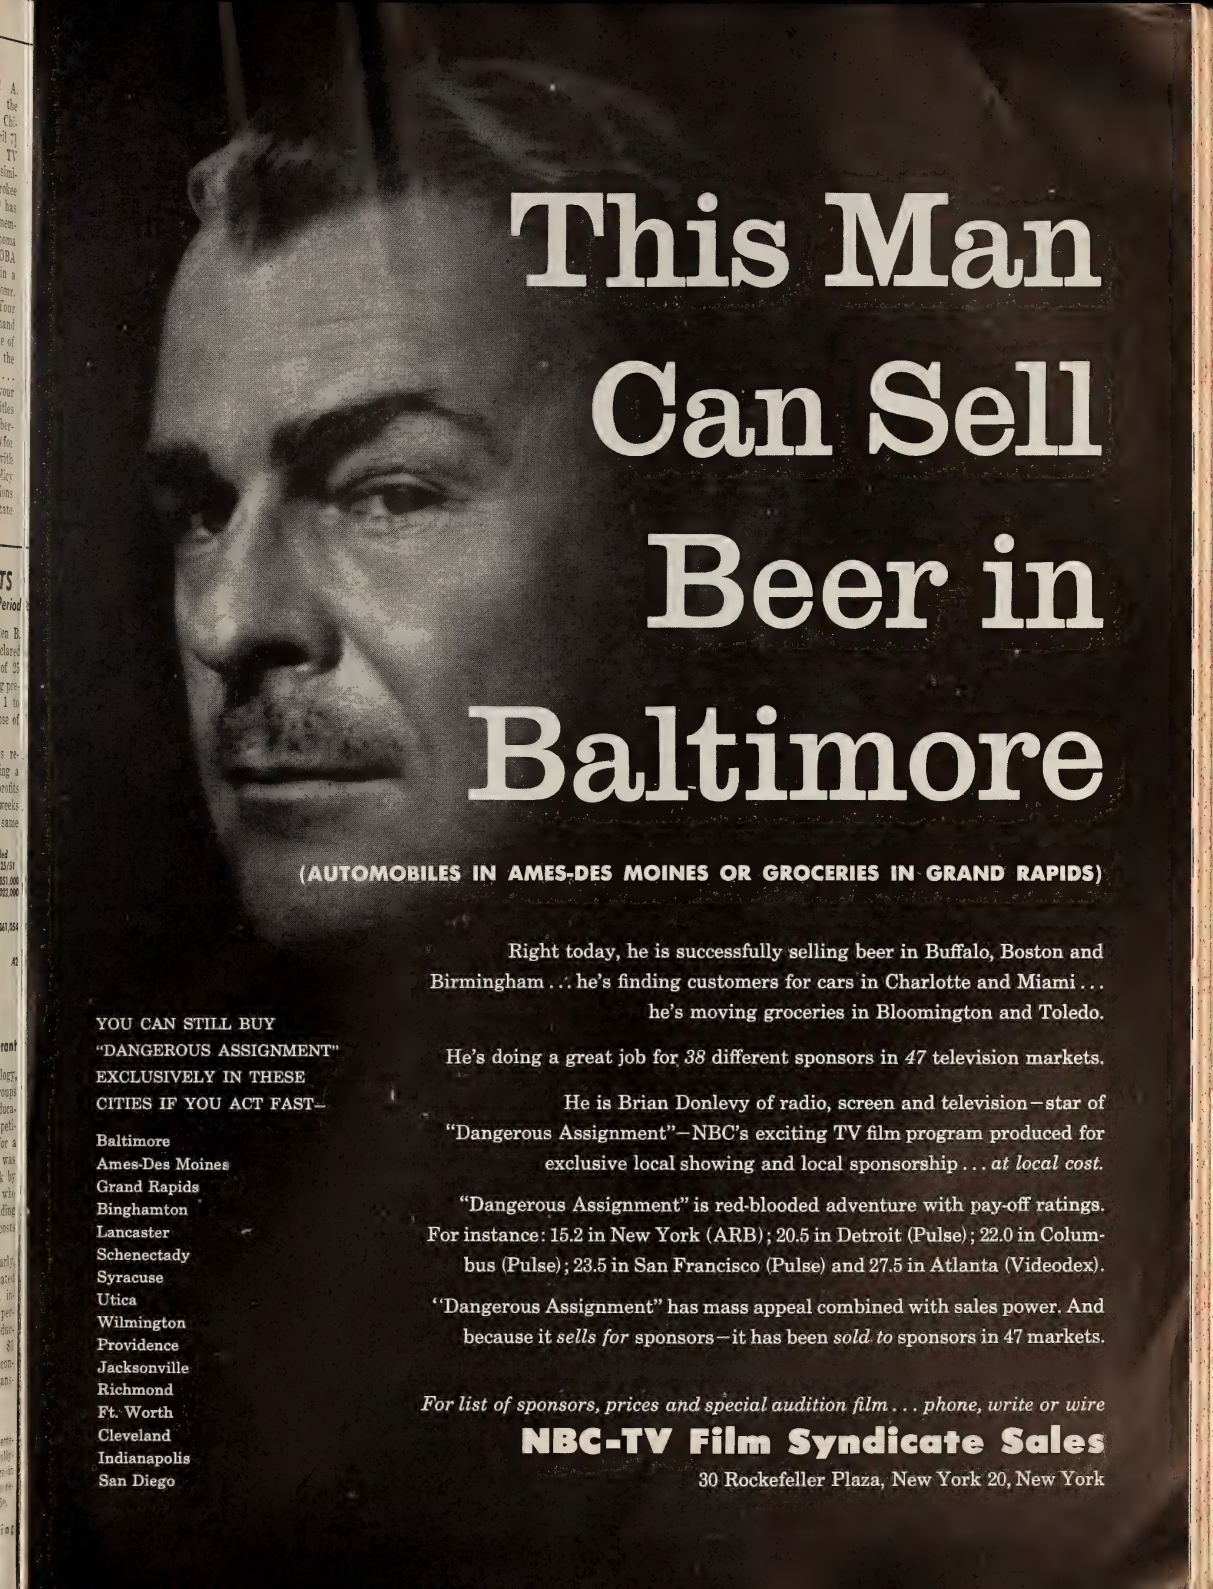
DuMONT REPORTS

Decrease in 12-Wk. Period

BOARD of directors of Allen B. DuMont Labs on May 21 declared regular quarterly dividend of 25 cents per share on outstanding preferred stock, payable July 1 to stockholders of record at close of business June 13.

Additionally, company has released following table showing a decrease in sales and net profits according to summary for 12 weeks ended March 23, compared to same period a year ago:

	12 weeks ended 3/23/52	3/25/51
Sales	$15,960,000	$18,851,000
Net Profit	114,000	1,022,000
Number of Common Shares Outstanding at End of Period	2,361,054	2,361,054
Earned Per Share After Preferred Dividends	.035	.42



IIT ASKS FORD

For $4 Million TV Grant

ILLINOIS Institute of Technology, on behalf of the Chicago groups which propose to operate educational VHF Channel 12, has petitioned the Ford Foundation for a grant of $4,250,000. This was reported in Chicago last week by IIT President John Rettaliata, who said the sum would cover building construction and operation costs for four years.

Of this amount, $800,000 yearly, or $3,200,000, would be allocated to actual operating expenses, including building maintenance, personnel, administration and production. The remainder, about $1 million, would be used for construction of the station and transmitter.

GEORGE CARSON PUTNAM, newscaster-announcer, KTTV (TV) Hollywood, filed bankruptcy proceedings in U. S. District Court with liabilities reported as $79,501.89 and assets $250.

(Continued from page 79)

imum) and stations in Columbus, Ohio, Buffalo and Washington.

Such an outlet, using 3½ times the present power (16.6 kw) of WDTV, would serve a radius of 33 miles and 3,421 sq. mi. of Grade A service, he noted.

Comr. Jones observed FCC's engineering data shows only 156.5 miles separation between Channel 4 stations is needed to protect the Grade A service out to the noise limitation.

"That is to say," he explained, "it doesn't make any difference how many miles co-channel spacing you have beyond 156.5 miles. If you separate Channel 4 stations a thousand miles, the Grade A service does not increase one square mile."

"It seems ridiculous to me that Channel 4 should be left out of Pittsburgh when there is a 29.8% increase in Grade A service of the channel in this area when a Pittsburgh station is added and not one square mile of Grade A service is lost by the three existing stations at Washington, Buffalo and Columbus," Comr. Jones stated.

"Since we do have unusually rugged terrain in the Pittsburgh area," Comr. Jones continued, "there is more excuse to put more VHF channels in the Pittsburgh area than there is in New York City, Los Angeles, Philadelphia, Washington, Baltimore, Cleveland, Erie or Columbus where the terrain is less severe or as flat as a table top." To equal WDTV's present coverage, he said a UHF station will have to radiate a full megawatt of power (1,000 kw).

Explaining the various general provisions of the Sixth Report, Comr. Jones reviewed major premises of his dissent which he had discussed earlier before the Ohio Assn. of Radio-TV Broadcasters' management clinic in Columbus [B•T, May 5]. He contended the Sixth Report constitutes an "inefficient use of the spectrum" and creates an "artificial scarcity" of VHF channels.

Charges 'No Excuse'

Holding "there is no excuse for Pittsburgh, one of the top 10 markets, to be on the bottom of the processing line when many smaller multiple station cities will be processed first," Comr. Jones contended "the issue in this battle" is not if the action is just, but whether the Sixth Report will hold up in court.

Comr. Jones observed that "They [the Commission] sit in a bomb-shelter, insulated from elections—insulated from the vote of any city that might be dealt with unjustly . . . The Commission says to the public: 'Prove I'm wrong. Make a court say I'm arbitrary, unreasonable, capricious.' "

The dissenting Commissioner told his Pittsburgh audience that "to recoup the permanent loss of local television service . . . the civic resources of your city and possibly the cities and communities of your metropolitan area will have to marshal their combined forces in a painstaking, expensive, time-consuming effort of factual (legal, engineering and economic) preparation for an administrative hearing, oral arguments, briefs and very likely, successive court appeals."

Comr. Jones further elaborated practical points of his dissent before the FCBA on Thursday, using some of the same visual material employed at Pittsburgh.

He told the Washington broadcast attorneys there is little to recommend the allocation plan, but it can do "a great deal of damage" to the nation in the future. Comr. Jones reiterated his view that FCC doesn't have legal authority to "prejudge the needs" of the various communities of the U. S.

FCBA, among others, a year ago unsuccessfully protested the legality of the fixed allocation plan. Comr. Jones dissented from the majority opinion which upheld the allocation at that time.

Contending the Sixth Report puts UHF "behind the eight-ball," Comr. Jones pointed out that the VHF co-channel minimum spacing of 70 miles is disproportionately much greater with respect to interference factors than is the 155-mile UHF spacing. He reminded the group it will take 2,000-ft. UHF antennas to compete with 500-ft. VHF antennas, placing UHF operators at great financial disadvantage not considering the 17-20 million VHF receiving set circulation.

Comr. Jones noted that the allocations plan sought to foster competition, but 889 cities are single channel assignments. He charged FCC has wasted signals in the East through provision of unnecessarily high antennas and powers and concentration of multiple services in the large markets. Thus, the rural areas get unequal service even though the Commission planned for VHF stations to cover them.

He noted that between Baltimore and Washington there are seven signals carrying only four (network) program services. Around New York, he noted. there are 12 signals of which eight provide only four network services.

Comr. Jones reiterated his earlier contention that the "firm, fixed and final" allocation plan doesn't provide as efficient a distribution of services as would result competitively if applicants were free to "serve their own selfish interests."

He pointed out that while the plan sets a VHF minimum co-channel separation of 170 miles, the Commission's allocation actually contains a median separation of 250 miles. Thus, with high towers and powers, FCC has inefficiently allocated a big-city plan upon all lesser communities of the country as well, he indicated.

Showing a schematic diagram of VHF Channels 7 to 13, using the median 250-mile separation and antenna height 1,000 ft. with full 316 kw power, Comr. Jones noted a space of 122 miles occurs between Grade B contours. He pointed out it takes four separate channels to substantially cover an area (triangular lattice concept).

This means, he stated, it takes all 12 VHF channels to give substantially everybody at all locations three Grade B services or better, with the result "you can have only three channels in any one particular location."

Holding that this is the fundamental philosophy of the Commission's plan, Comr. Jones charged FCC deviated from using a maximum of three VHF channels in one place, naming Los Angeles and New York-Newark, seven each, and Washington and Chicago, four each. This results in lessened Grade B service in outlying areas as supplemental channels are eliminated, he indicated.

Suggests Less Spacing

By reducing station spacing to 155 miles, Comr. Jones pointed out, substantially all Grade A service is preserved and the same four channels used in the 250-mile concept will provide nearly everyone with at least one Grade A service instead of Grade B. In addition, some locations will get two Grade A services, he noted.

In its petition to reconsider the High Point-Beckley allocation ruling, WHPE pointed out the separation requirements set forth in the final plan "sets up new separation distances which are greater than heretofore described and therefore cannot be the basis for denying the requests." WHPE explained that since this new separation "is new to the rule-making procedures and was not a part of the original notice . . . it cannot now become a rule and it cannot be the basis for the rejection of the [WHPE] proposals."

Reconsideration in the Braddock, Pa., case is to be sought by Matta Broadcasting Co., licensee of WLOA there. Dispute centers on rejection of proposed Channel 4 assignment because separation between the Braddock post office (built in 1892) and WLWC (TV) Columbus is 169.39 miles. The plan specifies 170-mile minimum.

In Lafayette, KVOL there (Evangeline Broadcasting Co.) plans to petition for reconsideration of FCC's relocation of VHF Channel 5 at Alexandria, La., substituting UHF Channel 67 at Lafayette.

FCC EXAMINERS

TWELVE influential Senators last week challenged the Congress as well as the FCC to get television to all of the nation's people in the shortest time possible.

The unique move, the more unusual in an economy legislature, grew with agreement a fortnight ago that Senate Interstate & Foreign Commerce Committee members should ask for additional funds to enable the Commission to tackle an increasing workload of TV applications [B•T, May 19].

There are no party lines in the Senators' call. Both Democrats and Republicans on the commerce committee joined in sponsorship of a proposed amendment to the 1953 Independent Offices Appropriations Bill.

That bill, already cut nearly $2 million by the House, is under consideration of Sen. Burnet R. Maybank's (D-S. C.) appropriations subcommittee.

The commerce group's amendment, included in a five-page frankly-worded letter to Chairman Maybank, calls for an appropriation of $800,000 "for salaries, and other expenses necessary for the employment of 20 examiner teams to be used exclusively [by the FCC] for processing and hearing television applications during the fiscal year ending 1953."

Williams Fails to Sign

Only member of the Senate commerce group not signing the letter was Sen. John J. Williams (R-Del.).

Most of the Senators signing the letter are among those who pull the most weight. In addition to Senate Commerce Committee Chairman Ed C. Johnson (D-Col.) and Senate Majority Leader Ernest W. McFarland (D-Ariz.), they include:

Democrats—Sens. Warren G. Magnuson (Wash.), Brien McMahon (Conn.), Herbert R. O'Conor (Md.), Lyndon B. Johnson (Tex.), Lester C. Hunt (Wyo.), and Republicans—Sens. Charles W. Tobey (N. H.), Owen Brewster (Me.), Homer E. Capehart (Ind.), John W. Bricker (Ohio) and James P. Kem (Mo.).

Sen. Johnson of Colorado testified before the Maybank subcommitte when FCC's appropriation was before it for consideration. A fortnight ago while hearing the nomination of Rosel H. Hyde to the Commission, Sen. Capehart offered the resolution which culminated in the letter and proposed amendment to the funds legislation.

Outlining the April 14 lifting of the "cruel, arbitrary and little understood television freeze . . . imposed in September 1948," which the committee said came "after 42 months of tortuous delay," the letter proceeded to describe the current situation which was said to exist at the Commission.

Pertinent points of the Senators' letter were briefly:

● It is "reasonable" to expect more than 1,000 applications "pending and clamoring for immediate action" and the Commission "must adopt a scrupulously careful method of processing these applications."

● The current seven examiners (who should handle about 10 to 15 applications per year) "are used for all types of hearings . . . and we are informed they now have a heavy workload on problems wholly unrelated to the licensing of new television stations which will keep them tied up for many months."

● Seventh Annual Report of the FCC "reveals that there were pending, as of June 30, 1951, 1,000 broadcast applications in the radio AM field and 186 in the radio FM field. . . . If you were an applicant, an outright death sentence likely would be far better than a notice of indefinite delay."

Team Already Assigned

● An examiner team has been assigned to an investigation and hearing involving divestment of the International Cable operation from Western Union. Case is set for June 5.

● "We are convinced that the FCC must be given 20 additional examiner teams for the next two years to clean up the television logjam occasioned by the sudden lifting of the arbitrary freeze. . . . It will not cost the government any more to hear these cases during the next two years than it would cost to string them out over a period of 10 years."

● Annual salary of an examiner team consisting of examiner, accountant, engineer, attorney, and two clerk-stenographers would total $36,000 a year and travel expenses $4,000, a total sum of $40,000 for each team.

● These additional teams are necessary if the freeze lift is to be "meaningful."

● Increase is not to be made every year, but only for the time to "cure the emergency."

● "The welfare of the people and not the happiness of the FCC is at stake in this situation. . . . Every applicant is entitled to his day in court without years of delay and it cannot be given to him unless we provide the money to hire the minimum of examiner teams. . . ."

● ". . . large percentage of the applications that will go on file will probably go to hearing because of the limited number of channels available in many of the cities . . . it becomes obvious . . . that if the present situation with respect to examiners is permitted to remain, some applicants will not know whether they will be granted TV licenses for many, many years."

● Congress will not save money by failing to add the $800,000 because it will have to pay for the processing eventually, anyhow.

● The benefits of television and its value to the people "far transcend the problem of whether the FCC is entitled to 10 employes or 10,000 employes."

● "Besides being a most fascinating form of entertainment and education, television is certain to become a major element in the American economy with respect to the number of people employed, money invested and a new and forceful device through which products are sold to the general public."

● "By an appropriation of $800,000 Congress can set in motion a chain reaction which in two years' time will create $3 billion in business. These figures are ultra conservative."

Concluding paragraph of the letter follows:

"We ought not shirk our duty. We ought to appropriate the money to authorize the recruiting of the 20 examiner teams or frankly tell the people that because money is not available for processing their television applications they must wait 6 to 10 years for TV in many areas of the U. S."

The House last March voted $6,108,600 to operate FCC in fiscal 1953. This is $1,966,540 under the amount requested in President Truman's budget. The Senate had been expected to restore some of this cut.

Senators Spark Funds Drive

IATSE Wins, Loses

IATSE Local 706 last week was named over NABET by a 7-0 vote as bargaining representative in the National Labor Relations Board election for makeup artists and hair stylists at NBC-TV Hollywood. Screen Cartoonists Guild, however, won out 5-2 over IATSE at Cascade Pictures of California, TV film producer.

WATV (TV) Move

SIX of the seven New York area TV stations will be transmitting from the top of the Empire State Bldg. by next winter, following FCC approval last week of WATV (TV) Newark's long-pending request to move there. WATV (TV) will reduce its radiated power from 30.5 kw visual to 3.4 kw when it makes the move, but its antenna height will be increased to 1190 ft. above ground. Its present transmitter site is atop First Mountain, near West Orange, N. J., less than 600 ft. above average terrain. WOR-TV is the only New York outlet not using the Empire State Bldg. site. It has an 810 ft. tower at North Bergen, N. J.

RCA Reports Tricolor Tube Improvements

(Report 217)

SIGNIFICANT improvements have been made in the RCA tricolor television picture tube, Dr. Elmer W. Engstrom, vice president in charge of the RCA Laboratories Div., announced last Thursday.

One of the disadvantages of the earlier RCA system, it was explained, was that the electron beam sources have been located at somewhat divergent positions with the tube, requiring a number of beam-deflection systems and a tube with three necks. Through a new invention by Alfred C. Schroeder, electrical engineer in RCA Labs., the electron guns can be placed close together in a single neck tube, an arrangement which allows for a single-beam deflection system similar to that used in black and white television.

The improved tube, patented early this month, has been successfully integrated into RCA's color TV system, he said.

Mr. Schroeder, associated with RCA since receiving his master's degree from Massachusetts Institute of Technology in 1937, is on the staff of the David Sarnoff research center and has spent much of his time working on color television.

'Lucy' Again Heads Videodex Top 10 Ratings

FOR the second successive month, *I Love Lucy* heads the Videodex ratings for the top 10 TV shows, both in percentage ratings and in number of homes reached. The show stars Lucille Ball and her husband, Desi Arnaz, and is carried over CBS-TV Monday, 9-10 p.m. (EDT). Videodex listings follow:

Program	Percent TV Homes
1. I Love Lucy (CBS)	52.1
2. Talent Scouts (CBS)	43.5
3. Red Skelton (NBC)	39.3
4. Godfrey & Friends (CBS)	39.3
5 You Bet Your Life (NBC)	38.7
6. Texaco Star Theatre (NBC)	37.
7. Your Show of Shows (NBC)	31.8
8. Comedy Hour (NBC)	31.1
9. Fireside Theatre (NBC)	30.9
10. My Friend Irma (CBS) 30.1	30.2

Program	No. of TV Homes (000)
1. I Love Lucy (CBS)	8,671
2. Red Skelton (NBC)	6,352
3. Texaco Star Theatre (NBC)	6,275
4. You Bet Your Life (NBC)	6,080
5. Godfrey & Friends (CBS)	5,854
6. Comedy Hour (NBC)	5,012
7. Your Show of Shows (NBC)	4,875
8. Fireside Theatre (NBC)	4,826
9. Philco TV Playhouse (NB)	4,801
10. Talent Scouts (CBS)	4,793

Video Being Used To Treat Cross-Eyes

TV's VALUE in treating cross-eyes of children was described to the Pennsylvania Optometric Assn. at its 56th annual meeting by Dr. J. Donald Kratz, associate professor of the Pennsylvania State College of Optometry.

The college plans to install TV sets in its eye-straightening clinic, he said, adding that video's use by trained personnel is valuable because it holds a child's attention where other types of training aids have failed.

'Lucy', 'Godfrey' Dominate Latest Nielsen

NATIONAL ratings for top ten television programs for two weeks ending April 26 have been released by A. C. Nielsen Co. as follows:

NUMBER OF TV HOMES REACHED

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	10,75
2	Arthur Godfrey & Friends (Liggett & Myers) (CBS)	7,60
3	Texaco Star Theater (NBC)	7,35
4	Red Skelton (NBC)	7,42
5	Your Show of Shows (R. J. Reynolds) (NBC)	7,38
6	You Bet Your Life (NBC)	7,30
7	Colgate Comedy Hour (NBC)	7,17
8	Your Show of Shows (Participating) (NBC)	6,79
9	Robt. Montgomery Presents (S. C. Johnson & Son) (NBC)	6,67
10	Philco TV Playhouse (NBC)	6,64

PER CENT OF TV HOMES REACHED IN PROGRAM STATION AREAS

Rank	Program	Homes %
1	I Love Lucy (CBS)	63.
2	Arthur Godfrey's Scouts (CBS)	53.
3	Arthur Godfrey & Friends (Liggett & Myers) (CBS)	49.
4	Red Skelton (NBC)	46.
5	Texaco Star Theater (NBC)	46.
6	Your Show of Shows (R. J. Reynolds) (NBC)	46.
7	You Bet Your Life (NBC)	44.
8	Pabst Blue Ribbon Bouts (CBS)	44.
9	Your Show of Shows (Participating) (NBC)	44.
10	Colgate Comedy Hour (NBC)	44.

Total Markets on Air 64* Stations on Air 109* Estimated Sets in use 17,076,609

* Includes XELD-TV Matamoros, Mexico

Editor's Note: Totals for each market represent estimated sets within television area. Where coverage areas overlap set counts may be partially duplicated. Sources of set estimates are based on data from dealers, distributors, TV circulation committees, electric companies and manufacturers. Since many are compiled monthly, some may remain unchanged in successive summaries. Total sets in all areas are necessarily approximate.

make small fry friends with fred

WBTV's own contribution to the cowboy craze, Fred Kirby corrals an average Videodex rating of 19.0 on his "Junior Rancho" programs (M-W-F, 5-5:30 PM). Over 2,000 Carolina children have appeared on the program with Fred since its debut in September, 1951. Praised by parents, teachers and civic leaders for its sound contribution to juvenile ideals, "Junior Rancho" offers advertisers a happy, hair-trigger reaction to their product appeals.

Appendix D, Section 3.610(a) (1) (i) and (iii), last line, change Appendix A to Appendix I. [Page 136].
Appendix D, Section 3.611(d) (1), last line, Section 3.611(d) (3) and (4), third line, and Section 3.611(d) footnote 7, last line, change Appendix B to Appendix II. [Page 137].
Appendix D, Section 3.614(a), 4th line from end [Page 137] Section 3.614(b) (1), next to last line [Page 138]. Section 3.614(b) (2), last line [Page 138], Section 3.682(a) (4) and (9), last line [Page 143], Section 3.684(c) 3rd line [Page 144], Section 3.685(e) (2) and (3) next to last line [Page 145], Section 3.687(a) (1), 5th line and footnote 27, Section 3.687 (a) (4) 3rd and last line, Section 3.687(b) 12th and 15th line [Page 146], change Appendix C to Appendix III.
Appendix A (of Appendix D), Fig. 1, change Appendix A to Appendix I. [Page 149].
Appendix B (of Appendix D) Table I, change Appendix B to Appendix II. Table II and III delete Appendix B. [Pages 151-154].

Appendix C (of Appendix D), Fig. 1, change Appendix C to Appendix III. [Page 155].
Appendix E: Flagstaff, Arizona, last column add 239. [Page 163]. Centralia, Illinois, first column add 529. [Page 163]. Johnstown, Pa. last column add 374. [Page 164]. Kirksville, Mo., first column add 527. [Page 163]. Adams, Wis. first column add none. [Page 164]. Chilton, Wis. first column add none. [Page 164]. Park Falls, Wis. first column add none. [Page 164]. Shell Lake, Wis. first column add none. [Page 164]. Cheyenne, Wyo. first column add none. [Page 164]. Rawlins, Wyo., first column add none. [Page 164].

In addition to the FCC corrections, the following corrections should be made to Part II of B•T, April 14:

Page 132, third column, following Washington, D. C., channels should read: 4, 5, 7, 9, 20, *26.
Page 137, fourth column, fourth line from top of page, should read: $D = (L^2_a + L^2_o)^{1/2}$
Page 144, second column, Section 3.683(b) (4) should read: In determining compliance with Section 3.685(a) . . .

NEW daily five-minute program, KNBH (TV) Hollywood *Fish and Game Editor*, features Frank Jaffray with news report on fresh and salt water fishing, dog trials, trap and skeet shooting events in California.

PROVIDENCE TV
Planned 'for Citizens'

PLANS for a citizen-owned television station are to be aired tonight (Monday) at a public meeting in Providence, R. I., according to Phil Ostrow and Dave Stackhouse, principals in Television Assoc., the proposed station applicant. After incorporation, "with a roster of responsibile citizens as officers and board of directors," Television Assoc. will sell shares to the public, they explained.

Mr. Ostrow, president of Albright Motors, and Mr. Stackhouse, announcer at WJAR Providence for ten years, reported 50 persons already have "voluntarily requested to be enrolled" in the venture with stock $10 per share, of which $1 will be collected initially to cover organization work.

JACK BENNY, star of CBS Radio-TV *Jack Benny Show*, starts five weeks personal appearance tour of Great Britain, June 16.

Floating Action! **for all TV Cameras**

"BALANCED" TV TRIPOD

This tripod was engineered and designed expressly to meet all video camera requirements.

Previous concepts of gyro and friction type design have been discarded to achieve absolute balance, effortless operation, super-smooth tilt and pan action, dependability, ruggedness and efficiency.

Below:

3 wheel portable dolly with balanced TV Tripod mounted.

Complete 360° pan without ragged or jerky movement is accomplished with effortless control. It is impossible to get anything but perfectly smooth pan and tilt action with the "BALANCED" TV Tripod.

Quick-release pan handle adjustment locks into position desired by operator with no "play" between pan handle and tripod head. Tripod head mechanism is rust-proof, completely enclosed, never requires adjustments, cleaning or lubrication. Built-in spirit level. Telescoping extension pan handle.

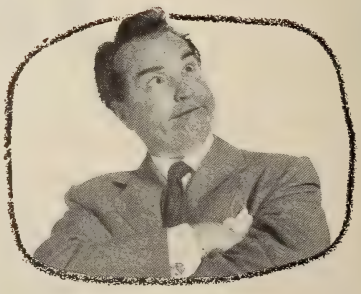
Summer success storyboard

Red Skelton portrays "The Astonished Advertiser"

This is an advertiser—contented, experienced, secure in the knowledge . . .



And, like many otherwise astute advertisers, perhaps he falls for the TV climatic fallacy—its effectiveness bounded by fall, winter and spring? Well - - -

The average TV family spends only 4½ summer days communing with nature—on vacation, that is.

In the New York market alone the typical summer advertiser obtained 46,000 extra customers through his TV advertising. Amazing? Well - - -

Even more, NBC has its new summer discount plan—and an array of sizzling summer shows to go with it.

That television, today, is the most profitable advertising medium ever evolved.

But, does he know that it stays profitable all year long?

In the average summer week, 94.8 of the TV families are available—and owners watch almost 2 hours every day.

Brands which advertised on TV last summer averaged 28% higher sales among program viewers compared to non-viewers—and does he know . . .

All told, no smart advertiser can afford to avoid the fantastic facts of NBC-TV's effectiveness, measured by the only true thermometer: results.

Now that Red Skelton (he with the 49.9 Nielsen Sunday night rating) has been warmed up on the subject of Summer Television, perhaps you, too, would like to hear more.

The whole red-hot story is in NBC's new research study, "Summer Television." It's yours for the asking—as well as full details on programming and rates . . .

NBC television

No. 1 Medium for your Sales Success

film report

Production . . .

George Fox Corp., Hollywood, plans a half-hour TV film series, *This Is Hawthorne*, starring **Jim Hawthorne**, comedian currently heard nightly on KNX Los Angeles. The format concerns a research leg-man whose work for an encyclopedia publishing company sends him globe-hopping. Film actors **Thurston Hall** and **Jimmy Conlin** head the supporting cast. The series, to be produced by president **George Fox**, starts in early July with 26 films to be completed by October and a total of 78 films by September 1953. **Eddie Cline**, recently with Arena Stars Inc. in charge of Spike Jones' tours and TV appearances, will direct from scripts by **Fred Beck**, newspaper columnist, and **Arthur Hoerl**, motion picture-TV writer.

* * *

Palomar Productions, Los Angeles, has acquired TV film rights to *Danger in the Cards*, book written by **Michael MacDougall**, a gambling and fraud investigator. Mr. MacDougall will narrate 13 half-hour TV film series and act as technical advisor with screen writers, **Earl Younker** and **Ray Gregori**, adapting scripts. Possible alternate title is *The Payoff*. Kefauver investigations, Hollywood's $1 million gin rummy scandal and Miami's Roney-Plaza swindle are among cases to be dramatized. Negotiations are being concluded for Hollywood name star to enact leading role. Production will start September 1 at either Motion Picture Center, Hollywood, or at Churubusco Studios, Mexico City.

* * *

Motion Picture Center Television Corp., Hollywood, has been formed for the production of half-hour TV film series. Firm is headed by **Albert Zugsmith**, president American Pictures, as president; **Gerald Mohr**, radio-film actor, vice president; **Ruth Zugsmith**, secretary; **Joseph Justman**, head of Motion Picture Center, treasurer. First series of 13, as yet untitled, will star Mr. Mohr with **Peggie Castle** and **Laurette Luez**, film actresses, signed to each enact feminine lead in first two films, all of which are budgeted at $20,000 or under. **Alfred E. Green**, director of "The Jolson Story," will direct series with **Ralph Black** as production manager.

* * *

Jerry Courneya Productions, Los Angeles, is starting 26 more quarter-hour TV films in its *Adventures of Noah Beery Jr.* series, starring TV-film actor **Noah Beery Jr.** A group of 13 is already completed.

* * *

John F. Link Productions, Hollywood, is making a 13 quarter-hour TV film series, *The Connoisseur*, dealing with fish and game. Mr. Link is the producer-director.

* * *

Crown Pictures International, Hollywood, is preparing recently acquired feature film, "Alice in Wonderland," for television presentation on Thanksgiving and Christmas Day this year. **Stewart O'Brien** will cut and edit the film which is part live and part animated action.

* * *

Screen Gems Inc., Hollywood, is completing *Thomas Jefferson*, half-hour TV film in NBC-TV *Cavalcade of America* series for **duPont.** The cast includes **Brandon Rhodes, Raymond Greenleaf, Don Randolph, Barbara Woodell** and **John Hamilton.** Producer - director is **Jules Bricken.**

* * *

Voglin Corp., Hollywood, is completing eight TV film commercials, ranging from two minutes to 30 seconds, for **Gruen Watch Co.**, Cincinnati, through **McCann-Erickson Inc.**, Hollywood. Appearing in the films are **Dennis O'Keefe, Edmond O'Brien** and **Lizabeth Scott**, film stars, and **Bob Garred**, ABC radio newscaster.

* * *

Film People . . .

Signed for **Pennant Productions**, Hollywood, initial film, "Flight From Tyranny" in *Date With Destiny* half-hour TV film series is **Zsa Zsa Gabor**, film actress and panel member of KNXT (TV) Hollywood's *Bachelor's Haven*. **Harold Schuster** will direct from a script by **Robert Hill.** Production is scheduled for late June.

* * *

Gene Autry's Flying A Pictures, Hollywood, has signed **Brad Johnson**, film actor, to portray Lofty Craig in *Annie Oakley*, 52 half-hour TV western film series. Enacting the title role is **Gail Davis** with **Lou Gray** producing.

* * *

W. A. Hillhouse, television director for **Alexander Film Co.**, Colorado Springs, named sales promotion manager. Succeeding him is **Earl D. Austin**, special television representative.

* * *

Doug Jenkins, vice president, **Bracken Television Productions**, Los Angeles, is currently with the Army Public Information Office in the Far East, completing a series of filmed interviews in that area, which are now being seen on West Coast TV.

* * *

Jack Barron, makeup supervisor, **Revue Productions**, Hollywood, father of twins, Jack Jr., and Jerilyn, May 10.

DISCUSSING standardization of spot TV film mechanics at New York meeting May 13 sponsored by National Assn. of Radio and TV Station Representatives Inc., are (l to r): George Brett, Katz Agency Inc.; T. F. Flanagan, NARTSR managing director; Robert Eastman, John Blair & Co.; Martin Beck, Katz Agency; Fred Nuberth, Avery-Knodel Inc.; William Eastham, Lever Bros., and Jones Scovern, Free & Peters Inc.

KEYL (TV) TOWER

To Go Up This Summer

SCHEDULED for late summer completion, KEYL (TV) San Antonio's new $65,000 tower and antenna will make the station the most powerful in Texas during 1952, according to George B. Storer Jr., managing director.

The 101 ft., six-day GE antenna to be erected on a new 76 ft. tower atop San Antonio' Transit Tower, will place the antenna tip at 554½ ft. above ground level, William J. Jackson, chief engineer, said, adding that the station's power will be doubled from 17 to 35 kw. KEYL will operate during the ten-day change-over, he said.

CBS-TV Billings

TOTAL of $6,175,000 in new billings has been booked for four major advertisers on CBS-TV Network, Fred M. Thrower, CBS-TV vice president in charge of network sales, announced Monday.

New business is from Pepsodent Div. of Lever Bros. [B•T, May 19]; Campbell Soup Co. [B•T, May 12]; American Cigarette & Cigar Co. for Pall Mall [B•T, May 12], and Owens-Corning Fiberglass Corp. [B•T, May 19].

FILM SPOTS

Plan Afoot to Standardize

MOVE to standardize and simplify requirements for 10-second television identification spots was instituted last week by station representatives and advertising agencies in order to reduce production problems and encourage the development and sale of such announcements.

First phase of the program is to standardize film spots, and later to adopt formulas for telops and slides, according to John W. Brooke of Free & Peters, national representative, and television committee chairman for the National Association of Radio-Television Station Representatives.

In a plan for film spots, adopted by major agency officials at a meeting in New York May 13, the agencies agreed to reserve the upper right hand quarter of the screen for station use, with advertising copy to be placed in the other three quarters. As for timing, it was agreed that 1¼ seconds be used for the opening with 6½ seconds for copy. Two seconds will be given to station identification and ¼ second to the closing.

Also it is hoped that 16mm film will be adopted by each station and that broadcasters will permit superimposition of station identification over advertising film, to avoid preparation of a different version of the same film commercial for every station which carries it.

The suggestions approved by agencies are to be submitted to the NARTSR board at its next meeting, expected to be called "shortly," then to the full membership and, through them, to the stations. The object is to receive wide enough acceptance of the standards to reduce agency production problems and still permit some flexibility for station procedure.

Ordinarily, securing specific data for each station's identification format and assembling a commercial within the deadline is time-consuming and costly.

SEATTLE RELAY

CBS-TV Announces Plans

PLANS for interconnection of CBS Television affiliate KING-TV Seattle with the AT&T transcontinental microwave system terminal at San Francisco, so that Washington state audiences will be able to receive live coverage of political conventions in Chicago this summer, were announced by CBS-TV last Monday [B•T, May 19].

Work is being facilitated by a guarantee of construction costs, made jointly by CBS Television and Westinghouse Electric Corp., sponsor of CBS-TV convention coverage, and Otto Brandt, vice president and general manager of KING-TV, is helping to coordinate the project. AT&T facilities now extend from San Francisco to Portland, Ore., with a microwave link being extended to Seattle, a distance of 147 miles.

CBS-TV spokesmen identified their network as the only one which will provide convention coverage from Boston to San Diego and from Seattle to Miami, the latter being from KING-TV to WTVJ (TV) Miami.

MEDICAL MEETING

Coast-to-Coast TV Slated

TWO half-hour coast-to-coast telecasts will be presented of the American Medical Association convention, to be held in Chicago next month. Both programs will be sponsored by Smith, Kline and French Labs., Philadelphia pharmaceutical firm, it was announced by NBC network last week.

To be narrated by Dr. Roy K. Marshall, the programs are scheduled for the NBC-TV network at 9:30-10 p.m. EDT June 10 and 10-10:30 p.m. EDT June 11, originating at the 101st annual AMA convention, to be held June 9-13.

Empire State TV Guild

INITIAL meeting of the Empire State Television Guild, an organization formed to continue friendships started during planning and construction of the multiple TV antenna atop the Empire State Bldg., was held in New York's Harvard Club Tuesday. The first annual dinner meeting was attended by some 40 scientists, engineers and businessmen, with all attending given certificates of membership.

Quid Pro Quo

AS A MEANS of impressing upon advertisers and agencies the on-the-air promotion given their shows, WCBS-TV New York sent them "bogus" invoices showing how much these announcements would cost at regular rates. By way of fair play, one sponsor promptly paid his $3,250 "bill" in phony money.

Cities Allocated Five or More Channels

(Continued from page 82)

City	Present No. of TV Stations	Total Allocated in April 14th Report	Heights of Existing Antennas Above Average Terrain
Jacksonville	1	5	477 ft.
Miami	1	6	306 ft.
Atlanta	3	5	531, 546, 932 ft.
Champaign-Urbana, Ill.	None	5	None
Chicago	4	10	390, 585, 627, 667 ft.
	Note: Two of present stations are located on Civic Opera Bldg. which is 555 ft. tall, one is on Tribune Tower which is 462 ft. tall, and one is on Amer. Nat. Bank Bldg. which is 479 ft. tall. There are 20 buildings in Chicago over 400 ft. tall, nine of which are over 500 ft. tall. The tallest are: Board of Trade 605 ft., Pittsfield 557 ft., Civic Opera 555 ft., Field 535 ft., One LaSalle St. 530 ft.		
Indianapolis	1	6	428 ft.
Davenport-Rock Is.	2	5	342, 370 ft.
Des Moines	None	5	None
Louisville	2	6	510, 529 ft.
New Orleans	1	7	395 ft.
Baltimore	3	6	405, 530, 540 ft.
	Note: Mathieson Bldg. on which one of present stations is located is the tallest building (495 ft.). Next tallest is 330 ft.		
Boston	2	7	501, 547 ft.
	Note: Present antennas located outside of built up center of city. Tallest buildings in Boston are U. S. Customs House (496 ft.) and John Hancock Bldg. (495 ft.).		
Detroit	3	6	500, 500, 658 ft.
	Note: Tallest buildings are Penobscott (557 ft.), Union Guardian (482 ft.), Book Tower (472 ft.), David Scott (436 ft.), Fisher (420 ft.) and Barlum Tower (416 ft.)		
Duluth-Superior	None	5	None
Minneapolis-St. Paul	2	7	490, 563 ft.
	Note: In Minneapolis, Foshay Tower is by far the tallest (477 ft.), Municipal Bldg. is 355 ft., North Western Bell Tel. 350 ft. and Rand Tower 311 ft. In St. Paul, First Nat. Bank Bldg. is 501 ft. not including 100 ft. sign. One of the existing stations is on Foshay Tower.		
Kansas City	1	6	745 ft.
	Note: Taller bldgs. are K.C. Light & Power (503 ft.), Fidelity (434 ft.), City Hall (418 ft.), Telephone (382 ft.)		
St. Louis	1	7	530 ft.
	Note: Taller bldgs. are Civil Courts (375 ft.), Bell Telephone (369 ft.) and Park Plaza Hotel (310 ft.).		
Omaha	2	6	590, 591 ft.
New York	6	8	975 to 1,445 ft.
	Note: WOR in North Bergen, N. J. is at 975 Height. All others on Empire State Building.		
Rochester	1	5	497 ft.
	Note: Present antenna is located on Pinnacle Hill. Tallest building is Eastman Kodak (366 ft.).		
Cincinnati	3	6	650, 670, 695 ft.
	Note: Tallest buildings are Carew Tower (574 ft.) and Union Central (495 ft.).		
Cleveland	3	6	619, 640, 725 ft.
	Special Note: Present TV antennas appear to be located outside of built up center of city. Cleveland has one building that towers above the others as markedly as the Empire State Bldg. stands out in New York City. The Terminal Tower is 708 ft. high and is the tallest building in the U. S. outside of New York City. The next building in height is 360 ft.		
Columbus	3	5	455, 485, 545 ft.
	Note: Tallest building in Lincoln-Le Veque Tower (555 ft.). One station is at present transmitting from it.		
Oklahoma City	1	5	935 ft.
	Note: Tallest buildings are First National (447 ft.) and Apco Tower (440 ft.).		
Tulsa	1	5	490 ft.
	Note: Tallest buildings are National Bank (400 ft.) from which present station is transmitting and Philtower (343 ft.).		
Portland, Ore	None	6	None
Philadelphia	3	7	650, 660, 719 ft.
	Note: At least two of the present stations are transmitting from points outside the built up center of the city. The tallest structure is Wm. Penn Statue atop City Hall (548 ft.). Tall buildings are Phila. Saving (491 ft.), Lincoln-Liberty (473 ft.), Guard. Trust (398 ft.), Lewis Tower (389 ft.), Fidelity Philadelphia Trust (377 ft.).		
Pittsburgh	1	6	818 ft.
	Note: The terrain may require use of a hill rather than a building. However, taller buildings are Gulf (582 ft.), Cathedral of Learning (535 ft.), U. S. Steel-Mellon (500 ft.).		
Chattanooga	None	5	None
Memphis	1	6	640 ft.
	Note: The Sterick Building is reported to be 465 ft. tall including 100 ft. sign.		
Nashville	1	6	680 ft.
Dallas	2	6	350, 463 ft.
	Note: Tallest building is Merchantile Nat. Bank (551 ft.). After that comes Magnolia Petroleum (430 ft.), Bell Telephone (377 ft.), Republic Bank Bldg. (323 ft.).		
El Paso	None	6	None
Houston	1	6	500 ft.
	Note: Two tallest buildings are Gulf (428 ft.), Neils Eperson (409 ft.). Neither is presently used.		
Lubbock	None	5	None
San Antonio	2	6	440, 480 ft.
Salt Lake City	2	6	416, 542 ft.
Norfolk	1	5	367 ft.
Seattle	1	6	408 ft.
	Note: The L. C. Smith Bldg. (500 ft.) is far taller than any other. Next building is Northern Life Tower (314 ft.).		
Milwaukee	1	6	340 ft.
	Note: The present Milwaukee station, WTMJ-TV, has published a budget of future expenses including an item of $292,000 for a 1,000 foot antenna. The tallest existing buildings in Milwaukee are the City Hall (350 ft.) and the Wisconsin Telephone Co. (313 ft.).		

KGO-TV EXPANDS

Adds New Studios

ABC has added two new downtown studios to its Radio City operation, for use of KGO-TV San Francisco, to add 1,600 sq. ft. floor space and a complete kitchen for its daily *Chef Cardini Show*, according to Vince Francis, station manager.

He said the new studios will give better service to advertisers and keep abreast of demands for more space. KGO-TV had been operating exclusively from its transmitter site on Mt. Sutro, he said.

FINAL TELEVISION ALLOCATIONS REPORT

EXTRA COPIES AVAILABLE NOW AT $3.00 EACH

This is the complete report—196 printed pages—just as the FCC released it, Monday, April 14, 1952.

This volume shows the complete city-by-city breakdowns for all 2,053 proposed stations in 1,291 communities. There are sections on antenna heights, educational reservations, power, procedures, Hennock's and Jones' opinions, zoning and mileage separation.

You'll want library copies, home copies, tear copies and working copies. Please use the coupon below and order today. Limited Supply.

programs promotion premiums

SOMETHING new in political broadcasts was given to listeners of WCCC Hartford, Conn., according to station report, when it aired tape-recorded telephone interviews between Sen. Robert A. Taft (R-Ohio) and members of the League of Women Voters, with the Senator talking on the Korean situation, labor and the economic program.

ADS, PUBLICITY PAY

COMBINATION of ads and publicity paid off for WCKY Cincinnati in its Ohio-Kentucky-Indiana talent opportunity contest. Buying half and quarter-page ads in weeklies and dailies in towns where 21 contests were to be held and releasing publicity stories with them, the station realized a response of 1,500 amateurs in 650 acts and awarded $1,665 in prizes.

WIP HONORS SHOWMAN

CONTEST staged by WIP Philadelphia to determine winner of station's first annual Showmanship Award, resulted in Buddy Greco, a singer who hails from Philadelphia, being named the outstanding male vocalist in the country. Gold plated trophy was presented to him by Benedict Gimbel Jr., president and general manager of the station. Special salute to the winner was aired by WIP on May 18.

CANADIAN TALENT

NEW talent show, *Stars of Excellence,* produced to give young Canadian entertainers their first opportunity to meet large audiences is being telecast on WBEN-TV Buffalo. Initial show of the series, sponsored by Peller Brewing Co. Ltd., will be seen May 30.

MYSTERY CONTEST

"HANDS of Mystery" contest on behalf of the California Institute for Cancer Research is being broadcast on *Lee Hogan Presents* on KNBH (TV) Hollywood. Contestant is given a chance to identify hands of famous celebrity after pledging his support to the institution whose goal is $250,000.

'WFIL-ADELPHIA' PROMOTION

FOLDER stating "If yours is a product of value to people you'll find WFIL of value to your product," has been distributed by that Philadelphia station. Success story quoting Norman Porreca's favorable opinion of radio advertising's effect on his appliance business is used to substantiate station's sales result claims.

MARKET STATISTICS

PICTORIAL book titled *Palm Beach County Story* is being mailed to agencies throughout the country by WJNO West Palm Beach. Copy outlines area's agriculture, industry, resorts and climate to impress on the reader "that this is a market with a future." Coverage map and breakdown of population data are attached to the folder.

TEACHERS INSPECT RADIO-TV

INFORMATION on the American business system was offered teachers in the Seattle area when Business-Education Day was held in the city a fortnight ago with KJR and KOMO cooperating in the plan. Groups of teachers toured both stations and executives explained the workings of the broadcast industry. At termination of the KJR tour momento folders were distributed to those who visited the studio. Teachers who inspected KOMO facilities saw themselves on a closed circuit TV presentation.

WLW SPONSORS CONTEST

PROMOTION plans have been arranged between WLW Cincinnati and *McCall's* magazine to select a 30-year-old homemaker from the Ohio Valley. Object of the search must be a mother, active in community affairs and reach the age of 30 in June. Winner will be featured in a 1952 issue of the magazine and receive a paid vacation in New York for herself and her family. Any listener in the WLW listening area may nominate a homemaker to be entered as a contestant.

DEALERS SEE TV

IN ORDER to acquaint dealers with TV and what they can expect when television comes to Montreal, Canadian Westinghouse in conjunction with CBC-TV in that city put on two demonstrations for dealers. Two-hour production featured live and film programs explaining the facts of the TV industry. Via internal TV circuit, dealers saw the inside of Montreal CBC-TV production center. Demonstration reportedly resulted in thousands of dollars worth of orders for TV sets.

CROSS-COUNTRY RADIO TRIP

TWOSOME featured on daily *Coffee with Lee and Lorraine* on WSPR Springfield, Mass., are offering stations a chance to give their listeners a cross-country trip this summer via tape recorded programs Lee and Lorraine Ellis will make on their westward jaunt. Couple will leave by car in June for a summer vacation. Along the way, they plan to record their experiences and send them to stations for broadcast as a unique travel series.

INDUSTRIAL SERIES

NEW series of half hour programs on WCAU Philadelphia, *Strength of the Nation,* highlights city's industry. Designed to acquaint listeners with the part American industry plays in bettering the American way of life, each presentation will portray an industry of the week, what makes it tick and what it does for the people it serves. Shows will feature tape recorded interviews with plant personnel and a discussion of the product manufactured there.

CONVENTION BROCHURE

FOUR-COLOR brochure with information concerning the Democratic and Republican national conventions will be distributed free to the public through Hallicrafters dealers starting this week. The convention program will include two sets of color cut-out maps and tally sheets for the recording of balloting. Booklet is a promotion piece of John S. Mahoney, advertising manager of the Chicago TV-radio manufacturing firm.

SEAPOWER STORY ON TV

FILM record of activties of the U. S. Navy on duty in the Mediterranean is being edited by Joel Chaseman who recently returned from that areas as special correspondent for WAAM (TV) Baltimore. During cruise from Norfolk to Gibraltar, he filmed considerable 16mm film on the operations of the *U.S.S. Palua* for the telecast on WAAM. After the initial showing on that outlet, the film will be made available to other TV stations desiring to tell the seapower story.

NEWS OF SERVICEMEN

NEWS director Bill Robbins, WSAI Cincinnati, makes a practice of broadcasting information about local servicemen. He also provides a service to their parents by mailing them copies of releases in which their sons are mentioned. Station reports that Mr. Robbins' personal contact with families of boys in the service is bringing hundreds of letters from appreciative parents.

SUPERMARKET MUSIC

"THE greatest names in groceries and drugs use Storecast—and you should too" is the cover inscription of a promotion piece put out by the company which provides music in supermarkets. Miniature red, white and blue labels of leading clients such as Philip Morris and Jell-O line the pamphlet cover like canned goods on a supermarket shelf, with the booklet's message giving several reasons why Storecast has become "a vital force" in drug and grocery sales.

FUN AND CONTESTS

TWO promotions currently entertaining WLWC (TV) Columbus Ohio, viewers are its "favorite postman or postmistress" contest on its *Big Bear Dollar Derby* show and its fun-provoking "buying and selling" of postholes on its rural-type *Meetin' Time at Moore's* program, the first show conducted by Spook Beckman and the latter by Billy Scott and Sally Flower.

STUDENTS TAKE OVER

BROADCAST operations at KRNT Des Moines were turned over fortnight ago to 13 high school students interested in radio. The aspiring air staffers made frequent appearances with regular entertainers during "High School Day" and handled portions of programs and commercials. Budding engineers assisted in the control room.

STRAW HAT PROMOTION

AS part of summer audience promotion, KNX Hollywood joined Los Angeles Downtown Business Men's Assn. in annual "Straw Hat Day" festivities by including 200 tickets and five invitations to appear on KNX programs in the 1,000 miniature hats passed out in the business section. Recipients of one of the five invitations will receive a GE portable radio plus a picnic kit.

PRESIDENTIAL POLL

LEAGUE of Women Voters in Los Angeles, KFWB Hollywood and the B-B Pen Co., that city, have combined forces to present "a radio Presidential straw vote" beginning June 2. Ballot boxes will be placed in 1,350 drug stores throughout the area. Over 700 of these stores will feature window displays of the event. Station disc jockeys and newscasters will make guest appearances as well as broadcast results.

CHANCE TO STRIKE OIL

PROMOTION campaign with a new twist will be sponsored by Dr. Pepper Co., Dallas, Tex., through Ruthrauff & Ryan, N. Y., during June and July. Promotion will be a jingle contest offering as first prize royalties from 44 Texas oil wells. Heavy schedule of spots will be carried predominately on *Ted Husing Sports Roundup* on CBS Radio.

Antenna Location—The Big Decision

(Continued from page 82)

tically proved how coverage can be extended if stations jointly move to the highest and most desirable location in their area.

The four stations which moved to the Empire State Building from other locations [WNBT was already there.—Ed.] formerly had their television broadcasting antennas at elevations of 954 feet, 640 feet, 565 feet and 733 feet, respectively. The top of the new Empire State television tower is 1,472 feet. more than a quarter of a mile high.

The average distance reached by these four stations before they moved was approximately 38 miles. From the Empire State Building they now reach a distance of about 70 miles in every direction and can be received in an area in which an estimated 17 million people live. This is an expansion of the stations' audience area from a circle approximately 76 miles in diameter to a circle approximately 140 miles in diameter, a circle containing 15,400 square miles. The commercial importance of these facts is almost incalculable. Actually it has to be calculated as well as possible in order to determine how much the fortunate owner of the choice broadcasting location is justified in investing in a tower and how much he is entitled to be paid for permitting the use of his location for television broadcasting.

No building owner should forget that the location will bring in no greater television revenue than it is actually worth in dollars and cents to the television stations. This rule must be equally true in every city in the country. If many locations in a city are equally good, one is set off against the other and no one will receive, or is entitled to receive, a premium price. However, if one location gives much more in earning power to television stations, the owner of that location should receive some significant portion of the extra earnings for permitting broadcasting from his location.

First Advantage

The first great advantage of locating a television broadcasting antenna on the highest possible point, then, is the added area it will reach at a distance from the station.

Increasing the height of the TV broadcasting location also adds to the number of viewers who can be reached with a good picture within the area nearer the TV station—the area from 0 to 25 miles away from the broadcasting point.

In a large city the total number of people in all the "shadow" areas who are brought out of the darkness by a very high broadcasting point can be a very significant addition to the viewing audience.

Television is indeed a tricky animal. Another effect of a too low broadcasting location is the tendency to produce "ghosts" on the TV set screen. In New York the great flat-sided masonry and steel bulk of the RCA Building proved a perfect bouncing board for TV signals from some of the lower broadcasting points as did the sides of the Empire State Building and other tall buildings. This resulted in frequent picture-distorting "ghosts" on New York television receiver screens, both close to the station and at a distance.

Once the broadcasting antennas had been moved up to the 1,472 foot high tower of the Empire State Building the "ghosts" substantially disappeared because the TV signals were transmitted high enough to go over the tops of the other buildings without bouncing or richocheting off them.

Central Location

Central location as well as great height is extremely important for an ideal TV broadcasting point, particularly in a city with a large business section of tall buildings. New York and many other of the larger cities in the country have numbers of tall steel girder buildings in the central part of the city. Television engineers who have dealt with the problem are of the opinion that a significant loss of strength in the broadcasted TV signal occurs if it has to pass over the entire business area of a city to reach a residential area beyond. This effect has been loosely referred to by some as an "absorption" of power. Whatever the scientific reason, the result is observable. The best cure for this appears to be to locate the broadcasting antenna at the center of the tall building area so that the television signal will cross over this area in the first few miles of its trip. When the antenna is in the center of the city the signal gets out beyond the high building area within the first few miles while it is much stronger than it is farther out.

It should be made clear that, except for the purpose of pushing the horizon of the TV station out to a point 70 miles from the center of a city, it is not necessary in most other cities to locate the broadcasting point a quarter of a mile in the air as has been done in New York City. The important point is that the broadcasting location should rear its head considerably above the imaginary plateau formed by the tops of the dozen or more tallest buildings in the city. In other words, the broadcasting point must be very high *in relation to* the general top level of tall buildings.

The fortunate combination of great height and central location made the Empire State Building the ideal television broadcasting point in New York City. It is the tallest structure, by far, in New York City, and is located at approximately the center of the tall

Antenna Location—The Big Decision

(Continued from page 101)

building area of the city.

The Empire State Building actually had the strength built into it in 1930-1 to carry the weight of the new 222 foot steel television tower and its heavy load of antennas and transmission lines. This was definitely not done in anticipation of television. It was done to enable the top of the Empire State Building to serve as a mooring mast for dirigibles. In 1930 dirigibles were thought to be the coming mode of trans-Atlantic and other long distance travel.

A particular advantage of erecting a moderately high tower on a tall building rather than erecting a tower 700 feet to 1,000 feet tall based on the ground for a TV broadcasting center is that the transmitters can be installed in the top floors of the building where there is enclosed space, heat and elevator service. Transmitters should be as close to the broadcasting antennas as possible because of the unavoidable and expensive loss of electric power in every foot the current has to travel between transmitter and antenna.

The economic effect of all these peculiar characteristics of television is an almost irrestistible pressure on each station to obtain for itself the highest and most central location in the city. Since there can be only one "highest" and "most central" location in any city, all stations, except the one lucky enough to have it will necessarily be frustrated if each one has to have a separate location.

Why Separate Locations?

But why does each station have to have a separate antenna location? They started that way because radio had always done so and because they feared the electrical cross-interference from several antennas broadcasting close together. Fortunately there were pioneers who dared to risk the cross-interference and to attempt a multiple antenna tower. The vision and courage of the management of the Empire State Building and of Dr. Frank G. Kear, the technical genius behind the whole project, the five broadcasting companies and RCA which designed, developed and tested the antenna systems, brought forth the answer.

The engineers did their best. They planned and designed a system which *theoretically* should operate without interference. But what if their calculations were wrong, or what if subsequent events resulted in an interference not present at the beginning? Rules, procedures and fast acting remedies had to be set up before any broadcaster could take the plunge.

True, the general rules of the FCC governed the operations of these television stations, but these rules had not been particularized to the point of dealing with a joint facility such as the Empire State tower and did not contain all the detailed rules for "family living" which each broadcaster felt essential before leaving its solitary splendor elsewhere to join the higher glory of the multiple broadcasting tower.

First, a precise definition was hammered out of the degree of interference, to either signal or equipment, which should not be tolerated. This was designated "objectionable interference". Unless a claimed interference came within the scope of "objectionable interference" it was agreed by all the engineers concerned that it did not merit corrective action or penalties.

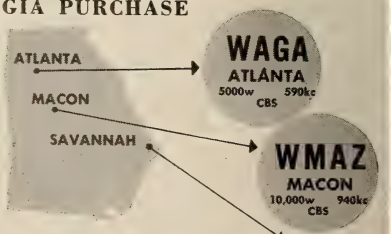
Remedies Differ

It was then found that objectionable interference could be of several types and that the remedies and penalties were necessarily different for each type. In the first place, the mere origination of a particular broadcasting activity by a particular station might result in objectionable interference to some activity already being carried on. Therefore, an elaborate screening and testing procedure was set up which any station must pass through before it could start a new activity or materially change its existing operation. The principle behind this was, of course, that each activity which had once been properly originated was entitled to protection from new or changed operations of others which would hurt it.

The second type of objectionable interference was that resulting from the deterioration in equipment or departure from proper practices of some station already on the tower. In this case the culprit was identifiable and was required to bear the burden of correcting the situation or forfeit its right to be on the tower.

The third type of objectionable interference was more general and included all those situations, some highly imaginary, in which after proper origination by all stations some circumstance developed which made it impossible for all existing operations to continue without cross-interference. Detailed obligations were here imposed for equipment changes and correcti measures and only in the final e tremity of absolute incompatibili of continued operations by all t stations was provision made f any withdrawing. Then activiti would be dropped in the rever order of origination. As a pra tical matter, it is difficult to co ceive of a situation in which t joint activities could be successf for a period of time and then su denly become impossible. Hov ever, provision must be made f even such highly fanciful poss bilities in a project of this scope.

The position of the buildin owner has to be carefully defined i such a situation. The buildin owner cannot assert or assum the power to change or overrul the rules, regulations or decisior of the FCC. On the other han the building owner is under n duty to permit any station t broadcast from its building or t continue to do so longer than pays its rent and acts in accor ance with rules imposed in a vance by the building owner for th protection of himself and othe tenants.



Harmonious Achievement

If the building owner merel licenses the use of space on it building by several television sta tions without imposing rules o conditions, chaos is almost certai to result. It must be remembere that the television broadcasters ar natural rivals in a highly competi tive business. It is a high tribut to the calibre of the five televisio stations in New York City wh share the Empire State tower tha they have worked so harmonious together in the planning, buildin and operation of this multipl broadcasting tower. But it is doubt ful if even these men, subject a they are to competing busines pressures, could have kept thei actions within this pattern if the did not live within the framewor of strict, carefully devised rule which provided prompt equitabl methods of dealing with every fore seeable deviation from such be havior.

The significant economic elemen in this picture is that the pressur for joint use of the best possibl location was so great that larg

THE GEORGIA PURCHASE

only a combination of stations can cover georgia's major markets

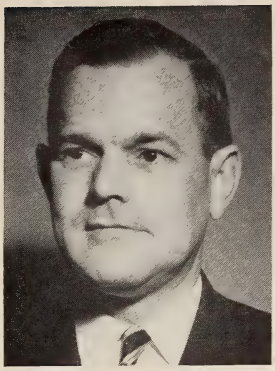
THE GEORGIA TRIO

represented individually and as a group by

THE KATZ AGENCY, INC.

ancial obstacles were quickly
ken in stride. As soon as the
ilding was made available for
ultiple broadcasting, four major
stations rushed to join the sole
station then broadcasting from
e Empire State Building. Each
these stations abandoned its
mer antenna location and will-
gly paid the cost of moving, pur-
asing new equipment, developing
w antennas and undertook to pay
antenna rental many times
her than any of them had ever
id before.

There is a very plain dollars-and-
nts-reason for this readiness to
end money which is applicable—
soon will be—throughout the
ited States.



Not only is the income of the TV
tions increased, but their costs
operation are reduced by the
nt use of the best broadcasting
ation.

If each station installs its own
wer, it will have to pay the full
st of buying or renting a loca-
n, constructing a tall tower on
and installing lights, de-icing
d other tower equipment. It will
o have the full maintenance
rden of painting and repairing
entire tower. When a multiple
wer is used there is only one
wer in one location and all of
se costs are shared.

The savings in structural steel
ne are tremendous if one tower
made to do for all. In these days
governmental control of steel
y locality may be lucky to get
ough steel allocated to it to build
good tower, especially now that
Empire State project has proved
t the technical characteristics of
evision do not require that broad-
ting antennas be kept separate.

The cost of bringing programs
the transmitting point is reduced
en all stations are in one loca-
n. Less cable or less micro-
ve equipment is used if all pro-
ams coming into the city are
ivered at one central point.

One final incidental boon brought
the multiple broadcasting tower
he simplification of the home re-
ving antenna which it makes
sible. Some portion of any re-
ving antenna must be aimed at
h TV station broadcasting in the
a. If there are several different

Mr. RUDDOCK

* * *

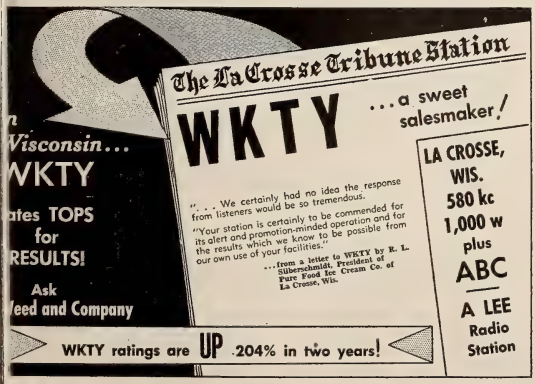
broadcasting locations, the receiving antennas must have enough elements to permit some to be aimed directly at each station. With a multiple tower for all TV stations there is only one point of aim and therefore a minimum of antenna parts and installation problems.

What is the value of a superlative tower location which will open the door to the largest audience which any TV station in the city can reach? If the building owner erects the tower at his own expense and operates it as part of his building, it is, of course, greater than if he merely rents the top of his building to the TV stations and permits them to erect a tower. In either case, however, the precious commodity of maximum television audience is what the owner of the best location has to sell.

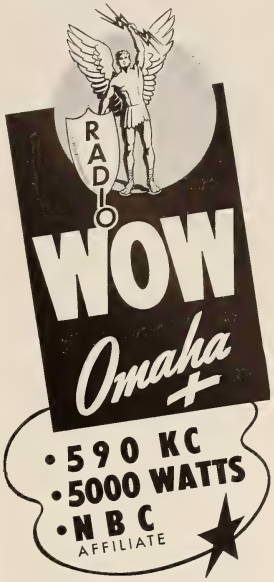
Attention was turned to various ambiguous theories. An early suggestion was that the television license rent should be based on the height of the Empire State Building and that so many dollars per linear foot of height should be charged. But when the discussions turned to "how many" dollars per linear foot, the figures had to be pulled out of thin air.

Then a so-called "audience-coverage" theory was developed. Under this the license rent would be computed at the rate of 25c or 50c per television set within the range of the station each year. This idea had a kernel of very good sense. The value of the building for television purposes was, of course, a direct reflection of the circulation it could make available to the television stations—the number of sets that could be reached. However, who was to say how many cents or dollars per set was fair?

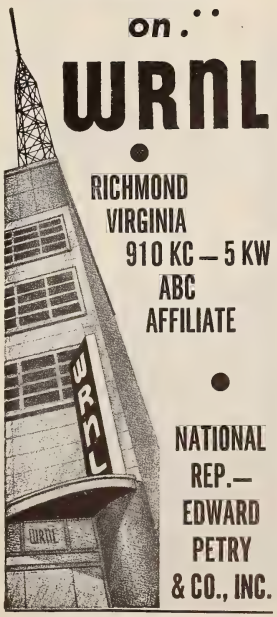
Parallels were investigated in subway advertising car rates, billboard rates, Times Square "spectacular" animated billboard rental rates, and advertising rates on radio programs received in buses in certain cities. All of these investigations proved over and over again that the rate was directly affected by "circulation" or audience coverage, by the number of persons who read a certain magazine, passed by a certain billboard location, rode in a certain bus line or subway, passed through Times Square on a certain day. It was found that the rate always went up with the circulation or audience coverage, but that no two advertising media placed the same "head-price," the same dollars and cents per person, on the coverage.



The advertising impact of the particular kind of media affected the rate per person.



The effect, the impact of television as an advertising medium, was believed to be as great and probably greater than any other media since both eye and ear were assailed simultaneously. This was a fine theory, but it did not give any logical basis for establishing the rate.



The measuring stick finally adopted would be applicable in any city where some one location is markedly superior to any other (or can be made so by tower construction) for television broadcasting. First a determination is made of the amount of rent which could be charged for any of the several locations in the city which could function with passable success if the one prime location did not exist. In doing this, strong reliance is placed on conventional real estate rental formulas.

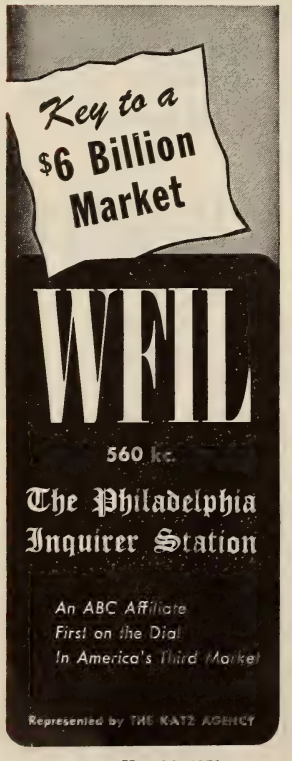
Having obtained this base rent, it is necessary to determine the premium rent to be added to it as the prices for the superiority in audience and picture which the one best location alone can give. To measure this the actual population within range of both the best and the ordinary locations is determined, and the degree of actual and potential saturation with television receivers worked out. By applying all the principles discussed earlier in this article which limit the audience of a TV station broadcasting from an ordinary or inferior location, both close-in and at a distance from the broadcasting antenna and comparing this to the potential performance from the best location, the extent of the superiority can be measured. Percentages of superiority can then be derived which can be valued. For

(Continued on page 104)

Antenna Location—The Big Decision

(Continued from page 103)

instance, in New York City it was found from tests made as to all previously existing stations that some reached with a satisfactory picture as little as 60% of the potential audience in the New York City area while the Empire State tower location approached the legendary 99 44/100% coverage.



When this percentage of superiority was applied to the base rent figure it gave a dollars-and-cents value to the superiority which, if anything, was an understatement of the true value. The reasonableness of this figure can best be tested by dividing the dollars involved by the actual number of home receivers which can be reached at any given time *only* by the best location.

By any normal advertising rate standards the cost of reaching each additional home is tiny. It does not begin to tap the additional revenues which the best location enables the station to charge the advertisers. However, it does bring in very sizable sums to the building owner since each of the stations on the building receive the same advantage and properly pay the same rate. Best yet, it achieves the aim of the FCC to have stations compete with each other on the basis of the merits of their programs and not their respective ability to bring a clear picture to the particular home receiver.

This was not a problem peculiar to New York City nor was its solution of significance only in New York City. All of the basic premises exist in your city also—the limitations of television, the dollars-and-cents advertising demand for the largest possible TV audience, and the economy of a joint financing and joint use of the best possible broadcasting location. The great contribution of the Empire State television tower was in pointing the way, in proving that it could be done.

'Hizzoner' of WJXN

WJXN Jackson, Miss., has unofficial production and program man in Mayor Allen C. Thompson. Mayor Thompson, through taped recordings, makes monthly reports over WJXN from the zoo, water works and other places of community interest. Last fortnight, the mayor was to "cover" the annual conference of United States mayors in New York's Waldorf-Astoria. Program was to be a composite report from the Waldorf-Astoria with the mayor doing the announcing, engineering and production.

'FREE'

New FTC Order Increases Word Use Conflict

MOUNTING confusion over use of the word "free" in broadcast and published advertising claims appeared inevitable in agency, advertiser and station circles as a result of another controversial ruling issued by the Federal Trade Commission.

While broadcast continuities apparently are not directly involved in an order issued against Book-of-the-Month Club Inc., the decision pointed up anew the possible impracticability of an earlier FTC administrative interpretation.

The commission ruled May 16 that the word "free" as used in Book-of-the-Month advertisements is "false, misleading and deceptive." It also was revealed that three other similar complaints are pending before FTC.

Comr. Lowell B. Mason, dissenting in the 3-1 decision, sharply challenged the cease-and-desist order and charged that the Commission had set itself up "as a lexicographer with power to punish those who ignore our definitions." He claimed FTC had supplanted "usage with bureaucratic fiat."

This was the second instance in which FTC implemented its administrative interpretation with a firm order, though it indicated plainly that use of "free" depends upon individual cases as to whether it violates the deceptive practices statute. An appellate court affirmed the interpretation last November and the U. S. Supreme Court upheld the ruling by refusing last March to review the case [B•T, April 14].

Thus, in effect, use of the word must be sufficiently hedged with certain conditions and reservations as to make it inadvisable to incorporate in ad claims, some authorities felt. But again, it depends on the case.

In the Book-of-the-Month decision, FTC said that use of that or similar words "should be approached by applying to the representation made the same yardstick that should be applied to all advertising—'Is it true or false,'"

FTC challenged as "false and misleading" the club's claims that it offered books "free to new members" without charge or obligation. If the member decides not to purchase at least four books within a year, "payment for [two] books theretofore designated as 'free' is thereafter demanded by the respondent," FTC said. It also cited use of the term "book dividends."

Here is the tack FTC took on use of the word "free" in this instance:

In the present case the word "free" as used by the respondent in the sale and distribution of its books has the definite and absolute meaning of a gift or a gratuity given without charge, cost or condition. So used the word is unambiguous and does not have a secondary meaning. Its meaning cannot be altered or qualified by other words. It can only be contradicted and the total representation made through use of the word "free" is false.

Respondent contends that although the books may not be free the advertisements contain statements clearly disclosing those things which the customer must do in order to receive the so-called "free" books and that these statements neutralize any probability or possibility of deception. We are unable to agree.

The contention might have some merit if the other statements in the advertisements only qualified the word "free."

In [other] cases . . . qualifying words could be chosen which would eliminate the deceptive representation and leave standing the truthful one alone. In the present case, however, the other statements in the advertisements do much more violence to the word "free" than merely qualifying it. The word "free" as used by the respondent makes a single representation and, being untrue, cannot be qualified; it can only be contradicted. A statement in advertisement which is totally fa cannot be qualified or modified.

FTC pointed out that befc members are entitled to recei "free" books, they must enroll the Book-of-the-Month Club a buy four books within a year, wi profit to the respondent. Hen they are "not gifts or gratuities without cost to the recipient."

Comr. Mason, harking back 1948 and the commission's stat ment of policy, held that "a simp order based on deception will n stand up on appeal" and that FT attorneys earlier agreed that t ads "were accurate in their e tirety."

He likened the order to one co demning selling of merchandise Saturday and reflected:

"A rule limiting what may done on Saturday is no more val than a rule limiting what may done with the word 'free' unle there is factual support in a reco before the commission to give jurisdiction over the days of t week or over the definitions of su qualitative words as in the insta case."

As a result of FTC's Janua 1948 statement, "which took 2 words to explain what one wo meant," nobody "has any mor certainty as to how free is 'free,' Comr. Mason said. Noah Webste dictionary records 24 separate us of the word, he added, noting:

"From now on, Webster's is o and the Federal Trade Commi sion's unabridged is in."

WJOC ELECTIONS

Kane Succeeds Layma

HAROLD P. KANE was name president of Air Waves Inc., ow er-operator of WJOC Jamestow N. Y., and general manager of t station, at a board of directo meeting May 19. Mr. Kane forme ly was corporation vice presider and WJOC sales manager.

John C. Walters was electe board chairman. Others electe were Grant J. Gruel and James Monagle, vice presidents; Fre erick E. Davis, treasurer, and D Clyde L. Wilson, secretary. Harr E. Layman, former president-ge eral manager, resigned because ill health, WJOC reported.

POLITICOS VIE
Candidates on KFRO Panel

A NOVEL forum program featuring all candidates for the third U. S. Congressional district was broadcast by KFRO Longview, Tex., May 17. Titled *How Do You Stand, Future Congressman?*, the program was offered to other radio stations in that district and aired as a public service feature. The eight participants were candidates for the post vacated by Rep. Lindley Beckworth (D-Tex.), now campaigning for the U. S. Senate.

Listeners, newspapers and others were invited to send in written questions asking the candidates where they stand on important issues. County Democratic Chairman H. O. Gossett Sr. served as moderator on the unrehearsed program.

MISSOURI LAW
Guards Radio-TV on Libel

LIBEL protection for Missouri radio and TV stations during uncensored political talks was provided last week when Gov. Forrest Smith signed legislation he originally had planned to veto.

Gov. Smith said he changed his mind about the veto after conferring with Missouri station spokesmen and studying FCC regulations barring station censorship of political speeches. The legislation was sponsored by Sen. Richard J. Hamier, Democratic majority leader, and was sought by radio and TV operators in the state.

An emergency clause made the act effective when signed. Gov. Smith said he had planned to veto the bill on the ground it would encourage "character assassinations". Passage was sought in part as the result of protests against radio and TV speeches in the 1950 campaign by candidates of the Christian National Party, described by the St. Louis *Post Dispatch* as a so-called "hate" group operating in Missouri.

COMMENDATION was received by WTIC Hartford from Rau-Locke American Legion Post, Hartford, for "excellent public service" in presenting the Frederic W. Ziv Co. series, *I Was a Communist for the F.B.I.*

CALL JOHN E. PEARSON CO.

NEW JERSEY Broadcasters Assn. officials greet FCC Comr. Rosel H. Hyde at group's spring meeting in Atlantic City [B•T, May 12]. L to r: Fred Weber, owner of WFPG Atlantic City, member of NJBA advisory committee; Thomas B. Tighe, general manager of WJLK Asbury Park, NJBA secretary-treasurer; Comr. Hyde; Paul Alger, general manager of WSNJ Bridgeton, association president; Phil Gravatt, Atlantic City commissioner; Harry Goodwin, general manager of WNJR Newark, member of NJBA advisory committee.

On All Accounts

(Continued from page 12)

vertising man, he was converted to the concept of advertising over a period of years in discussions with family business associates and friends. After graduation from Brown U. in 1932 and two years at Northwestern U.'s schools of law and commerce, he quit to get his start in advertising and in radio.

Two years later, when he was sales manager, he sold his stock in WROK and invested the money in the Presba & Fellers agency. His father, a black-and-white man, was therefore outnumbered by his son and Mr. Fellers, both dogmatic devotees of broadcasting.

Subsequently, Mr. Presba has balanced media within the agency so that about 50% of the billings go to radio and TV and 50% to other media. Broadcast accounts include Book House for Children, Olson Rug Co., Keeley Brewing, Flex-O-Glass Mfg. and Orleans and Hi-Life dog food. Although he works on all accounts, Mr. Presba is most interested in merchandising and marketing.

A native Chicagoan, he lives in North Shore Winnetka with his wife, the former Jean Countryman of Rockford, and their children, Paula, 11, and David, 6. He is a trustee of Brown U. and a director of the Brown Club of Chicago, a member of Psi Upsilon fraternity and a trustee of the N.U. chapter.

Fond of fishing, he prefers the fresh water variety, but on an office wall has a sailfish which came within two ounces of setting the small sailfish record at Ft. Lauderdale. Mr. Presba and his family spend much of the summertime at Pelican Lake in northern Minnesota, but—to maintain a firm cleavage between pleasure and business—he takes clients fishing in northern Michigan to the North Woods Club.

John P. Keating

JOHN P. KEATING, 75, vice president and production manager of The Journal Co., Milwaukee, licensee of WTMJ-AM-TV, died Tuesday as a result of a cerebral hemorrhage. He had served as a vice president and director since 1939. Survivors include his wife and two sons.

NEBRASKA MEET
AP Group Names Slate

NEBRASKA Associated Press Radio Assn., meeting jointly with Nebraska Assn. of Radio News Directors, named Walt Kavanagh, news director of KOWH Omaha, as chairman; Jack Rogers, KBRL McCook, vice chairman, and E. E. Makiesky, correspondent supervising AP radio operation in Nebraska, as secretary.

Mr. Makiesky said each AP member station has contributed news to AP files and that contributions exceeded those of the previous year. He said KBRL ranked among the nation's top ten AP news contributors.

KEAR Seeks 10 kw

APPLICATION for a power increase from 1 to 10 kw is to be filed with the FCC by KEAR San Mateo, Calif., the station reported last week. The San Francisco Bay area outlet, on 1550 kc, said the power boost would increase its daytime audience by nearly a million persons. The station specializes in "good music" programming.

KILL-KOTE THE ODORLESS, LEADFREE, WONDER PAINT, in white, clear and six pastel colors, is registered with the Departments of Agriculture in the United States and Canada, it is harmless to humans, animals, and fowl, it is washable and can be applied with roller, spray, or brush.

* * * NEW SALESMEN HAVE AVERAGED $50.00 PER DAY FIRST WEEK OUT * * *

Territory has been granted in Eastern Canada, Western New York, Florida, Georgia, Wisconsin, Illinois, Missouri, Ohio, and Iowa, and is going fast. We will assist in every way possible in setting up your organization, advertising, and the President and General Manager of a Nationally known Brewery just left a $25,000.00 a year job to become our Merchandising Manager. *BECAUSE HE HAD USED KILL-KOTE IN HIS GRAIN STORAGE ROOMS FOR TWO YEARS AND SEEN IT ELIMINATE INSECTS AND COBWEBS WHICH HAD BEEN A VERY SERIOUS PROBLEM.* Another man who had used it in a large hotel of which he had been manager, and who had been on the Governors Board of the American Hotel Association, is now our National Hotel and Institution Manager *BECAUSE HE SAW IT WORK.*

The financial worries of our Distributors may well be ended for life, because we have a non-competitive product with practical and widespread demand. Let us show you how, after the most rigid investigation you care to make, it is entirely possible with a moderate investment for a KILL-KOTE EXCLUSIVE FRANCHISE to become as valuable as those for other Nationally Advertised Brands.

KILL-KOTE definitely offers a ground floor opportunity, for a man with sales and organization ability, good character, and references who can invest moderately in a business with unlimited potential for expansion and profit. ACT NOW * and write, wire, or telephone 3-5311 for complete details and a personal interview in confidence if desired.

Managerial

TV STATION MANAGER WANTED

A group of prominent local citizens, not associated with any existing TV or radio station, are applying for a VHF TV station in one of the large southern metropolitan markets. We need a part-time man with all-around TV experience who can coordinate matters for us, help us in our programming proposals and give us general advice—over and above that which we are now receiving from our Washington lawyers and consulting engineers.

The right man would receive not only compensation but a stock interest as well. Upon the grant of the application he would become the Station Manager. In replying, give all pertinent information and particularly your TV experience. Replies held in confidence.

CREDIT EASING

Set Sales Stimulat Termed Varied

CREDIT requirements for installment purchases of radio-TV sets, ho hold appliances and new automobiles began to crystallize last wee the wake of demands for abolition of all price controls.

On the basis of reports from manufacturers and dealers, receiver appliance sales had perked up slightly in many markets, while the new car business noted a generally sizeable upswing—with advertising playing a major role at the dealer level.

Opinion remained divided, however, on the degree to which the nation's manufacturers and dealers had taken advantage of the government's suspension of Regulation W in easing credit curbs on long-term purchases [B•T, May 12].

Dealers varied in their price policy from no down payment to 10% down, usually with a maximum of 24 months to pay, on receivers, washing machines, refrigerators and other consumer goods. Previous terms by the Federal Reserve Board called for 15% down and 18 months maturity.

Controversy over the board's action and demands by business groups for suspension of all price controls characterized last week's developments. Former Sen. Francis J. Myers (D-Pa.) charged that FRB "leaked" word of its move 24 hours in advance, permitting some business firms to "jump" their competitors in advertising easier terms. He urged Congress to strip the board of standby authority to re-impose curbs.

While dealers and distributors found themselves caught in the controversy between "easy credit" and a retention of the "status quo" on terms for appliances, the Senate Banking and Currency Committee preserved the Federal Reserve Board's authority to reinstate restrictions, with cutoff date of March 1.

At the same time, the Office of Price Stabilization noted FRB's action and proceeded with preparation of tailored regulations for price ceilings in the radio-TV set industry.

At least one set manufacturer went on record for abolition of controls by OPS. In an earlier statement, Ross D. Siragusa, president and board chairman of Admiral Corp., commented:

"The lifting of Regulation W . . . should act as a powerful medicine to improve the general health of the appliance business. The elimination of credit controls at this time should prevent a log jam of television receivers, refrigerators and other electrical products from piling up in retail outlets throughout the country.

"While this is a move in the right direction, I believe the next logical step should be the removal of OPS price controls in fields which obviously no longer need them. For example, in the highly competitive, mass production television industry, retail prices have been anywhere from $50 to $100 below OPS ceiling prices for about a year."

★

Inventories of receivers been substantially reduced, ever, since last fall, with pro tion backlog now down to a no level of 60 days.

There appeared to be little p pect, however, that the age would decontrol radio and tel sion sets at this time. OPS h to promulgate ceilings somet by July 1. Rules would go retailers and wholesalers—ac the board.

Still and all, with dealers competitively between two sch of thought on credit terms, the p pect seemed bright for a poten multi-million plus in natio regional and local advertisin with actual sales jumps varying particular markets on the basi competitive conditions and products involved.

Among reports given by ma facturers and dealers last w were these:

Westinghouse Electric Corp.—TV ceiver output is "gradually" increa and production of electric roasters 40%. Inventories are about normal the current volume of business— considerably from a year ago and 100% greater than two years ago.

General Electric Co.—Reports h inventories of refrigerators and freezers, and cutbacks in employm with appliance plant at White Pla N. Y., on a three-day week du May.

Alan Radio & Appliance Co., Chic —Now advertising "no money do on some goods and 10% down others.

Neuman's Radio & Electric Co., P land, Ore.—Attributes about half recent sales to suspension of cu which "gave some life to a very ging business."

Largest sales boost was repor by auto dealers, offering te varying from 25% down to 3 down over a two-year period, stead of the 18 months prescri by the reserve board. Early budget increases were chiefly the dealer level and are not pected to be reflected nationa until early 1953.

Conservative thinking recko prospects were in line with se ments expressed by James Shouse, board chairman of Cros Broadcasting Corp. and vice pr dent of Avco Mfg. Co. That re tion was this: John Q. Public been conditioned to restrictions consumer durables and is in mood to buy—regardless of e credit.

In this category fall home fu ture firms and automobile deal There were published reports t a variety of such home furnish stores would adhere to restrict terms despite competition fr "easy credit" stores.

HELP WANTED

Experienced girl or man copywriter for continuity department. Air mail full details of experience and references along with photo to Radio Station WONE, Dayton, Ohio.

Can You Use *$150,000.00-$200,000.00* to Solve Your TV Problem?

The Blackburn-Hamilton Company has an investor who will put between $150,000.00-$200,000.00 into a corporation to apply for TV in a medium to major sized market and will take a minority position of 40% to 45% when the grant is made. This investor has asked that we do the contact work for him and develop a definite proposal. He will not take an active part in management but wants to make a good investment. May we have your problem on financing and see if we can come up with a solution. All inquiries and discussions are, of course, in strict confidence.

Goldstein to CBS-TV

JACK GOLDSTEIN has been named manager of special projects in the CBS-TV Public Relations Department where he will handle star buildups, special program projects, premieres and other special functions, David J. Jacobson, department director, announced Wednesday.

CHICAGO SHOWS

Ad Club Selects Best

DERBY Foods' *Sky King* and the City National Bank and Trust Co.'s *Impact* on WENR-TV Chicago were chosen by the Chicago Federated Advertising Club as the best new television shows created there during the year.

Awards were presented at the annual banquet Thursday night to local and network winners in each of four radio and three television categories. The best radio shows developed during the year were *Arbogast* on WMAQ (NBC) and *Down You Go*, a Mutual network feature from WGN. Agency for Derby Foods is Needham, Louis & Brorby, Chicago. Writers on *Arbogast* are Robert Arbogast and Pete Robinson, with Homer Heck as producer. Louis Cowan packages *Down You Go*.

In the juvenile class, *Super Circus* on ABC-TV, sponsored by Canada Dry gingerale and Mars candy, was cited as the best network TV feature, while *Kukla, Fran & Ollie* on NBC-TV, sponsored by RCA Victor, won the citation in the general class. *Breakfast Club*, sponsored by Swift & Co. through McCann-Erickson, both Chicago, was the leading radio network feature.

Other award winners and their classes:

Radio, local programs—*The Patrick O'Riley Show*, **Old Gold cigarettes, WBBM, produced by Jerry Lee and written by Arthur Thorsen. Honorable mentions in this group went to** *Unshackled*, **sponsored on WGN by Pacific Garden Mission and written, produced and directed by Eugenia Price, and the WLS** *National Barn Dance*, **sponsored by Phillips Petroleum Co.**

The Untouchables, **aired on WBBM, earned the winning citation in local special features, and was written by Perry S. Wolff and directed by Thomas A. Bland. Honorable mention went to** *Hello Sucker*, **aired on WMAQ as a public service feature, written by Madeleine Peters, produced by Judith Waller and directed by John Keown.**

Top commercial radio announcement went to General Mills for its *Kixie-Nixie*, **produced by Tatham-Laird agency and written by Howard W. Rapport. Honorable mentions included Realemon-Puritan Co., for Realprune, through Schwimmer & Scott agency and written by John Cole. Standard Oil of Ind., through McCann-Erickson agency, written by Jim Shelby, Bill Hagerman and Dick Slade, and to the Toni Co. for White Rain, through Tatham-Laird, written by Dan Ryan.**

Leading local TV shows were *King Calico*, **in the juvenile class, on WENR-TV;** *Impact*, **for news, sponsored by the City National Bank & Trust Co. on WENR-TV through George H. Hartman & Co., and** *WGN-TV Sports*.

Honorable mention in network programs went to *Zoo Parade*, **sponsored on WNBQ (NBC) by the Quaker Oats Co. and written by Don Meier.**

Winning commercial TV spot was the Mystik Adhesive Products account, for Mystik tape, through George H. Hartman agency and produced by Sarra Inc. in the 20-second class. One-minute film spot citation went to the Toni Co. for White Rain, placed through Tatham-Laird and written by Alice Westbrook. Honorable mentions included Swift & Co., for Brookfield dairy products through McCann-Erickson, written by Jim Shelby, Patricia Burns and Jerry Birn; Santa Fe Railway, Leo Burnett agency; Standard Oil of Ind., for Permalube motor oil, through McCann-Erickson with writers Jim Shelby and William Hagerman, and to WNBQ for a live station break.

WOR SCHEDULES

Third Business Show

WOR New York last week scheduled its third sponsored show with a business format, *Today's Business*, 7:15-7:20 p.m. Mon-Fri. starting today (Monday), to be sponsored three days a week by Bache & Co., investment brokers. A general roundup of business and financial news and important market quotations will be given by WOR commentator Henry Gladstone, who also conducts *Your Investment Dollar;* noon to 12:15 p.m. Sunday, sponsored by United Business Service.

The third program, *Your Money at Work*, 10:15-10:30 p.m. Sunday, is sponsored by Kidder, Peabody & Co. for its mutual funds.

Tracing Interference

STORY in layman's language of how FCC traces illegal broadcast stations and other sources of spectrum interference is told by George S. Turner, chief of the Commission's Field Engineering and Monitoring Bureau, on current *Crusade Against Crime* program, taped series aired over 12 stations in the east and midwest [B•T, May 12]. Major sources of radio-TV set interference are electrical devices and appliances in the home, Mr. Turner reported. Diathermy and industrial radio devices run a close second, he said. Complaints should be sent to FCC only after all local means to check and eliminate interference have been exhausted, the Commission official suggested.

at deadline

WEBSTER SEES SLOW ACTION ON TV

TV APPLICATION processing and final action will be slow, FCC Comr. E. M. Webster was to tell Indiana Broadcasters Assn. Saturday morning, according to talk released Friday. Reasons: (1) Expected 1,000 applications by July 1, (2) limited staff, (3) no money to hire more help and (4) demands of many other vital services precludes use of non-broadcast staff. IBA sessions were held May 23-24 at WIRE Indianapolis studios.

Reminding that FCC non-TV workload also has been mushrooming during rush to complete Sixth Report lifting freeze, Comr. Webster noted there are only 61 professional staff people at FCC to handle all broadcast processing, of which TV has only 13 (six engineers, two each lawyers and accountants, three secretaries). It will take four times total employes in TV whole year to process 1,000 applications estimated by July 1. Even all seven hearing examiners can't work on TV, he said, even though 500 bids are seen falling into 200 hearings. He sees no more than 60 to 70 TV hearings during next fiscal year.

James O. Luce, of J. Walter Thompson Co., New York, said broadcasters should develop a standard method of measuring station audience. He urged stations interested in getting national spot business to tell their market story, provide concise and complete data and show characteristics of their markets.

Joseph M. Kittner, assistant chief of FCC Broadcast Bureau, and Wray Fleming, Indianapolis attorney and IBA counsel, debated political broadcasting questions. Panel on local sales was moderated by Robert D. Enoch, WXLW Indianapolis. Taking part were Gene Vaughan, WFBM Indianapolis; Ray Baker, WSAL Logansport; Glenn VanHorn, WTTS Bloomington, and Josiah Autenrieth, WKAM Warsaw.

IBA President O. E. Richardson, WASK Lafayette, opened meeting Friday. Two-day session was to wind up Saturday afternoon with visit to Indianapolis Speedway.

CENSORSHIP DANGER SEEN IN HOUSE RADIO-TV PROBE

CENSORSHIP overtones will make House probe of radio-TV programs difficult, according to Chairman Orren Harris (D-Ark.), of new Crosser subcommittee to probe sound and sight media (see story, page 29). Rep. Joseph F. O'Hara (R-Minn.), also subcommittee member, said "quite a few" Congressmen feel some national advertisers are sponsoring programs which weaken moral fibre of nation.

Chairman Harris said thorough hearings will be held on both good and bad side of programming, noting complaints about early-hour scheduling of crime shows. Investigation is important because nearly every home has radio and TV homes are increasing, he said, adding subcommittee would have to carry out House order to study programs for "immoral or offensive" material.

Speaking on Thursday night ABC *News of Tomorrow*, he asserted that if Congress had not decided to investigate, FCC would have been forced to do it. He continued, "Many advertisers find it profitable to sponsor shows the whole family can watch or listen to."

CBS-TV PRICES STEADY

NO PRICE increases for any CBS-TV production facilities or services, despite increased costs "on just about everything involved," was word of Fred M. Thrower, vice president in charge of network sales, to clients and agencies Friday. "The reason CBS Television is able to continue holding the price line on its production facilities and services," Mr. Thrower said, "is that the network has kept hammering away at finding short cuts and streamlining operations with just one thing in view—to give advertisers the topmost quality at the lowest production cost."

Business Briefly

(Continued from page 5)

tisers to switch from defunct Liberty Broadcasting System to another network is Pequot Mills which is placing its *Paula Stone Show* on Mutual effective around July 1. Agency, Jackson & Co., N. Y.

GENERAL MILLS HILLBILLY ● General Mills through Dancer-Fitzgerald-Sample, N. Y., understood to be interested in buying 45 minutes of new hillbilly program on ABC radio. Network would include non-TV markets only.

PLANTERS RENEWS ● Planters Nut & Chocolate Co., Wilkes-Barre, Pa., renews participation in *Lucky U Ranch* radio program for 13 weeks over ABC Pacific Coast Radio network. Agency, Raymond R. Morgan Co., Hollywood.

WTCN SALE FILED

FORMAL BID filed at FCC Friday for approval of $325,000-sale of WTCN Minneapolis-St. Paul by Mid-Continent Radio-Television Inc. to former U. S. Ambassador to Cuba and Australia Robert Butler and associates [B•T, April 21]. Sale contingent on approval of merger of CBS' WCCO there with Mid-Continent's WTCN-TV [B•T, March 10].

LOW COST TV FORMULA

LOW COST local programming at WDTV (TV) Pittsburgh was outlined Friday afternoon at BMI TV clinic Chicago, by Harold C. Lund, general manager, and A. Donovan Faust, assistant general manager. Their recommendations for keeping expenses down: Use strip programming; backdrops are cheaper than flats, and latter when used can be painted with washable paint for re-use; schedule all live programming in eight hour period so second camera crew unnecessary; pay good salary to well-trained film director, who can save thousands of dollars; use permanent sets for standard shows; hire talent which is versatile and can do several things; hire TV performers who can sell as well as be likable and believable; pay one higher salary to do work of more than two lower-priced people.

PEOPLE..

BARRETT C. DILLOW, Alexander Smith In to McCann-Erickson, N. Y., as account exec tive for Congoleum-Nairn Inc.

EDWARD K. (TED) PRICE, formerly WP (TV) New York engineer, named associa director in programming department.

"TONIGHT'S NEWSREEL" on WOR-tv, channel 9

delivers an average of 442,900 commercial impressions per week... for only 85¢ for 1,000 viewers per minute of commercial.*

*Based on May, 1952 Telepulse Ratings

Channel 9 — New York's lowest cost tv station — offers advertisers a unique buy, "Tonight's Newsreel."

The only continuous newsreel on New York television, this show delivers...

New York's late-evening news audience
Newsreel goes on at approximately 11:00 P.M. following Main Event on Sports.

Audience turnover
It runs over and over, exactly like a newsreel theatre . . . delivering a new audience with each run.

Commercial impact
"Tonight's Newsreel" delivers 442,900 commercial impressions per week.

Low cost
Single sponsorship costs only 85¢ per 1,000 viewers per minute of commercial . . . or 12 viewers per penny!

WOR-tv channel 9 1440 Broadway, N.Y.

Bulova DOES A COMPLETE JOB . . .

SO DO HAVENS AND MARTIN, Inc. STATIONS . . . **WMBG WCOD WTVR**

For more than 20 years, the Bulova Time Signal (on radio and now TV too) has helped regulate America's daily activity. Behind this vital service is the genius of a man who coupled American skill and technology to build, in a handful of years, the world's foremost watch firm. Bulova knows his business well.

Havens & Martin, Inc. Stations (serving the rich Virginia markets centering around Richmond) know broadcast advertising. Together they comprise Richmond's one and only complete broadcast institution. Advertisers know the value of telling their story via the First Stations of Virginia

KNOT HOLE GANG

On the evening of May 7, more than 1250 youngsters—some of whom are pictured above—were in the stands at Lancaster's Stumpf Field for the first "Knot Hole Gang" night. As guests of WGAL and WGAL-TV, they were watching the Lancaster Red Roses, of the Inter-State League, play ball. These youthful baseball fans are entitled to attend fifteen admission-free games during the 1952 season.

The "Knot Hole Club" had its inception on WGAL and WGAL-TV a few weeks ago. Youngsters under fourteen were invited to join the club. After only two programs, over 1,000 had enrolled —and the membership list is now in excess of 10,000.

The "Knot Hole Club" meets at WGAL and WGAL-TV every Saturday morning. Members of the club participate in all programs. The stations' Sports Editors preside, and guests from the Inter-State League and elsewhere are on hand to answer the boys' baseball questions.

CLOSED CIRCUIT

ETITIONS for reconsideration of FCC's exosive rule on rebroadcasts which would force ations denying rebroadcast rights to so otify FCC within 10 days, with their licenses a line, will be filed forthwith, it's learned. mong those to petition understood to be ARTB and two or possibly more networks. xpected result: rescinding or sharp modificaon of mischievous order [B•T, May 19].

WORKS is deal which may see NBC's 27-ear-old KOA Denver go to Bob Hope and enver Mayor Quigg Newton for approxiately $2.25 million, with Hope-Newton also opeful of early entry into TV. (TV-less enver heads FCC's priority list for new staons.) NBC officials say only that they've had any offers to buy KOA, including Hope-New-n's in past, have never considered it for sale, ill haven't made up minds to dispose of it. f mind-change now ensues, network's longanding desire for KMPC Los Angeles may e factor.

OW THAT Supreme Court has ruled transit adio is constitutional, way is clear for FCC ction on issues stemming from specialized es of FM, such as Functional Music, Muzak, orecasting and other "beep" services. Comission sentiment apparently favors specialed uses but indications are formal hearing ill be held to establish record, particularly ecause of divergent viewpoint. Another fac-r, not originally in FM proceedings, is that f subscription television (Phonevision, Skiaron, Telemeter). Arguing for hearing on M services is question of whether station and ponsor identification rules are complied with nd whether special rules would have to be ritten to accommodate such services.

S MEANS of stabilizing radio network inustry, top executives of at least one network elieve new rate structures should not only ring base rates down substantially but also nclude discount patterns so attractive as lmost to compel sponsors to stay on air 52 eeks a year. Summer hiatus tradition which ow creates operational problems for networks nd adds to overhead would thus be avoided.

VILL HIGH television costs prevent developent of television networking on pattern simir to radio networking? At least one imporant TV network thinks so and is making erious plans for network operation wholly ifferent from that which has obtained in adio. What may evolve is structure not unke that of magazines, with network providng full programming service and selling sponorship on participating basis throughout. lost sponsors would not buy fall full prorams but only commercial announcements o be fitted into program schedule, as magazine dvertisers buy run-of-the-book pages or maller space.

UTH JONES, print supervisor at Benton Bowles, N. Y. and Jean Lawlor, timebuyer, ave resigned. Fred Apt will take over Miss ones' duties while Don Quinn is resigning

ADVERTISING COUNCIL APPOINTMENTS MADE

NILES TRAMMELL, NBC board chairman, named chairman of Radio and Television Committee of Advertising Council for 1952-53, Howard J. Morgens, Procter & Gamble advertising vice president and council chairman, is announcing today (Monday). Wesley I. Nunn, advertising manager of Standard Oil Co. (Indiana), appointed vice chairman of committee.

Other appointments: Philip L. Graham, publisher, *Washington Post* (WTOP-AM-TV Washington), and Lee H. Bristol, president Bristol-Myers Co., to be chairman and vice chairman, respectively, of council's executive committee; Fairfax M. Cone, president, Foote, Cone & Belding, and Samuel C. Gale, vice president and director of advertising and public services of General Mills, to be chairman and vice chairman of planning committee; Edgar Kobak, owner of WTWA Thomson, Ga., and Harold B. Thomas, to be chairman and vice chairman of promotion committee.

William R. Baker Jr., president, Benton & Bowles, and Howard M. Chapin, marketing manager Birds Eye Div. of General Foods, chairman and vice chairman of campaigns review committee; Charles G. Mortimer Jr., General Foods Executive vice president, and Henry G. Little, Campbell-Ewald Co. executive vice president, chairman and vice chairman of nominating committee; Leo Burnett, president Leo Burnett Co., and Theodore L. Bates, partner in Ted Bates & Co., chairman and vice chairman of sponsorship committee; James W. Young, senior consultant, J. Walter Thompson Co. and radio-TV consultant to Ford Foundation, and Chester J. LaRoche, president C. J. LaRoche & Co., chairman and vice chairman of round-table committee; Stuart Peabody, assistant vice president, Borden Co., and Albert E. Winger, board chairman, Crowell-Collier Pub. Co., chairman and vice chairman of government relations committee.

ZINK, SOLOMAN PROMOTED

ALBERT G. ZINK and Henry M. Soloman have been appointed to new managerial positions in General Electric broadcasting stations Dept., R. W. Welpott, manager of stations operations, announced Thursday.

Mr. Zink, supervisor of programs for WRGB (TV) Schenectady since 1947, has been named manager of programs for all stations: WGY and WGFM (FM) Schenectady, as well as WRGB. Mr. Soloman, administrative assistant to WGY-WRGB stations manager since 1947, has been promoted to manager of finance.

RADIO PULLS BEST

WROL KNOXVILLE, Tenn., claimed Thursday to have proved radio's pulling power all over again. Newspaper ads, circulars inserted in grocery bags, movie trailers and WROL announcements were used by refrigerator manufacturer and a grocery chain to publicize their three-day cooking school. Results were that 6,000 women attended overflow classes, with 69.2% reporting they had heard about school by radio—WROL.

BUSINESS BRIEFLY

PET MILK CO. BUYS EDWARDS ● Pet Milk Co., St. Louis, to sponsor *Truth or Consequences*, featuring Ralph Edwards, as summer replacement for *Fibber McGee and Molly* on NBC Radio, starting June 17 (Tues., 9:30-10 p.m. EDT). Agency, Gardner Adv. Co., St. Louis.

BIDS FOR KUKLA ● Four or five advertisers are understood to be bidding for sponsorship of *Kukla, Fran & Ollie* in its new time slot next fall, half-hour weekly (Sunday, 6:30-7 p.m.) on NBC-TV. Network also about to sign new sponsor for its *Dragnet* (Thursday, 9-9:30 p.m.).

SUMMER REPLACEMENT ● Block Drug Co. (Amm-i-dent) will sponsor *Blind Date* as summer replacement for first half-hour of *Your Show of Shows*, effective June 7 (NBC-TV, Sat., 9-9:30 p.m.). Agency, Cecil & Presbrey.

McLENDON GIVES NAME TO NEW NETWORK

GORDON McLENDON, president of suspended LBS, late Thursday announced formation of McLendon Broadcasting System. New network, composed of 26 stations, will begin operation June 7, Mr. McLendon said. Although none of stations have signed contract, Mr. McLendon said he had verbal agreements with all. Los Angeles feeder station expected to be announced early this week. Network incorporated in Los Angeles.

At first, programming will be limited to three hours of re-created baseball and half-hour of news and commentary, reported Mr. McLendon, adding that he planned to expand programming to 12 hours by Oct. 1.

Mr. McLendon is president of new network; Ben Paschall, former LBS West Coast vice president, is vice president of new firm.

Plans are afoot, Mr. McLendon revealed, to join with another new network now forming in Southwest. LBS suspended operations May 15 [B•T, May 19]. Formation of several regional networks was being considered [B•T, May 26].

EVANSVILLE COULD HAVE MORE TV, SAYS JONES

EVANSVILLE (Ind.) could have three VHF TV channels instead of one as allocated by FCC if channels were spaced 155 miles apart rather than 250, FCC Comr. Robert F. Jones said last week. Comr. Jones spoke at Evansville Sales Executive Club dinner meeting.

Reiterating his lone dissent on allocations plan [B•T, May 26], Comr. Jones argued again for closer spacing. He charged FCC "has approached television with its experience in radio and is, therefore, driving with a rear-view mirror."

TRIBUNE STAFFERS HELP ABC COVER CONVENTIONS

NEWS EXPERTS from *New York Herald Tribune* to participate in ABC Radio-TV reportorial and analytical coverage of both national political conventions, Thomas Velotta, ABC vice president, announced Thursday. Leading editorial personnel of New York publication assigned to ABC radio and television work—to be sponsored by Admiral Corp.—include Frank Kelley, national editor; Bert Andrews, head of Washington bureau and his assistant Jack Steele; David McConnell and Don Irwin, both of the paper's Washington office; John O'Reilly, humorist and feature writer; Robert J. Donovan, White House correspondent; Judith Crist, feature writer; Murray Snyder, legislative correspondent, and Richard L. Tobin, radio and television director. ABC also to assign its own top newsmen and commentators, to be headed by John Daly.

EFFECT OF COURT RULING IN AGENCY CASE EXPLAINED

NEIL P. CULLOM, counsel for defendants in case of Duane Jones Co. against nine of its former officers and Frank J. Burke and Manhattan Soap Co. (early story, page 24), said Thursday:

"The appellate division yesterday sustained the sufficiency of the complaint in the above case. The court wrote no opinion. The effect of this decision is simply as a matter of form the complaint's sufficiency has been upheld. The court expressed no opinions as to any principle of law or issues of fact, as asserted by the attorney for Mr. Jones, and there is a vast difference between what a plaintiff may allege in a pleading and proof in a trial."

RCA VICTOR ON WIND

RCA Victor Distributing Corp., Chicago, one of 50 distributors to use factory co-op funds for local radio this summer, has purchased half-hour Sunday night show on WIND Chicago for 13 weeks from June 8. Spots will be used also in campaign to plug leading popular records. Al Paul Lefton Co. Inc., New York is agency.

TV TUBE SALES DROP

SALES of TV picture tubes to set makers in April totaled 270,781 tubes valued at $6,074,540 compared to 370,206 units valued at $8,582,538 in March and 278,955 units valued at $6,869,181 in April year ago, according to Radio-Television Mfrs. Assn. Sales of receiving tubes in April totaled 26,247,258 units compared to 35,883,627 tubes in same 1951 month.

In this Issue—

CBS Radio affiliates will meet with top CBS executives July 1-2 in New York to figure out what is to be done about network radio. The meeting is called by nine prominent affiliates, but CBS management agrees to attend. The nine sponsors of the conference urge all affiliates to be there, for the situation in radio network business "offers cause for great concern." *Page 23.*

Broadcast Advertising Bureau's executive committee approves $600,000 budget for the bureau for the next 10 months. Included is a $15,000 appropriation to help pay for the Advertising Research Foundation's important study into radio measurement services. *Page 27.*

Transit Radio Inc., whose operations are declared constitutional by the U. S. Supreme Court, plans ambitious expansion. Officers and directors will meet tomorrow to figure out how to expand nationally. *Page 25.*

House investigators will begin to look into radio-television morals tomorrow. Chairman Harris of the investigating committee wants to keep the probe "within bounds," though he doesn't make clear what those bounds are. Lead-off witness will be Rep. Gathings who introduced the resolution calling for the investigation. *Page 28.*

Soap companies are in a lather buying broadcasting time. Here's a roundup of new radio and television purchases by such big spenders as Procter & Gamble, Lever Bros. and Colgate-Palmolive-Peet. *Page 25.*

Senate Appropriations Committee okays bigger budget for FCC to finance processing of TV applications and hasten development of television. If the appropriation goes through, the Commission can gain 15 examiner teams. *Page 61.*

New tax bill introduced in the House promises radio broadcasters who also operate other businesses a chance for some relief in excess profits taxes. *Page 23.*

FCC's Sixth Report (the TV thaw) is challenged by KVOL-AM-FM Lafayette, La., which petitions FCC for rehearing or reconsideration of final assignments to Lafayette. *Page 62.*

Radio and television paid $23 million to American Federation of Musicians members in 1950, according to a new AFM report. *Page 30.*

Upcoming

June 3-5: Public hearing, House Commerce subcommittee investigation of "immoral" radio and TV programs, 10 a.m., Room 1334, New House Office Bldg., Washington.

"America's Most Listened - To Independent Station"

"Go North, young man, go North!"

Wise men are heading North today—to the land of the aurora borealis, to prosperity, to Canada. For Canada is the United States' best customer abroad.

Yes, Canada buys 20% of everything made in the United States that's sold abroad—and pays CASH, too! As a new market for you, Canada is unsurpassed.

Geographically, Canada is your next door neighbour.

Industrially, she leads the world in numerous things. For instance, Canada is the world's largest producer of—

Nickel
Radium
Platinum
Asbestos
and
Newsprint . . .

56% of the world's newsprint was produced by Canada in 1949.

It's these natural resources that have helped to make the Canadian dollar worth 1% more than the U. S. dollar—a hard fact in support of the statement that Canada is a profitable market for *you*.

But—how to reach it?

Radio is the answer. It's easy enough to reach the densely populated centers. But that leaves 41.5% of Canada's total retail sales market untouched: an area that accounted for $3,622,465,000 in retail sales in 1949. In this rural market Radio can give you a better sales performance than any other medium—*plus* high performance in the "High Density" areas.

For 94% of ALL Canadian homes have a radio!

And

"In Canada you sell 'em when you tell 'em!"

A message from the 103 member stations of the Canadian Association of Broadcasters whose voices are invited into over 3 million homes every day.

ASSOCIATION OF AMERICAN RAILROADS
TRANSPORTATION BUILDING
WASHINGTON 6, D. C.

WILLIAM T. FARICY
PRESIDENT

May 31, 1952

To the PRESS and RADIO:

Subject: ONE WAY TO HAVE BETTER ROADS

Everybody wants good roads -- and having them means protecting the roads we have, as well as improving them.

That's why everybody has an interest in the results of a series of road tests conducted for eleven state highway departments on a paved highway in Maryland which is typical of many thousands of miles in the United States.

These tests demonstrated scientifically that there is a basic and inescapable relationship between the strength of a roadway and the weight of the vehicles which it can carry without costly damage and deterioration.

In fact, as the weight of the heavier vehicles increases, the amount of damage done increases in far greater than direct proportion. In the Maryland tests, an increase in single axle weights from 18,000 pounds to 22,400 pounds caused more than six times as much cracking in pavement laid, in both cases, on subsoil of the same character. And raising tandem axle weights from 32,000 pounds to 44,800 pounds on the two axles caused more than twelve times as much cracking in pavement laid on soil of the same kind in both cases.

This is one reason why highway engineers are so concerned that highways and bridges be protected from abuse and overloading, which means heavy damage and added costs. These costs must be borne by general taxpayers and by all motorists who use the highways.

Fortunately, the steel highways of the railroads are built to take the heavy loads of the nation's commerce, and their maintenance and repair do not cost the taxpayer a single penny.

Sincerely yours,

William T. Faricy

SELL THE HEART OF THE NORTH

OVER **KFYR** BISMARCK, TH

"Unique" is merely a statement of fact in any description of KFYR Bismarck. It has a greater coverage area than any other station in the country, regardless of power—encompassing 1,000,000 people in North and South Dakota and sections of Montana, Wyoming and Nebraska, and 850,000 in Canada. It serves many cities exclusively and completely dominates a large group of others. In fact, there is no other outlet of such power and advantageous wave length within its entire coverage area.

KFYR is the favorite station among the majority of listeners in this huge segment of the Northwest—a top rank borne out by every independent survey. KFYR features splendid network, spot and local programming, but it is actually far more than just a medium of entertainment. Since there are relatively few daily newspapers in the area, KFYR is in a unique service position as the immediate source of news, weather reports, farm news and other vital information.

As a radio buy, KFYR becomes still more important in light of the purchasing power of its audience. Since the war, North Dakota has reached an all-time high in agricultural production, with industry and mining keeping pace. Just one example of this market's prosperity is the $53,000,000 spent each year on groceries alone.

John Blair & Company, exclusive representatives of KFYR for 13 years, has filed one example after another of how KFYR has translated the loyalty and spending power of its listeners into success stories for advertisers. For actual case histories on products in your field—all produced *at low cost* over KFYR—call your John Blair man today!

KFYR's Master Control Room which, like all of this s tion's facilities, represents the newest in scientific planni

Commercial Manager **BOB MacLEOD** consults wit Program Director **CAL CULVER.** The intricate progra board in background, which shows details of four week programs, slides electrically between their offices.
